

2011-2013 General Catalog

Revised June 2012

McLennan County Junior College District

Volume 30

1400 College Drive

Waco, Texas 76708

For more information, call 254-299-8MCC (8622) or visit www.mclennan.edu.

McLennan Community College is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the Associate of Arts, Associate of Science, Associate of Applied Sciences, and Associate of Arts in Teaching degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4501 for questions about the accreditation of McLennan Community College.

Equal Opportunity Statement

McLennan Community College provides equal educational opportunity for all qualified students and does not discriminate on the basis of gender, disability, race, creed or religion, color, age, national origin or any other unlawful factors in its educational programs, activities or employment as required by Title VI and Title VII of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Educational Amendments Act of 1972 and the Age Discrimination Act of 1978.

Title IX Statement

“No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.”

Legal Citation: Title IX of the Education Amendments of 1972, and its implementing regulation at 34 C. F. R. Part 106 (Title IX)

In accordance with the requirements of the Title IX Education Amendments of 1972 MCC's designated Title IX Coordinator — Al Pollard, Vice President, Program Development/EEO Officer — and Deputy Coordinator — Phyllis Blackwood, Director of Human Resources — shall be responsible for coordinating the College's effort to comply with and carry out its responsibilities under Title IX.

Welcome to McLennan Community College

McLennan Community College is an exciting place to be a student. With a strong commitment to excellence in education, MCC offers dozens of educational programs, an atmosphere of cultural and philosophic diversity, a supportive learning environment, and a variety of extra-curricular programs and opportunities.

Whether you're just starting college or returning to school, working toward a degree or taking classes for personal or professional enrichment, MCC offers you many opportunities for success.

You have options

In today's highly competitive society, an advanced education greatly improves your earning power and expands your career opportunities. At MCC, you have a broad range of education options from which to choose.

You can get specialized training for the skills you need to get you the job you want by enrolling in a Workforce Education program. Or you can build a solid foundation for your bachelor's degree by taking courses from MCC's core curriculum that transfer easily into any Texas public college or university. No matter what your goal is, MCC is committed to student success, to help you graduate and get a job or continue your education.

Students wanting to earn a higher degree can also stay in Central Texas and attend one of the many colleges participating in the University Center, which brings bachelor's, master's and doctoral degree programs to MCC's campus.

Whichever option you choose, MCC will help you succeed in reaching your goals.

Highland traditions of excellence

Since MCC's founding in 1965, its students have benefited from the school's strongest traditions: excellent teaching, individual attention, student support, equal opportunity and exceptional value. MCC boasts a dedicated faculty and staff and a governing board that keeps the best interests of the community and the students its top priority. Among the more than 400 full- and part-time MCC faculty members are industry professionals, community leaders and national award winners.

The campus environment

MCC sits on a beautiful, 215-acre main campus of rolling hills and native trees. The college also includes Highlander Ranch, a 200-acre ranch about five miles from campus, and the Emergency Services Education Center (ESEC), a facility just a few miles off campus that was

built in conjunction with the city of Waco, McLennan County and local municipalities to provide a central location for training emergency professionals. The ESEC was constructed to meet LEED standards, which is the rating system for green buildings used by the U.S. Green Building Council.

The main campus features more than 20 buildings, including the Dennis F. Michaelis Academic Center and the Science Building, which were built in 2009 to meet LEED standards. The new and many renovated buildings on campus allow MCC to offer state-of-the-art facilities to meet the growing needs of its students.

The MCC community

MCC has seen tremendous growth in its enrollment over the past several years, and almost 11,000 credit students enrolled in the Spring 2011 semester. About half of MCC's students are enrolled in Workforce programs and half in Arts and Sciences. MCC's faculty, staff and administrators recognize that each student is unique, with individual strengths, goals and reasons for attending college. The average student age is 26, and most are already a part of the workforce.

MCC recognizes the need to equip this large and diverse population with new and progressive learning methods and technologies. Students can take classes on the Internet, watch lectures online through live video streaming, virtually travel to campus via two-way interactive video, or rent a laptop from the library and study outside on the scenic campus.

The college officially recognizes almost 30 student organizations, from honor societies and student government to cultural and special-interest clubs. With so many educational and extra-curricular opportunities, it's no wonder so many Central Texans make MCC their college choice. No matter what your goals may be, MCC can put them well within your reach.

Board of Trustees

Mission Statement

Mission:

McLennan Community College provides access to excellent workforce and transfer programs, student services, and continuing education that promotes student success including proficiency in identified student learning outcomes, successful course completion, graduation, employment, and transfer to a senior institution. The college engages and strengthens its community through successful educational attainment, strong leadership, sustainability efforts, best practices, community service, and integrity.

Core Values:

All choices, decisions and actions of McLennan Community College, and the individuals associated with it arise from and are consistent with the following core values.

1. Excellence requires a commitment to allocating the time, effort, and resources to ensure superior achievement.
2. Integrity is exhibited through principled leadership that continues to earn the public's trust and to achieve the highest levels of honesty and ethical behavior.
3. Innovation is to promote and affirm the spirit of invention and creativity.
4. Inclusion assures opportunity for accessible education to diverse learners by addressing financial, environmental, social, and academic barriers.
5. Stewardship, Sustainability, and Accountability requires an efficient and effective use of human, physical, and financial assets. Allocation of these resources is based on the commitment to the efficient and effective use of the environment.
6. Collaboration is essential in partnering to develop educational, technical, industrial, and cultural support to improve the quality of life in the community.

Admissions & Registration

McLennan Community College maintains an open door admissions policy and accepts applications throughout the year. Entrance examinations are not required, but tests for placement in appropriate courses are required. No particular test scores are necessary for admission to the college; however, acceptable scores are required to enroll in some college-level courses.

Admission to the college does not automatically admit students to a specific program. Students should consult with an academic advisor or a program director regarding admission requirements for specific programs.

Admission or re-admission to the college or programs may be denied to a person who does not meet the admission requirements of the college or program.

Requirements for Admission to the College

New students and students who were not enrolled at MCC during the last calendar year must reapply for admission at the Office of Student Admissions. New students must also submit an official high school transcript or General Educational Development (GED) test scores, and transfer students must submit official transcripts from all colleges attended. Immigration records may be required of some students.

Continuing and returning students must verify information on the Automated Degree Plan through WebAdvisor on the MCC website (www.mclennan.edu) before each registration. Students who have not been enrolled during the last calendar year must submit an application for admission and official transcripts from all colleges attended since their last enrollment at MCC.

Students must meet all admission requirements to the college before registration. Students who do not submit the appropriate transcript(s) (high school or college) or GED scores to the Office of Student Admissions before the 12th class day for a fall/spring semester or fourth class day for a summer term shall not be permitted to re-enroll, and MCC official transcripts will be withheld until the transcript(s) or GED scores have been received. There is a statement on the MCC Application for Admissions form that indicates that students who do not provide official transcripts or GED test scores within 12 days following the beginning of the semester can give MCC permission to request and obtain required transcripts. A fee is charged for this service. Although the college provides this service, it is the student's responsibility to ensure that MCC receives official transcripts and GED scores within the time frame listed above.

Students Seeking a Degree or Certain Certificates

Students who plan to work toward a certificate or a degree may qualify for admission to the college and for enrollment in college credit courses by meeting admission requirements in one of the following:

1. Graduation from an accredited high school or home school

Submit to the Office of Student Admissions an official high school transcript or other written proof of graduation from an accredited high school or home school. Graduates from a non-accredited high school should submit an official high school transcript or other written proof of graduation. Graduates from a non-accredited high school may be admitted under the terms of individual approval (see below).

2. Successful completion of the General Educational Development (GED) Test, if not a high school graduate

Submit an official copy of the GED Certificate or an Official Report of Test Results to the Office of Student Admissions.

3. Eligibility as a transfer student

Submit to the Office of Student Admissions an official transcript from all colleges or universities attended. Transfer students must submit an official transcript and a report of their Texas Success Initiative status, if required, prior to enrollment. In the event the student cannot submit a complete transcript because of time constraints, an incomplete transcript and/or a current grade report may be used for advising purposes, but students are required to submit official transcripts by the 12th class day of the semester.

Individuals who are not eligible to return to the last accredited college or university attended may be considered for admission by the Coordinator of Student Admissions or Director of Admissions and Recruitment.

4. Individual approval

An individual 18 years of age or older who does not qualify for admission under one of the other admission categories may be admitted by individual approval of the Coordinator of Student Admissions or the Director of Admissions and Recruitment.

Applicants under 18 years of age who apply for admission as graduates from non-accredited high schools or who were schooled in nontraditional settings may be admitted, provided they:

- a. Complete an application for admission.
- b. Submit a written request seeking admission to the college. The written request should be submitted to the Coordinator of Student Admissions.
- c. Submit a notarized record of high school completion.
- d. Pass the General Educational Development (GED) testing program.

Applicants in this category who do not complete the GED testing program should contact the Coordinator of Student Admissions, who may forward an application to the Admissions Committee for further review.

In addition to the information and forms listed in items a, b and c above, applicants in this category will be required to submit any documentation that supports admission to the college to the Coordinator of Student Admissions. Examples of documentation include: partial transcripts from accredited high schools, transcripts from non-accredited high schools, SAT or ACT scores, and written recommendations of the principal or superintendent of the last non-accredited or accredited high school attended. All documents and scores will be reviewed by the Admissions Committee. The Committee will grant or deny admission, with or without specific conditions or restrictions.

5. Eligibility for Early Admissions Program

A high school student who has completed his/her junior year in high school may be eligible for admission to McLennan Community College to receive college credit for courses. To be eligible, students shall submit to the Office of Student Admissions the Early Admissions application and comply with the following conditions:

- a. The student must lack no more than four credits for high school graduation and must be enrolled in the high school and the college concurrently during the academic year. (Exception: Early Admissions students may enroll during the summer after the completion of the 11th grade.) Under special circumstances, a student who has not completed the junior year may be granted approval by the Dean of Education and Learning Services to enroll in college-level course work. Approval is based on such factors as grade point average (GPA), ACT or SAT scores and other assessment indicators.
- b. The student must have a minimum high school grade point average of B (80).
- c. The student must have the approval of the high school principal or counselor, parent or guardian, and a Student Development Counseling Specialist or Dual Credit Liaison at MCC.
- d. Unless otherwise exempt, the student must have passing scores on the reading section, as well as sections of the Accuplacer Test, THEA Test or an approved alternative test related to the course in which the student intends to register. Early admissions students may not take college-level courses related to sections of the test that have not been passed.
- e. The student may enroll in no more than two college credit courses in a semester. Exceptions to the course load limitation may be made by the Dean of Education and Learning Services.
- f. The student must agree to abide by academic, general conduct and departmental policies of McLennan Community College as outlined in the [Highlander Guide](#) and the MCC General Catalog.

Eligibility for Academic Dual Credit Classes (receiving high school and college credit)

High school juniors and seniors who receive approval from their parents, principal or counselor, and Dual Credit Liaison at MCC may enroll for Dual Credit. That is, they may be granted credit by the college and the high school for course work successfully completed at the college. To be eligible, students shall submit to the Office of Student Admissions the Academic Dual Credit application and comply with the following conditions:

- a. The student must have completed his/her sophomore year in high school. Under special circumstances, a student who has not completed his or her sophomore year may be granted approval by the Dean of Education and Learning Services to enroll in college-level courses. Approval is based on such factors as grade point average (GPA), ACT or SAT scores and other assessment indicators.
- b. Unless otherwise exempt, the student must have passing scores on the reading section, as well as sections of the Accuplacer Test, THEA Test or an approved alternative test related to the course in which the student intends to register. Academic Dual Credit students may not take college-level courses related to sections of the test that have not been passed.
- c. The student must have approval of the high school principal or counselor, parent or guardian, and Dual Credit Liaison at MCC.
- d. The student may enroll in no more than two college credit courses in a semester. Exceptions to the course load limitation may be made by the Dean of Education and Learning Services.
- e. The student must be enrolled in the required number of courses each day in the high school and be in attendance during the accounting period.
- f. The student must agree to abide by academic, general conduct and departmental policies of McLennan Community College as outlined in the [Highlander Guide](#) and the MCC General Catalog.

College credits earned by Early Admissions or Dual Credit shall become official when the student graduates from high school and submits to the college an official transcript of his/her high school record certifying graduation. Such credits are transferable and have the same value as credits earned after high school graduation.

Eligibility for Workforce Dual Credit Courses

High school juniors and seniors who receive approval from their parents, principal or counselor, and Student Development Counseling Specialist or Dual Credit Liaison at MCC may enroll for Dual Credit. That is, they may be granted credit by the college and the high school for course work successfully completed at the college. To be eligible, students shall submit to the Office of Student Admissions the Workforce Dual Credit application and comply with the following conditions:

- a. The student must have completed his/her sophomore year in high school. Under special circumstances, a student who has not completed his or her sophomore year may be granted approval by the Dean of Education and Learning Services to enroll in workforce courses. Approval is based on such factors as grade point average (GPA), ACT or SAT scores and other assessment indicators.
- b. The student must have 10th or 11th grade English/language arts TAKS score of 2100+ with a minimum writing score of 2. A 10th or 11th grade math TAKS score of 2100+ will be required if relevant to the course.
- c. The student must have a 75+ high school average.
- d. The student must have approval of the high school principal or counselor, parent or guardian, and Dual Credit Liaison at MCC.
- e. The student may enroll in no more than two college credit courses in a semester. Exceptions to the course load limitation may be made by the Dean of Education and Learning Services.
- f. The student must be enrolled in the required number of courses each day in the high school and be in attendance during the accounting period.
- g. The student must agree to abide by academic, general conduct and departmental policies of McLennan Community College as outlined in the [Highlander Guide](#) and the MCC General Catalog.

6. Eligibility as an international student.

An individual who has successfully completed at least the equivalent of 12 years of elementary and secondary education shall be eligible for admission to MCC if the following conditions are met:

- a. The student must submit an admission application to McLennan Community College.
- b. The student must submit the [International Student Information Sheet](#).
- c. The student must submit official transcripts of all previous academic work. Documents in a language other than English must be accompanied by English translations certified by a university official. Students must have at least a C average to be eligible for transfer from another college or university in the United States.
- d. If not from an English-speaking country, the student must submit scores from the Test of English as a Foreign Language (TOEFL) with a minimum score of 500 on the paper-based test, 61 on the Internet-based test (iBT) or 173 on the computer-based test. If the student has graduated from a high school in the U.S. or received the GED, the TOEFL may be waived, and a transcript or GED score report is

required. The McLennan Community College TOEFL code is 6429. For more information, go to www.toefl.org.

- e. The student must provide a financial statement of support reflecting sufficient funds to cover all expenses while in the United States.
- f. The student must meet all admission requirements by July 1 for admission to the fall semester, by November 1 for admission to the spring semester or April 1 for the summer semesters.
- g. The student must submit a \$50 nonrefundable application fee.
- h. The student must submit official verification of required immunizations during the first semester of enrollment.
- i. The student must take the THEA, Accuplacer or an approved alternative test prior to enrollment.

If transferring from a U.S. school, the student must include a copy of his or her visa, passport, I-94 card, I-20 and a transfer clearance form completed by the international advisor at his or her current institution.

The Office of Student Admissions shall notify students of tentative acceptance and shall provide necessary forms and information related to entering the United States on a student visa.

International students attending MCC on student visas are required to maintain full-time student status by being enrolled in a minimum of 12 semester hours of course work with a minimum of 9 of those hours in face-to-face on-campus classes. Any exceptions must be approved in writing by the international student advisor, the Coordinator of Student Admissions or the Director of Admissions and Recruitment before a student may drop below full-time status.

Admission For Students Not Seeking a Degree or Certificate

Students not seeking a degree or a certificate must submit an official high school transcript or General Education Development (GED) scores or official transcripts from all colleges attended to the Office of Student Admissions upon initial enrollment.

Non-degree- or non-certificate-seeking students shall take the THEA test or an approved alternative before enrolling in any college-level course work unless otherwise exempt.

Admissions Committee

The Vice President of Instruction, the Vice President of Student Services, the Director of Admissions and Recruitment, and the Coordinator of Student Admissions constitute the permanent Admissions Committee. The committee shall consider individual student requests for admission or re-admission when the student does not meet the college's standard admission

requirements. Requests for hearings are made in writing to the Coordinator of Student Admissions.

Texas Success Initiative

The Texas Success Initiative is an instructional program designed to ensure that all students attending public institutions of higher education in Texas have the reading, mathematics and writing skills necessary to perform effectively in college-level course work.

Students must take the THEA or an approved alternative test such as the Accuplacer, Compass or Asset prior to enrolling for any college-level course work unless otherwise exempt or enrolled in a waived Level-One Certificate program of 42 hours or less. The college reserves the right to make an exception to this policy for those individuals seeking additional training in a specialized workforce program after completion of a Level-One Certificate.

The following students are exempt from the Texas Success Initiative:

- A student who has exemplary SAT, ACT or TAKS scores
- A student who transfers to an institution from a public, private or independent institution of higher education or an accredited out-of-state institution of higher education and who has completed college-level course work in the areas of reading, math and writing with a grade of D or higher
- A student who has graduated with an associate or baccalaureate degree from a public institution of higher education
- A student who has attended any public institution and has been determined to have met readiness standards by that institution
- A student who is serving on active duty as a member of the armed forces of the United States, the Texas National Guard or a reserve component of the armed forces of the United States and has been serving for at least three years preceding enrollment
- A student who on or after August 1, 1990, was honorably discharged, retired or released from active duty as a member of the armed forces of the United States or the Texas National Guard or service as a member of a reserve component of the armed forces of the United States

Sections of the THEA or an approved alternative test that are passed will satisfy the requirements of the Texas Success Initiative, and those sections failed or not attempted will result in the student being required to meet the provisions of the institution's developmental education plan. Students who have not passed all sections of the THEA or an approved alternative test and who have not completed a developmental education program may enroll in a winter or summer minimester course as long as the course is not in the area of deficiency. There are no additional exceptional circumstances under which a student who does not pass all areas of an assessment may enroll in college-level course work before completing a developmental education program or passing all areas of the THEA or an approved alternative test.

A student must begin any required developmental education during the first semester of college enrollment. In general, students are encouraged to address all areas of weakness in the beginning but **must** remediate in at least one area until all remedial sequences have been completed or the student passes the section of the THEA or an approved alternative test for which remediation was initially required. Students are required to remain enrolled in developmental education courses through the census date and are encouraged to remain enrolled through the completion of the semester. Reading is given priority over math and writing since the skill of reading applies to all areas of the curriculum. In addition, students who do not pass two or more sections of the THEA or an approved alternative test are required to enroll in Psychology 1300, a course designed to expose the student to learning theory and assist the student in the development of study skills, time management, note-taking and critical-thinking skills.

Students who do not meet the minimum passing score on each section of the THEA or an approved alternative test may satisfy the requirements of the Texas Success Initiative in one of two ways: 1) achieving a passing score on sections of THEA or an approved alternative test for which developmental education was initially required; or 2) completing the required remediation. If the student is required to retest based on the scores set by the Texas Success Initiative, the student is not required to pass the retest in sections previously failed.

All students, unless otherwise exempt or enrolled in a waived Level-One Certificate program, must have THEA or approved alternative test scores. The college testing center offers the THEA, Quick THEA and Accuplacer on a regular basis. Following the receipt of test scores, students are advised as to appropriate course selection.

All students are strongly encouraged to see an academic advisor each semester. Advisors in the various departments are available to meet with students throughout the semester.

Students required to enroll in developmental course work are required to meet with an academic advisor. The academic advisor and the student review the student's test scores, and the advisor provides guidance to the student in course selection and educational planning.

Each student entering college for the first time is required to meet with an academic advisor to discuss the student's major and to select first semester courses. Students are also required to complete the online orientation for new students to receive information about the college, the matriculation process, financial aid and other valuable information about life as a student at MCC.

A student transferring to the college from a Texas public, private or an out-of-state institution of higher education must have a made a grade of D or higher in college-level course work in the areas of math, reading and writing in order to meet college-level readiness standards. If not, the student will then be required to test in the respective area, and developmental education requirements apply for those sections not passed. A student transferring from a Texas public institution who has met the requirements of the Texas Success Initiative at their college is considered ready for college-level work and will not be required to test or meet developmental education requirements at MCC.

Students who are regularly enrolled at private or out-of-state institutions of higher education who attend Texas public institutions temporarily are waived from the requirements of the Texas Success Initiative. Evidence of such enrollment must be from the immediately preceding semester. The only exception to this rule is for students who attend private or out-of-state institutions during the spring semester, do not go to school during the summer, and then decide to attend a Texas public institution in the fall semester. Otherwise, students who did not attend a private or out-of-state institution during the term immediately preceding the term for which they seek enrollment at a Texas public institution may not be waived from testing requirements.

MCC Student Success Initiative

Freshman Orientation

All new students and transfer students who have accumulated fewer than nine semester hours (regardless of test scores or GPA) and are enrolling in nine or more semester hours must complete the online orientation. Topics covered include core curriculum, fields of study, transfer options, degrees and certificates offered, the Texas Success Initiative, financial aid, student organizations, and more. Once the course is completed, students will meet with an advisor and then will be able to register for courses.

Learning Frameworks Courses

All incoming students will be required to enroll in PSYC 1100 or EDUC 1100 during their first semester in which the student is eligible to take the course. As a minimum, students also must be co-enrolled in either READ 0300 or READ 0301 or have passed the reading portion of the THEA or an approved alternative test.

The PSYC 1100/EDUC 1100 Learning Frameworks course focuses on critical issues for students new to college. Emphasis is placed on addressing perceptions, expectations, behaviors and outcomes required for college success. Upon completion, students will have knowledge of communication and social skills, time management, available college resources, and solutions to challenges in the college environment.

Students who do not pass two or more sections of the THEA or an approved alternative test will be required to also enroll in PSYC 1200 or EDUC 1200 the following semester. These students also must either have credit for or be concurrently enrolled in READ 0302 or have passed the reading portion of the THEA or an approved alternative test. Students placed into a reading level below READ 0302 will have to wait until a subsequent semester to enroll in PSYC 1300.

PSYC 1200 and EDUC 1200 is a follow-up course to PSYC 1100/EDUC 1100 and expands on the students' knowledge of learning theories and practical student success strategies (note-taking, reading, test preparation, etc.).

Both PSYC 1100/EDUC 1100 and PSYC 1200/EDUC 1200 are credit-hour courses and will count toward degrees at MCC. They are all transferable to four-year colleges and universities as well. All students wanting to strengthen their study skills are welcome to enroll in the course.

Registration

College Credit Courses

Registration for college credit courses scheduled for the fall and spring semesters and for summer and minimester terms must be completed during the scheduled registration periods at the beginning of each semester or term. The class schedule is available in PDF form or searchable by subject in WebAdvisor on the college's [website](#) before each semester or term. Admitted students will be given clearance to register.

Students are encouraged to meet with an advisor to discuss degree/certificate programs and class needs before registration. Before meeting with an advisor, students should print a copy of their Automated Degree Plan(s), available through WebAdvisor. All courses required for a degree or certificate, courses that have been completed, and courses remaining to be taken are listed on the automated degree plan.

Registration includes completion of required forms, preparation of a class schedule, and payment of all tuition and fees.

Registration for courses beginning at irregular times during the semester or term is completed at the time specified for the particular course.

Tuition & Fees

McLennan Community College strives to provide an affordable college education for any person who desires it. The college keeps tuition and fees as low as possible through funding from the state of Texas and from local taxes. In addition, qualifying students can receive financial assistance in the forms of grants, scholarships, loans and student employment.

All tuition and fees shown in this catalog are those in effect when the catalog is published and are subject to change without advance notice. Tuition and fees are payable at the time of registration; registration is not complete until all tuition and fees have been paid by cash, check, American Express, Discover, MasterCard, Visa or approved financial assistance.

Tuition For Credit Courses

	Residents of Texas		Out-of-State
	In-County	Out-of-County	Residents & International
	per semester hour		per semester hour
LONG SESSION AND SUMMER	\$106	\$124	\$181
	per student		per student
MINIMUM	\$212	\$248	\$385

Courses Beginning at Irregular Times

Returned Checks (Student Financial Responsibilities)

A student who pays for tuition or any other registration fees/charges (including bookstore charges) with a check returned unpaid to McLennan Community College may be dropped from enrollment. When financial insufficiency has been confirmed because of “insufficient funds,” “account closed” or any other reason, and regardless of the student’s class attendance, enrollment may be nullified.

Residence Classification

The legal residence for tuition purposes of each applicant for admission to McLennan Community College is determined in the Office of Student Admissions. It is the responsibility of the student to enroll under the proper residence classification. Questions concerning the classification of Texas residency should be directed to the Office of Student Admissions prior to registration.

Residence for tuition purposes is mandated by state law and is subject to changes by the Texas Legislature.

Generally, a resident of Texas for tuition purposes is an individual who is 18 years of age or older, who has been gainfully employed within Texas for 12 months prior to registration, or who is a dependent whose parent or guardian has been gainfully employed within Texas for 12 months prior to registration. Normally, a person 18 years of age or older who moves to Texas from another state is considered a nonresident student for tuition purposes as long as he/she remains enrolled in a post-secondary institution.

Persons in the military service and their dependents are classified as residents for tuition purposes, provided they are assigned to a duty station in Texas or maintain their Home of Record in Texas while in the military or upon discharge.

A Texas resident who resides within McLennan County will qualify as an in-county resident. A student who is a resident of Texas but who does not reside within McLennan County at the time of registration for classes will qualify as an out-of-county resident.

An international student is considered to be a nonresident for tuition purposes unless he/she holds a United States immigrant visa or a non-immigrant visa that allows the student to establish a domicile in the United States. These students, while eligible to establish Texas residency for tuition purposes, must meet the same rules as United States citizens to qualify as a resident for tuition purposes.

To determine the proper residency classification, applicants may be asked to provide documents that will determine that the applicant has a legal right to be classified as a resident for tuition purposes. Documentation that supports the establishment of a domicile in Texas and must be documented at least 12 months prior to the census date of the term of enrollment includes, but is not limited to:

1. Gainful employment in Texas
2. Title to real property in Texas
3. Marriage certificate with documentation that spouse is a domiciliary of Texas
4. Ownership of a business in Texas
5. State or local license to conduct a business or practice a profession in Texas
6. Property tax payments for the year preceding enrollment. McLennan Community College will waive the difference in the rate of tuition for nonresident and resident applicants and their dependents who own property that is subject to ad valorem taxation by McLennan County Junior College District.

In addition to documentation to prove establishment of a domicile in Texas, students will be

asked to provide at least one other document to verify that they have physically lived in Texas for 12 months prior to enrollment. These documents include, but are not limited to:

1. Utility bill in Texas
2. Texas college transcript or Texas high school transcript
3. Texas driver's license or Texas ID
4. Texas voter's registration card that has not expired
5. Pay stubs showing a Texas address
6. Bank statements with a Texas address
7. Lease of rental property in Texas
8. Current credit report with residence information in Texas

Residence Classification Appeal Procedure

The appeal process for challenging residence classification as determined by the Coordinator of Student Admissions will be as follows:

1. The decision of the Coordinator of Student Admissions may be appealed in writing to the Director of Admissions and Recruitment during the semester/term in question.
2. If the student is not satisfied with the decision of the Director of Admissions and Recruitment, the student may submit all facts concerning residence status to the appropriate officials of the Coordinating Board for further clarification.
3. This documentation must be submitted to the Student Admissions Office by the fourth day of a summer semester or the 12th day of a fall or spring semester.

For more information about residency, including FAQs, forms and a glossary of terms, visit the residency website at www.mclennan.edu/residency.

Cost of Books

Although the cost of books varies from course to course, the average cost for a full-time student is approximately \$610 per semester. Because some books purchased for the fall semester are also used in the spring semester, fall semester book costs are usually greater than those for the spring semester.

Books and supplies are available at the MCC Bookstore, located on the first floor of the Michaelis Academic Center. If books will be used the following semester and are in good condition, they may be returned to the bookstore for a partial refund.

Payment Methods

Students may pay tuition and fees online at www.mclennan.edu, by mail or in the Business Office on campus. The college accepts American Express, Discover, MasterCard or Visa.

Installment Plan

Students may set up a payment plan by the payment deadline and pay out the balance in installments. A nonrefundable \$25 processing fee is assessed for participation, and a \$25 late charge is assessed for each late payment. Payment plans are not available for minimesters courses.

Tuition and Fees Refunds**Withdrawals and Dropping Classes**

When students withdraw from the college or drop a portion of their semester hour enrollment, a refund of tuition and mandatory fees shall be made in accordance with the refund schedule and other provisions shown below.

Fall and Spring Semester

Percent of Refund

Prior to the first class day	100
During the first 15 class days	70
During the 16th through 20th class days....	25
After the 20th class day.....	None

Summer Terms

Percent of Refund

Prior to the first class day	100
During the first five class days	70
During the sixth and seventh class days....	25
After the seventh class day	None

Class day(s) refers to the number of days classes in general (not a particular class) have been in session.

Mandatory fees include General Services Fee, Facilities Fee and Lab Fees.

Optional fees are non-refundable.

Refunds for flexible-entry and non-semester-length courses with a census date other than the 12th class day (or fourth class days for a six-week summer semester) are described below:

Flexible-Entry and Non-Semester-Length Classes

(Includes Continuing Education, etc.)

Percent of Refund

Prior to the first class day	100
After classes begin	per state-mandated schedule

Tuition refunds apply only to that portion of a student's semester hour enrollment for which tuition has been charged and payment received. Tuition and fees paid directly to the college by a sponsor, donor or scholarship will be refunded to the source, rather than directly to the student.

Repeat Courses

Students may be charged a higher rate of tuition for courses repeated the third and subsequent time.

Return of Title IV Funds

Students who receive federal financial aid (Federal Pell Grants, Federal Supplemental Educational Opportunity Grants, Academic Competitiveness Grants, Direct Loans, Unsubsidized Direct Loans and PLUS Loans) and who withdraw or are dropped from all of their course work on or before 60 percent of the semester is over will have to repay an equivalent percentage of unearned financial aid back to the financial aid program. In addition, the student will have to repay the same percentage of their tuition and fees back to the college. This

repayment will be due from all students receiving federal financial aid regardless of whether the financial aid paid for the tuition and fees. For example, a student who withdraws after completing 40 percent of the semester would be responsible for repaying 60 percent of his or her tuition and fees to the college and 60 percent of the aid disbursed to the student to the Department of Education. This repayment must occur within 45 days, or the college must report to the Department of Education that the student received an overpayment of federal funds. Once the student is reported, he or she becomes ineligible for further federal financial aid until the amount owed is repaid in full.

Financial Aid

The Office of Financial Aid is available to help eligible students meet the cost of attending college. The primary responsibility of financing an education rests with students and their families; however, scholarships, grants, loans, work opportunities and other financial benefits are available to students who qualify for these programs.

The level of federal and/or state financial aid provided to students is based upon demonstrated financial need. This is the difference between the reasonable cost of attending college for one year and the estimated family financial contribution, as determined by a review of the Free Application for Federal Student Aid (FAFSA).*

*** PLEASE NOTE: Each student seeking federal and/or state financial aid must complete this financial need analysis application. This application is available online at www.fafsa.ed.gov; computers are available on MCC's campus for students to use.**

It is recommended that the application be completed so that all forms can be turned in to the Office of Financial Aid by the following dates:

Fall semester — June 1
Spring semester — Nov. 1
Summer terms — April 1

For more information about requirements, qualifications and application deadlines, contact the Office of Financial Aid.

Grants

Pell Grants

Pell Grants are awarded to undergraduate students who have not earned a bachelor's or professional degree. (A professional degree would include a degree in a field such as medicine, law or dentistry.) For many students, Pell Grants provide a foundation of financial aid to which other aid may be added.

Eligibility Requirements:

- Show exceptional financial need.
- Have a high school diploma or a General Education Development (GED) certificate, pass a test approved by the U.S. Department of Education or meet other standards your state establishes that are approved by the U.S. Department of Education. (See the financial aid administrator at the college for more information.)
- Enrollment in remedial-only course work does not meet eligibility requirements.
- Be enrolled or accepted for enrollment as a regular student working toward a degree or certificate in an eligible program. (Students may not receive aid for correspondence or

telecommunications courses unless they are part of an associate, bachelor's or graduate degree program.)

- Be a U.S. citizen or eligible non-citizen.
- Have a valid Social Security Number.
- Make satisfactory academic progress.
- Sign a statement on the Free Application for Federal Student Aid (FAFSA) certifying that federal student aid will only be used for educational purposes.
- Sign a statement on the FAFSA certifying that the student is not in default on a federal student loan and that the student does not owe money back on a federal student grant.
- Register with the Selective Service, if required. (If you are a male 18-25 years of age and you have not yet registered with Selective Service, you can give Selective Service permission to register you by checking a box on the FAFSA. You can also register at www.sss.gov.)

For more information about award maximums and the number of Pell Grants you can receive, visit studentaid.ed.gov. How much you get will depend not only on your Expected Family Contribution (EFC) but also on your cost of attendance, whether you're a full-time or part-time student, and whether you attend school for a full academic year or less. You may not receive Pell Grant funds from more than one school at a time.

Students should complete the Free Application for Federal Student Aid (FAFSA), and the Office of Financial Aid will notify the student if he/she is eligible for a Pell Grant.

Federal Supplemental Educational Opportunity Grant (FSEOG)

This federal grant was designed to provide financial assistance to undergraduate students with exceptional financial need.

Eligibility Requirements:

- Show exceptional financial need.
- Enrollment in remedial-only course work does not meet eligibility requirements.
- Have a high school diploma or a General Education Development (GED) certificate, pass a test approved by the U.S. Department of Education or meet other standards your state establishes that are approved by the U.S. Department of Education (See the financial aid administrator at the college for more information.)
- Be enrolled or accepted for enrollment as a regular student working toward a degree or certificate in an eligible program. (Students may not receive aid for correspondence or telecommunications courses unless they are part of an associate, bachelor's or graduate degree program.)
- Be a U.S. citizen or eligible non-citizen.
- Have a valid Social Security Number.
- Make satisfactory academic progress.

- Sign a statement on the Free Application for Federal Student Aid (FAFSA) certifying that federal student aid will be used only for educational purposes.
- Sign a statement on the FAFSA certifying that the student is not in default on a federal student loan and that the student does not owe money back on a federal student grant.
- Register with the Selective Service, if required. (If you are a male 18-25 years of age and you have not yet registered with Selective Service, you can give Selective Service permission to register you by checking a box on the FAFSA. You can also register at www.sss.gov.)

Awards range up to \$1,000 per year at MCC. Complete the Free Application for Federal Student Aid (FAFSA), and the Office of Financial Aid will notify the student if he/she is eligible.

TEXAS (Toward EXcellence, Access & Success) Grant

The Texas Legislature established the TEXAS (Towards EXcellence, Access and Success) Grant to make sure that well-prepared high school graduates with financial need could go to college. To qualify for an initial award, a student must:

- Be a Texas resident.
- Have not been convicted of a felony or crime involving a controlled substance.
- Show financial need.
- Register for the Selective Service or be exempt from this requirement.
- **AND**
 - Be a graduate of an accredited high school in Texas not earlier than the 1998-99 school year.
 - Complete the Recommended High School Program or Distinguished Achievement Program in high school.
 - Enroll at least three-quarter time (9 hours) in a nonprofit public college or university in Texas within 16 months of graduation from a public or accredited private high school in Texas.
 - Have accumulated no more than 30 semester credit hours, excluding those earned for dual or concurrent courses or credit by examination (AP, IB or CLEP).

Students entering the program from high school who continue in college and who meet program academic standards can receive awards for up to 150 semester credit hours, until they receive a bachelor's degree, or for five years if enrolled in a four-year degree plan or six years if enrolled in a five-year degree plan, whichever comes first.

The academic requirements for continuing in the program are:

- At the end of the first year, the student entering the program from high school must be meeting the school's Satisfactory Academic Progress (SAP) requirements.

- At the end of his/her first year in the TEXAS Grant program, the person entering the program on the basis of an associate degree must have completed at least 75 percent of the hours attempted, have an overall grade point average (GPA) of at least 2.5 on a 4.0 scale and must have completed at least 24 semester credit hours during the year.
- At the end of the second year in the program or subsequent years, all students must complete at least 75 percent of the hours attempted in the prior academic year, have an overall college grade point average (GPA) of at least 2.5 on a 4.0 scale and complete at least 24 semester credit hours per year.

For information about award amounts, visit www.collegeforalltexasns.com.

Students apply for the TEXAS Grant when they complete and submit the Free Application for Federal Student Aid (FAFSA). Funding is limited, so students should submit their applications as soon as possible after January 1 of their senior year. The Office of Financial Aid will determine if TEXAS Grant is part of the aid package offered to individual students.

Texas Public Educational Grants (TPEG)

These grants, which are awarded based on financial need and availability of TPEG funds, generally cover tuition and fees. Students must be enrolled for at least six semester hours of college-credit course work or the equivalent during each semester. Summer students (or continuing students who declare their intent to enroll at MCC in the following fall semester), must enroll in at least six semester hours during a nine-week term or four semester hours during a six-week term. A limited number of awards may be available to less-than-half-time students.

Leveraging Educational Assistance Partnership Program (LEAP) and State Leveraging Educational Assistance Partnership Program (SLEAP)

Federal and state funds combine to provide grant assistance for financially needy students who:

- Are Texas residents.
- Attend a public or private university.
- Are undergraduate students.
- Show financial need based on federal methodology.
- Are not in default on a federal loan and do not owe a refund on a federal or state grant.
- Are U.S. citizens.
- Have not borrowed in excess of federal student aid limits.
- Register for the Selective Service, unless exempt.

To apply, complete the Free Application for Federal Student Aid (FAFSA). The financial aid office will determine eligibility and notify eligible students.

Funding for this program is very limited and is awarded to the earliest applicants who meet

eligibility requirements. Funds may not be immediately available at the beginning of the semester due to state funding procedures.

Scholarships

MCC Foundation Scholarships

The McLennan Community College Foundation was activated in 1990 and is a 501(c)(3) not-for-profit organization independent of McLennan Community College. It is governed by an elected board of 24 community members and college representatives. All expenses of the Foundation are paid through MCC's institutional budget so that almost 100 percent of donations made to the Foundation go toward the program for which the donations were intended. To further its mission, the MCC Foundation "acquires financial resources and strengthens support to fund scholarships, professional development, and capital improvements for the students, faculty and staff of the college and the broader communities it serves." From 1990 to 2011, the Foundation has provided almost \$3.21 million in financial assistance to more than 3,200 students.

For a complete list of scholarships available and more information about how to apply, please visit the Foundation's website at www.mclennan.edu/departments/foundation or call the Foundation at 254-299-8818. Scholarship applications are generally due in January for the following school year (check the Foundation website for the specific date each year). Selection of scholarship recipients is made by several college committees, with most announcements made by the first week in May each year.

All scholarship recipients must complete the MCC Foundation Scholarship Application and the Free Application for Federal Student Aid (FAFSA) each year to continue to receive scholarships. The FAFSA is available online at www.fafsa.ed.gov.

Presidential Scholars Program

Scholarships to attend McLennan Community College shall be awarded to as many as 20 students who are high school graduates, General Educational Development (GED) Test completers or currently enrolled college students. Students who have demonstrated scholastic ability (B average or higher) and academic potential are eligible to apply. The scholarship shall pay for tuition, fees and books and shall be valid for four consecutive long semesters (for example: fall, spring, fall, spring) after the recipient begins using it. The recipient shall begin using the scholarship no later than the fall semester following receipt of the scholarship. A cumulative grade point average of 3.0 shall be required to maintain the scholarship. Students receiving the Presidential Scholarship shall meet with the President of the college regularly and act as ambassadors for the President of the college at designated events.

Apply using the MCC Foundation Scholarship Application available online at www.mclennan.edu/departments/foundation. Completed applications are due in early January each year (specific due dates are listed on the college website and application). Selection of recipients is made by the college President after an interview with the applicant.

Bernard and Audre Rapoport McLennan Community College First Generation Scholarship Program

The Bernard and Audre Rapoport McLennan Community College First Generation Scholarship Program coordinates with family and community foundations to provide scholarships of up to \$1,000 per semester for up to four semesters for students who come from families with no college experience. A 3.0 GPA is required to enter and remain in the program. There are also summer course requirements for the summer immediately preceding the fall semester of the freshman year.

Students may apply for this scholarship by completing the MCC Foundation Scholarship Application found at www.mclennan.edu/departments/foundation. Completed applications are due in early January each year (specific due dates are listed on the college website and application).

Students who successfully complete the First Generation program may also be eligible for additional scholarships at four-year institutions for students to complete their bachelor's degrees. For more information, contact the First Generation program director at MCC.

President's Scholarship Baylor University Transfer

This scholarship is available to students who plan to attend Baylor University after completing MCC. Eligible students will have completed requirements for the A.A. or A.A.S. degree, applied for graduation during the current year, met Baylor's transfer grade point average requirements of 2.5, and earned at least 30 of their most recent hours at MCC.

Apply using the MCC Foundation Scholarship Application available online through at www.mclennan.edu/departments/foundation. Completed applications are due in early January each year (specific due dates are listed on the college website and application). Selection of recipients is made by the college President.

Other Scholarship Opportunities

McLennan Honors College

McLennan Honors College brings together a community of motivated and gifted learners whose interests are served through an interdisciplinary program of academic inquiry that is both challenging and nurturing. The Honors College offers honors credit courses, opportunities for independent and collaborative projects, mentoring from faculty and administrators, campus support, and leadership opportunities. Honors College scholars also participate in specific Honors College pursuits designed to increase their breadth and depth of learning.

Honors College scholarships may cover tuition and fees up to 18 credit hours per semester for four semesters (excluding summer sessions) and include semester book allowances to assist

with the purchase of course texts and required supplies. Honors scholars must maintain a minimum college GPA of 3.0 and enroll in appropriate Honors courses as advised.

Students are encouraged to apply as high school seniors. Applicants must have an admitting high school average of B or higher and have passed the THEA or be THEA-exempt. Teacher recommendations are encouraged. Apply using the MCC Foundation Scholarship Application available online at www.mclennan.edu/departments/foundation or by contacting the McLennan Honors College. For more information, visit the Honors College page on the MCC website.

McLennan Scholars Program

The college offers scholarships to students graduating in the top 10 percent of each accredited high school class in McLennan County or to the top five students in each graduating class, whichever represents the greater number. If the class has fewer than 21 students, the top two students will receive the scholarship. Students are identified for these scholarships by their respective high schools, so no application is necessary. Recipients are notified by the Office of Financial Aid and their high school principals.

The scholarship is valid for four long semesters after graduation from high school, and recipients must begin using their scholarship no later than the fall semester immediately following graduation from high school. The scholarship covers tuition and fees. Recipients must attend school full time and maintain a 3.0 grade point average.

For more information, students should contact their high school counselors.

Departmental Scholarships

Scholarships in music, theatre, visual arts and athletics (including the MCC Dance Company) are offered to outstanding students in these areas. Recipients are selected by a departmental committee or the appropriate director. For more information, contact the program director in the respective department.

The MAC Grant

Funded through gifts from Mr. and Mrs. Malcolm Duncan Sr. to the MCC Foundation, the MAC Grant pays MCC tuition, books and fees for any McLennan County high school graduate not receiving other financial aid. The MAC Grant requires a student to complete the Free Application for Federal Student Aid (FAFSA) to determine eligibility. To apply for a MAC Grant, students should contact The Waco Foundation, 900 Austin Ave., Suite 1000, Waco, TX 76701, or call 254-752-9457 for more information.

The deadline is usually May 1 of the student's senior year.

Students may also apply for MAC Grant transfer scholarships, which are for the third and fourth years of college. Students must have applied for a MAC Grant by May 1 of their senior year in

high school and must apply for the MAC Grant transfer scholarship by Dec. 1 of their sophomore year at MCC.

Financial Assistance Through Income Tax Credits

Education tax credits can help offset the costs of higher education for yourself or a dependent. The Hope Credit and the Lifetime Learning Credit are two education credits available that may benefit you. Because they are credits, rather than deductions, you may be able to subtract them in full dollar-for-dollar from your federal income tax.

For more information about the Hope Credit and Lifetime Learning Credit, including credit amounts and requirements, see IRS Publication 970, Tax Benefits for Education, which can be obtained online at www.irs.gov or by calling the IRS at 800-TAX-FORM (800-829-3676).

Loans

Federal Direct Loan Programs

Federal Direct Subsidized Loan

The purpose of the Direct Loan Program Subsidized Stafford Loan is to provide low-interest educational loans that enable a student to pay the cost of attendance at a public, private or nonprofit college or university. The federal government pays the interest on these loans while a student is in school, during a grace period and during authorized periods of deferment.

Eligibility Requirements:

- Be a U.S. citizen or an eligible non-citizen.
- Complete a FAFSA and be eligible to receive federal financial aid.
- Be enrolled at least half time (enrollment in remedial-only course work does not meet eligibility requirements).
- Meet Satisfactory Academic Progress requirements.
- Must not owe a refund (also called an “overpayment”) on any federal grant program or be in default or delinquent on a previously obtained federal student loan.

Annual Loan Limits:

First-year undergraduates	\$3,500
Second-year undergraduates	\$4,500
Aggregate limit for undergraduate students	\$23,000

A 2 percent origination fee is deducted from the proceeds of each loan disbursement. There are no guarantee or insurance premium fees. Loans that are first disbursed on or after July 1, 2006, will have a fixed annual (simple interest) rate of 6.8 percent for the life of the loan. The borrower is not responsible for the interest accrued while he/she is enrolled at least half time, during the six-month grace period and during certain authorized deferment periods. Interest is not capitalized at any time and may be paid as it accrues.

Repayment of the loan begins six months after the student ceases to be enrolled at least half time. The loan repayment schedule will require a minimum monthly payment of \$50 or an amount required to repay the loan within 10 years, whichever is greater. Borrowers may be eligible for postponement of loan repayment under certain circumstances.

Federal Direct Unsubsidized Loan

The purpose of the Federal Direct Loan Program Unsubsidized Stafford Loan is to provide low-interest educational loans that enable a student to pay the cost of attendance at a public, private or nonprofit college or university. The borrower is responsible for interest that accrues while in school, during a grace period or during authorized periods of deferment or forbearance.

Eligibility Requirements:

- Be a U.S. citizen or an eligible non-citizen.
- Completed a FAFSA.
- Be enrolled at least half time (enrollment in remedial-only coursework does not meet eligibility requirements).
- Meet Satisfactory Academic Progress requirements.
- Must not owe a refund (also called an “overpayment”) on any federal grant program or be in default or delinquent on a previously obtained federal student loan.

Annual Loan Limits:

First-year undergraduates	\$6,000
Second-year undergraduates	\$6,000
Aggregate limit for undergraduate students	\$23,000
Aggregate limit for subsidized and unsubsidized loans	\$57,000

A 2 percent origination fee is deducted from the proceeds of each loan disbursement. There are no guarantee or insurance premium fees. Interest accrues from the date the funds are issued until the loan(s) are paid in full. Interest is not capitalized at any time and may be paid as it accrues.

Repayment of the loan begins six months after the student ceases to be enrolled at least half time. The loan repayment schedule will call for a minimum monthly payment of \$50 or an amount required to repay the loan within 10 years, whichever is greater. Borrowers may be eligible for postponement of loan repayment under certain circumstances.

Federal Parental Loans to Undergraduate Students (PLUS)

The purpose of the PLUS loan is to enable parents with good credit histories to borrow to pay the educational expenses of their dependent undergraduate students. To be eligible, parents must:

- Be U.S. citizens or eligible non-citizens.
- Have students enrolled at least half time.
- Have students who are meeting the Satisfactory Academic Progress requirements of the college or university.
- Have good credit.
- Are not in default or owe a refund (the financial aid office may call this an “overpayment”) to any student financial assistance program.

Applicants do not have to show financial need. The PLUS may be used to cover the family’s expected contribution (EFC). Awards vary. The amount of PLUS combined with other financial assistance cannot be greater than the cost of attendance.

Institutional Loan Program

Short-Term Emergency Loan

This loan is available to a limited number of students to assist in meeting emergency financial demands. The loan is offered on a short-term basis, not to exceed 60 days, when other funds are expected but currently unavailable. This enables the student to continue his/her educational pursuits. Students should be enrolled for at least six semester hours and maintain satisfactory progress. Loans generally do not exceed \$250 and are due before the end of the semester in which they are made.

Student Employment

Federal Work-Study Program

The Federal Work-Study Program provides jobs for undergraduate and graduate students with financial need, allowing them to earn money to help pay education expenses. The program encourages community service work and work related to the course of study. In order to be eligible, students must:

- Complete the Free Application for Federal Student Aid (FAFSA) and have financial need.
- Have a high school diploma or a General Education Development (GED) certificate, pass a test approved by the U.S. Department of Education or meet other standards your state establishes that are approved by the U.S. Department of Education. (See the financial aid administrator at the college for more information.)
- Be enrolled or accepted for enrollment as a regular student working toward a degree or certificate in an eligible program. (Students may not receive aid for correspondence or telecommunications courses unless they are part of an associate, bachelor’s or graduate degree program.)
- Be a U.S. citizen or eligible non-citizen.
- Have a valid Social Security Number.
- Make satisfactory academic progress.

- Sign a statement on the FAFSA certifying that federal student aid will only be used for educational purposes.
- Sign a statement on the FAFSA certifying that the student is not in default on a federal student loan and that the student does not owe money back on a federal student grant.
- Register with the Selective Service, if required. (If you are a male 18-25 years of age and you have not yet registered with Selective Service, you can give Selective Service permission to register you by checking a box on the FAFSA. You can also register at www.sss.gov.)

State Work-Study Program

The State Work-Study Program was created to provide part-time jobs to eligible students with financial need to enable them to attend college.

Eligibility Requirements:

- Be a Texas resident.
- Show financial need.
- Register for the Selective Service or sign a statement that you are exempt from this requirement.
- Enroll at least half time.

To apply, complete the Free Application for Federal Student Aid (FAFSA). The financial aid office will determine eligibility and notify eligible students.

Non-Work-Study Program

This program provides on-campus work opportunities for a limited number of students with special skills, i.e., tutoring, lab assistants, etc. Financial need is not a factor in this program.

Up to \$1,000 Tuition Rebates for Certain Students

Students who are pursuing a baccalaureate degree from a Texas public four-year university may qualify to receive up to a \$1,000 rebate of tuition paid at the time that they receive their bachelor's degree. To be eligible, a student must meet all of the following criteria:

- Enrolled for the first time in college in the Fall 1997 semester or later.
- Must be requesting a rebate for work related to a first bachelor's degree received from a Texas public university.
- Must have been a resident of Texas.
- Must have attempted all course work at a Texas public institution.
- Must have been entitled to pay resident tuition at all times while pursuing the degree.
- Must have attempted no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which they were graduated.

- Must apply for the rebate prior to receiving their baccalaureate degrees on forms provided by the school.
- Student is solely responsible for enrolling only in courses that will qualify them for the rebates.

The institution that grants the bachelor's degree is the institution that will pay the rebate to students. Students can be eligible by transferring from a two-year public institution to a four-year institution by following the above rules and providing a copy of the transcript to the four-year school.

The amount of the rebate may be reduced by the amount of any outstanding student loan owed to or guaranteed by the state, including the Texas Guaranteed Student Loan Corp.

For more information, contact Student Development at 254-299-8614.

Satisfactory Academic Progress Policy

Under current federal law, all students who receive federal or state financial aid must be making satisfactory progress as defined by the College in order to receive or continue to receive that aid. The following are the requirements at McLennan Community College.

1. All recipients of financial aid must be enrolled in a program of study leading to an associate's degree, an eligible certificate, or program that is transferable toward a baccalaureate degree.
2. Students receiving financial aid must maintain a 2.0 cumulative grade point average (a grade of "C") on all college level credit hours attempted at MCC in order to remain eligible for financial aid.
3. Students receiving financial aid must complete 67% of all hours attempted at MCC regardless of whether financial aid was received for the hours.
4. Students must complete their degree within 150% of the hours required in their program. (Eligibility is lost beyond this limit).
5. Satisfactory progress will be measured three times per year, at the end of each semester, fall, spring and summer. The evaluation will be made regardless of the number of hours attempted during the semester.
6. Course work attempted and grades earned in semesters forgiven through the State of Texas "Academic Fresh Start" program will be included in the Satisfactory Progress Calculation.
7. Grades of A, B, C, D, and CR are considered hours attempted and successfully completed (earned).
8. Grades of F, NC (non-completion), I (incomplete), and W (withdrawals and drops) are counted as hours attempted but not successfully completed (unearned).

9. Course repeats are counted as attempted hours and either earned or unearned depending upon the grade assigned as noted above. Last grade is included for GPA purposes.
10. Only the first two attempts of a course completed with a passing grade can be paid by financial aid. The third attempt cannot be included for payment purposes.
11. Financial aid is available for only the first 30 semester hours of remedial coursework attempted. Remedial coursework is counted in the 67% completion rate.
12. The first time a student does not meet the Satisfactory Academic Progress criteria they will be placed on financial aid “warning”. While on warning, the student will continue to receive financial aid for which they have qualified. The warning period is one semester.
13. Students not meeting the minimum Satisfactory Academic Progress criteria at the end of their warning period will be suspended from receiving financial aid.
14. Students placed on “suspension”, although they may continue to enroll at the College, must pay for their coursework from their own funds.
15. Financial aid eligibility will be reinstated after a student meets the Satisfactory Academic Progress criteria (listed above), both the completion rate (67%) and cumulative grade point average (2.0). Students who regain eligibility by completing required coursework must notify the Office of Financial Aid in order to have their progress reevaluated.
16. A student who has been suspended from financial aid for failure to meet the satisfactory progress requirements outlined in this policy due to mitigating circumstances may appeal the decision by completing an appeal form, explaining their mitigating circumstances, and providing appropriate documentation to support their claim. Appeals without documentation will not be considered.
17. A student must be able to meet the satisfactory progress requirements within one semester or an appeal cannot be approved.
18. When a student has an appeal approved, they are placed on a probationary status for one semester. Probationary students who do not meet the satisfactory progress requirements will again be suspended.
19. Students who have had a prior appeal approved (probationary status) must complete a minimum of 12 semester hours (100% completion) with a 2.0 GPA without the benefit of financial aid in order to file another appeal.
20. When the number of hours required to complete a degree plus the number of hours attempted (including transfers) exceeds 150% of the hours required for a degree, the student becomes immediately ineligible for further financial aid. (Maximum Time Frame Suspension).
21. Appeals for attempting beyond the maximum time frame require a copy of a degree plan signed by the advisor and an appeal form explaining why the additional coursework is necessary. The student must be meeting the 67% and 2.0 CGPA for all hours attempted in order for this appeal to be approved.
22. Not being prepared for college work, or the course was not what was expected, or student didn't like the teacher and similar reasons are NOT mitigating circumstances and an appeal for these reasons will not be approved.

STUDENT RESPONSIBILITY

Students are responsible for understanding and monitoring their own satisfactory progress status. Although the Office of Financial Aid attempts to notify students of their financial aid status, failure to receive notice does not affect the calculated status and is not a reason to appeal.

Satisfactory Progress Criteria

Grade Point Average

Students receiving financial aid must maintain a 2.0 cumulative grade point average on all college-level credit hours attempted at MCC in order to remain eligible for financial aid.

Completion Rate

Students receiving financial aid must complete 67 percent of all hours attempted at MCC regardless of whether financial aid was received for the hours.

Maximum Time Frame

Associate Degree Programs

Students in an associate degree program may receive federal or state financial aid during their first 93 attempted semester hours of course work in their program. This includes all transfer credit hours and excludes developmental/remedial course work. Students who have attempted less than 93 semester hours of course work at the beginning of a given semester may receive an award for that semester. Students who have attempted 93 or more semester hours of course work will be suspended from receiving financial aid regardless of their cumulative grade point average. For degree programs requiring more than 62 semester hours, this time frame may be increased.

Certificate Programs

Students in a certificate program may receive federal or state financial aid during their first 51 attempted semester hours of course work in their program. This includes all transfer credit hours and excludes developmental/remedial course work. Students who have attempted less than 51 semester hours of course work at the beginning of a given semester may receive an award for that semester. Students who have attempted 51 or more semester hours of course work will be suspended from receiving financial aid regardless of their cumulative grade point average. For certificate programs requiring more than 34 semester hours, this time frame may be increased.

Failure to Complete in Maximum Time Frame

At the point that it becomes mathematically impossible for the student to complete the program within the time frame (150 percent of degree requirements), the student will be suspended immediately and will no longer be eligible for financial aid for that program. Additionally, there is no appeal for suspension under this section.

Evaluation Time Frame

Associate Degree Students

Satisfactory progress will be measured one time per year, at the end of the spring semester. The evaluation will be made regardless of the number of semesters attended or the number of hours attempted during the year.

Certificate Students

Satisfactory progress will be measured three times per year, at the end of each semester: fall, spring and summer. The evaluation will be made regardless of the number of hours attempted during the semester.

Evaluation Outcomes

Financial Aid Probation

A student who does not meet the Satisfactory Academic Progress criteria will be placed on financial aid probation. While on probation, the student will continue to receive financial aid for which he/she has qualified. The probationary period for certificate students is one semester and for associate degree students is one year.

Financial Aid Suspension

If the student does not meet the minimum Satisfactory Academic Progress criteria at the end of his/her probationary period, the student will be suspended from receiving financial aid. Students placed on suspension, although they may continue to enroll at the college, will not receive any federal or state financial aid.

Reinstatement of Eligibility

Financial aid eligibility will be reinstated after a student meets the Satisfactory Academic Progress criteria (listed above), both the completion rate (67 percent) and cumulative grade point average (2.0), or has an appeal approved as described below. Students who regain eligibility by completing required course work must notify the Office of Financial Aid in order to have their progress reevaluated.

Financial Aid Suspension Appeal Process for GPA and Completion Rate

A student who has been suspended from financial aid for failure to meet the satisfactory progress requirements outlined in this policy due to mitigating circumstances may appeal the decision by completing an appeal form, explaining their mitigating circumstances and providing appropriate documentation to support their claim. The Office of Financial Aid staff (Specialists and Associate/Assistant Director) shall evaluate individual mitigating circumstances, supporting documentation and notify students of the decision regarding their appeal within three weeks.

Students may pick up an Appeal Form at the Office of Financial Aid or may print a [copy](#) from the Financial Aid Web page at www.mclennan.edu/finaid. The appeal must be completed in writing; provide appropriate, adequate documentation; and be signed by the student. Please type or print legibly in black or blue ink. Illegible appeals will be returned to the student.

Appeals will be considered based on the following mitigating circumstances only:

- 1. Personal illness, injury or accident.**
Requires a doctor's written statement, hospital records or accident/police reports.
- 2. Serious illness or death within immediate family (grandparents, parents, spouse, siblings and children).**
Requires a death certificate/obituary notice or statement from a doctor.
- 3. Transportation problems.**

Requires a mechanic's bill and verification that public transportation is not available in your area.

4. Divorce or separation.

Requires divorce/separation documents or letter from attorney.

5. Last enrollment was at least 10 years ago.

Requires a copy of relevant transcripts.

6. Administrative error.

Requires a letter of verification from source of error.

The condition or situation must be resolved, showing the student has the ability to complete course work successfully, or the request will not be approved.

Financial Aid Suspension

Appeal Process for Maximum Time Frame

Under current regulation, there is no appeal for failing to complete within the maximum time frame.

Second Appeals

Students whose first appeal has been denied may appeal to the director of Financial Aid if they feel that they have not been treated fairly according to this policy. This appeal must be in writing, signed and turned in within 10 days of receiving notification of the decision denying the appeal. The decision of the director is final.

All awards from financial aid programs funded by the federal or state government are administered according to laws and regulations governing those programs. This policy is subject to change as required by federal or state guidelines and/or by the college.

Rehabilitation Assistance

The Texas Department of Assistive and Rehabilitative Services (DARS) offers assistance with tuition and required fees to students who have certain physical or emotional handicaps, provided the vocational objective selected by the student with disabilities has been approved by the appropriate representative of the commission. Through this state agency, other rehabilitation services are available to assist students with disabilities to become employable.

Applications for assistance must be submitted to the local Texas Department of Assistive and Rehabilitative Services (DARS) (formerly Texas Rehabilitation Commission).

Veterans Services

MCC is an approved training facility for veterans and their dependents under the provisions of the various public laws commonly referred to as the GI Bill and Dependents Educational Benefits. Eligible persons may apply to the Office of Financial Aid. Certification requests must be made each semester. It is the responsibility of the veteran or dependent to contact the Office of Financial Aid. Recipients must maintain a 2.0 cumulative grade point average.

For information on how to apply for benefits, contact the Office of Financial Aid at 254-299-8698 or the VA Regional Education Center at 888-442-4551.

Student Services & Campus Activities

Student Services provides a full range of services and programs to assist students in meeting their varied needs and in achieving their lifelong goals.

Services include student recruitment, student admissions, testing services, student records, Upward Bound, financial aid, career exploration, a program for single parents and homemakers re-entering the workforce, tutoring, services to students with disabilities, mentoring, success workshops, and more. In addition, there are numerous student activities and organizations. Students are encouraged to use each of these services and to participate in MCC's various programs.

Admissions and Recruitment

Student Admissions specialists are available to directly assist with the college admissions process. Call 254-299-8622 for assistance. Official college and high school transcripts and General Education Development (GED) test scores are submitted to this office. Automated degree plans are available for current students through WebAdvisor.

Records and Registration

Student Records staff members plan and organize the registration process for college credit courses. This office is responsible for maintaining permanent student records of academic progress and accomplishments for credit students and students participating in continuing education courses. Records and Registration also plans commencement exercises. This office is responsible for processing class changes and withdrawals from the college and maintaining automated degree plans.

Transcript of Credits/Continuing Education Units

The MCC transcript of credit and the transcript of continuing education units (CEUs) are chronological listings of college credit classes or continuing education classes completed at MCC. The official transcript is printed on security paper and imprinted with the signature of the registrar.

There is no charge for the first 25 official transcripts. After the first 25 copies, each official copy of a transcript is \$3. Upon written request, the Office of Student Records will send an official transcript to the individual student or to any college or agency. A transcript will be released only if all obligations to the college have been met.

Commencement

Formal commencement exercises are conducted at the end of the spring and fall semesters and at the end of the second summer semester annually. In order to participate in the graduation exercises, students must complete certificate and/or degree requirements and submit an application for graduation to the Office of Student Records by the date published in the Institutional Calendar and on the college's website in the Registration Guide and on the [homepage](#).

The graduation application fee is incorporated into the general services fee, which students pay each semester; therefore, there is no graduation application fee charge.

Upward Bound

McLennan Community College provides an Upward Bound Program for eligible secondary school students. The purpose of the Upward Bound Program is to assist eligible target secondary school students with academic potential to complete high school and enroll in and complete college.

The program provides classroom instruction in basic skills, tutoring, supervised study, career and personal development workshops, and academic, career and personal counseling. In addition, the program also helps students complete financial aid and admissions applications and provides scholarship information for post-secondary educational programs. Upward Bound also provides visits to college campuses and participation in cultural, educational and recreational activities. (Also see [Upward Bound](#).)

Student Development

Student Development offers counseling, information and activities to assist students desiring help in selecting a major or career field. Online guidance systems, interest and personality inventories, and a library of printed materials are provided to help students with career decision-making. Graduates are aided in resume writing and interview skills. The department maintains job listings for students who are seeking full-time or part-time employment.

Student Development maintains transfer information and degree plans to assist students planning to transfer to a four-year college or university. In addition, counseling specialists provide academic advising for undeclared and general studies majors. Call 254-299-8614 for more information.

Testing

McLennan Community College is an official testing center for the Standard and Quick THEA; Accuplacer, an approved THEA alternative; the American College Test (ACT) and Scholastic Aptitude Test (SAT), examinations that measure college preparedness; NET, Nursing Entrance Test; CAT, Computer Adaptive Test for nursing graduates; Health Occupations Aptitude Examination (for Vet Tech students); and the College Level Examination Program (CLEP), standardized subject examinations by which MCC students may receive credit for various college courses. These examinations are offered on a regularly scheduled basis. Call 254-299-8453 for more information.

Student Support Services

A variety of services designed to help eligible students reach their academic goals is provided through Student Support Services. Services include, but are not limited to, one-on-one and small-group tutoring, academic and personal counseling, and study skills assistance. Cultural enrichment activities are scheduled throughout the year for program-eligible students. For students interested in transferring, visits to regional universities are scheduled each semester.

Academic Support

Academic Support at MCC is an active, comfortable space where students can discover, create and collaborate with peers. MCC and University Center students have access to numerous services and resources to assist with any course or subject, such as academic writing, math, English, technology, MLA/APA style, or test prep for Accuplacer, HESI, ACT/SAT, and more.

You will find computer workstations, group work areas and study rooms (with interactive projector technology designed for group work and flexibility), areas available for audio/video recording, a study room/classroom for groups and presentation practice, document scanning, tutors, webcams, workshops, and other resources to enrich learning and research. (Some resources are available online; see website for more information.)

For more information, call 254-299-8500 or visit Academic Support on the bottom floor of the Student Services Center, in room 105, or online at www.mclennan.edu/academic-support.

Services for Individuals with Disabilities

In accordance with the requirements of the Americans with Disabilities Act (ADA) and the regulations published by the United States Department of Justice 28 C.F.R. 35.107(a), MCC's designated ADA Co-Coordinators, Gene Gooch, Vice President of Instruction, and the Vice President of Student Success, shall be responsible for coordinating the college's efforts to comply with and carry out its responsibilities under ADA. Students with disabilities who may require accommodations in their classes must contact Renee Jacinto at 254-299-8122 or at her office, located on the second floor of the Student Services Center.

Support & Empowerment Program for Single Parents and Homemakers Re-entering the Workforce

This program provides special services for single parents and homemakers re-entering the workforce to help them achieve their goals at MCC. Services include counseling, support groups, workshops, referral to community services and limited funds to assist qualified technical majors with child care or transportation expenses. For more information, contact Pansy Lam at 254-299-8681.

Student Activities and Campus Life

MCC makes a special effort to create and maintain a friendly and democratic atmosphere on campus so that students may develop their maximum potential. Faculty, staff and administrators make every attempt to enhance learning by recognizing individual needs of students. Formal instructional programs, organized student activities and informal day-to-day relationships contribute to the total educational experiences of students.

The college encourages organizations, activities and programs that contribute to student growth and development. Each activity is open to all interested students. Student organizations, sponsored by faculty and staff members, complement academic development and provide a

rewarding college experience.

Student Activities

Student Activities plans programs to enhance the overall educational experience of students through development of, exposure to, and participation in social, cultural, intellectual, recreational and governance programs.

Campus Organizations

Formalized policies and procedures for organizing and operating campus groups are published in the student handbook, the Highlander Guide, which is available online at www.mclennan.edu/students/hguide/HighlanderGuide.pdf.

Campus student organization meetings and other student events are coordinated by the Office of Student Activities and are published on the Student Activities Web page at www.mclennan.edu/students/stuact. All student activities must be cleared through this office. Organizations approved by the college have the privilege of using college facilities and the college name in publicizing their activities. The following are examples of the types of organizations available for student involvement:

Honorary Societies: Excellence in general academic achievement and the attainment of notable proficiency in certain subject areas are emphasized. Phi Theta Kappa is the national junior college scholastic fraternity. Other honor societies include: Epsilon Delta Pi, national honor society for computer science in community and junior colleges; Psi Beta, the national honor society in psychology in community and junior colleges; Mu Alpha Theta, math honor society; and Sigma Kappa Delta, English honor society.

Subject-Area Groups: These groups emphasize various subject or professional areas of interest. These include Psi Beta (psychology), Nursing Student Association, Physical Therapy Association and Rho Kappa Pi (Respiratory Therapy Association).

Special-Interest Groups: These groups include students who are interested in theatre, art and multicultural activities.

Religious Groups: Members of the different religious faiths are permitted to meet as organized groups. Example: Baptist Student Ministry.

Student Government

The Student Government Association is the representative assembly elected by the students of McLennan Community College. The assembly acts as the liaison between students and faculty and staff, articulates student positions on issues that might affect MCC students, and plans and recommends social, cultural and educational activities. SGA makes recommendations regarding student interests and policies through the Coordinator of Student Activities and the Vice President, Student Services. In addition, Student Government members serve on committees,

assist with campus events, attend leadership conferences and volunteer in their community. Elections are held each spring semester at the Highland Games.

Traditions

The rich and colorful Scottish heritage of Central Texas is the basis for some of the college's traditions. The Highlander is the official mascot, and the colors of the McLennan tartan are the official colors of the college. Orange, blue and white are often used to symbolize the tartan. An annual event on campus is the Highland Games, which includes various competitions and events sponsored by Student Activities and student organizations.

Intercollegiate Athletics

The athletic teams of McLennan Community College are among the most outstanding in junior college competition, with teams consistently ranked in the top 20 in national polls in each intercollegiate sport. Programs include baseball, men's and women's basketball, dance, men's and women's golf, and softball.

MCC is a member of the Northern Texas Junior College Athletic Conference and the National Junior College Athletic Association. The MCC athletic teams provide a positive image for the college throughout the community and championship-caliber teams for interested community members.

Visual and Performing Arts

The college offers a variety of cultural options for student involvement and the community's enjoyment. Offerings include concerts, student and faculty recitals, stage productions, and art exhibitions. For information, contact the Ball Performing Arts Center Box Office at 254-299-8200 or visit the Visual and Performing Arts website at www.mclennan.edu/divisions/FineArtsDiv/.

Music performances include the MCC Chorale, Wind Ensemble, Stage Band, Opera Workshop, rock bands, country bands, and the brass, percussion, voice, jazz, guitar and woodwind ensembles. These ensembles perform for the student body and various community groups. MCC also sponsors the Waco Community Band and the Waco Jazz Orchestra, whose concerts are enjoyed by the community throughout the year. With 27 Steinway pianos on campus, MCC also holds the prestigious designation of being an All-Steinway School.

The Theatre department presents four major productions each year, including a major musical production.

The Visual Arts department provides several exhibitions each year, as well as annual juried competitions for MCC students and area high school students.

Library

The MCC Library, located in the Learning Technology Center, provides a wide range of materials for research and study. The LTC combines traditional library collections with electronic databases and other digital research tools. The collection has more than 79,000 volumes, approximately 350 periodical and newspaper subscriptions, 60,000 full-text electronic books,

1,200 full-text electronic reference works, and access to 20,000 full-text electronic journals and magazines. The collection is designed to support the courses offered by the college and to provide general reference materials and information. The online library catalog provides access to the library's collection of books, reference books and periodicals. Book stacks are open to all.

The library also offers more than 175 computers for Internet access and subscribes to numerous periodical indices and full-text databases on the Internet to facilitate students' research needs. Students have access to word processing software and laser printers on library computers, as well as copiers and scanners. Five quiet study rooms with computers provide space for students to study or meet in small groups. Library staff members are available to assist students with research needs and use of the computers.

Detailed information on use of the library is contained in the [Highlander Guide](#) and on the library's Web page at www.mclennan.edu/library.

Food Services

A full-line cafeteria, the Highlander Café, is located in the Learning Technology Center. The MCC Tartan Café, located in the Community Services Center, offers selected entrees daily. The Thistle Stop, located in the Dennis F. Michaelis Academic Center, offers a variety of ready-to-go items. Vending machines also are available in most campus buildings.

Shuttle Service

Along with providing campus parking, McLennan Community College also offers shuttle service. Students may park at the Community Services Center (CSC) parking lot nearest College Drive and ride the shuttle to designated stops on campus. The shuttle runs approximately every 10 to 15 minutes, Monday through Friday. For the return trip to the CSC lot, the shuttle stops at the Learning Technology Center, Dennis F. Michaelis Academic Center and Enrollment Services Center. For more information about the MCC shuttle service, contact Campus Police at 254-299-8864.

Child Development Center

The college operates a Child Development Center on campus as a laboratory site for Child Development majors and other students. Enrollment of children is open to students, faculty/staff and community families.

The center provides a full-day Child Development program in the Community Services Center. For information about enrollment, hours of operation and fees, call the center at 254-299-8720.

Emergency First Aid

An individual requiring first aid on campus should contact Campus Police at 254-299-8911.

Emergency call boxes are located at strategic places around campus. Red emergency phones in each building are available for students, staff and visitors to reach MCC campus police.

Parking and Traffic Regulations

All vehicles must be registered at the time a student officially registers for classes. All vehicles parked on campus property must have a valid MCC parking sticker. Campus traffic and parking regulations are further outlined in the [Highlander Guide](#).

Student Health Insurance

The college has made arrangements with an insurance company for students to obtain low-cost health insurance. Additional information and application forms are available in the Human Resources Office, located on the first floor of the Administration Building.

Campus Smoking Policy

The use of tobacco products is prohibited in all MCC buildings and within 30 feet of all building entrances.

The use of tobacco products is only permitted at designated smoking areas on the MCC grounds. Designated smoking areas are no closer than 30 feet to building entrances and will be identified and clearly marked as smoking areas. Receptacles for extinguishing smoking materials will be placed in appropriate locations on campus.

The smoking policy applies to all employees, students, independent contractors and visitors.

General Conduct Policy

The following policies will govern the conduct of all persons: (1) on the McLennan Community College campus or other property or facilities owned or used by the college for any purpose, wherever situated, or (2) while engaging in college-sponsored activities, wherever occurring. These policies shall apply to college students, employees of the college, and visitors, including invitees.

All persons shall conduct themselves on college premises, or while engaging in college-sponsored activities, in a manner consistent with:

1. All local, state, and federal laws and all rules, regulations, and policies of the Board of Trustees and administrative officials of the college.
2. The lawful exercise of the rights and freedoms of others.

The President of the college, or his/her representative, shall be responsible for initiating and assuring prompt enforcement of these regulations, including the application of remedies and the institution of appropriate disciplinary or legal proceedings. A complete copy of the policy is printed in the [Highlander Guide](#).

Continuing Education & Community Partnerships

At McLennan Community College, “community” is more than just the school’s middle name. It also guides MCC’s approach to developing new programs and services. For nearly four decades, the college has aimed to serve its community by learning about the needs of students and local groups in order to develop and adapt programs to benefit our area.

The resulting community partnerships and program initiatives include continuing education opportunities, extended campus concepts, business partnerships, and agreements with area school districts and other colleges — all ways MCC plays a pivotal role in helping individuals and the community reach their full potential.

Continuing Education

The dynamic courses offered through MCC’s Continuing Education department offer opportunities to help people enrich their leisure time and develop creative and workplace skills. Through these classes, students of all ages have multiple opportunities for lifelong learning.

Continuing Education classes are open to the public and don’t require admission to the college.

Opportunities include:

- Community education and personal enrichment classes, including cooking, fitness, art, music, languages and sports.
- Career training for general workforce skills, health and human services careers, law enforcement training, and emergency medical services preparation.
- Kids College, a program of educational enrichment and fun classes, with opportunities offered on the MCC campus and at Highlander Ranch.

Registration

Registration opens when course schedule information is released and, in most cases, continues through the first class day. Many courses are limited in size, and registration is on a first-come, first-served basis. Occasionally, classes may be canceled because the minimum enrollment has not been met.

Students may register for Continuing Education courses online at www.MCCandYou.com, by calling 254-299-8888 or in person at the Continuing Education Office, located in the Community Services Center at 4601 N. 19th St. Registration is not complete until fees are paid by cash, check or credit card.

Current course offerings and fees may be obtained by writing MCC Continuing Education (1400 College Drive, Waco, Texas 76708), by calling 254-299-8888 or by visiting the MCC Continuing Education website at www.MCCandYou.com.

Continuing Education Refund Policy

Various types of classes have different refund schedules. A complete refund policy is available for Continuing Education courses through the Financial Services Office located in the Administration Building.

Students who are dropped from a course for academic, disciplinary and/or attendance reasons will not be eligible for a refund and may not audit the remainder of the course.

Community Programs

Community Programs offers a wide variety of enriching and lifelong learning opportunities for adults of all ages. Courses are open to the public and are offered several times per semester and per year. Course topics include:

- Arts, crafts and hobbies
- Music and dancing
- Health, sports and fitness
- Home computer use
- Activities for those ages 55 and older
- Cooking, food and diet
- Outdoors
- Special interests
- Trips and special events

For more information about Community Programs classes, call 254-299-8888 or go to www.MCCandYOU.com to browse the latest schedule.

Corporate Training

The Corporate Training team partners with business and industry to develop custom training opportunities to best suit employers' needs. Services include:

- Assessing employees' skills to develop training programs.
- Providing employee training at client sites, MCC classrooms and online through distance education.
- Developing industrial partnerships to create new workforce opportunities.
- Identifying grant and other funding opportunities to help new and expanding businesses grow.
- Offering open-registration classes in a wide range of subject areas.

The Corporate Training department offers a wide array of courses on a variety of topics utilizing curriculum from some of the leading courseware providers, including Achieve Global, AMA, DDI and Ken Blanchard. Multiple topics are offered in each of these main subject areas:

- Customer Service
- Leadership and Management Development
- Computer Training in Microsoft Office, Adobe and Cisco
- Safety Training (OSHA, forklift, first aid, CPR, SafeStart Safety)
- Industrial Training (Electrical, Hydraulic, Pneumatic, HVAC)
- Workplace Spanish

For more information, call 254-299-8888 or go to www.MCCCorporateTraining.com.

Health & Human Services

The Health & Human Services Continuing Education classes are an integral part of the college's service to area health and human services professionals and agencies. Among the classes conducted on the MCC campus, or at off-campus locations, are courses to enter health and human services professions and activities to meet relicensure and recertification requirements in a number of health and human services specialties.

Preparatory vocational courses to enter health and human services professions include: Certified Nurse Aide, Certified Medication Aide, Activity Director, Pharmacy Technician, EKG Technician, Medical Billing and Coding Specialist, and Massage Therapist.

Other Health Care classes include:

- Return to Nursing course for RNs/LVNs who need a state-approved course to return to the nursing field
- CPR for health care professionals

Current continuing education activities are offered for relicensure and/or recertification to: registered nurses, licensed vocational nurses, certified respiratory care technicians, physical therapist assistants, nursing home administrators, psychologists, activity directors, social workers, teachers, licensed professional counselors and many others. For more information, please call 254-299-8888 or visit www.MCCandYOU.com.

Law Enforcement Academy

The Law Enforcement Academy offers three courses for individuals wishing to become certified as a peace officer or corrections officer (jailer) by the Texas Commission on Law Enforcement Officers Standards and Education (TCLEOSE). The Basic Peace Officer Certification course is a 20-week course with hands-on and classroom training. The Basic Correction Certification course is a four-week class. For more information, call 254-299-6529.

Paramedicine and EMT

MCC offers courses leading to designation as a certified provider of emergency medical services (EMS), as well as remediation and recertification courses to meet licensure and certification for EMS professionals. For more information, call 254-299-8707.

Kids College

MCC serves the community with a variety of Kids College summer courses and camps designed for fun, enriching and educational experiences for students ages 8-17. Throughout the remainder of the year, Community Programs frequently offers additional classes for youths. For more information, visit www.MCCKidsCollege.com.

Other MCC Community Services

MCC offers a variety of other educational and enrichment opportunities to the community:

Small Business Development Center (SBDC)

As part of its economic development efforts, MCC sponsors the Small Business Development Center (SBDC) to help small businesses in Central Texas survive, grow and prosper. Funded in part by a grant from the U.S. Small Business Administration, the SBDC provides free, confidential counseling; low-cost training; and technical assistance to current and prospective small business owners in a seven-county area. SBDC also helps owners do business and acquire contracts with government agencies. SBDC is located in MCC's Community Services Center (4601 N. 19th St.) in Waco. For more information, call 254-299-8141 or go to www.mccsbdc.com.

RSVP

The Heart of Texas RSVP recruits, trains, manages and supports volunteers over the age of 55 in non-profit organizations throughout Bosque, Falls, Freestone, Hill, Limestone and McLennan counties. The mission of RSVP is to meet critical national and local community needs through citizen service and provide services that strengthen and expand non-profits. While MCC is the primary sponsor of the program, RSVP is also funded through local, state and federal grants from such sources as foundations, the Texas Health & Human Services Commission, and the Corporation for National & Community Service. For more information, contact the RSVP office at 254-299-8577 or go to www.mclennan.edu/departments/rsvp.

High School Outreach

College Credit in High School

Each year approximately 1,200 area high school students earn college credit while still enrolled in high school. These students attend college classes at their local high schools, on MCC's campus, on the Internet or through two-way interactive video. Through courses offered via the Internet or interactive video, several smaller schools have been able to join forces with each other and MCC to allow their student to take such courses as college algebra and other advanced classes. As a result, local young people are able to graduate from high school with nearly a semester of college credit.

Students may take courses for dual credit, which earns students both high school and college credit for the same college course. They may also enroll in courses for college credit only by

attending MCC as part of the college's early admission program. For more information about the dual credit program, call 254-299-8937. For more information about the early admission program, contact Student Development at 254-299-8614.

Upward Bound

This college preparatory program helps high school students improve study skills and gain essential skills to be successful in higher education. The program serves ethnic minorities, students from low-income households or those who will be the first in their family to receive a bachelor's degree. Specifically, the program serves inner-city students from five target schools: A.J. Moore, Waco High, University High, Connally High and LaVega High. For more information, contact the Upward Bound Office at 254-299-8756 or go to www.mclennan.edu/community/ubound.

Adult Basic Education

MCC is one of the most active voices in combating illiteracy in Central Texas. In 2000, MCC's Adult Basic Education Program was named one of the top 10 in the nation by the U.S. Department of Education. The Adult Education Division offers literacy, general educational development (GED), English as a Second Language (ESL), family literacy and citizenship classes at approximately 40 sites throughout McLennan, Bosque, Falls and Hill counties.

The Family Learning Center uses an intergenerational approach to literacy. In this on-site program, parenting skills are incorporated into basic skills study. This center provides lessons using acclaimed software, as well as one-on-one traditional teaching methods.

The Adult Basic Education Program is located in the MCC Community Services Center at 4601 N. 19th St. in Waco. For more information, call 254-299-8777 or go to www.mclennan.edu/departments/aed.

Bosque River Stage

The Bosque River Stage is an outdoor venue that hosts star-studded entertainment acts in the spring, fall and summer months. The amphitheater provides 530 theater-style seats with additional seating on adjacent grassy areas along the banks of the Bosque River. MCC students studying the arts have a real-life lab for exploring performance and venue and concert management. Professional-quality lighting and sound equipment, restrooms, concessions, and full access for the disabled make this a first-class entertainment setting. For more information, call 254-299-8283 or visit the website at www.mclennan.edu/brs.

Conference Center

MCC offers this state-of-the-art facility for banquets, conferences, lectures, receptions, seminars, teleconferences and workshops. It's conveniently located right off of North 19th Street in the Community Services Center. Several floor plans are available to accommodate groups of a dozen to 500. Each room has individual climate control, sound and lighting panels, as well as

audio-visual equipment for impressive presentations. Catering options are also available. For more information and a map to the Conference Center, call 254-299-8586 or go to www.mclennan.edu/community/conference.

The Northwood House

This historic home has been renovated into a facility that offers an intimate setting for small groups. The Northwood House has been elegantly restored to reflect its original old southern charm and offers seating for up to 80 guests. It also includes a beautiful outdoor area with a patio, gazebo and landscaped grounds. Catering is available. For more information, call 254-299-8586 or go to www.mclennan.edu/community/northwood.

Highlander Ranch

The 200-acre Highlander Ranch is located about five miles from campus. MCC's Veterinary and Agriculture credit programs are located on the Ranch. Additional non-credit programs and services include: horseback lessons, equine boarding and numerous Continuing Education courses. Ranch facilities include a large covered arena, meeting rooms, pastures and a large tree-covered picnic area that are available for rent. For more information and a map to the Ranch, call 254-299-8511 or visit the website at www.HighlanderRanch.com.

Emergency Services Education Center (ESEC)

This state-of-the-art building was constructed specifically for training individuals in emergency services fields. The ESEC was built in conjunction with the city of Waco, McLennan County and local municipalities to provide a central location for training emergency professionals. The building includes specialized training facilities for MCC's fire academy, police academy, and EMS and criminal justice programs. The ESEC was built to meet LEED standards, which is the rating system for green buildings used by the U.S. Green Building Council. For more information and a map to the ESEC, visit www.mclennan.edu/esec.

Family Health Center Community Clinic

MCC partners with the Family Health Center to offer a Community Clinic on the college's campus. The Family Health Center operates this primary care clinic for the college's students and personnel and the community. McLennan County residents may be eligible for discounted medical fees if they meet the necessary criteria.

Alternative Teacher Certification Program

This program trains individuals with bachelor's degrees who desire to enter the teaching profession. Upon successful completion of MCC's program and state mandated certification exams, individuals will be certified to teach in Texas schools. McLennan Community College's Alternative Teacher Certification program is accredited by the State Board for Educator Certification (SBEC)/Texas Education Agency (TEA).

Admission Requirements

Applicants seeking Texas alternative teacher certification at MCC should meet the following criteria:

1. Hold a bachelor's degree from an accredited institution of higher learning.
2. Have a 2.5 GPA on the last 60 hours toward a bachelor's degree or accumulative GPA.
3. Have passing scores on the **THEA**: Reading-230, Mathematics-230 and Writing-220; **Accuplacer**: Reading Comprehension-78, Elementary Algebra-63, Sentence Skills-80 and Written Essay-6; **ASSET**: Reading Skills-41, Elementary Algebra-38, Writing Skills (objective)-40 and Written Essay-6; **COMPASS**: Reading Skills-81, Algebra-39, Writing Skills (objective)-59 and Written Essay-6; **be exempt from the THEA** under provisions of the Texas Success Initiative in 2002; or **pass the required State Content Exam**.

Individuals can obtain a teaching certificate in one of the following teaching contents:

- Art EC-12
- Bilingual Education Supplemental EC-12
- Business Education (Secondary)
- English as a Second Language Supplemental EC-12
- English Language Arts and Reading (Secondary)
- Generalist EC-6
- Generalist 4-8
- Health Education EC-12
- Health Science Technology Education (Secondary)
- History (Secondary)
- Life Science (Secondary)
- Math (Secondary)
- Music EC-12
- Physical Education EC-12
- Science 4-8
- Science (Secondary)
- Social Studies 4-8
- Social Studies (Secondary)
- LOTE Spanish EC-12
- Special Education EC-12
- Speech 7-12
- Technology Application (Secondary)
- Technology Education (Secondary)
- Theatre Arts EC-12
- Trade & Industry Education

Speakers Bureau

The MCC Speakers Bureau comprises many of the college's knowledgeable faculty and staff, who offer their services as speakers on a myriad of topics. Local organizations and clubs can find guest speakers or musical groups free of charge. For more information, go to www.mclennan.edu/community/speakers/.

University Center at MCC

The University Center is a partnership between MCC and universities that agree to offer bachelor's, master's or doctoral degree programs on MCC's campus. The universities are responsible for their degree programs and provide faculty members to instruct each course. The courses are taught by full-time professors or visiting faculty and are offered in a face-to-face, two-way interactive or online format. The courses are offered in a predictable sequence so that a student can earn a degree within a designated time period if he or she follows the proper

course sequence and successfully completes each course. Classes are offered during the day, in the evenings and on weekends to accommodate students' busy schedules.

Each degree program can be completed by taking classes on the MCC campus or online so that students do not have to commute out of McLennan County. However, students in some University Center programs may choose to take a course at the home university campus in order to finish their degree ahead of schedule.

The University Center at MCC is concerned with the junior- and senior-level courses needed to complete a bachelor's degree in a chosen field. Graduate programs are also offered in a variety of fields. Advisors are available for each degree that is offered. Each bachelor's degree plan is designed to incorporate the core curriculum from McLennan Community College to provide a seamless transition to the four-year degree of choice.

Scholarships may be available for students taking classes through the University Center. To learn more, students can contact the university from which they plan to receive their degree.

For the most current list of degrees available and contact information, visit the University Center website at uc.mclennan.edu.

Degrees available through the University Center at MCC

Tarleton State University

Bachelor of Applied Arts and Sciences in Business

This business degree is attractive to students who complete the MCC Business Management associate degree and/or who have been in the workforce (or applicable military experience) for at least five years. The student can qualify for up to 36 hours of college credit toward this bachelor's degree for approved occupation specialization experience.

Bachelor of Applied Arts and Sciences – Manufacturing and Industrial Management

This degree, which has a focus on engineering technology, will be appealing to students who have completed an A.A.S. degree program in computer graphics, engineering technologies, or transportation and services clusters. It allows the student the opportunity to take advantage of up to 48 hours of additional occupational specialization training. The core classes may be completed at MCC, along with the major requirement courses being taught online.

Bachelor of Business Administration in Computer Information Systems

This 120-hour degree program emphasizes support courses by including a variety of business disciplines, including computer information systems, general business, finance, management and marketing areas. Graduates of this degree program have been awarded jobs in many areas, such as database administrators, network analysts, programmers, technology directors and IT specialists.

Bachelor of Business Administration in Management

This 120-hour degree program provides a broad-based education in business management knowledge, combined with a strong foundation of liberal arts and sciences. The Tarleton BBA in management is nationally accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

Bachelor of Business Administration in Marketing

This 120-hour ACBSP nationally accredited degree prepares students for the fast-changing, fast-growing field of marketing. A strong liberal arts and sciences curriculum is combined with advertising, designing and marketing knowledge – which uncovers a vital and rewarding area in business.

Bachelor of Business Administration in Human Resources Management

This 120-hour degree program provides a broad-based education in human resource management and business, combined with a strong foundation of liberal arts and sciences. All Tarleton BBA degree programs are nationally accredited by the Association of Collegiate Business Schools and Programs (ACBSP).

Bachelor of Business Administration in Accounting

For students preparing to become certified public accountants, the Public Accountancy Act of 1991 requires that applicants must have completed at least a baccalaureate degree and not fewer than 150 semester credit hours of recognized courses. Courses included in the Bachelor of Business Administration in Accounting are accepted toward this requirement. This is a 120-hour degree consisting of core curriculum requirements, 24 hours of additional business related courses, and 54 hours of TSU upper-level required accounting and College of Business Administration courses. Courses for this degree option are available in the traditional classroom setting, online or through two-way interactive methods.

Bachelor of Science in Agricultural Services and Consumer Sciences (Agricultural Extension/Industry Option or Agricultural Science with Teacher Certification Option)

Students are able to complete the core curriculum and additional agriculture courses at MCC in order to transfer directly to Tarleton State University. Those wishing to obtain teacher certification as an agriculture science teacher or who desire to interact in the community in the agricultural industry and extension areas will find these degree options very desirable. Internships are also included to further the student's course of study.

Bachelor of Science in Applied Science in Business Administration

This business degree has a triple emphasis: a broad-based education through the MCC core curriculum; up to 36 semester hours of transferred credit for technical training (work experience not eligible) from most any technical discipline; and a focused development in business knowledge in upper-level courses from Tarleton. This degree will be valuable if you want to work in a business area related to your academic discipline and technical expertise.

Bachelor of Science in Criminal Justice

Complete two years at MCC in the Criminal Justice program, then transfer directly into one of the Tarleton bachelor's degree options. Just a few of the career options for well-trained people in this field are police and sheriff's departments, prisons and correctional facilities, public safety,

alcoholic beverage control, parks and wildlife, crime bureaus, juvenile agencies, and investigative departments. On the federal level, criminal justice graduates may work in border patrol, customs, drug enforcement, or immigration and naturalization. There are also countless private opportunities. In many law enforcement careers, the higher the academic degree you hold, the greater the potential for advancement to command positions.

Bachelor of Science in Family and Consumer Science: Child and Family Studies

Tarleton offers this popular degree through the Human Sciences division. Students pursuing this degree will complete core requirements at MCC, as well as specialized course work that applies to the Child Development A.A.S. degree offered through MCC. When students enroll in upper-level coursework with Tarleton, they will continue to learn more in-depth areas of the human sciences, focusing in the areas of parenting, family, child studies and management.

Bachelor of Science in Interdisciplinary Studies with 4-8 Middle School Math/ESL Certification

Students completing this degree plan and making successful scores on the ExCET/TEXES exams will receive teacher certification in Texas for 4-8 Middle School Math/ESL. After completing the required freshman and sophomore hours at MCC, students complete the remaining 48 junior and senior hours, which include the teaching internship and student teaching, through Tarleton in Waco.

Bachelor of Science in Interdisciplinary Studies with 4-8 Middle School Language Arts/Social Studies/ESL Certification

This degree provides students with the opportunity to earn a middle school teaching degree in two valuable areas while also obtaining ESL certification. A total of 77-82 hours may be completed with MCC, and the remaining 48 junior- and senior-level hours are completed with Tarleton. Internship and student teaching are both completed in Waco. Students are also required to take the ExCET/TEXES Exams and make appropriate scores before beginning their teaching careers.

Bachelor of Science in Interdisciplinary Studies, EC-6 Generalist with ESL

This degree prepares students to become highly qualified teachers for the state of Texas and the nation. A total of 77-82 hours may be completed with MCC, and the remaining junior- and senior-level hours will be completed with Tarleton. Successful completion of the ExCET/TEXES exams is required in order to receive teacher certification. All-level Special Education Certification or Bilingual Generalist options are also available with this degree.

Bachelor of Science in Liberal Studies

This degree is designed for students who have completed numerous advanced credit hours but have not met the requirements for a major and degree in an academic area. To complete the Liberal Studies degree through the University Center, the student will be expected to designate an emphasis of 18 hours, a support field of nine hours and an additional 33 elective hours, all at an advanced level. Choices include criminal justice, psychology, business and sociology.

Prospective students must meet with the Tarleton academic advisor to discuss their previous course work and determine how the courses will meet Tarleton's requirements for this degree.

Bachelor of Science in Psychology

The Bachelor of Science in Psychology is intended for students who wish to prepare for work or advanced study in psychology. After completing the required credit hours at MCC, Tarleton will require an additional 43 hours of upper-level course work. All of the courses will be available either in classrooms at MCC or online.

Bachelor of Social Work

This degree prepares graduates for licensure opportunities in the state of Texas as a qualified social worker. With the Bachelor of Social Work, students may have the opportunity to advance in careers with both public and private institutions in areas such as substance abuse programs, mental health facilities, community action and domestic violence services, and many others. A 2.5 overall GPA is required for entrance into the Social Work program. Tarleton accepts 76 hours of course work from MCC. An additional 45 hours of upper-level course work is required from Tarleton to complete degree requirements.

Master of Business Administration

The Tarleton MBA program is a face-to-face program taught on the MCC campus and will enhance the student's general business training to prepare them for executive-level positions. Each student's degree program is designed to provide opportunities for developing leadership and interpersonal and decision-making skills.

Master of Criminal Justice

The 36-hour Master of Criminal Justice (MCJ) is a professional track curriculum designed in consultation with criminal justice professionals. A combination of face-to-face and online courses provides an opportunity for students to complete the program and balance full-time employment. The program presents graduates with academic studies, coupled with the management and leadership skills necessary to advance in the competitive field of criminal justice.

Master of Education in Counseling

The Master of Education in Counseling is a 48-hour school counselor option that enables graduates to be eligible for the Professional Counselor License (LPC). Students must have accrued at least two years of teaching experience in the public school setting, grades K-12, in order for the school counseling certification to be granted.

Master of Education in Curriculum & Instruction

The Department of Curriculum and Instruction offers the Master of Education in Curriculum & Instruction designed to help educators expand their knowledge and skills and to complete certification renewal requirements in their respective fields. The program requires a minimum of 36 hours of course work designed to provide educators with advanced professional development in pedagogy, subject matter and/or instructional leadership.

Master of Educational Administration with Principal Certification and Post-Master's Principal Certification and Superintendent Certification

These degree and certification programs are designed to prepare administrators for a variety of roles and responsibilities at the master's degree level. The Principal's Certificate qualifies one to hold campus-level administrative positions in the school, including the principalship. After successfully completing the M.Ed. degree in Educational Administration, a student is then

eligible to apply for the Tarleton doctoral program (Ed.D.) in educational leadership. Many students, after successfully completing a Principal Certification Program, will opt to continue on to the Superintendency Certification Program. This is an additional 15 hours, 12 of which will satisfy the doctoral program requirement.

Master of Science in Counseling Psychology

The Master of Science in Counseling Psychology allows students to obtain the Licensed Professional Counselor designation. Students pursuing this 48-hour degree will be provided options in counseling psychology and marriage and family. Curriculum includes career counseling and guidance, psychopathology, group therapy, and human development.

Master of Science in Human Resource Management

This is a 36-hour degree that will provide the student with a background in the major functional areas of human resource management. The program will increase students' knowledge, skills and abilities in the field, as well as their capacity to advance in the profession.

Master of Science in Information Systems

The Master of Science in Information Systems is designed to develop a student's skills as an information systems professional. Those pursuing this degree will complete a comprehensive 36-hour program that includes course work relating to telecommunications, systems analysis, database management and research methods in information systems. Upon completion of the course work, a comprehensive exam must be satisfactorily completed. This degree is offered totally online.

Master of Science in Management and Leadership

This degree is a 36-hour program designed for students aspiring to, or continuing in, general management and leadership roles in for-profit and not-for-profit businesses. The major focuses are leadership and change. This degree is especially attractive to managers already working in the field or those seeking management positions, wanting to facilitate a change of careers or to advance in a current position.

Doctor of Education in Educational Leadership

This Ed.D. program from Tarleton is designed to prepare highly qualified scholar-practitioners for public school leadership. The Ed.D. in Educational Leadership offers a rich theoretical knowledge base as the foundation for the development of visionary leaders for the Pk-12 environment. The degree combines an individualized program of study with specialized course work and research, and it can be completed in three years and a summer.

Texas Tech University

Bachelor of Arts/Bachelor of Science in University Studies

The University Studies degree allows students to obtain either a Bachelor of Arts or Bachelor of Science using any three of a number of concentrations available in all college departments at

Texas Tech. Academic advisors assist students in choosing a combination of concentrations that focus on their educational goals. Students pursuing this flexible degree also have the ability to become highly certified in various teaching areas, should they choose to do so. A minimum of 54 hours of upper-level course work is required for graduation.

Texas Tech University Health Sciences Center

Bachelor of Science in Nursing (RN to BSN)

The Texas Tech Health Sciences Center School of Nursing offers the RN to BSN undergraduate program. A student may earn an associate degree in nursing at MCC to become an RN and then transfer into an accelerated program in order to complete a BSN. Courses are available online for easy access, and the program can be completed in two semesters or 30 semester hours of credit.

Master of Science in Nursing (RN to MSN)

The RN to MSN Leadership in Nursing Education program is offered through the Texas Tech Health Sciences Center School of Nursing. This program is designed for students who hold their RN license and wish to pursue an MSN. Students obtaining this degree will not receive a BSN degree but will progress directly toward graduating with an MSN degree. Courses for this degree are available only online and include 54 semester credit hours.

The University of Texas Medical Branch/Galveston

Bachelor of Science in Clinical Laboratory Science

This program allows MCC graduates with an Associate of Applied Science in Medical Laboratory Technician to transfer their credits directly into the UTMB Bachelor of Science in Clinical Laboratory Science program.

The University of Texas at Brownsville

Bachelor of Applied Technology (BAT) in Computer Information System Technology (CIST)

The BAT CIST track prepares individuals for employment in industry, business, banking, and other services or fields where computer-related knowledge, competencies and skills are essential. The student will complete the core curriculum plus up to an additional 35 credit hours in a related technical field at MCC. The BAT CIST requires an additional 33-37 upper-level credit hours from UTB, which are totally online.

Bachelor of Applied Technology (BAT) in Health Services Technology (HST)

The BAT HST track is designed for individuals who would like a bachelor's degree and continued training in allied health technical areas. It prepares the student for careers in mid-management in health service and health corporate settings with responsibilities in management and extensive supervision and for instructional responsibilities in health services training and other related fields. The student will complete the core curriculum and up to 36 credit hours in a related technical field at MCC. An additional 33-36 upper-level credit hours are taken totally online from UTB.

Midwestern State University (MSU)

Bachelor of Science RRT to BSRC

Students who have completed their respiratory care technology training with MCC have the option to complete a Bachelor of Science in Respiratory Care through the University Center.

Once a student has completed the RRT examination administered by the National Board for Respiratory Care, they may submit credentialing verifications to Midwestern State University, complete their core curriculum at MCC and then finish 32 upper-level hours with MSU in order to complete their BSRC. All courses for this degree are taught either on the MCC campus or online.

Academic Policies

Like all other colleges, McLennan Community College follows policies and procedures that guide grades, class attendance, scholastic probation, degree plans, credit by examination and other subjects. These instructional guidelines, which are established by the college and sometimes by governmental regulation, are discussed in this section.

This section also lists organizations and agencies that provide accreditation, recognition and approval for MCC's programs.

Degree Requirements

McLennan Community College offers four degrees.

Associate of Arts (A.A.) degree and Associate of Science (A.S.) degree

These degrees are awarded to students who complete 60 hours of credit in college-level courses. The courses are often called "transfer" programs because they provide the two-year foundation for transferring to a four-year college and earning a bachelor's degree (see [Requirements for the A.A. Degree](#)). For some areas, students can complete an approved field of study curriculum as part of their degree. Such a [field of study](#) curriculum will transfer as a designated block of courses to public universities in Texas.

Associate of Arts in Teaching (A.A.T.) degree

The A.A.T. degree is a Texas Higher Education Coordinating Board-approved collegiate degree program consisting of lower-division courses that transfer to baccalaureate programs leading to initial Texas teacher certification. This degree is awarded to students who complete a minimum of 60 hours of college course work that includes all of the requirements for the A.A.T. degree (see [Requirements for the A.A.T. Degree](#)).

Associate of Applied Science (A.A.S.) degree

This degree is awarded to students who complete a minimum of 60 hours of college work in one of MCC's workforce programs, including 15 hours of general education credit (see [Requirements for the A.A.S. Degree](#)). The degree is awarded to students who seek immediate employment in the workforce or who may transfer to a four-year college.

Graduation Requirements for the Associate Degree

Each student's course of study leading to an associate degree is determined by the degree requirements in effect at the time the student first enrolls in college-level courses at MCC. From the date of that initial enrollment, the student has five years to complete an associate degree (A.A., A.A.S., A.A.T. or A.S.). After five years, the student will be subject to any new degree requirements that may be in effect when the student next enrolls. Exceptions to these requirements must be approved by the appropriate Dean.

Certificate of Completion

A certificate is awarded to students who complete specified requirements as outlined in programs awarding certificate recognition. There are two levels of certificates: *Level One* requires completion of 15 to 42 semester hours; *Level Two* requires completion of 43 to 59 semester hours.

Transfer Information

All lower-division academic courses shall be fully transferable among public institutions and must count toward the same degree at any public college or university in Texas.

- a. Each institution of higher education shall identify in its undergraduate catalog each lower-division course that is substantially equivalent to an academic course listed in the current edition of the Lower Division Academic Course Guide Manual by the Texas Higher Education Coordinating Board.
- b. Each university must offer at least 45 semester credit hours of academic courses that are substantially equivalent to courses listed in the Lower Division Academic Course Guide Manual, including those that fulfill the lower-division portion of the institution's Core Curriculum.
- c. All public colleges and universities must accept transfer of credit for successfully completed courses identified in (a) and (b) as applicable to an associate or baccalaureate degree in the same manner as credit awarded to non-transfer students in that major.
- d. Each institution shall be required to accept in transfer into a baccalaureate degree the number of lower-division credit hours in a major that are allowed for its non-transfer students in that major; however:
 1. No institution shall be required to accept in transfer more credit hours in a major than the number set out in the applicable Coordinating Board-approved Transfer Curriculum for that major, as prescribed by the current issue of the Coordinating Board's guide to transfer curricula and transfer of credit, *Transfer of Credit Policies and Curricula*.
 2. In any major for which there is no Coordinating Board-approved Transfer Curriculum, no institution shall be required to accept in transfer more lower-division course credit in the major applicable to a baccalaureate degree than the institution allows its non-transfer students in that major.
 3. A university may deny the transfer of credit in courses with a grade of D as applicable to the student's field of study courses, core curriculum courses or major.
- e. All senior institutions of higher education in Texas shall provide support services for transfer students equivalent to those provided to non-transfer students regularly enrolled at the institutions, including an orientation program for transfer students equivalent to that

provided for entering freshman enrollees.

- f. No university shall be required to accept in transfer or toward a degree more than 66 semester credit hours of academic credits earned by a student in a community college. Universities, however, may choose to accept additional credit hours.

Penalty for Noncompliance with Transfer Rules

If it is determined by the Coordinating Board that an institution inappropriately or unnecessarily required a student to retake a course that is substantially equivalent to a course already taken at another institution, in violation of the provisions of section 5.372, formula funding for credit hours in the repeated course will be deducted from the institution's appropriations.

Resolution of Transfer Disputes for Lower-Division Courses

- a. The following procedures shall be followed by public institutions of higher education in the resolution of credit transfer disputes involving lower-division courses:
 - 1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
 - 2. A student who receives notice as specified in subsection (1) of this section may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.
 - 3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with Coordinating Board rules and guidelines.
 - 4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of Higher Education of its denial and the reasons for the denial.
- b. The Commissioner of Higher Education or the Commissioner's designee shall make the final determination about a dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.
- c. Each institution of higher education shall publish in its course catalogs the procedures specified in subsections (a), (b), (d) and (e) of this section.
- d. The Texas Higher Education Coordinating Board shall collect data on the types of transfer disputes that are reported and the disposition of each case that is considered by the Commissioner or the Commissioner's designee.

- e. If a receiving institution has cause to believe that a course being presented by a student for transfer from another school is not of an acceptable level of quality, it should first contact the sending institution and attempt to resolve the problem. In the event that the two institutions are unable to come to a satisfactory resolution, the receiving institution may notify the Commissioner of Higher Education, who may investigate the course. If its quality is found to be unacceptable, the Texas Higher Education Coordinating Board may discontinue funding for the course.

Guarantee for Job Competency

1. The graduate must have earned the Associate of Applied Science degree or Certificate of Completion beginning August 1, 1992, in a workforce program identified in the college's General Catalog.
2. The graduate must have completed requirements for the Associate of Applied Science degree or Certificate of Completion with the McLennan Community College system, with a minimum 75 percent of credits earned at MCC, and must have completed the degree or certificate within a four-year time span from initial enrollment.
3. Graduates must be employed full time in an area directly related to the area of program concentration as certified by the appropriate administrative officer.
4. Employment must commence within 12 months of graduation.
5. The employer must certify in writing that the employee is lacking entry-level skills identified by MCC as program-exit competencies and must specify the areas of deficiency within 90 days of the graduate's initial employment.
6. The employer, graduate and assigned representative(s) of the college will develop a written educational plan for retraining.
7. Retraining will be limited to nine credit hours related to the identified skill deficiency and to those classes regularly scheduled during the period covered by the retraining plan.
8. All retraining must be completed within a calendar year from the time the educational plan is agreed upon.
9. The graduate and/or employer is responsible for the cost of books, insurance, uniforms, fees and other course-related expenses.
10. The guarantee does not imply that the graduate will pass any licensing or qualifying examination for a particular career.

A student's sole remedy against MCC and its employees for skill deficiencies shall be limited to nine credit hours of tuition-free education under the conditions described above. Activation of the "Graduate Guarantee Program" may be initiated by the graduate by contacting the appropriate MCC administrative office within 90 days of the graduate's initial employment.

Credit-By-Articulation

Credit-by-articulation allows students the opportunity to receive college credit at MCC for specific courses taken during the junior or senior year of high school. Students must complete the identified high school course(s) with a grade of B or better, meet all admission requirements to MCC, and enroll at the college within 24 months of high school graduation. Credit-by-articulation will only be granted if a formal articulation agreement is in effect between the school district and MCC at the time the student completes the course. Participating school districts and course listings can be obtained from high school counselors or through the Dean of Workforce Education.

Tech-Prep

MCC participates in the state Tech-Prep initiative, which permits high school students to get an early start on their career goals. Through course articulation, MCC and the high school agree on course competencies to be taught. The student may receive up to 12 semester hours of credit when he/she enrolls and may complete an equal number of hours toward an approved Tech-Prep degree at MCC.

A Tech-Prep articulated career path is a six-year plan of courses, beginning with grade nine in the secondary school and continuing through the two-year associate degree program in the community college. Tech-Prep programs are designed to prepare a high-quality workforce that meets current and future regional labor market demands by ensuring that students exit high school and/or community college with marketable skills and the credentials to pursue higher education.

MCC is actively involved in developing and providing Tech-Prep associate degree programs in cooperation with the area independent school districts. The guidelines for Credit-by-articulation apply to all Tech-Prep programs.

Students should contact their high school counselor or the Dean of Workforce Education at MCC to determine if their school has an agreement with MCC. Students participating in a high school Tech-Prep program who plan to continue their Tech-Prep program at MCC must meet the entry requirements of the college and the specified program they are pursuing. See [Requirements for Tech-Prep Associate Degree](#) for more information.

Advising

Advising is a process that assists students in the formulation of educational and career plans for the realization of their life goals. Advisors will assist students with defining and refining goals; gaining an understanding of their academic abilities, skills and interests; evaluating alternative courses of action; selecting an educational program; and selecting courses. The ultimate responsibility for making decisions about life goals, educational plans and course selection rests with the student.

Class Attendance Policy

Regular and punctual attendance is expected of all students, and each instructor should maintain a complete record of attendance for the entire length of each course. Students will be counted absent from class meetings missed, beginning with the first official day of classes. Students, whether present or absent, are responsible for all material presented or assigned for a course and will be held accountable for such materials in the determination of course grades.

Absence from 25 percent of scheduled lecture and/or laboratory meetings will be taken as evidence that a student does not intend to complete the course. Unless an instructor has reason to believe the student will complete the course, the student will be withdrawn from the course with a grade of W. The instructor may reinstate the student if satisfied that the student will resume regular attendance and will complete the course.

If the student's 25 percent absences are reached after the official drop date (the 60 percent point in the semester or term), the instructor may assign a W, if the student is passing and requests to be withdrawn. However, if a student who is not passing reaches the 25 percent point after the official drop date, the student will receive an F. In extenuating circumstances, the instructor may assign a W to a student who is not passing.

Each absence will count toward attendance requirements in each course.

Students will be permitted to make up class work and assignments missed due to absences caused by (1) authorized participation in official college functions, (2) personal illness, (3) an illness or a death in the immediate family, or (4) observance of a religious holy day (see policy below). Also, the instructor has the prerogative of determining whether a student may make up work missed due to absences for other reasons. It is the student's responsibility to inform the instructor of the reason for an absence and to do so in a timely fashion.

Students enrolled in THEA mandated developmental classes based on MCC's developmental education plan must adhere to attendance requirements as established by developmental education guidelines. Students who are required by the Texas Success Initiative to take a developmental course or courses will be required to follow the attendance guidelines in effect at the time of the student's enrollment in the developmental course or courses.

Programs such as Cosmetology, Performing Arts and many of the Allied Health & Nursing programs may have departmental attendance guidelines due to clinical requirements or requirements of approving agencies. (See appropriate departmental policies for details.)

Student Absences on Religious Holy Days

McLennan Community College shall excuse a student from attending classes or other required activities, including examinations, for the observance of a religious holy day, including travel for that purpose. Students are required to file a written request with each instructor for an excused

absence. A student whose absence is excused for this observance may not be penalized for that absence and shall be allowed to take an examination or complete an assignment from which the student is excused within a reasonable time after the absence. Religious holy day means a holy day observed by a religion whose places of worship are exempt from property taxation under the Texas Tax Code.

McLennan Community College may not excuse absences for religious holy days that may interfere with patient care.

Developmental Studies

Developmental courses are designed to help students improve basic skills so they may realize their potential for success in college. Although designed to fulfill the student's own desire for preparation, some of these courses may be required of students whose academic record or test scores indicate the need for skill development. These courses will not be counted toward graduation requirements at MCC and usually are not transferable to universities or other senior institutions. The following are developmental courses/programs:

- English 0300, Basic Grammar and Composition I
- English 0301, Basic Grammar and Composition II
- English 0310, Developmental Composition I for Non-Native Speakers
- English 0311, Developmental Composition II for Non-Native Speakers
- Human Development 001R, Reading Remediation
- Human Development 001M, Math Remediation
- Human Development 001W, Writing Remediation
- Math 0100, Basic Concepts in Arithmetic
- Math 0101, Basic Applications of Arithmetic
- Math 0102, Pre-Algebra I
- Math 0103, Pre-Algebra II
- Math 0104, Pre-Algebra III
- Math 0105, Beginning Algebra I
- Math 0106, Beginning Algebra II
- Math 0107, Beginning Algebra III
- Math 0300, Basic Mathematics
- Math 0301, Prealgebra
- Math 0307, Elementary Algebra
- Math 0311, Intermediate Algebra
- Reading 0300, Fundamentals of Reading
- Reading 0301, Introduction to College Reading
- Reading 0302, Reading Comprehension and Analysis

Student Classification

Students will be classified as freshmen until they have earned 30 semester hours of credit. They will be classified as sophomores if they have earned from 30 to 64 hours of credit.

Students are classified as full time if they are enrolled for 12 or more semester hours, or the contact-hour equivalent, and part time if they are enrolled for fewer than 12 semester hours, or the contact-hour equivalent.

Student Course Loads

The normal student course load during a long session semester is 15 to 17 semester hours. First-semester freshmen are encouraged to limit themselves to the number of semester hours shown in the student's course of study (major) in the General Catalog.

The maximum course load for a summer term is seven semester hours. A student may register for no more than nine semester hours in a summer day and concurrent evening term combined. A student may not receive credit for more than 14 semester hours for a full summer term. Students requesting special approval to exceed any of these limits should determine if the institution to which they expect to transfer will accept credits earned under such conditions. The maximum course load for a three-week minimester term is three semester hours.

To register for 18 or more semester hours in a fall or spring semester or to exceed the maximum loads for a summer term, a student must have special approval of the Dean of Arts and Sciences, Dean of Workforce Education, Dean of Education & Learning Services, Director of Records and Registration, Director of Student Development, Vice President of Student Services, or appropriate division chair. Among factors to be considered in the decision to grant or deny students such approval are:

1. Previous college course load(s) and grades earned.
2. High school academic record.
3. Standardized or special test scores.
4. Anticipated workload and/or co-curricular activities.
5. Nature of the courses or courses of study to be undertaken.
6. Special circumstances such as the number of semester hours remaining to complete degree or certificate requirements.

Auditors

An auditor is an observer in a college credit course and is subject to the same tuition and fees as if taking the course for credit. Auditors do not receive college credit.

A course that has been audited must be repeated if credit is to be awarded. Auditors must be eligible for admission to the college; their names will appear on the class roll. Auditors are entitled to use laboratory equipment and supplies or participate in field work on a space-

available basis. The instructor, however, is not obligated to take any papers or examinations from the auditor.

Auditors must receive approval to audit courses from the appropriate program director or division chair, who shall have the authority to grant permission to audit courses in their areas of responsibility. Lecture courses are the most appropriate for students to audit. Auditors may not be accepted in certain courses due to lack of space, course prerequisites, entrance requirements for a particular program or the amount of individualized instructional time required, such as in internship courses.

A student may change from credit to audit status, with the approval of the appropriate program director or division chair, provided the change is made before the 12th class day in a fall or spring semester, the fourth class day in a summer term or before the census day for minimester courses or courses beginning at irregular times during a semester or term.

Course Credits

The semester hour is the unit of credit and is defined as the amount of credit given for one lecture hour per week for 16 weeks or its equivalent. A lecture class meeting three hours per week, therefore, counts three semester hours.

Laboratory work may add a semester hour of credit to a course. In general, three hours of carefully planned and supervised laboratory work are equivalent to one hour of lecture or recitation. Field experience also may add semester hours to the course value. In general, four to six hours of field experience are equivalent to one hour of lecture.

Course Numbers

McLennan Community College has adopted the Texas Common Course Numbering System to help students transfer general academic courses between colleges and universities throughout Texas. Common courses are freshman and sophomore academic credit courses identified as common by institutions that are members of the Common Course Numbering System.

The Common Course number has a standardized four-letter prefix followed by a four-digit number. The four-letter prefix identifies the subject area.

The first digit identifies the course as either freshman level (1) or sophomore level (2). The second digit identifies the number of credit hours students earn upon completing the course. Usually this digit will be 1, 2, 3 or 4. The final two digits establish the sequence in which courses are often taken. For example, ENGL 1301 is taken before ENGL 1302. Both 1301 and 1302 are freshman-level courses with a semester credit hour value of three hours each. Courses that begin with a 0 are developmental (not college level) and do not count toward graduation.

If a course does not have a Common Course number, it does not suggest that the course will not transfer or meet degree requirements. For example, any number of Visual and Performing Arts credits may satisfy degree requirements at most colleges, while only one course will have the Common Course number that refers to Survey of Art History, Music Appreciation or Theatre Appreciation.

Each college or university will continue to offer a wide variety of unique courses meant to primarily satisfy degree requirements in their respective programs. These courses may also be identified with Common Course numbers. In such cases, students may need to seek further assistance in planning their transfer program.

Credit By Examination

Students who believe they already possess the knowledge and/or skills taught in certain courses or programs offered by McLennan Community College will be given the opportunity to receive credit by special examination in courses where proficiency may be determined appropriately by examination.

Credit by examination is available to students who plan to enter the college and to students who are currently enrolled. The college awards credit for successful completion of MCC departmental examinations and various examinations published by the College Board, including the College Board Advanced Placement Program (AP) and the College Level Examination Program Subject Exams (CLEP-S).

Application Procedures

1. College Level Examination Program (CLEP)

Under the College Level Examination Program, the college will award credit for only the specified subject examinations. General examinations are not accepted. As with other testing programs, a student may attempt a CLEP examination at a national CLEP test center before enrolling and have the scores reported to the college. These examinations are also offered at MCC through the Testing Services Center. Further information concerning CLEP tests may be obtained from high school counselors and principals or from www.collegeboard.com.

2. College Board Advanced Placement Program Examination (AP)

The Advanced Placement examination is the final examination for a nationally standardized course offered in a limited number of secondary schools. The objective of the AP is to allow students to begin work toward college credits while still in high school. Students should check with their high school counselors or principal as to the availability of the AP examinations in their school.

3. International Baccalaureate Examination (IB)

The International Baccalaureate Diploma Program is an international program of courses and examinations offered at the high school level. MCC will grant a minimum of 24 hours credit for an IB Diploma completed with Higher or Standard Level exam scores of 4-7. For those individuals who participate in IB courses but do not receive an IB diploma, individual course credit may be earned based on the score obtained on specified IB exams.

4. MCC Departmental Examinations

Departmental examinations are available for many courses offered by the college. For specific examinations available and for application forms, contact the respective departments. An application form for each examination must be approved by the appropriate division chair or program director, who will designate an instructor to prepare, administer and grade the examination.

General Rules and Procedures

The student is responsible for having exam scores sent to the MCC Testing Center. Scores for CLEP, AP and IB examinations should be received prior to enrollment for use in course advisement and placement. Generally, no more than 24 hours of credit by examination may be obtained either at McLennan Community College or by transfer from other institutions or a combination thereof.

To receive credit by examination at MCC, a student must score at or above the "C" level. The course number, title and credit hours will be entered on the student's permanent record with notation of the type of test taken and the score. A grade of "CR" (credit) will be assigned for any course in which credit is earned by examination. This grade is not computed in the grade point average. Credit by examination may be attempted only one time in a given course. There will be

no refund and no entry made on the student's permanent record in case of failure of an examination for credit.

Students should direct inquiries concerning courses available for credit by examination to the Testing Center.

Credit Through Advanced Standing

Advanced standing is a means whereby a student may be placed in an upper-level course and at the same time receive academic credit for a lower-level prerequisite course in the same subject.

Advanced standing may be accomplished for certain courses in English and mathematics on the basis of scores achieved on the American College Testing (ACT) Assessment or the Scholastic Aptitude Test (SAT).

Students must make application for advanced standing in the Testing Center. Failure to gain approval for advanced standing may result in no credit for the lower-level course if an upper-level course is taken without such approval. Advanced standing may be attempted only one time in a given course. Contact the Testing Center for additional information.

Licensed Vocational Nurses

A Licensed Vocational Nurse (LVN) who wishes to obtain advanced standing in the Associate Degree Nursing Program has two options and must meet specific admission requirements. All Licensed Vocational Nurses must:

- Apply for advanced standing.
- Have a valid current Texas vocational nurse license.
- Submit official copies of all college transcripts.

Licensed Vocational Nurses who qualify for advanced placement by completing the leveling course RNSG 1327 (Transition from Vocational to Professional Nursing) must demonstrate:

- Completion of all admission requirements to MCC.
- Completion of all prerequisite courses as required for entry into Level III of the Associate Degree Nursing Program. (Courses taken at another college or university will be evaluated on an individual basis.)
- A cumulative grade point average of 2.8 or better in all courses applicable toward the Associate Degree Nursing Program.
- Passing scores on HESI Admission Assessment Exam. Upon completion of RNSG 1327, the student is granted credit for RNSG 1293, 1462, 1463, 1523, 2504 and 1161 and may enroll in the first sophomore Associate Degree Nursing courses, RNSG 2462 and 2514. Enrollment is limited to the number of vacancies in the course. **Note: Licensed**

Vocational Nurses who have enrolled and failed in the Associate Degree Nursing Program are not eligible for RNSG 1327.

Licensed vocational nurses who qualify for advanced standing by completing department challenge examinations must demonstrate a grade of C or better in all Level I and Level II nursing challenge examinations.

Note:

1. Challenge examinations may not be taken until all course prerequisites are met.
2. A course may be challenged by examination once.
3. A grade of CR is recorded on the student's permanent record if the student receives a passing grade.
4. Licensed vocational nurses who fail a challenge examination have two options to continue in the program:
 - a. Enroll in and successfully complete the course or
 - b. Apply for the transition course, RNSG 1327.

Emergency Medical Technician (EMT)-Basic

By passing the National Registry EMT-Basic certifying examination, students may earn college credit. In order to receive credit, the applicant must fulfill the following requirements:

1. Meet all admission requirements of the college.
2. Present a copy of the National Registry EMT-Basic exam scores to the Paramedicine Program Director.
3. Complete a degree plan.

With approved credit for the EMT-Basic, credit for the following courses will be granted upon completion of equivalent hours at MCC:

- EMSP 1401, Emergency Medical Technician-Basic
- EMSP 1160, Clinical-Emergency Medical Technology/Technician

Emergency Medical Technician (EMT)-Intermediate

By passing the National Registry EMT-Intermediate certifying examination, students you may earn college credit. In order to receive credit, the applicant must fulfill the following requirements:

1. Meet all admission requirements of the college.
2. Present a copy of the National Registry EMT-Intermediate exam scores to the Paramedicine Program Director.
3. Present a copy of Basic Trauma Life Support-Advanced Certification to the Paramedicine Program Director.
4. Complete a degree plan.

With approved credit for the EMT-Intermediate, credit for the following courses will be granted upon completion of equivalent hours at MCC:

- EMSP 1401, Emergency Medical Technician-Basic
- EMSP 1160, Clinical-Emergency Medical Technology/Technician
- EMSP 1161, Clinical-Emergency Medical Technology/Technician
- EMSP 1162, Clinical-Emergency Medical Technology/Technician
- EMSP 1338, Introduction to Advanced Practice
- EMSP 1356, Patient Assessment and Airway Management
- EMSP 1355, Trauma Management

Certified Legal Assistant

By passing the Certified Legal Assistant examination, students may earn college credit. In order to receive credit, the applicant must fulfill the following requirements:

1. Meet all admission requirements of the college.
2. Present a certified transcript of the CLA Examination results to the Paralegal Program Director.
3. Complete a degree plan.

With approved credit for the CLA Certification, credit for the following courses will be granted upon completion of six hours at MCC:

- LGLA 1313, Introduction to Paralegal Studies
- POFT 1227, Introduction to Keyboarding
- POFT 1301, Business English
- BUSI 2301, Business Law I
- ENGL 2311, Technical Communication
- PHIL 2374, Critical Thinking
- LGLA 1172, Computerized Legal Research
- ITSW 1301, Introduction to Word Processing (OFAD elective)

Students may earn as many as nine more credit hours depending upon the substantive law sections taken on the CLA Examination.

Professional Legal Secretary (PLS)

By passing the Professional Legal Secretary examination, students may earn college credit. In order to receive credit, the applicant must fulfill the following requirements:

1. Meet all admission requirements of the college.

2. Present a certified transcript of the PLS Examination results to the Paralegal Program Director.
3. Complete a degree plan.

Paralegal Program

With approved credit for the PLS Certificate, credit for the following courses will be granted upon completion of six hours at MCC:

- LGLA 1313, Introduction to Paralegal Studies
- POFT 1227, Introduction to Keyboarding
- POFT 1301, Business English
- BUSI 2301, Business Law I
- LGLA 1172, Computerized Legal Research
- LGLA 2307, Law Office Management
- ITSW 1301, Introduction to Word Processing (OFAD elective)
- POFT 2321, Machine Transcription (non-LGLA elective)

Credit for Correspondence Courses

The following conditions apply regarding the acceptance of credit for correspondence courses:

1. Credit for courses taken by correspondence may be accepted as transfer credit if the courses correspond with courses offered at MCC and if the correspondence courses are completed through a college or university that is accepted by a regional accrediting agency.
2. In order for correspondence courses to be accepted for transfer or substitutions, these courses must be approved by the Coordinator of Student Admissions and the appropriate division chair or program director.
3. Correspondence courses approved for transfer or as substitutions will apply toward degrees and certificates granted by MCC. All pertinent General Catalog regulations shall apply.

Credit for USAFI Courses

The following conditions apply regarding the acceptance of credit for the United States Armed Forces Institute (USAFI) courses:

1. Credit for USAFI courses taken by correspondence or through college extension may be accepted as transfer credit if the courses correspond with courses offered at MCC. A course not meeting this criterion may be approved as a substitution for an MCC course by the Coordinator of Student Admissions and the appropriate program director or department coordinator.
2. USAFI courses for which credit was gained by examination only will not be accepted.

3. USAFI courses approved for transfer or as substitutions will apply toward degrees and certificates granted by MCC. All pertinent General Catalog regulations shall apply.

Guidelines for Internships

Internship courses are designed to enhance and develop workforce skills in a variety of instructional programs, such as: Accounting, Child Development, Commercial Music, Computer Information Systems, Criminal Justice, Interpreter Training, Mental Health, Long-Term Care Administration, Office Administration, Paralegal and Real Estate.

The student should consult with the respective program director for information regarding enrollment in internship courses.

1. A student enrolling in an internship course must take at least one subject matter course at the same time. Exception: A student who has completed, or will complete in the current semester, all courses listed in that semester of the course of study where the internship is listed may enroll for the internship.
2. A student must have a declared major in the area in which the internship is done.
3. A student may not challenge an internship course through credit by examination.
4. Approved intern stations must provide work experience directly related to the program objective. Students and the intern stations must meet established program guidelines and must be approved by the program director prior to registration.
5. The minimum acceptable work experience is 20 clock hours and one seminar or conference hour per week for most internship courses. Exceptions must be approved by the Dean of Workforce Education or the Dean of Education & Learning Services.
6. Other terms for external learning are practicum and clinicals.
7. Exceptions to the above statement must have prior approval of the Dean of Workforce Education or the Dean of Education & Learning Services.

College Grading System

A college grade indicates the level of knowledge, understanding and competence a student attains in relation to the objectives and subject matter of a course. This level is determined by the instructor's evaluation of the student's performance during the semester. A grade is assigned for each course in which a student is enrolled, and that grade is entered on the student's permanent record. Grade results may be obtained by accessing the [MCC website](#) and selecting the WebAdvisor link.

While good grades are important to all students who wish to attain a particular educational objective, they are especially important to students who plan to transfer to senior institutions to complete their education. Only those courses in which satisfactory grades are made can be transferred for credit to other colleges and universities.

The following shall be the system used for reporting and evaluating student grades at McLennan Community College:

<u>Grade in</u> <u>Course</u>	<u>Grade Points Per</u> <u>Semester Hour</u>
A EXCELLENT	4
B GOOD	3
C FAIR	2
D POOR	1
F FAILING	0

W WITHDRAWAL — This grade is given for an instructor- or student-initiated course withdrawal through the 60 percent point in the semester or term. After the 60 percent point, an instructor may authorize a course withdrawal and assign either a W if passing work was being accomplished or an F (or NC, Non-Completion, for a student enrolled in a developmental class) if the student was doing failing work. In extenuating circumstances, the instructor may assign a W to a student who is not passing through the last regular class day of a semester or term.

I INCOMPLETE — This grade is given when a course is incomplete because of a student's absence caused by illness or other reasons acceptable to the instructor. To be eligible for this grade, the student must have essentially completed the course. The work remaining should be of such a nature as to not require class attendance. If the work is not made up within the following long semester, the I will be changed to an F and the course must be repeated if credit is to be given.

AU AUDIT — This grade indicates a course is taken for no credit.

Due to requirements of various accrediting agencies and the nature of clinical education, the grading policies of the Allied Health & Nursing programs may differ if approved by the Vice President of Instruction.

Grade points are earned in courses where grades of A, B, C or D are made. While no (0) grade points are earned for courses in which an F is received, the semester hour value of such courses is included in the total number of semester hours taken. To determine grade point average, total all grade points from all courses in which any of the preceding grades are given and divide the total by the semester hours attempted.

The following grades may be assigned for internships, practicums, special projects, seminars, CLEP examinations, credits by examination and other courses approved by the Vice President

of Instruction:

CR CREDIT — No grade points are earned. This grade will be given when the student meets the criteria established by the instructor for passing that specific course. Appropriate credit hours are given.

NC NONCOMPLETION — No grade points are earned. This grade will be given when the student does not complete the criteria for the CR in the special courses listed above nor all of the modules required to complete a self-paced course. The student must re-enroll in the course to receive credit.

Grades in developmental courses will be A, B, C, W or NC. No grade points are earned for any grade in a developmental course; appropriate developmental credit hours are earned.

Certain Continuing Education programs may use the student grading system of A, B, C, D, F, W and I. A grade of D or F is not passing, and the student will have to repeat the course for continuing education units (CEUs). No grade points are earned for any grade in a Continuing Education course; appropriate CEUs are earned. The selection of Continuing Education programs to use the grading system, and any exceptions are made at the discretion of the Continuing Education Dean.

WARNING: It is recommended that students consult the catalog of the four-year college to which they plan to transfer in order to determine the procedure and computations of grades and grade point averages, as colleges differ in their methods of computation.

Grade Replacement

When courses are repeated, only the credit hours and grade points earned the last time the course was taken are counted toward computing the grade point average. If the course is identified in the General Catalog as repeatable for credit, all grades are included in the calculation of grade point averages. If a course that is not identified as repeatable for credit in the General Catalog is repeated, the credit hours for this course will be counted once toward certificate or degree completion. A punitive grade (F) cannot be removed when a student enrolls in that course again and receives a W or I. In this case, the first attempt will continue to be included in the overall grade point average.

Grade Appeal Policy

A student may appeal a grade within a period of one year from the day the class ends. Questions regarding potential grade errors should be directed to the Office of Student Records. Grade changes may be made by the instructor of record only or, in the absence of the instructor, the appropriate Dean. Grade appeals will not be considered after one year.

Withdrawal from a Course

Students who are considering withdrawing from a course are to contact one of the following, preferably in the order listed: instructor, advisor, program director or division chair. **If, after consultation between the student and the instructor, there is a decision to withdraw through the 60 percent point in the semester or term, it is the responsibility of the student to see that the Change in Schedule Form is filed with the Office of Student Records. (The instructor can also request that a student be withdrawn from a course through WebAdvisor.)** If, after the 60 percent point in the semester or term and after consultation between the student instructor, there is a decision to withdraw, it is the responsibility of the instructor to submit the Change in Schedule Form to the Office of Student Records (or request that the student be withdrawn from a course through WebAdvisor) as soon as possible or prior to the last class day of a semester or term. The effective date for withdrawing from a course is the date the Change in Schedule Form is received at the Office of Student Records.

Withdrawal from College

In case of emergency where the student must withdraw from the college, the student may request withdrawal by one of the following: 1) advisor or 2) Office of Student Records.

Withdrawal from college requires the return of all college-owned property and payment of all outstanding debts. Official transcripts will be issued only after all obligations to the college have been met.

Students who receive financial assistance should contact the Office of Financial Aid before withdrawing from a class or withdrawing from the college to determine how their financial aid will be affected by the reduction of hours.

Scholastic Probation and Suspension

Each student will have his/her scholastic record evaluated at the end of fall and spring semesters. A student taking fewer than 12 semester hours in a regular semester will have his scholastic record evaluated upon the completion of 12 or more semester hours of work.

Any student who has completed one or more semesters and has attempted 12 or more semester hours will be placed on scholastic probation if he/she fails to maintain a 2.0 cumulative grade point average. A student placed on first-time scholastic probation will be strongly encouraged to enroll in PSYC 1300-Learning Framework. A student on scholastic probation will be removed from scholastic probation when he/she earns a 2.0 cumulative grade point average. A student on scholastic probation who achieves a cumulative grade point average of 1.50 through 1.99 will continue on scholastic probation.

Failure of a student on scholastic probation to maintain at least a 1.5 cumulative grade point average will result in his/her being placed on scholastic suspension for one long semester. A student placed on scholastic suspension may waive the long semester of suspension by

enrolling in PSYC 1300 Learning Framework. Students who do not attend this required course shall be administratively withdrawn by the Director of Records and Registration from all courses in which they are enrolled. Students who do not improve their grade point average above 1.49 shall be suspended a second time and must stay out for one semester. (**Note: Students who have attained a grade point average of 2.5 or higher in their last 12 hours of enrollment may apply to the Director of Records and Registration for special consideration.**) Suspension applies to both day and evening classes.

A student who has been suspended from the college for scholastic reasons will be on scholastic probation if he/she re-enters. A student on scholastic probation or suspension who has attempted at least nine hours during the summer terms may, at the end of the summer, be re-evaluated to determine whether the probation or suspension may be rescinded.

Students are expected to know whether they have maintained the minimum standard and are eligible to continue in college. An ineligible student who registers in the college will be subject to dismissal.

Access to Student Records

A federal law enacted in 1974, Public Law 93-380 Family Educational Rights and Privacy Acts, grants to all students access to the records that the institution possesses about them.

The law also limits access to a student's grades, reports of academic performance, reports of disciplinary action and other data in the personal file without the student's permission.

As provided in PL 93-380, potential donors and/or donors of scholarships will be provided copies of a student's record without prior consent from the student or parent (provided the student has made application for the scholarship), and no record thereof will be maintained.

A detailed policy in compliance with this law is published in the Highlander Guide, the student handbook, available online at www.mclennan.edu/students/hguide/HighlanderGuide.pdf.

Directory Information

Directory/general information may be released to the general public without the written consent of the student. A student may request that all or any part of the directory information be withheld from the public by making written request to the Office of Student Admissions or the Office of Student Records during the first 12 class days of a fall or spring semester or the first four class days of a Summer term. This request will apply only to the current enrollment period. The directory information items are listed in the [Highlander Guide](#).

Accreditation and Recognition

McLennan Community College is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award the Associate of Arts, Associate of Science, Associate of Applied Sciences, and Associate of Arts in Teaching degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call 404-679-4501 for questions about the accreditation of McLennan Community College.

Recognition has been given McLennan Community College by the Texas Higher Education Coordinating Board. The college is approved for the training of veterans and foreign students.

Individual programs also may be accredited or approved by other agencies. The programs that have received such recognition and the accrediting or approving agencies are listed below:

Associate Degree Nursing

Board of Nurse Examiners for the State of Texas
National League for Nursing Accrediting Commission

Certified Nurse Aide

Texas Department of Aging and Disability Services

Certified Medication Aide

Texas Department of Aging and Disability Services

Computer Information Systems

CISCO Local Academy

Continuing Nursing Education

Texas Nursing Association (provider status)

Correctional Officer

Texas Department of Criminal Justice

Cosmetology

Texas Department of Licensing and Regulation

Defensive Driving

Texas Safety Association

Emergency Medical Technology

Texas Educational Theatre Association

Visual Arts

Texas Association of Schools of Art

Transfer Programs (A.A., A.S. and A.A.T.)

McLennan Community College offers the Associate of Arts, Associate of Science and the Associate of Arts in Teaching degrees, which are designed to transfer to bachelor's degree programs at senior-level institutions.

Students who plan to obtain a bachelor's degree should plan to take classes at MCC that meet the requirements of the senior institution at which the degree work will be completed. Students are encouraged to work with advisors to plan their course work.

Texas public senior colleges and universities are required to accept by transfer up to 66 hours — or one-half of the bachelor's degree requirements if that constitutes fewer than 66 hours of credits — earned by a student in a community or junior college. Additional course credits may be accepted in transfer at the discretion of the receiving institution.

Transfer Credit

Students enrolling in 12 or more semester hours or those who have completed 24 semester hours of credit should establish a degree plan with an academic advisor at McLennan Community College. This plan will help ensure that credits will transfer to a particular senior college and will apply toward the selected major course of study at that college. A change in major may result in previously acquired credits not counting toward requirements of the new major.

Questions or problems relating to course transfer matters should be directed to the Director of Student Development at MCC.

Requirements for the Associate of Arts (A.A.) Degree

1. Credit for at least 60 semester hours of college work, excluding developmental courses.
 - a. Fulfillment of the 42-hour [core curriculum](#) as part of the 60-hour total.
 - b. At least 25 percent of semester hours must be earned in college-level courses through MCC.
 - c. Pass a computer literacy exam or take COSC 1301 or BCIS 1305.
2. An overall grade point average of at least 2.0.
3. Successful completion of the college's Developmental Education Plan for the Texas Success Initiative.

4. Payment of all financial obligations to the college.

Requirements for the Associate of Science (A.S.) Degree

Students wishing to complete the Associate of Science degree will fulfill the same requirements listed for the Associate of Arts degree. The student will also be required to complete at least 15 hours of college-level mathematics and/or science courses.

Requirements for the Associate of Arts (A.A.) or Associate of Science (A.S.) Degrees Including a Field of Study

1. Credit for 60 hours of college work, depending upon the particular field of study and excluding developmental courses. Such credit shall include the following:
 - a. Fulfillment of all course requirements in the particular field of study curriculum.
 - b. Partial or complete fulfillment of the [core curriculum](#) as specified by each particular degree plan, depending on the number of credit hours required by the field of study curriculum.
 - c. At least 25 percent of semester hours must be earned in college-level courses through MCC.
 - d. Pass a computer literacy exam or take COSC 1301 or BCIS 1305, credit for COSC 1301 or a particular field of study course that also satisfies the computer literacy requirement.
2. An overall grade point average of at least 2.0.
3. Successful completion of the college's Developmental Education Plan for the Texas Success Initiative.
4. Payment of all financial obligations to the college.
5. Minimum grade of C is required for all courses within the field of study.

Requirements for the Associate of Arts in Teaching (A.A.T.) Degree

The Associate of Arts in Teaching (A.A.T.) degree is a Texas Higher Education Coordinating Board-approved collegiate degree program consisting of lower-division courses that transfer to baccalaureate programs leading to initial Texas teacher certification. This degree is awarded to students who complete a minimum of 60 hours of college course work that includes all of the requirements for the A.A.T. degree.

1. Credit for at least 60 semester hours of college work, excluding any developmental courses. Such credit shall include the following:
 - a. Fulfillment of the 42-hour [core curriculum](#) as part of the total hours.
 - b. MATH 1350 and 1351, along with MATH 1314 as a prerequisite.
 - c. EDUC 1301 and 2301.

- d. At least 3 additional semester hours of science.
 - e. At least 25 percent of semester hours must be earned in college-level courses through MCC.
2. An overall grade point average of at least 2.0.
 3. Successful completion of the college's Developmental Education Plan for the Texas Success Initiative.
 4. Payment of all financial obligations to the college.

Achieve Texas

Achieve Texas is an education initiative designed to prepare all students (preschool through college) for a lifetime of success. It allows all students to achieve excellence by preparing them for secondary and postsecondary opportunities, career preparation and advancement, meaningful work, and active citizenship.

This initiative uses the 16 federally defined career clusters of the States' Career Clusters initiative as the foundation for restructuring how schools arrange their instructional programs. A Career Cluster is a grouping of occupations and broad industries based on commonalities. All clusters have been cross-walked to the U.S. Department of Labor occupational classification system O*NET.

Most McLennan Community College degrees have been linked to a career cluster.

General Education Core Curriculum

The 75th Texas Legislature mandated that Texas colleges and universities must each develop a core curriculum of classes in "Liberal Arts, Humanities, Sciences, and Political, Social and Cultural History that all undergraduate students (except students in specifically designated 'Fields of Study') are required to complete before receiving an academic undergraduate degree." (Texas Education Code, Chapter 61, Subchapter S, "Transfer of Credit")

The core curriculum at MCC contains a variety of courses that encourage breadth of study so that students can reflect upon diverse individual, scientific, political, economic, social and other cultural aspects of life. The core curriculum represents (1) the first steps students take in pursuit of a broad-based education; (2) the fundamental requirements of the Associate of Arts and the Associate of Science degrees; and (3) the commitment of each institution of higher education in Texas to help students transfer their core curriculum courses between schools.

Guidelines

1. The first 42 hours completed in the core curriculum will be designated as such on the student's MCC transcript.

2. The core curriculum for MCC will be evaluated two years before the institution's compliance report is due at the Southern Association of Colleges and Schools.
3. In fulfilling the Natural Sciences requirements, the student will take two four-hour lab science courses with six hours satisfying the Natural Science requirement and the additional two hours carrying over to the Institutional Designated Option.
4. Students who plan to obtain a bachelor's degree should consult with an academic advisor to arrange a program to meet the requirements of the senior college where the degree will be completed.
5. A D grade earned in a core course at MCC will satisfy degree requirements for the Associate of Arts, the Associate of Science or the Associate of Arts in Teaching degrees. However, students should be aware that some receiving institutions may not accept the D grade for fulfillment of their degree requirements.

MCC Core Curriculum

The student must complete 36 semester credit hours according to the parameters described below.

<i>Component Area</i>	<i>Required Semester Credit Hours</i>	<i>To Be Selected From</i>
Communication	6	ENGL 1301 & 1302 or 2311
Mathematics	3	MATH 1314, 1316, 1324, 1325, 1332, 1342, 2412, 2413
Natural Sciences *	6	BIOL 1406, 1407, 1408, 1411, 1413, 2401, 2402, 2404, 2420 CHEM 1405, 1407, 1411, 1412 ENVR 1101/1301 (Both must be taken) GEOL 1101/1301, 1401, 1403 or 1404 PHYS 1401, 1402, 1403, 1404, 1405, 1407, 2425, 2426
Humanities	3	PHIL 1301 or HUMA 1301, 1302 or Any sophomore-level literature course
Visual & Performing Arts	3	ARTS 1301, 1303, 1304 DRAM 1310, 2361, 2362 MUSI 1306, 1308, 1309, 1310
Social & Behavioral Sciences	6	HIST 1301 & 1302
	6	GOVT 2305 & 2306
	3	PSYC 2301 or SOCI 1301

Total Minimum Requirement 36

Institutional Designated Option (IDO)

The student must complete an additional 4 semester credit hours from the following:

ANTH 2346
 ARTS 1311, 1316
 COMM 1307, 2301
 CRIJ 1301
 DRAM 1351, 2366
 ECON 2301, 2302
 EDUC 1100
 FREN 1411, 1412, 2311, 2312
 GERM 1411, 1412, 2311, 2312
 GOVT 2304
 HUMA 2319
 MUEN 1121, 1141
 PHIL 1316, 1317, 2306, 2374
 PSYC 1100, 2314, 2315
 SPAN 1411, 1412, 2311, 2312
 SOCI 1306, 2301, 2319, 2326
 SPCH 1311, 1315, 1318, 1321, 2301, 2333
 Any sophomore-level history course

Total Additional Hours 6*

* In fulfilling the Natural Sciences requirement, the student will take two four-hour lab science courses. The lab hours for each course (a total of 2 credit hours) will be counted in the IDO, making the total IDO hours 6.

Field of Study Curricula

A field of study curriculum is a group of courses approved by the Texas Higher Education Coordinating Board that can be taken at the community college level and transferred as a block into a specialized bachelor's degree program at a state university. The number of hours required to complete each field of study varies among subject areas. In some cases, students will be able to complete the entire field of study as well as all the core curriculum courses. In other cases, students will be able to complete the field of study and partially complete the core curriculum.

MCC currently offers field of study programs in business, computer science, criminal justice, engineering, transfer music and speech communication.

A.A. Degree with a Field of Study in Business

Business Field of Study Curriculum

Component Area	Required Semester Credit Hours	To Be Selected From
Economics	6	ECON 2301 and 2302***
Mathematics	3	MATH 1325*
Computer Literacy	3	BCIS 1305
Speech	3	SPCH 1315 or 1321***
Accounting	8	ACCT 2401 and 2402**
Total Hours	23	

*Prerequisite for MATH 1325 is MATH 1324

**ACNT 1303 is highly recommended as a prerequisite for ACCT 2401. One year of accounting in high school or work experience in an accounting capacity may be articulated for ACNT 1303.

***Both ECON and SPCH satisfy core curriculum, as well as field of study, requirements.

General Education Courses

Component Area	Required Semester Credit Hours	To Be Selected From
Communication	6	ENGL 1301 & 1302 or 2311
Mathematics	3	MATH 1324

Physics	4	PHYS 2426 Physics II

Total Hours **28**

*Corequisite for COSC 1336 is COSC 1301.

**Prerequisite for MATH 2413 is MATH 2412.

Notes:

- COSC 1336/1436 and 1337/1437 are preparatory and sequential in nature; however, not all courses are required for the Computer Science major at all universities but may apply to general degree requirements.
 - COSC 1336/1346 is not part of the Computer Science major requirements at the University of Texas at Austin, University of Texas at Arlington, University of Texas at Dallas and Texas A&M University.
 - COSC 1337/1437 is not part of the Computer Science major requirements at the University of Texas at Austin. Preparatory courses such as COSC 1336 and COSC 1337 will assist students who need additional background but do not apply toward the Computer Science major requirements.
- COSC 2325/2425 is not part of the Computer Science major requirements at the University of Texas at Austin or Texas A&M University but may be applied to general degree requirements.
- It is recommended that students complete the math sequence, physics sequence and computer science sequence at the same institution to reduce the likelihood of potential gaps in the curriculum.

Recommended Programs of Study with Special Areas of Emphasis*

Associate of Science with an Emphasis in Agriculture

Students knowledgeable in agricultural science and management have a full spectrum of career paths from which to choose. Individuals with a background in agriculture work in private and governmental industries in such fields as agricultural engineering, agronomy, animal breeding and genetics, animal nutrition, soil science, and wildlife science. The recommended curriculum below is designed to meet the requirements of the core curriculum leading to an A.S. degree, with a special emphasis in agriculture. It will provide students with a general background in agriculture, as well as the opportunity to take more specific electives in order to pursue a bachelor's degree at a four-year institution.

Biomedical Science Transfer Agreement with Texas A&M University

An agreement signed with Texas A&M University will facilitate the admission and academic transfer of students from MCC to the Biomedical Science (BIMS) Department in the Texas A&M College of Veterinary Medicine. This agreement will ensure a seamless transition of the student into the Biomedical Science program at Texas A&M University.

What does a Biomedical Science degree offer?

This degree gives the student a strong background in the sciences and provides the fundamental knowledge on which to build the skills needed for successful vocational achievements. The depth of training in the sciences and emphasis on the application of knowledge to health problem solving assists the Biomedical Science graduates in securing productive careers in a wide variety of biomedical endeavors.

What can I do with a Biomedical Science background?

Biomedical Science graduates enter schools of human medicine, veterinary medicine, osteopathy, dentistry, pharmacy, optometry, podiatry and law. All of the pre-professional course requirements for any of these can be completed while registered in the Biomedical Science curriculum. In addition to this, the Biomedical Science curriculum prepares the students for the basic course work required for allied health fields such as nursing, physical therapy, physician assistant, dental hygiene, health care administration and occupational therapy.

What are the requirements at McLennan Community College for me to participate in the 2+2 articulation agreement?

McLennan Community College students who complete MCC's portion of the Biomedical Science degree plan as full-time students (see below) will be admitted to the BIMS program automatically, provided they:

- meet all other requirements (i.e., transcripts, applications, timelines, deadline dates, etc.) for general admission to Texas A&M University.
- are in good standing and have maintained no less than a cumulative 3.4 GPA in the courses taken at McLennan Community College.
- have not have made any grade below a B in all of their required science and math course work.

Articulated Biomedical Science Degree Plan*

First Semester

ENGL 1301 Freshman Composition I	3 hrs.
BIOL 1406 Biology for Science Majors I	4 hrs.

HIST 1301 History of U.S. to 1877	3 hrs.

Workforce Education Programs (A.A.S. & Certificate)

McLennan Community College offers course work designed to prepare students to enter specific occupational areas at the end of a one- or two-year period of specialized training or to continue their education at a four-year institution. Suggested courses of study for each of these options are included in this section, which focuses on workforce programs that lead to a certificate or an Associate of Applied Science (A.A.S.) degree. Each student should, however, see a faculty advisor or program director at the earliest opportunity in order to effectively plan his or her program.

General Education Requirements

Each A.A.S. degree program has at least 15 semester hours of general education with credit hours from each of the following three areas: humanities/fine arts, social/behavioral sciences, and math/science/
computer science. **These courses are indicated in bold typeface.**

Requirements for the Associate of Applied Science (A.A.S.) Degree

1. Credit for a minimum of 60 semester hours of college work excluding developmental courses. Such credit will include:
 - a. Completion of the required course of study specified in the approved degree plan for one of the technical curricula or approval by the Dean of Workforce Education or Dean of Education & Learning Services.
 - b. At least 15 hours of general education with credit hours in each of the following areas: humanities or fine arts, social or behavioral sciences, and natural sciences or mathematics/computer science.
 - c. At least 25 percent of semester hours must be earned in college-level courses through MCC.
 - d. Successful completion of the college's Developmental Education Plan for the Texas Success Initiative.
2. A grade point average of at least 2.0 in the workforce curriculum completed.
3. A minimum grade of C in each major course in the workforce curriculum completed. A major course is a course that has the prefix of the program (i.e., POFT courses are major courses for all of the Office Technology Program degrees or certificates). A minimum grade of C will be required for related courses when specified in the catalog course description as a prerequisite.

4. A minimum grade of C will be required for courses transferred from another college or for substitution to satisfy degree requirements.
5. Payment of all financial obligations to the college.

Tech-Prep

MCC participates in the state Tech-Prep program, which prepares today's youth for high-demand technical careers by offering focused, sequenced programs of secondary and postsecondary study consisting of a four-year high school graduation plan and a two-year Associate of Applied Science (A.A.S.) degree plan. The Tech Prep articulated career path is a six-year plan of courses:

4 years of high school

+2 years of college

6-year program = Associate degree

MCC is actively involved in developing and providing Tech-Prep associate degree programs in cooperation with area independent school districts. Within articulated Tech-Prep programs are articulated courses — high school courses that contain the same course content as an equivalent college course and for which MCC has agreed to award college credit if the student meets requirements outlined in the course articulation agreement.

MCC currently offers Tech-Prep career paths in the following areas: Computer Information Systems & Multimedia (Network Administration, Web Technologies, Information Systems & Applications, and Media Communications), Business Programs (Accounting, Business Management, General Business and Marketing), Paralegal, Visual & Performing Arts (Commercial Music Management), and Office Technology Careers (Administrative Assistant, Medical Office Assistant, Digital Publishing Technology and Computer Applications). Other technical areas will be added as articulation agreements are developed with area independent school districts.

Requirements for Tech-Prep Associate Degree

1. While in high school, the student must follow a coherent sequence of designated courses for the chosen career path, along with the requirements for the Recommended or Distinguished Plan.
2. The student must earn a grade of B or higher in the articulated course(s). The student must also fulfill the learning outcome objectives on the completion of the articulated high school course and be recommended as being competent in the subject matter to be recognized for articulated credit at MCC.
3. The student must have completed the articulated course(s) as a junior or senior in high school or through a coherent sequence of designated courses. The final course in the sequence must have been taken as a junior or senior.

4. The student must meet all admission requirements to MCC and enroll within 15 months after high school graduation.
5. The student must petition for the articulated credit in the Tech-Prep office at MCC within 15 months after high school graduation.
6. MCC will post articulated credit on the college transcript when the student completes six non-developmental college hours at the college with a grade point average of 2.0 or better. This requirement may be satisfied before high school graduation by dual credit or by qualifying AP or CLEP examination scores with a grade point average of 2.0 or better.
7. The student can articulate a maximum of 12 college hours.
8. Since a grade of CR (credit) is assigned to articulated courses, the grade does not affect a student's college grade point average but will be included in accumulated college hours attempted and earned.
9. Articulated credit will be granted only to those students who took the identified course when an official articulation agreement was in place between the school district and MCC.
10. McLennan Community College guarantees the acceptance of articulated credit under the conditions specified above. Acceptance of articulated credit to colleges other than MCC will be subject to approval from the receiving institutions.
11. McLennan Community College participates in the Advanced Technical Credit Program, which sets common statewide standards for the award of college credit for selected, content-enhanced high school courses. Advanced Technical Credit will be granted only to those students whose school district participates in the Advanced Technical Credit Program, high school teacher is certified in Advanced Technical Credit and credit is approved by the Division Chair at MCC.

Achieve Texas

Achieve Texas is an education initiative designed to prepare all students (preschool through college) for a lifetime of success. It allows all students to achieve excellence by preparing them for secondary and postsecondary opportunities, career preparation and advancement, meaningful work, and active citizenship.

This initiative uses the 16 federally defined career clusters of the States' Career Clusters initiative as the foundation for restructuring how schools arrange their instructional programs. A Career Cluster is a grouping of occupations and broad industries based on commonalities. All clusters have been cross-walked to the U.S. Department of Labor occupational classification system O*NET.

Most McLennan Community College degrees have been linked to a career cluster.

Institutional Awards are offered in the following programs:

- [Central Service Sterilization Technician](#)
- [Phlebotomy](#)

All Allied Health & Nursing programs, except Certified Medical Assistant, have competitive admission requirements for limited enrollment.

Admission to Allied Health & Nursing Programs

(Admission, Re-entry, Progression)

An individual who wishes to enroll in any of the Allied Health & Nursing programs should:

- Meet admission requirements of the college.
- Submit a program application to the appropriate department by the deadline date for each admissions review.
- Submit to the Office of Student Admissions required data, which includes: all previous high school or college transcripts, ACT or SAT scores, and any required reading and math tests or other admission tests.
- Attend program information sessions or arrange a conference with the program director for program information.
- Meet established criteria for admission and other admission requirements of individual program.
- Submit evidence of required immunizations with application to program.

- Return required acceptance notice indicating that applicant will register for enrollment.
- Submit documentation of CPR certification, when required, before beginning clinical phase of the program within the first year. Every student must have a criminal background check and drug screen to enroll in an Allied Health or Nursing program. Multiple criminal background checks and drug screens **will** be required to participate in the clinical courses associated with each program.
- Meet immunization and CPR requirements:
 - Proof of immunization against Hepatitis B; Varicella (chicken pox); measles, mumps and rubella; diphtheria/tetanus; flu; and meningitis.
 - Tuberculosis skin test or chest x-ray per protocol annually.
 - Cost for immunizations and x-rays will be the responsibility of the student.
 - Failure to comply with requirements will result in withdrawal from clinical assignments and possibly the program.
 - Proof of immunizations, drug screen results and background check **does not** guarantee acceptance in the program.
 - Positive drug screens or criminal background checks may prevent program admission.
 - Must stay certified in adult, child and infant CPR by an American Heart Association Health Care Provider.

Applications will **not** be processed until all required information is submitted; therefore incomplete applications are not forwarded for program admissions review. Admission will be finalized only after all admission requirements listed above have been met. Meeting these requirements does not guarantee admission to the program.

The student must maintain a minimum of a 2.0 in the Allied Health and Nursing programs. In addition, the student must maintain a C or better average in each program course within the Allied Health or Nursing program. The program courses can be identified by the rubric RSPT, SRGT, etc. The minimum percentage required to obtain a C may vary in each program. To be eligible to apply for re-entry into a program following interruption of study regardless of the reason for departure, the student must maintain a minimum of C average in each major course within the program. Allied Health & Nursing students in an Associate of Applied Science degree curriculum have five academic program years to complete the technical curriculum after official enrollment in the first program course. Allied Health & Nursing students in a certificate or advanced placement option have three program academic years to complete the curriculum after official enrollment in the first program course. If a student withdraws from a program course and then re-enters the program, that student must still complete the program within the time allotted.

Failure in any program course indicates the possibility of failure on licensing or certifying examinations. Therefore, no more than one program course may be repeated, and that course may be repeated only once during the three- or five-academic year time period. Students who

withdraw from a program course must still complete the curriculum within the allowed three- or five-year period. If, for any reason, a student is unable to complete the program within the allowed three- or five-year period, he or she may apply to compete as a new applicant. In such an instance, the applicant would start at the beginning of the program academic year.

A program course is a course that has the prefix of the major, i.e., RSPT courses are program courses for all of the Respiratory Care Technology Program degrees or certificates.

Each program has established student policies pertaining to its program. This is necessary in order to meet the criteria of the licensing board of the individual programs. Each student is given a copy of these policies when beginning the program.

Associate Degree Nursing

(An Approved Tech-Prep Program)

Accredited/Approved by Board of Nurse Examiners for the State of Texas (P.O. Box 430, 333 Guadalupe, Tower 3, Austin, TX 78701; www.bon.state.tx.us); National League for Nursing Accrediting Commission (NLNAC) (3343 Peachtree Road, N. E., Suite 500, Atlanta, GA 30326; www.nlnac.org; Phone: 404-975-5000).

This two-year program is designed to prepare registered nurses to give patient-centered care in general nursing at hospitals and other health care agencies. The curriculum provides students with nursing theory and clinical experiences that prepare them to become registered nurses as defined by the state of Texas. Graduates are eligible to apply to write the NCLEX examination for licensure as a registered nurse.

If developmental courses are needed for Texas Success Initiative requirements, it is recommended that such courses be completed before enrolling in RNSG 1523/1462.

A grade point average (GPA) of at least 2.8 in the academic courses and a grade average of C or better in all nursing courses will qualify the student to receive the Associate of Applied Science degree. A minimum grade of C with a cumulative GPA of 2.8 is required for other courses in the curriculum as prerequisites for nursing courses.

Completion of all Level I and II courses with a grade of C or better is required for admission to Level III of the Associate Degree Nursing Program.

All students must be concurrently enrolled in both a theory course and a clinical course each semester in the program.

A student has five years to complete the Associate Degree Nursing curriculum after official enrollment in the first Associate Degree Nursing course or three years if the student enters through advanced placement.

Level I

Prerequisite Courses

CHEM 1405 Introductory Chemistry I or	
CHEM 1407 Introductory Chemistry II or	
CHEM 1411 General Inorganic Chemistry I or	
BIOL 1406 Biology for Science Majors I or	
BIOL 1407 Biology for Science Majors II or	
BIOL 1408 General Biology or	
BIOL 2404 Introductory Anatomy and Physiology	4 hrs.
BIOL 2401 Anatomy and Physiology I	4 hrs.
BIOL 2402 Anatomy and Physiology II	4 hrs.
PSYC 2301 General Psychology	3 hrs.
	<i>15 hrs.</i>

Freshman Year

First Semester

RNSG 1523 Introduction to Professional Nursing for Integrated Programs	5 hrs.
RNSG 1462 Clinical – Nursing (RN Training)	4 hrs.
PSYC 2314 Human Growth and Development	3 hrs.
HPRS 1206 Medical Terminology or	
HPRS 1106 Medical Terminology AND	
HPRS 1101 Introduction to Health Professions	2 hrs.
	<i>14 hrs.</i>

Completion of Level I curriculum will qualify the student to receive a Certificate of Completion as a Nursing Assistant.

Level II

Second Semester

RNSG 2504 Integrated Care of Client with Common Health Care Needs	5 hrs.
RNSG 1463 Clinical – Nursing (RN Training)	4 hrs.
ENGL 1301 Freshman Composition I	3 hrs.
	<i>12 hrs.</i>

Third Semester

RNSG 1293 Special Topics in Nursing	2 hrs.
RNSG 1161 Clinical – Nursing (RN Training)	1 hr.
RNSG 1162 Clinical I – Nursing (RN Training) Optional	1 hr.
	<i>3 hrs.</i>

Completion of Level I and II curriculum and additional optional courses will qualify the student to receive a Certificate of Completion in Vocational Nursing. In order to meet state licensure

requirements for vocational nursing, students must take RNSG 1162, VNSG 1119 and VNSG 1463. Completion of RNSG 1523, 2504 and 1293 with a minimum grade of C and credit for RNSG 1462, 1463, 1161 and 1162 and VNSG 1119 will qualify the student to enter VNSG 1463. Students who receive credit for RNSG 2462 may substitute that course for VNSG 1463, provided that all other criteria have been met regarding Level I and II courses and that RNSG 1162 and VNSG 1119 have been completed successfully. See [Course Descriptions](#).

Level III

Prerequisite: Completion of all Level I and II courses (RNSG 1523, 1462, 2504 and 1463) with a grade point average of at least 2.0 and a minimum grade of C in all nursing courses. Students may also enroll in RNSG 2514 if they successfully complete the challenge examination for each freshman-level nursing course or take RNSG 1327 Transition from Vocational to Professional Nursing. See the section about [Advanced Standing](#) for Licensed Vocational Nurses for details regarding those two paths for entry into RNSG 2514. Enrollment in RNSG 2514 is limited.

Sophomore Year

Fourth Semester

RNSG 2514 Integrated Care of Client with Complex Health Care Needs	5 hrs.
RNSG 2462 Clinical – Nursing (RN Training)	4 hrs.
BIOL 2420 Microbiology	4 hrs.
Speech Communication (college-level)	3 hrs.
	<i>16 hrs.</i>

Fifth Semester

RNSG 2535 Integrated Client Care Management	5 hrs.
RNSG 2463 Clinical – Nursing (RN Training)	4 hrs.
Humanities elective	3 hrs.
	<i>12 hrs.</i>
	<i>Total 72 hrs.</i>

Certified Medical Assistant

The Certified Medical Assistant Program curriculum leads to a two-year Associate of Applied Science degree. The program is designed to provide the student with skills and knowledge applicable to a wide range of medical assisting office and clinical settings. Career enhancements in addition to the A.A.S. degree include certificates in phlebotomy, certified nurse aide, certified medication aide, medical coding and insurance, medical transcription, and medical office assistant. The course work is intended to provide a foundation for further specialization in nursing or allied health professions.

A grade point average of at least 2.0 in each major course in the technical curriculum and a minimum grade average of C or better in all Certified Medical Assistant courses will qualify the student to receive the Associate of Applied Science degree. A minimum grade of C or better is required for other courses in the curriculum as prerequisites for Certified Medical Assistant courses.

Students in the Certified Medical Assistant Program have five academic years to complete the technical curriculum after official enrollment in the first program course.

No more than one program course may be repeated, and that course may be repeated only once during the five-year time period. Failure of two program courses, or failure of one course twice, will cause the student to become ineligible to re-enroll in the Certified Medical Assistant Program.

[Electroneurodiagnostics and Polysomnography](#)

Accredited by the Committee on Accreditation of Allied Health Education Programs (CAAHEP) (35 East Wacker Dr., Suite 1970, Chicago, IL 60601) upon recommendation of the Committee on Accreditation for Education in Electroneurodiagnostics and Polysomnography Technology (Co-AEND) (7600 Hunters Hollow Trail, Novelty, OH 44072-9541; website: www.coa-end.org)

The Electroneurodiagnostics and Polysomnography curriculum leads to an Associate of Applied Science degree in Electroneurodiagnostics and Polysomnography Technology. Students who complete the curriculum are eligible to complete the national examinations for credentialing in R. EEG T. for electroencephalography, R. EP T. for evoked potentials and CNIM for intraoperative monitoring, administered by the American Board of Registration of Electroencephalographic and Evoked Potential technologists (ABRET); CLTM for long-term monitoring and R.EDT. for nerve conduction by the American Association of Electrodiagnostic Technologists (AAET); and RPSGT for Polysomnography administered by the Board of Registered Polysomnographic Technologists (BRPT).

Electroneurodiagnostics (END) is a term for the field of medicine that uses specialized instruments to study the electrical signals generated by the brain and its many pathways. The five major categories of procedures in the END field are: Electroencephalography (EEG), Evoked Potentials (EP), Polysomnography (PSG or Sleep), Nerve Conduction Studies (NCS) and Intraoperative Monitoring (NIM-IOM). Under the direction of a physician, Polysomnography technologists administer various sleep studies in order to diagnose the type and extent of sleep disorders, and they perform routine patient assessments and score sleep records. The knowledge and skills for performing electroneurodiagnostic and polysomnography testing are achieved through didactic classroom, campus laboratory and clinical preparation. Electroneurodiagnostic and polysomnography technologists are employed in hospitals, clinics and private companies.

A student has five years to complete the Associate of Applied Science degree in Electroneurodiagnostics and Polysomnography after official enrollment into the program. Students who complete the associate degree program will also receive a Certificate of Completion in Polysomnography. Contact the program director for more information.

Health Information Technology

Accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)(233 N. Michigan Ave., 21st Floor, Chicago, IL 60601-5800; www.cahiim.org); 312-233-1100.

The Health Information Technology Program is a two-year associate degree program. Graduates of the program are eligible to apply for the national qualifying examination for certification as a Registered Health Information Technician (RHIT). If developmental courses are needed for Texas Success Initiative requirements, it is recommended that such courses be completed before enrolling in the first fall semester of the program. In addition, applicants are

encouraged to complete support courses, such as Anatomy and Physiology and Medical Terminology, early on since new classes begin each fall semester and courses should be taken sequentially for progression in the program.

The Health Information Technology Program is designed to prepare the graduate to perform technical duties vital to the health-care industry. The health information technician is responsible for the compilation, inspection, preservation and appropriate disclosure of patient information for patients, health care institutions and the public. Typical job functions include health data collection, analysis, monitoring, maintenance, retrieval and reporting of quality health information that is compliant with professional practices, guidelines and regulatory standards in traditional and electronic environments. In addition, health information technicians are responsible for maintaining and submitting patient data used for reimbursement, quality of care studies, research and the compilation of statistics for health care organizations. Supervising day-to-day operations of a health information department and sustaining the flow of health information within the organization also encompass roles of the health information technician.

Numerous career opportunities exist for the profession, such as employment in hospitals, physician clinics, insurance companies, governmental agencies, pharmaceutical companies, mental health, long-term care and an array of other health-related agencies.

All students must demonstrate math competency by being eligible to enroll in a college-level math course at MCC, which may be accomplished by passing the math portion of THEA or an approved alternative test or by having passed a college-level math course.

A student has five years to complete requirements for the Associate of Applied Science degree in Health Information Technology after official enrollment into the program. Contact the program director for more information.

Coding Specialist Certificate

The Coding Specialist Certificate prepares students to work as health information coding specialists in hospitals, health agencies, medical clinics and other health care settings that submit billing for reimbursement. Job opportunities are plentiful for coding specialists, who may also apply these courses to MCC’s two-year Health Information Technology A.A.S. degree.

The certificate program is an open-enrollment program offered through the Health Information Technology Program. The Coding Specialist Certificate is a Texas Success Initiative-complete program, provided the student strictly adheres to the certificate degree plan. Upon completion of the program, the student will receive a Certificate of Completion.*

Individuals with coding work experience or education as a coding specialist may apply to take the national examination offered by the American Health Information Management Association (AHIMA) for certification as a Certified Coding Associate. The Coding Specialist Certificate Program at MCC can assist in preparing individuals to sit for the CCA examination.

Program prerequisite: keyboarding skills

* A grade of C or better in all certificate courses or an overall GPA of 2.0 is required to progress through the program. The clinical course may require students to travel within a 200-mile radius of Waco.

Medical Laboratory Technician

Tech-Prep Approved

Accredited by the National Accrediting Agency for Clinical Laboratory Sciences (5600 N. River Road, Suite 720, Rosemont, IL 60018-5119; www.naacls.org; Phone: 773-714-8880)

This program prepares entry-level medical laboratory technicians for an important role in the detection, diagnosis and treatment of disease. Students learn to perform tests in clinical chemistry, microbiology, hematology, coagulation, urinalysis, immunohematology and immunology. Graduates are eligible to take a national certifying examination.

A student in an Associate of Applied Science degree program has five academic years to complete the technical curriculum after official enrollment in the first program course. If a

student withdraws from a program course and then re-enters the program, that student must still complete the program within the time allotted.

A student who has failed two program courses may apply for admission to the program as a new applicant after the original five-year completion date has expired. A student who withdraws from a program course must still complete the curriculum within the allowed five-year period. If, for any reason, the student is unable to complete the program within the allowed five-year period, he or she may apply as a new student.

A program course is one that has the prefix of the major (e.g., MLAB courses are program courses for all of the Medical Laboratory Technician degree).

Prerequisite Course

BIOL 1406 Biology for Science Majors or
BIOL 1408 General Biology 4 hrs.

Freshman Year

First Semester

	<i>13 hrs.</i>

Third Semester

Speech Communication elective (college-level)	3 hrs.
Humanities elective	3 hrs.
MLAB 1191 Special Topics	1 hr.
	<u>7 hrs.</u>
	<i>Total 72 hrs.</i>

Notes:

- * Credits for the Associate of Applied Science degree include a minimum grade of C (2.0 grade point average) in each major course in the technical curriculum. A major course is a course that has the prefix of the program (i.e., MLAB or PLAB). A minimum grade of C will be required for related courses when specified in the catalog course description as a prerequisite. A minimum grade of C will be required for courses transferred or substituted to satisfy degree requirements.
- * PLAB 1160 Clinical – Phlebotomy/PLB is an optional 80-contact-hour course for MLT majors but is a required course for phlebotomy students. MLAB 1160 Clinical – Phlebotomy/MLT is a 48-contact-hour course that is required for both MLT majors and phlebotomy majors.
- * No more than one program course may be repeated, and that course may be repeated only once during the five-year time period. In other words, failure of two program courses or failure of one course twice, will cause the student to become ineligible to re-enroll in the MLT Program. The individual must complete and new application after the initial five-year time period ends and repeat the application process as a new student.

[Back to A.A.S. Degrees](#)

[Back to Allied Health & Nursing](#)

Institutional Award – Phlebotomy

Students who want a national certification as a phlebotomist may complete the following courses and receive an institutional award in phlebotomy from the college. The phlebotomy sequence of courses is offered each spring and fall semester.

PLAB 1223 Phlebotomy	2 hrs.
MLAB 1160 Clinical – Phlebotomy/MLT	1 hr.
PLAB 1160 Clinical – Phlebotomy/PLB.....	<u>1 hr.</u>
	<i>Total 4 hrs.</i>

- * The phlebotomy sequence of courses at MCC is also a Tech-Prep, dual-credit program available to area high school seniors enrolled in health occupation classes. Individuals interested in Tech-Prep should contact their high school counselor or the MLT program director for more information.

Physical Therapist Assistant

Accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) of the American Physical Therapy Association (APTA) (The Commission Accreditation in Physical Therapy Education, Department of Accreditation, American Physical Therapy Association, 1111 N. Fairfax St., Alexandria, VA 22314; website: www.apta.org/CAPTE; Phone: 703-706-3245.)

The Physical Therapist Assistant Program prepares assistants who will contribute to physical therapy services by performing a variety of functions under the supervision of a physical therapist. The curriculum provides theory, lab practice and clinical experience to prepare students to perform quality patient care. A student completing the program is eligible to sit for the licensing examination administered by the Texas Board of Physical Therapy Examiners. Job opportunities exist in a wide variety of health care settings. If developmental courses are needed for Texas Success Initiative requirements, such courses must be completed before entry into the program.

A student has five years to complete the Physical Therapist Assistant curriculum after official enrollment in the first Physical Therapist Assistant course. Contact the program director for more information.

Radiologic Technology

Accredited by Joint Review Committee on Education in Radiologic Technology (20 N. Wacker Drive, Suite 2850, Chicago, IL 60606-3182; www.jrcert.org; 312 - 704-5300)

The radiologic technologist assists radiologists (physicians specially trained in uses of radiation) in the examination of patients for broken bones, ulcers, tumors, disease or malfunction of organs within the body. Students in the Radiologic Technology Program learn the positioning, exposure, professional ethics, medical terminology, physics, procedures and techniques of x-ray technology. A student completing the program is eligible to apply for admission to the certification exam administered by the American Registry of Radiologic Technologists (ARRT). The radiologic technologist may secure employment in hospitals and clinics and other health care agencies. If developmental courses are needed for Texas Success Initiative requirements, it is recommended such courses be completed before enrolling in the program.

A student has five years to complete the radiologic technology curriculum after official enrollment in the first radiologic technology course. Contact the program director for more information.

Prerequisite Courses

BIOL 1408 General Biology or

BIOL 2404 Introductory Anatomy and Physiology 4 hrs.

Plus completion of 6 semester hours from the following **before** admission to the program. The remaining courses **may** be taken **before** admission to or **during** the program.

Enhanced Skills Certificate – Computed Tomography

The Enhanced Skills Certificate in Computed Tomography provides students with knowledge and skills needed to perform computed tomography exams in medical facilities. Courses can be completed in one semester and include both lecture and clinical courses. Eligibility for enrollment is limited to graduates of an accredited radiologic technology program. Contact the program director for more information.

RADR 2240 Sectional Anatomy for Medical Imaging	2 hrs.

[Respiratory Care Technology](#)

Accredited by the Commission on Accreditation for Respiratory Care (CoARC) (1241 Harwood Road, Bedford, TX 76021-4244; www.coarc.com)

The respiratory care curriculum leads to an Associate of Applied Science degree in Respiratory Care Technology. Students who complete the associate degree curriculum will be eligible to complete the examinations administered by the National Board for Respiratory Care (NBRC) for Certification (CRT) and Registry (RRT). The respiratory therapist applies scientific knowledge and theory to practical clinical problems of respiratory care. The knowledge and skills for performing various respiratory care modalities are achieved through didactic, laboratory and clinical preparation. Clinical training is provided in routine and special procedures applicable to pediatric, adult and geriatric patients. Respiratory therapy personnel are employed in hospitals, nursing care facilities, clinics, and institutions or companies providing home care. Applicants for this program must meet admission requirements established by the college. If developmental courses are needed for Texas Success Initiative requirements, it is recommended that such courses be completed before the fall semester of the first year of the program.

A student has five years to complete requirements for the Associate of Applied Science Degree in Respiratory Care after official enrollment into the program. Contact the program director for more information.

Surgical Technology

Accredited by the Accreditation Review Committee on Education in Surgical Technology — a collaborative effort of the Association of Surgical Technologists and the American College of Surgeons, under the auspices of the Commission on Accreditation of Allied Health Education Programs (1361 Park St., Clearwater, FL 33756; www.caahep.org; 727-210-2350)

This one-year certificate program is designed to prepare surgical technologists to be an integral part of the team of medical practitioners providing surgical care to patients in a variety of settings as defined by the National Board of Surgical Technology and Surgical Assisting (NBSTSA). Surgical technologists are individuals with specialized education who function as

members of the surgical team in the role of scrub person. Students who would like to apply for acceptance into the Surgical Technology Program at MCC are required to take the THEA, Accuplacer or an approved alternative test prior to enrolling in college courses. A student has three years to complete the surgical technology curriculum after official enrollment in the first surgical technology course. Contact the program director for more information.

Vocational Nursing

Accredited/Approved by Board of Nurse Examiners for the State of Texas, (333 Guadalupe #3-460, Austin, TX 78701; www.bon.state.tx.us)

This one-year certificate program is designed to prepare the vocational nurse to provide direct patient care and other nursing activities as designated by the licensure and practice regulations defined by the Board of Nurse Examiners for the State of Texas. Students must provide HESI test scores for admission review. Graduates are eligible to apply to write the examination for vocational nurse licensure (NCLEX-PN). Students enrolled in a pre-vocational nursing academic program at MCC are required to take the THEA or approved alternative test prior to enrolling in college courses. Once students are accepted in the Vocational Nursing Program, they will be Texas Success Initiative waived.

All students must be concurrently enrolled in both a theory course and a clinical course each semester in the program.

A student has three years to complete the vocational nursing curriculum after official enrollment in the first vocational nursing course. Contact the program director for more information.

Prerequisite Courses

(Academic courses must be completed before entering the program.)

BIOL 2404 Introductory Anatomy and Physiology or BIOL 2401 Anatomy & Physiology I AND BIOL 2402 Anatomy & Physiology II	4 hrs.

Business Programs

The Associate of Applied Science degree is offered in these Business Programs:

- [Accounting](#)
- [Business Management](#)
- [General Business](#)
- [Marketing](#)
- [Real Estate](#)

Certificates of Completion are offered in the following Business Programs:

- [Accounting](#)
- [Business Management](#)
- [Entrepreneurship](#)
- [Marketing](#)
- [Real Estate](#)

Marketable Skills Achievement Awards are offered in the following program:

- [Business](#)

[Accounting](#)

This program prepares students for positions in the accounting departments of large and small private businesses and service agencies such as hospitals and federal, state and local governments. Jobs range from specific areas such as payroll accounting to handling an entire accounting system. The emphasis is on concepts, with practical application on the job and an understanding of the business and economic environment. Graduates are qualified to fill jobs in a variety of interesting and challenging organizations.

Freshman Year

First Semester

ACNT 1303 Introduction to Accounting I ²	3 hrs.
BUSI 1301 Survey of Business	3 hrs.
BMGT 1327 Principles of Management	3 hrs.
ENGL 1301 Freshman Composition I or	
POFT 1301 Business English	3 hrs.
POFT 1393 Special Topics: Introduction to Keyboarding ^{1,2}	3 hrs.
MRKG 1311 Principles of Marketing	3 hrs.
	<i>18 hrs.</i>

Second Semester

BCIS 1305 Business Computer Applications ^{3,4}	3 hrs.
Humanities or Visual/Performing Arts elective ⁶	3 hrs.
ACCT 2401 Principles of Financial Accounting	4 hrs.

Math (college-level) or both POFT 1321 Business Math and Natural Sciences elective ⁶	3-6 hrs.
Speech elective	3 hrs.
	<i>16-19 hrs.</i>

Sophomore Year

First Semester

ACNT 1329 Payroll and Business Tax Accounting	3 hrs.

Certified Medical Assistant

Certified Medical Assistant

The Certified Medical Assistant Program curriculum leads to a two-year Associate of Applied Science degree. The program is designed to provide the student with skills and knowledge applicable to a wide range of medical assisting office and clinical settings. The course work is intended to provide a foundation for further specialization in nursing or allied health professions.

A grade point average of at least 2.0 in each major course in the technical curriculum and a minimum grade average of C or better in all Certified Medical Assistant courses will qualify the student to receive the Associate of Applied Science degree. A minimum grade of C or better is required for other courses in the curriculum as prerequisites for Certified Medical Assistant courses.

Students in the Certified Medical Assistant Program have five academic years to complete the technical curriculum after official enrollment in the first program course.

No more than one program course may be repeated, and that course may be repeated only once during the five-year time period. Failure of two program courses, or failure of one course twice, will cause the student to become ineligible to re-enroll in the Certified Medical Assistant Program.

Freshman Year

Fall Semester

[Media Communications](#)

This program prepares students for the diverse and exciting world of digital media manipulation and production. Curriculum exposes students to various types of digital media including digital

imaging and graphics, audio and video production, 2D and 3D animation, Web technologies, and desktop publishing. This program consists of a two-year A.A.S. in Media Communications as well as certificates in Web Design, Internet Webmaster and Media Communications. It prepares students for careers in graphic design, website production and management, video production, animation, gaming, electronic journalism, communications, etc. The A.A.S. has two tracks, one that focuses on design concepts and a second that specializes in the technical aspect of running a media server.

Network Administration

(An Approved Tech-Prep Program)

Today's computer power comes from networking an array of computers and computerized devices. The Network Administration A.A.S. degree and certificates were created to meet the demand for network specialists.

MCC courses prepare students to take the Microsoft Certification Professional and Microsoft Certified System Administrator (MCSA) exams. MCC is a Microsoft Academic Alliance partner.

MCC is also a CISCO Local Academy. There is a four-course sequence that covers the competencies on the CISCO Certified Network Administrator (CCNA) exam.

This program offers both a two-year A.A.S. degree in Network Administration with coverage of networking technologies, including Microsoft, CISCO systems and LINUX, as well as two one-year specialty certificates (Microsoft and CISCO).

Freshman Year

First Semester

COSC 1301 Introduction to Computing	3 hrs.
COSC 1336 Programming Fundamentals I	3 hrs.
ITCC 1310 Cisco Discovery I: Networking for Home and Small Businesses ⁴	3 hrs.
ENGL 1301 Freshman Composition I	3 hrs.
ITSC 1305 Introduction to PC Operating Systems	3 hrs.
	<i>15 hrs.</i>

Second Semester

ITSC 1307 Unix Operating System I	3 hrs.
ITCC 1311 Cisco Discovery II: Working at a Small-to-Medium Business or ISP ³	3 hrs.
ITSC 1325 Personal Computer Hardware ¹	3 hrs.
Math (college-level) or Natural Sciences elective ⁵	3 hrs.
ITSY 1342 Information Technology Security	3 hrs.
	<i>15 hrs.</i>

Summer

Social and Behavioral Sciences (ECON recommended) ⁵	3 hrs.
Speech Communication elective (SPCH 1321 recommended) ⁵	3 hrs.
Humanities or Fine Arts elective ⁵	3 hrs.
	<i>9 hrs.</i>

Sophomore Year

First Semester

ITSE 2309 Database Programming	3 hrs.
ITNW 1354 Implementing and Supporting Servers ²	3 hrs.
ITCC 1312 Cisco Discovery III: Introducing Routing and Switching in the Enterprise ³	3 hrs.

ITSY 2300 Operating System Security	3 hrs.
ITSC 1347 UNIX System Administration II (Server)	3 hrs.
	<i>15 hrs.</i>

Second Semester

ITCC 1313 Designing and Supporting Computer Networks ³	3 hrs.
ITNW 2352 Administering a Microsoft SQL Server ²	3 hrs.
ITNW 1345 Implementing Network Directory Services ²	3 hrs.
ITSC 2339 Personal Computer Help Desk ⁴ or Computer Internship ⁴	3-4 hrs.
	<u>12-13 hrs.</u>
	<i>Total 66-67 hrs.</i>

¹ This course may be eligible for articulation with some high schools. Please check with your high school counselor for more information.

² This course is designed to prepare students for the exams to receive the Microsoft Certified Professional (MCP) and Microsoft Certified Systems Administrator (MCSA) certification.

³ MCC is a CISCO Local Academy. This is one of four courses leading up to the CISCO Certified Network Administrator certification.

⁴ Capstone course, which brings together knowledge and skills learned in other courses and applies them in decision-making situations and in completing job tasks. Check course prerequisites.

Marketable Skills Achievement Award in CISCO Network Associate Certification

This Marketable Skills Achievement Award prepares the student for the CISCO Certified Network Administrator (CCNA) certification exam.

Required Courses

ITCC 1310 Cisco Discovery I: Networking for Home and Small Businesses ¹	3 hrs.
ITCC 1311 Cisco Discovery II: Working at a Small-to-Medium Business or ISP ¹	3 hrs.
ITCC 1312 Cisco Discovery III: Introducing Routing and Switching in the Enterprise ¹	3 hrs.
ITCC 1313 Designing and Supporting Computer Networks ¹	3 hrs.
<i>Total 12 hrs.</i>	

¹ MCC is a CISCO Local Academy.

In order to receive a Marketable Skills Achievement Award, the following requirements must be met:

1. You must make a minimum grade of C or higher in each course.
2. You must provide an unofficial transcript, with the appropriate courses highlighted on the request form.
3. You must submit a Request for Processing form to AS 218 for processing.

Your Marketable Skills Achievement Award certificate will include your course grade and the job competencies in the courses taken.

Marketable Skills Achievement Award in Electronic Media

This Marketable Skills Achievement Award enhances the technical skills of students from non-technical backgrounds to work in the e-commerce marketplace.

Required Courses

ARTC 1302 Digital Imaging I	3 hrs.
IMED 1316 Web Design I	3 hrs.
ARTC 1313 Digital Publishing I	3 hrs.
ARTC 2313 Digital Publishing II or IMED 2313 Project Analysis and Design or IMED 2315 Web Design II or ARTV 2301 2D Animation	3 hrs.
<i>Total 12 hrs.</i>	

In order to receive a Marketable Skills Achievement Award, the following requirements must be met:

1. You must make a minimum grade of C in each course.
2. You must provide an unofficial transcript, with the appropriate courses highlighted on the request form.
3. You must submit a Request for Processing form to AS 218 for processing.

Your Marketable Skills Achievement Award certificate will include your course grade and the job competencies in the courses taken.

Marketable Skills Achievement Award in Information Security

This Marketable Skills Achievement Award enhances the technical skills of students from non-technical backgrounds in information security technologies.

Required Courses

ITSC 1305 Introduction to PC Operating Systems.....	3 hrs.
ITSY 1342 Information Security	3 hrs.
ITCC 1310 Cisco Discovery I: Networking for Home and Small Businesses	3 hrs.
ITSY 2300 Operating System Security	3 hrs.
<i>Total 12 hrs.</i>	

In order to receive a Marketable Skills Achievement Award, the following requirements must be met:

1. You must make a minimum grade of C in each course.
2. You must provide an unofficial transcript, with the appropriate courses highlighted on the request form.
3. You must submit a Request for Processing form to AS 218 for processing.

Your Marketable Skills Achievement Award certificate will include your course grade and the job competencies in the courses taken.

Marketable Skills Achievement Award in Information Systems

This Marketable Skills Achievement Award enhances the technical skills of students from non-technical backgrounds in information systems technologies.

Required Courses

ITSW 1307 Introduction to Database	3 hrs.
IMED 1316 Web Design I	3 hrs.
COSC 1336 Programming Fundamentals I	3 hrs.
ITSW 1304 Introduction to Spreadsheets or ITSE 2309 SQL Programming or ITSY 1342 Information Security	3 hrs.
<i>Total 12 hrs.</i>	

In order to receive a Marketable Skills Achievement Award, the following requirements must be met:

1. You must make a minimum grade of C in each course.
2. You must provide an unofficial transcript, with the appropriate courses highlighted on the request form.
3. You must submit a Request for Processing form to AS 218 for processing.

Your Marketable Skills Achievement Award certificate will include your course grade and the job competencies in the courses taken.

Health Information Technology

[Health Information Technology](#)

Accredited by the Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)(233 N. Michigan Ave., 21st Floor, Chicago, IL 60601-5800; www.cahiim.org); 312-233-1100.

The Health Information Technology Program is a two-year associate degree program. Graduates of the program are eligible to apply for the national qualifying examination for certification as a Registered Health Information Technician (RHIT). If developmental courses are needed for Texas Success Initiative requirements, it is recommended that such courses be completed before enrolling in the first fall semester of the program. In addition, applicants are encouraged to complete support courses, such as Anatomy and Physiology and Medical Terminology, early on since new classes begin each fall semester and courses should be taken sequentially for progression in the program.

The Health Information Technology Program is designed to prepare the graduate to perform technical duties vital to the health-care industry. The health information technician is responsible for the compilation, inspection, preservation and appropriate disclosure of patient information for patients, health care institutions and the public. Typical job functions include health data collection, analysis, monitoring, maintenance, retrieval and reporting of quality health information that is compliant with professional practices, guidelines and regulatory standards in traditional and electronic environments. In addition, health information technicians are responsible for maintaining and submitting patient data used for reimbursement, quality of care studies, research and the compilation of statistics for health care organizations. Supervising day-to-day operations of a health information department and sustaining the flow of health information within the organization also encompass roles of the health information technician.

Numerous career opportunities exist for the profession, such as employment in hospitals, physician clinics, insurance companies, governmental agencies, pharmaceutical companies, mental health, long-term care and an array of other health-related agencies.

All students must demonstrate math competency by being eligible to enroll in a college-level math course at MCC, which may be accomplished by passing the math portion of THEA or an approved alternative test or by having passed a college-level math course.

A student has five years to complete requirements for the Associate of Applied Science degree in Health Information Technology after official enrollment into the program. Contact the program director for more information.

Program prerequisite: keyboarding skills

Freshman Year

Summer Semester

Coding Specialist Certificate

The Coding Specialist Certificate prepares students to work as health information coding specialists in hospitals, health agencies, medical clinics and other health care settings that

submit billing for reimbursement. Job opportunities are plentiful for coding specialists, who may also apply these courses to MCC's two-year Health Information Technology A.A.S. degree.

The certificate program is an open-enrollment program offered through the Health Information Technology Program. The Coding Specialist Certificate is a Texas Success Initiative-waived program, provided the student strictly adheres to the certificate degree plan. Upon completion of the program, the student will receive a Certificate of Completion.*

Individuals with coding work experience or education as a coding specialist may apply to take the national examination offered by the American Health Information Management Association (AHIMA) for certification as a Certified Coding Associate. The Coding Specialist Certificate Program at MCC can assist in preparing individuals to sit for the CCA examination.

Program prerequisite: keyboarding skills

* A grade of C or better in all certificate courses or an overall GPA of 2.0 is required to progress through the program. The clinical course may require students to travel within a 200-mile radius of Waco.

First Year

Office Technology Careers Programs

The Associate of Applied Science degree is offered in these Office Technology Careers Programs:

- [Administrative Assistant](#)
- [Computer Applications](#)
- [Digital Publishing Technology](#)
- [Medical Office Assistant](#)

Certificates of Completion are offered in the following Office Technology Careers Programs:

- [Computer Applications – Software Applications Specialist](#)
- [Digital Publishing](#)
- [Medical Office Assistant](#)
- [Medical Unit Assistant](#)
- [Administrative Assistant](#)
- [Office Technology](#)

Marketable Skill Achievement Awards are offered in the following programs:

- [Basic Medical Transcription](#)
- [Keyboarding and Business Document Formatting](#)
- [Word Processing](#)

The Office Technology Careers associate degree programs are designed to provide the student with skills and knowledge applicable to a wide range of office professional and information processing positions. The programs include common business and microcomputer core courses that provide a foundation for further specialization. The Administrative Assistant, Medical Office Assistant, Computer Applications and Digital Publishing degrees are offered with specific courses that provide academic and competency-based instruction in the specified field.

Office Technology Careers certificate programs are designed to provide students with skills and knowledge applicable to secretarial and information processing positions: receptionist, medical unit secretary, correspondence secretary, data entry and bookkeeping. Certificate programs in Office Technology, Medical Unit Assistant and Medical Office Assistant can be completed in nine months to one year and provide for employment or advancement in various business environments.

[Administrative Assistant](#)

(An Approved Tech-Prep Program)

This program prepares students for employment and advancement in information processing departments, as well as for positions as administrative assistants, office managers or executive secretaries. The duties range from operation of a single software application to operating and managing all application software for an office, department or company. The emphasis is on executive-level information processing, including word processing, digital publishing, office procedures, transcription, electronic spreadsheet applications and advanced document formatting. Areas of employment include office management, transcription, banking, government and bookkeeping.

Freshman Year

First Semester

POFT 1393 Special Topics: Introduction to Keyboarding ^{1,2} or

[Digital Publishing Technology](#)

(An Approved Tech-Prep Program)

If you enjoy the high-tech aspect of working with computers but long to use your artistic talents at the same time, this degree is perfect for you. This program builds on a foundation of business and office practices and computer technology. Your digital publishing training is enhanced by a graphics course and a design course from MCC's art department, as well as courses in Web page design and e-commerce. You will put it all together with state-of-the-art scanning equipment, clip art and digital graphics, color printers, and industry-standard publishing

software. The result is a well-rounded education that can take you into one of the many positions in the dynamic and growing field of digital publishing.

Second Semester

ARTC 2313 Digital Publishing II ³ (offered only in spring) 3 hrs.
 3 hrs.
 Total 42 hrs.

¹ May be waived if the student has taken a keyboarding course (touch method) or if the student can keyboard by touch at least 30 words a minute. Keyboarding test is required.

² May be eligible for articulation through high school Tech-Prep or by individual courses from high school. See your high school counselor.

³ This is a Capstone course, which brings together skills and knowledge learned in other classes and applies them in decision-making situations and in completing job tasks. Check for prerequisites.

⁴ Student must meet [Guidelines for Internships](#) and have approval of the program director to enroll in this course.

Medical Office Assistant

(An Approved Tech-Prep Program)

This program prepares students for employment and advancement in secretarial positions in hospitals, doctors' offices, nursing homes, medical clinics and other health care installations. The emphasis is on medical terminology, medical document processing and medical transcription. The program also includes bookkeeping, business writing, word processing, digital publishing, database, office procedures, advanced document formatting, transcription and electronic spreadsheet applications.

Freshman Year

First Semester

POFT 1393 Special Topics: Introduction to Keyboarding ^{1,2} or

Fire Protection Technology

Approved by the Texas Commission on Fire Protection

This program is offered both day and night to accommodate a variety of work schedules. Students who successfully complete the following curriculum will be awarded a Certificate of Completion in Fire Protection Technology and be eligible to take the state test to become a certified structural firefighter. The Texas Commission on Fire Protection certification test serves as the program Capstone. All courses below must be taken in a block schedule.

Students must also complete medical certification to be certified by the Texas Commission on Fire Protection. (A minimum of the Emergency Medical Technician course is recommended).

Required Courses

FIRS 1301 Fire Fighter Certification I	3 hrs.
FIRS 1407 Fire Fighter Certification II	4 hrs.
FIRS 1313 Fire Fighter Certification III	3 hrs.
FIRS 1319 Fire Fighter Certification IV	3 hrs.
FIRS 1323 Fire Fighter Certification V	3 hrs.
FIRS 1329 Fire Fighter Certification VI	3 hrs.
FIRS 1433 Fire Fighter Certification VII	4 hrs.
FIRS 1103 Fire Fighter Agility and Fitness Preparation	1 hr.

Total 24 hrs.

[Back to Emergency Services Education](#)

Paramedicine

Approved by the Department of State Health Services (1100 W. 49th St., Austin, TX 78756; www.dshs.state.tx.us; 512-458-7111) (Pending Tech-Prep Approval)

The Paramedicine Program is designed to prepare students for a career in emergency medical services. Progression through the program is EMT-Basic, EMT-Intermediate, certificate in Paramedicine and A.A.S. in Paramedicine. Students may complete a 12-month program and be awarded a certificate of Completion and be eligible to take the exam for certified paramedic administered by the National Registry for Paramedics. Students completing the two-year program will be awarded an A.A.S. degree in Advanced Paramedic **or** Paramedic Management and will be eligible to apply for paramedic licensure. Regular admission to the college is required. Contact the program director for more information. If developmental courses are needed for Texas Success Initiative requirements, it is recommended such courses be completed before enrolling in the program.

For information about credit through advanced standing for students holding their Emergency Medical Technician (EMT)-Basic and Emergency Medical Technician (EMT)-Intermediate, see the policy on [Advanced Standings](#).

Prerequisite: Emergency Medical Technician Basic certification

Certificate of Paramedicine

Program Prerequisites

BIOL 2404 Introduction to Anatomy and Physiology.....	4 hrs.
HPRS 1206 Medical Terminology	2 hrs.
	<i>6 hrs.</i>

Freshman Year

Fall Semester

EMSP 1160 Clinical – Emergency Medical Technology/Technician	1 hr.
EMSP 1501 Emergency Medical Technician – Basic	5 hrs.
EMSP 1173 First Responder Agility and Fitness Preparation	1 hr.

Paramedicine and EMT (Continuing Education and Recertification)

MCC offers courses leading to designation as a certified provider of emergency medical services (EMS), as well as remediation and recertification courses to meet licensure and certification for EMS professionals. For more information, call 254-299-8591.

[Law Enforcement Academy](#)

The Law Enforcement Academy offers two courses for individuals wishing to become certified as a peace officer or corrections officer (jailer) by the Texas Commission on Law Enforcement Officers Standards and Education (TCLEOSE).

The Basic Peace Officer Certification course is an 19-week course with hands-on and classroom training. Upon completion of the course, students receive a certificate and up to 12 credit hours.

The Basic Correction Certification course is a four-week class for which students will receive a certificate upon completion.

For more information on either course, call 254-299-6529.

Child Development

(An Approved Tech-Prep Program)

The curriculum in the Child Development/Early Childhood Program is designed to prepare individuals for careers in human services agencies. Students completing the program may serve in child care agencies or programs as caregivers/teachers, directors or supervisors, foster parents, or para-professionals in educational systems. The course work provides academic background and practical workplace experience. A grade of C or higher in all Child Development classes in the selected curriculum is required for graduation.

Freshman Year

First Semester

TECA 1311 Educating Young Children	3 hrs.
TECA 1354 Child Growth and Development	3 hrs.
CDEC 1358 Creative Arts for Early Childhood	3 hrs.
CDEC 1421 The Infant and Toddler	4 hrs.
ENGL 1301 Freshman Composition I	3 hrs.
	<i>16 hrs.</i>

Second Semester

TECA 1318 Wellness of the Young Child	3 hrs.
CDEC 1356 Emergent Literacy for Early Childhood	3 hrs.
CDEC 1413 Curriculum Resources for Early Childhood Program ¹	4 hrs.
CDEC 1419 Child Guidance	4 hrs.
CDEC 2307 Math and Science for Early Childhood	3 hrs.
	<i>17 hrs.</i>

Sophomore Year

First Semester

TECA 1303 Family, School and Community	3 hrs.
CDEC 1323 Observation & Assessment	3 hrs.
CDEC 2326 Administration of Programs for Children I	3 hrs.
Speech elective	3 hrs.
SOCI 1301 Introduction to Sociology or PSYC 2301 General Psychology	3 hrs.
Math elective (college-level)	3 hrs.
	<i>18 hrs.</i>

Second Semester

CDEC 1359 Children with Special Needs	3 hrs.
CDEC 2364 Practicum in Child Development	3 hrs.
CDEC 2441 The School-Age Child	4 hrs.
Humanities or Visual/Performing Arts elective	3 hrs.
COSC 1301 Introduction to Computing ¹	3 hrs.
	<u><i>16 hrs.</i></u>
	<i>Total 67 hrs.</i>

¹ May be eligible for articulation with a high school that has a current articulation agreement with MCC. See the high school counselor for information.

The Child Development Associate National Credential Training (CDA)

The Child Development Associate Credential (CDA) represents a national effort to qualify individuals who work with children from birth to age 5.

Child Development Associates demonstrate their ability to nurture children’s physical, social, emotional and cognitive growth in a child development framework. The proof of cognitive competence is the CDA Credential. The Credential is awarded by the Council for Professional Recognition (the Council), headquartered in Washington, D.C.

The CDA Competency Standard are the core of the program. These standards are called Competency Goals and are further defined into 13 Functional Areas. These areas describe the major tasks teachers/caregivers must complete in order to carry out competency goals.

CDEC 1317 CDA I	3 hrs.
CDEC 2322 CDA II	3 hrs.
CDEC 2324 CDA III	<u>3 hrs.</u>
	<i>Total 9 hrs.</i>

[Cosmetology](#)

Approved by the Texas Department of Licensing and Regulations

In addition to meeting admission requirements to the college and general college credit programs, individuals who wish to enroll in the Cosmetology, Aesthetics or Instructor programs must meet admission requirements as follows:

1. Apply for admission to MCC.
2. Submit a copy of the student’s MCC admission application to the Cosmetology Program Director.
3. Submit a Cosmetology Application for admission to the program director.
4. Submit a copy of an Automated Degree Plan to the Cosmetology Program.
5. Submit an official high school transcript or General Education Development (GED) test scores to the department of Student Admissions.
6. Students must be 18 years of age or older.
7. Pass Accuplacer Reading test with a score of at least 78 and pass the Writing portion with a score of W5 and Objective score of S80.

If transferring from another school of cosmetology, students must meet all of the above requirements and, in addition, must furnish the department with theory grades and verification of practical application completion. An official transcript from the Texas Department of Licensing

and Regulations must be on file before acceptance into the program can be finalized. Students transferring 500 or more clock hours must arrange, with the program director, a skills assessment evaluation.

Cosmetology Program

This program is designed to provide the student with the skills and knowledge for successful entry into the field of cosmetology. The certificate program can be completed by a full-time student in approximately one year.

First Term

CSME 1405 Fundamentals of Cosmetology	4 hrs.
CSME 1451 Artistry of Hair, Theory and Practice	4 hrs.
CSME 1443 Manicuring and Related Theory	4 hrs.
CSME 1431 Principles of Nail Technology I	4 hrs.
	<i>16 hrs.</i>

Second Term

CSME 1453 Chemical Reformation and Related Theory	4 hrs.
CSME 2401 Hair Coloring and Related Theory	4 hrs.
CSME 2439 Advanced Hair Design	4 hrs.
CSME 2237 Advanced Cosmetology Techniques	2 hrs.
	<i>14 hrs.</i>

Third Term

CSME 2441 Preparation for TDLR Examination	4 hrs.
CSME 1447 Principles of Skin Care/Facials and Related Theory	4 hrs.
CSME 2443 Salon Development	4 hrs.
	<i>12 hrs.</i>
	<i>Total 42 hrs.</i>

Students are eligible to take the Texas licensure examination upon completion of skills and 1,504 clock hours. This examination serves as the Cosmetology Capstone experience. Those students who complete the program and have a GPA of 2.0 or higher will be eligible to receive a Certificate of Completion.

[Back to Certificates of Completion](#)

[Back to Human Services & Education](#)

Aesthetician (Facial Specialist) Program

This program is designed to provide the student with the skills and knowledge for successful entry into the field of skin care. A full-time student can complete the certificate program in approximately one year.

First Term

CSME 1420 Orientation to Facial Specialist	4 hrs.
CSME 1348 Principles of Skin Care	3 hrs.
CSME 1421 Principles of Facial/Aesthetics Technology I	4 hrs.
	<i>11 hrs.</i>

Second Term

CSME 1545 Principles of Facial/Aesthetic Technology II	5 hrs.
CSME 1447 Principles of Skin Care/Facials and Related Theory	4 hrs.

CSME 2531 Principles of Facial/Aesthetic Technology III	5 hrs.
	<u>14 hrs.</u>
	Total 25 hrs.

Students are eligible to take the Texas Licensure Examination upon completion of all course work and 800 clock hours. This examination serves as the Cosmetology Capstone experience. Those students who complete the program and have a GPA of 2.0 or higher will be eligible to receive a Certificate of Completion.

[Back to Human Services & Education](#)

[Interpreter Training](#)

This program is designed to teach the basic skills and the ethical behavior required of the professional interpreter providing services to deaf/hard-of-hearing persons. Students learn through classroom study, skills development and laboratory practice. Field observation and experience focusing on workplace competencies are also required.

Professional opportunities for sign language interpreters are as wide-ranging as the communities in which we live. Interpreters work in rehabilitation, education, state and local government, medical facilities, legal practices, and other community services. Once you enter the field, you can enhance your career growth by earning advanced levels of certification from the National Registry of Interpreters for the Deaf or the state's Office for Deaf and Hard of Hearing Services.

Freshman Year

First Semester

SGNL 1401 Beginning ASL I	4 hrs.
SLNG 1317 Introduction to Deaf Community	3 hrs.
SLNG 1321 Introduction to the Interpreting Profession	3 hrs.
ENGL 1301 Freshman Composition I	3 hrs.
SPCH 1318 Interpersonal Communication	3 hrs.
	<i>16 hrs.</i>

Second Semester

SGNL 1402 Beginning ASL II	4 hrs.
SLNG 1347 Deaf Culture	3 hrs.
SLNG 1211 Fingerspelling	2 hrs.

Long-Term Care Administration

Recognized by the Texas Department of Aging and Disability Services

MCC offers two certificates in Long-Term Care Administration (LTCA). The first, in Nursing Facility Administration, addresses the unique academic and field experience prerequisites for testing to become a Licensed Nursing Facility Administrator in Texas. This course of study can be taken as part of, or in addition to, a bachelor's degree. Since 2001, a certificate in Assisted Living Facility Management has been available through the LTCA Program. This second certificate meets the current state requirements for recognition as an Assisted Living Facility Manager.

Long-Term Care Administration – Nursing Facility Administration Advanced Skills Certificate

Recommended Schedule

Fall Semester

LTCA 1311 Introduction to Long Term Care Administration	3 hrs.
LTCA 1313 Organization & Management of Long Term Care Facilities	3 hrs.
LTCA Internship*	4-6 hrs.
	<i>10-12 hrs.</i>

Spring Semester

LTCA 2314 Long Term Care Law	3 hrs.
LTCA 2315 Financial Management of a Long Term Care Facility	3 hrs.
LTCA Internship*	4-6 hrs.
	<i>10-12 hrs.</i>

Summer Semester

LTCA 1312 Resident Care in the Long Term Care Facility (Capstone)	3 hrs.
LTCA Internship*	4-6 hrs.
	<u>7-9 hrs.</u>
	<i>Total 27 hrs.</i>

* The certificate in Nursing Facility Administration requires the completion of one of the following internship options. Consult with the LTCA advisor to select the appropriate internship option.

- Option I – the following internship is repeated three times for a total of 12 credit hours. LTCA 2489 Internship – Hospital/Health Facilities Administration – 4 credit hours for 3 semesters
- Option II – the following internship is repeated twice for a total of 12 credit hours. LTCA 2689 Internship – Hospital/Health Facilities Administration – 6 credit hours for 2 semesters.

Long-Term Care Administration – Assisted Living Facility Management Advanced Skills Certificate

Recommended Schedule

Fall Semester

LTCA 1311 Introduction to Long Term Care Administration	3 hrs.
LTCA 1313 Organization & Management of Long Term Care Facilities	3 hrs.
	6 hrs.

Spring Semester

LTCA 2314 Long Term Care Law	3 hrs.
LTCA 2315 Financial Management of a Long Term Care Facility	3 hrs.
	6 hrs.

Summer Semester

LTCA 1312 Resident Care in the Long Term Care Facility (Capstone)	3 hrs.
	<u>3 hrs.</u>
	Total 15 hrs.

Mental Health

Successful completion of this program opens doors to employment or a better position in social welfare, governmental and community service agencies. Graduates can make significant contributions wherever people are employed to help others with social- and mental health-related situations.

Core Requirements

The Mental Health Program includes a foundation of courses that provide a framework for the Mental Health associate degree, as well as further specialization in substance abuse/addictions and youth counseling. Each specialization may be in the form of a one-year certificate and/or a two-year Associate of Applied Science (A.A.S.) degree.

To obtain a two-year A.A.S. degree, the student will pursue the foundation courses, exploring the various specializations in the field of mental health. At the end of the first year, a student

may continue the associate degree curriculum and/or pursue specialization(s) with a focus on workplace competencies. A grade of C or better is required for all mental health courses for graduation.

A.A.S. Degree First-Year Courses

Freshman Year

First Semester

PMHS 1191 Special Topics in Psychiatric/ Mental Health Services Tech	1 hr.
PMHS 1166 Practicum – Psychiatric/Mental Health Services Tech	1 hr.
SCWK 1321 Orientation to Social Services	3 hrs.
PSYC 2301 General Psychology or SOCI 1301 Introduction to Sociology	3 hrs.

Veterinary & Agriculture

The Associate of Applied Science degree is offered in:

- [Veterinary Technology](#)

The Associate in Science degree is offered in:

- [Agriculture](#)

Certificates of Completion are offered in:

- [Veterinary Assistant – Small Animal](#)
- [Veterinary Assistant – Large Animal](#)

Veterinary Technology

Accredited by the American Veterinary Medical Association

This academically challenging program is designed to provide the theory and practice necessary to follow a fulfilling career as a Registered Veterinary Technician. A veterinary technician is knowledgeable in the care and handling of animals, basic principles of normal and abnormal anatomy and physiology, and routine laboratory and clinical procedures.

Training as a veterinary technician enables the student to work as professional technical support to veterinarians, biomedical researchers and other scientists. Students can also find positions in the pharmaceutical industries, zoological gardens, animal control and humane organizations, and local and state health departments. Currently there is a strong demand for graduates from veterinary technology programs. This trend is expected to continue into the future. Opportunities for jobs exist in the following areas:

Veterinary practice	Veterinary supply sales	Teaching
Zoo/wildlife	Medical	Military service
Biomedical research	Humane societies	
Herd health managers	Diagnostic laboratories	

Because the Veterinary Technology Program is fully accredited by the American Veterinary Medical Association, students are allowed to work in all areas of animal health care. While in school, a student spends time in laboratories working with dogs, cats, horses, cows, pigs, sheep, goats, laboratory and exotic animals such as mice, rats, rabbits, guinea pigs, snakes, lizards and birds.

The two-year program consists of 72 credit hours taken sequentially over a six-semester period of time. It culminates in the awarding of an Associate of Applied Science degree in Veterinary

Technology. Following this, the student may take the state and national examinations given by the Texas Veterinary Medical Association and the American Association of Veterinary State Boards, respectively. Upon successfully passing these examinations, the student will be classified as a Registered Veterinary Technician (RVT) in the state of Texas.

Enrollment into the Veterinary Technology Program is limited and competitive. Students must meet the admission requirements to the college, as well as admission requirements into the Veterinary Technology Program. A point system is used to select applicants. Applicants must be high school graduates or have completed the GED. The four college-level prerequisite courses listed below must be taken prior to being accepted into the Veterinary Technology Program. Test scores are required for assessment by taking the Health Occupations Aptitude Exam. In addition, all applicants must have worked for, volunteered with or observed in a veterinary practice for 50 hours. Proof of this activity must also be submitted with the application. Official transcripts of all high school and college-level courses are required. The admissions committee will review and evaluate all information, calculate point accumulation, and recommend admission based on the submission of the required information. Applicants with the greatest number of points will be admitted into the program.

Applications are accepted beginning January 1 and ending on June 15 of each year for admission into the program beginning the following August. Applications will not be processed until all required information is submitted. Applicants are notified of the selection committee's decision by July 15. Applications may be requested by contacting the admission office at McLennan Community College or from the Veterinary Technology website.

Students must maintain a minimum grade of C in all required courses, as well as an overall grade of 2.0 in order to progress in the degree program. Veterinary Technology students have five academic program years to complete the curriculum after official enrollment in the first program course.

There are many types of employment available to a registered veterinary technician. Some of these, such as working in a veterinary clinic, can be physically demanding. A student interested in pursuing a degree in veterinary technology, and who plans on working in a veterinary clinic, should be able to lift at least 50 pounds, have the ability to stoop and bend, be capable of standing for long periods of time and not have any life-threatening allergies to animals.

Prerequisite Courses

Academic courses must be completed before entering the program.

BIOL 1413 Zoology	4 hrs.
ENGL 1301 Freshman Composition I	3 hrs.
MATH 1314 College Algebra	3 hrs.
PSYC 2301 General Psychology	3 hrs.
	<i>13 hrs.</i>

Freshman Year

Fall Semester

PHIL 2374 Critical Thinking	3 hrs.

Associate of Science with an Emphasis in Agriculture

Students knowledgeable in agricultural science and management have a full spectrum of career paths from which to choose. Individuals with a background in agriculture work in private and governmental industries in such fields as agricultural engineering, agronomy, animal breeding and genetics, animal nutrition, soil science, and wildlife science. The recommended curriculum below is designed to meet the requirements of the core curriculum leading to an A.S. degree,

with a special emphasis in agriculture. It will provide students with a general background in agriculture, as well as the opportunity to take more specific electives in order to pursue a bachelor's degree at a four-year institution.

Commercial Music Programs

The Commercial Music Program is an extensive program designed to prepare students for careers in the music industry as performers, songwriters, recording engineers/producers, music store employees, private lesson instructors, and management employees for companies selling music industry products and services.

In addition to bands and touring stage shows, other possible employers include recording studios, film companies, radio and television stations, advertising agencies, and production companies. Other career opportunities are open in the fields of publishing, artist management, concert promotion and music merchandising.

The Associate of Applied Science degree is offered in these Commercial Music Programs:

- [Audio Technology](#)
- [Performance](#)
- [Songwriting](#)
- [Venue and Talent Management](#)

Certificates of Completion are offered in the following Commercial Music Programs:

- [Performance](#)
- [Songwriting](#)
- [Venue and Talent Management](#)

Special admission criteria: Students who do not pass the music theory placement test will be required to raise their skills to entry level.

Audio Technology

Students completing this program are prepared to assume audio production positions in the music industry. Employment opportunities include: audio producer, recording engineer, sound designer and MIDI programmer. Potential employers include advertising agencies, video and audio production companies, recording studios, record labels, and publishing companies.

Freshman Year

First Semester

MUSC 1213 Commercial Music Theory I	2 hrs.
MUSC 1311 Commercial Music Sight-Singing/Ear-Training	3 hrs.
MUSI 1181 Class Piano	1 hr.

Capstone Course

All students graduating from Commercial Music programs (A.A.S. and certificates) must complete a Capstone Project, which will be graded by a panel of Commercial Music faculty. Project examples: portfolio review, present full-length public performance, comprehension test, etc. Each student will develop a Capstone contract with the program coordinator.

Course Descriptions

Each course has a four-digit number. The first digit identifies the course as either freshman level (1) or sophomore level (2). When the first digit is 0, the course is developmental and does not earn college-level credit. The second digit identifies the number of credit hours students earn upon completing the course. The final two digits establish the sequence in which courses are usually taken.

The information in parentheses at the end of each course description indicates the number of hours each week of lecture, laboratory and other activity. For example, (3 lec/3 lab) indicates a course meets for three hours of lecture and three hours of laboratory each week. See [Course Numbers](#) for additional information on the Texas Common Course Numbering System and its benefits to students.

Accounting

ACCT 2401 Principles of Financial Accounting

Introduces the accounting process and the use of accounting data as applied to various forms of business organizations. Emphasis is given to the accounting cycle and financial statements, accounting for current and plant assets, accounting for liabilities, internal control, and corporate equity and debt. Prerequisites: ACNT 1303 with a C or better or permission of the director. Students must have passed the reading portion of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 4 (3 lec/2 lab)

ACCT 2402 Principles of Managerial Accounting

Emphasizes managerial use of and decision making with accounting data. Topics include financial statement analysis and interpretation, budgeting, product costing, cost control, and management decision techniques. Prerequisites: Completion of ACCT 2401. Students must have passed the math portion of the THEA or approved alternative test or have credit for MATH 0307. Semester Hours 4 (3 lec/2 lab)

ACNT 1303 Introduction to Accounting I (formerly ACCT 1370 Bookkeeping)

Analyzes, classifies and records business transactions in a manual and computerized environment. Emphasis on understanding the complete accounting cycle and preparing financial statements, bank reconciliations and payroll. May not be counted toward the associate degree if taken after successful completion of ACCT 2401. Semester Hours 3 (3 lec/lab)

ACNT 1313 Computerized Accounting Applications
(formerly ACCT 2372 Automated Accounting)

Utilizes the computer to develop and maintain accounting record-keeping systems, make management decisions and process common business applications with emphasis on utilizing a spreadsheet and/or database package/program. This course also utilizes a general ledger software program comparable to those used by businesses. This is a Capstone course that integrates knowledge from previous courses and provides the opportunity to apply accounting principles to real world situations. Prerequisites: ACCT 2401 and BCIS 1305 or COSC 1301. Semester Hours 3 (3 lec)

ACNT 1329 Payroll and Business Tax Accounting
(formerly ACCT 2375 Accounting Applications)

Introduces payroll procedures, taxing entities and reporting requirements of local, state and federal taxing authorities in a manual and computerized environment. Prerequisites: BCIS 1305 or COSC 1301 and ACCT 2401 or ACNT 1303. Semester Hours 3 (3 lec/lab)

ACNT 2488 Internship – Accounting

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Prerequisite: An approved work station. (See [Guidelines for Internships](#).) ACCT 2401 with a C or better. Semester Hours 4 (15-20 lab)

ACNT 2489 Internship – Accounting

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Prerequisite: An approved work station. (See [Guidelines for Internships](#).) ACCT 2488. Semester Hours 4 (15-20 lab)

Aerospace Studies

McLennan Community College participates in a cross-town agreement with the Air Force and Baylor University that allows MCC students to participate in the first 2 years of the 4-year Air Force Reserve Officers Training Corps (AFROTC) program via Aerospace Studies/general military course (GMC) classes. This 2-year program enables students to compete for an enrollment allocation to participate in the professional officer course (POC)/last 2 years of AFROTC when they transfer to an accredited bachelor's degree program at an institution affiliated with an AFROTC program (e.g., Baylor, UMHB, UNT). MCC students register at MCC, pay MCC tuition, and receive MCC credit, and those students who participate in the AFROTC program for two semesters will have completed their PHED requirements for MCC.

Leadership Laboratory

The AERO 1111, 1112, 2111 and 2112 classes are collectively referred to as the Leadership Laboratory (LLAB), which is required of any student pursuing an enrollment allocation to the professional officer course (POC). Instruction is conducted within the framework of an organized cadet corps with a progression of experiences designed to develop leadership potential. LLAB involves a study of Air Force customs and courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force commissioned officer. Weekly physical training and a once-a-semester fitness assessment is also included, as well as field trips to Air Force installation throughout the United States when funding permits. Students must attend at least 80% of LLAB activities (i.e., practical military training) and 80% of physical training. Practical military and physical training averages 4 hours per week throughout a student's entire enrollment in the AFROTC program.

General Military Course

The AERO 1101, 1102, 2101 and 2102 classes are collectively referred to as the General Military Course (GMC), which is intended to acquaint students with Air Force organizations, missions, functions, history and career opportunities. The classes do not incur a military service obligation and are normally completed sequentially over the first 2 years of undergraduate studies; however, the fall semester (i.e., AERO 1101 and AERO 2101) and spring semester (i.e., AERO 1102 and AERO 2102) courses can be taken concurrently if a student doesn't start AFROTC during his or her first semester of undergraduate studies. Upon selection by the Air Force, the GMC culminates in a 4-week, off-campus training course called field training whereas successful completion enables students to enroll in the professional officer course.

Field Training

Eligible students compete, on a nationwide basis, to attend field training during the summer months at Maxwell Air Force Base, Ala. Students usually compete for a field training enrollment allocation in the spring of their sophomore year and attend field training that summer. Field training expenses are paid by the Air Force and successful completion of field training enables students to enroll in the Professional Officer Course.

Professional Officer Course

The professional officer course (POC) is only offered at institutions with accredited bachelor's degree programs and is intended to prepare students to be Air Force second lieutenants through the study of leadership, professional development, communication skills, national security affairs and preparation for active duty. Upon successfully completing a baccalaureate degree, a POC student is appointed as a commissioned officer and enters extended active duty (i.e., full-time military service) within 365 days of their commissioning date. Upon completing the GMC at MCC, students must transfer to an AFROTC affiliated institution in order to enter the POC.

AFROTC Courses for Other Students

Students who are not pursuing a career as an Air Force officer may take the AERO 1101, 1102, 2101 and 2102 classes for credit. These students will not register for the leadership laboratory portion (i.e., AERO 1111, 1112, 2111, 2112) of the AFROTC program.

AFROTC College Scholarship Program

Students with at least 3 years of undergraduate studies remaining, as of the fall semester, are eligible to compete, on a nationwide basis, for AFROTC scholarships. Students selected for AFROTC in-college scholarships are required to voluntarily obligate to serving at least 4 years of active military service and are provided funds for tuition, books and fees plus a monthly subsistence allowance for the period of the scholarship. More detailed information about the Air Force ROTC scholarship program can be found at www.afrotc.com or by contacting the Department of Aerospace Studies.

Additional Information

More detailed information about the AFROTC program may be obtained by writing: AFROTC Detachment 810, Baylor University, One Bear Place #97070, Waco, TX 76798, or by visiting the Department of Aerospace Studies located in the Baylor University Speight Plaza Building and Parking Garage, Suite 100, 1521 S. 4th Street, Waco, Texas. The e-mail address is afrotc@baylor.edu and telephone number is 254-710-3513.

Aerospace Studies Course Descriptions

AERO 1101 Foundations of the Air Force I

An introductory course exploring the doctrine, mission, and organization of the U.S. Air Force and roles of the U.S. Army, Navy, and Marine Corps. Laboratory (AERO 1111 or AERO 2111, if concurrently enrolled in AERO 2101) required for AFROTC cadets.

AERO 1102 Foundations of the Air Force II

A continuation of the study of U.S. Forces including general purpose forces, aerospace support forces, and a study of the functions of the strategic offensive and defensive forces. Laboratory (AERO 1112 or AERO 2112, if concurrently enrolled in AERO 2102) required for AFROTC cadets.

AERO 1111 Leadership Laboratory

A study of Air Force customs, courtesies, drill and ceremonies, career opportunities in the Air Force, and the life and work of an Air Force officer. An extensive physical fitness program is taught, reinforced, and evaluated. Students under contract with AFROTC must pass a physical fitness test (sit-ups, push-ups, 1.5 mile run) each term. Non-contract students must attempt the physical fitness test each term. Field trips to Air Force installations are also included. Corequisite: concurrent enrollment in AERO 1101.

AERO 1112 Leadership Laboratory

A continuation of AERO 1111. Corequisite: Concurrent enrollment in AERO 1102.

AERO 2101 Evolution of Air and Space Power I

Presents the evolution of air and space power through the Cuban missile crisis. Introduces and develops Air Force values and communication skills. Laboratory (AERO 2111) required for AFROTC cadets.

AERO 2102 Evolution of Air and Space Power II

A continuation of AERO 2101, emphasizing the evolution of air and space power from the Cuban missile crisis in 1962 to present. Further develops Air Force values and communication skills. Laboratory (AERO 2112) required for AFROTC cadets.

AERO 2111 Leadership Laboratory

A continuation of AERO 1112. Corequisite: Concurrent enrollment in AERO 2101.

AERO 2112 Leadership Laboratory

A continuation of AERO 2111. Corequisite: Concurrent enrollment in AERO 2102.

Agriculture**AGRI 1131 The Agricultural Industry**

Overview of world agriculture, nature of the industry, resource conservation and the American agricultural system, including production, distribution and marketing. Special emphasis will be placed on Central Texas agriculture industry. Semester Hours 1 (1 lec/1 lab)

AGRI 1309 Computers in Agriculture

Use of computers in agricultural applications. Introduction to programming languages, word processing, electronic spreadsheets and agricultural software. Semester Hours 3 (3 lec/1 lab)

AGRI 1311 Dairy Science

Survey of the dairy industry, including dairy breeds, standards for selection and culling, herd replacements, feeding, management, physiology and health maintenance. Food value for milk, tests for composition and quality, and use and processing of market milk and dairy products. Semester Hours 3 (3 lec/1 lab)

AGRI 1329 Principles of Food Science

Biological and scientific aspects of modern industrial food supply systems. Food classification, modern processing and quality control. Semester Hours 3 (2 lec/2 lab)

AGRI 1407 Agronomy

Principles and practices in the development, production and management of field crops including plant breeding, plant diseases, soils, insect control and weed control. Semester Hours 4 (3 lec/3 lab)

AGRI 1415 Horticulture

Structure, growth and development of horticultural plants from a practical and scientific approach. Environmental effects, basic principles of propagation, greenhouse and outdoor production, nutrition, pruning, chemical control of growth, pest control, and landscaping. Semester Hours 4 (3 lec/3 lab)

AGRI 1419 Introductory Animal Science

Scientific animal agriculture. Importance of livestock and meat industries. Selection, reproduction, nutrition, management, and marketing of beef cattle, swine, sheep, goats and horses. Semester Hours 4 (3 lec/3 lab)

AGRI 2301 Agricultural Power Units

Fundamentals of internal combustion engine operation to include gasoline-fueled engines. This course covers theory of operation, disassembly, inspection, assembly and tuning of small gasoline-fueled engines. Emphasis will be placed on understanding the universal principle of induction, efficiency, compression, emission, control, exhaust, camshafts and tuning that are common to all internal combustion engines. Semester Hours 3 (2 lec/2 lab)

AGRI 2304 Introductory Metal and Welding

The importance of cold metal work, including: soldering, pipe fitting, tool sharpening, hardware nomenclature, arc and oxyacetylene welding. Semester Hours 3 (2 lec/4 lab)

AGRI 2317 Introduction to Agricultural Economics

Fundamental economic principles and their applications to the problems of the agricultural industry. Semesters Hours 3 (3 lec)

AGRI 2321 Livestock Evaluation I

Selection, evaluation and classification of livestock and livestock products. Semester Hours 3 (2 lec/4 lab)

AGRI 2322 Livestock Evaluation II

Selection, evaluation and classification of livestock and livestock products. Prerequisites: AGRI 2321. Semester Hours 3 (2 lec/4 lab)

AGRI 2330 Wildlife Conservation and Management

Principles and practices used in the production and improvement of wildlife resources. Aesthetic, ecological and recreational uses of public and private lands. Semester Hours 3 (3 lec)

Anthropology

ANTH 2301 Physical Anthropology

Physical anthropology is the study of human variation and evolution. Also included within the discipline is the subfield of primatology; anthropologists study nonhuman primates both for their own sakes and for the insights they provide into the evolution of human morphology (form or

structure) and human behavior. Four broad topical areas are covered in this course: Genetics, Living Primates and Primate Evolution, Hominid Evolution, and Human Variation and Adaptation. Prerequisites: THEA or approved alternative reading test passed or credit for READ 0302. Semester Hours 3 (3 lec)

ANTH 2346 Introduction to Anthropology

Surveys the diversity and unity of humankind. Introduces major subfields of physical anthropology, archaeology, linguistics and ethnology. Semester Hours 3 (3 lec)

ANTH 2351 Cultural Anthropology

Uses comparative analysis of cultures to increase understanding and respect for cultural diversity and human universals. Students will be introduced to processes that create culture, society and social interaction and learn about the critical role of culture in human adaptation and survival. Students will also explore and consider impacts of culture on environmental sustainability. Prerequisites: THEA or approved alternative reading test passed or credit for READ 0302. Semester Hours 3 (3 lec)

ANTH 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in anthropology. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of human social behavior and/or social institutions. Prerequisites: THEA or approved alternative test reading passed or credit for READ 0302. Semester Hours 3 (3 lec)

Allied Health & Nursing**(Available to all Allied Health & Nursing majors)****HPRS 1101 Introduction to Health Professions**

An overview of roles of various members of the health care system, educational requirements and issues affecting the delivery of health care. Semester Hours 1 (1 lec)

HPRS 1106 Essentials of Medical Terminology

A study of medical terminology, word origin, structure and application. Semester Hours 1 (1 lec)

HPRS 1206 Medical Terminology

Introduces study of word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols, surgical procedures, medical specialties, and diagnostic procedures. Prerequisite: READ 0302. Semester Hours 2 (2 lec)

HPRS 2300 Pharmacology for Health Professions

Provides a study of drug classifications, actions, therapeutic uses, adverse effects, methods of administration, client education and calculation of dosages. Prerequisite: a course in anatomy and physiology or medical terminology or consent of division chair. Semester Hours 3 (3 lec)

HPRS 2301 Pathophysiology

Introduces a study of pathology and general health management of diseases and injuries across the life span. Topics include etiology, symptoms, and the physical and psychological reactions

to diseases and injuries. Prerequisite: A course in anatomy and physiology or medical terminology or consent of division chair. Semester Hours 3 (3 lec)

Art

Students who plan to obtain a bachelor's degree should consult with an advisor in the Visual Arts Department to arrange a program to meet the requirements of the senior college where degree work will be completed. Courses are not repeatable for credit, with the exception of "Problems" class.

ARTS 1301 Art Appreciation

Applies as a required humanities or fine arts course for all students. Introduces the visual arts through an exploration of their purposes and processes. A study, from the layman's point of view, of painting, sculpture and architecture, with emphasis on design fundamentals, aesthetics, and other related aspects of art and design. Semester Hours 3 (3 lec)

ARTS 1303 Art History I

Surveys painting, sculpture, architecture and related arts from prehistoric times to the 14th century. Semester Hours 3 (3 lec)

ARTS 1304 Art History II

Surveys painting, sculpture, architecture and related arts from the 14th century to the present. Semester Hours 3 (3 lec)

ARTS 1311 Design I

Presents the fundamentals of art with emphasis on two-dimensional concepts; includes line, shape, color, texture, space and composition. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 1312 Design II

Continues ARTS 1311 with emphasis on three-dimensional concepts. Prerequisite: ARTS 1311 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 1316 Drawing I

Investigates a variety of media techniques and descriptive and expressive possibilities. Includes practice in illusionism (using media to make images appear real), composition and creative development. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 1317 Drawing II

Continues the investigation of media techniques and descriptive and expressive possibilities. Includes further practice in illusionism (using media to make images appear real), composition and creative development. Prerequisite: ARTS 1316 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 1325 Drawing and Painting for the Non-Art Major

Includes painting, freehand drawing and composition for the beginner. This course is designed to acquaint the student with media techniques and other painting and drawing fundamentals.
Semester Hours 3 (4 lec/studio)

ARTS 1375 Ceramics for the Non-Art Major

Introduces basic ceramics, including hand-built pottery, wheel-thrown pottery and glazing techniques. Semester Hours 3 (4 lec/studio)

ARTS 1376 Watercolor for the Non-Art Major

Introduces the techniques, possibilities and compositional concerns of a water-based media. Semester Hours 3 (4 lec/studio)

ARTS 1377 Oil Painting for the Non-Art Major

Explores the techniques, possibilities and compositional concerns of oil painting media. Semester Hours 3 (4 lec/studio)

ARTS 1378 Sculpture for the Non-Art Major

Provides experiences in working with materials such as stone, metal, clay, wood and plaster, with an emphasis on expression in three-dimensional form. Semester Hours 3 (4 lec/studio)

ARTS 2311 Design III

Investigates further the problems of two-dimensional and three-dimensional concepts with emphasis on individual concerns. Prerequisites: ARTS 1312 and 1317 or consent of the instructor. Semester Hours 3 (6 lec/studio)

ARTS 2313 Design Communications

Introduces processes and techniques of design communication. In this studio course, the students will use the computer to learn various software and solve a variety of graphic design problems with an emphasis on creative thinking. Prerequisites (for art majors only): ARTS 1312 and ARTS 1317. Prerequisites (for all other majors): Consent of instructor. Semester Hours 3 (6 lec/lab)

ARTS 2316 Painting I

Explores the potentials of painting media with emphasis on color and composition. Includes practice in illusionism (using media to make images appear real) and creative development. Prerequisites (for art majors only): ARTS 1312 and 1317 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2317 Painting II

Continues the investigation of painting with emphasis on individual concerns and creative development. Prerequisite (for art majors only): ARTS 2316 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2323 Life Drawing I

Emphasizes structure and action of the human figure. Anatomical study includes drawing muscles, bones and the nude model. Prerequisites: ARTS 1312 and 1317 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2324 Life Drawing II

Continues the investigation of drawing, focusing on the human figure with emphasis on individual development and accomplishment in various areas designated by the student and instructor. Anatomical study includes drawing muscles, bones and the nude model. Prerequisite: ARTS 2323 or consent of instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2326 Sculpture I

Introduces various sculptural approaches in a variety of media, including additive and subtractive techniques. Prerequisite (for art majors only): ARTS 1312 and 1317 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2327 Sculpture II

Continues Sculpture I with emphasis on individual expression. Prerequisite (for art majors only): ARTS 2326 or consent of the instructor. Semester Hours 3 (6 lec/studio plus 3 hours minimum out of class)

ARTS 2346 Ceramics I

Introduces basic ceramics including hand-built pottery, wheel-thrown pottery and glazing techniques. Prerequisites (for art majors only): ARTS 1312 and 1317 or consent of instructor. Semester Hours 3 (6 lec/studio)

ARTS 2347 Ceramics II

Continues ARTS 2346 and includes advanced problems in the creation of artistic and practical ceramic ware. Prerequisite: ARTS 2346. Semester Hours 3 (6 lec/studio)

ARTS 2348 Digital Art I

A studio course that explores the potential of digital imaging with the use of digital cameras, digital camcorders, and computer hardware and software for visual, conceptual and practical uses. Prerequisites (for art majors): ARTS 1316 and 1317 (Drawing), ARTS 1311 and 1312 (Design), and ARTS 2356 (Photography). No prerequisite for non-majors. Semester Hours 3 (3 lec/3 lab)

ARTS 2356 Photography I

Introduces the basic fundamentals of black and white photography and uses 35mm cameras, accessories and procedures in making pictures from exposed sensitive materials to completed prints. Credit will not be given for both ARTS 2356 and COMM 1318. Semester Hours 3 (3 lec/3 lab)

ARTS 2357 Photography II

Continues investigation in black and white photography. Emphasis on creative photographic documentation and on improving photographic processes and techniques both in the darkroom

and with camera operations. Credit will not be given for both ARTS 2357 and COMM 1319. Prerequisite: ARTS 2356 or COMM 1318 or consent of instructor. Semester Hours 3 (3 lec/3 lab)

ARTS 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on work experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of studio art and/or art history. Prerequisites: ARTS 1312 and 1317 and consent of instructor. Semester Hours: 3 (2 lec/3 lab)

Biology

BIOL 1322 Principles of Nutrition

Surveys basic principles of nutrition including functions, food sources, digestion and absorption, and metabolism with application to human nutritional needs. Prerequisites: None. Semester Hours 3 (3 lec)

BIOL 1406 Biology for Science Majors I

Fundamental principles of living organisms involving the physical and chemical properties of life, evolutionary adaptation, physiologic function, cell structure and function, genetics, and scientific methodology. Semester Hours 4 (3 lec/3 lab)

BIOL 1407 Biology for Science Majors II

A survey of viruses, bacteria, and the kingdoms Protista, Fungi, Plantae, and Animalia. Also includes scientific methodology, the origin and history of life, taxonomy, reproduction, and ecology. Includes both laboratory and field studies. Field trips are encouraged. This course is the second half of a two-semester sequence intended for science majors. Prerequisite: BIOL 1406. Semester Hours 4 (3 lec/3 lab)

BIOL 1408 General Biology

Introduces the fundamental concepts of molecular biology, cell structure and function, photosynthesis and respiration, cellular and organismal control mechanisms of plants and animals, mitosis and meiosis, plant and animal reproduction, genetics, evolution, and principles of ecology. Semester Hours 4 (3 lec/3 lab)

BIOL 1411 Introductory Botany

Surveys plant groups, emphasizing progressive advancements in structure and function of representatives from the kingdoms Plantae, Monera and Protista. Includes study of metabolism, physiology, morphology, cytology, anatomy, reproduction and ecology as they relate to plants. Semester Hours 4 (3 lec/3 lab)

BIOL 1413 Introductory Zoology

Surveys the kingdoms Protista and Animalia through chordates. Emphasizes the anatomical, physiological, ecological, behavioral, developmental and evolutionary relationships of major phyla. Semester Hours 4 (3 lec/3 lab)

BIOL 1414 Introduction to Biotechnology

Designed to introduce the student to basic biotechnology techniques, as well as, introduce the student to the science behind the techniques. Covers the social, legal, and ethical implications of biotechnology. Prerequisite: BIOL 1406 with a grade of "C" or better; BIOL 2316 is suggested but not required. Semester Hours 4 (3 lec/3 lab)

BIOL 1415 Introduction to Biotechnology II

Designed to introduce students to industrial application of biotechnology techniques. Students will study the products of such applications. As many biotechnological products are proteins of such applications. As many biotechnological products are proteins or protein-based, students will focus heavily on protein structures, functions and uses. Prerequisites: BIOL 1406 with a grade of "C" or better; BIOL 1404 with a grade of "C" or better; BIOL 2316 is suggested but not required. Semester Hours 4 (3 lec/3 lab)

BIOL 2116 Genetics Lab

Study of the principles of molecular and classical genetics and the function and transmission of hereditary material. May include population genetics and genetic engineering. Prerequisites: BIOL 1406 and BIOL 2316 or Corequisite: BIOL 2316. Semester Hours 1 (3 lab)

BIOL 2316 Genetics

Introduction to various aspects of genetics, including molecular genetics, Mendelian genetics, population genetics, genetic engineering, micro/macro evolution principles (as it pertains to changing gene frequencies) and the relationships of genes to traits. Prerequisite: BIOL 1406. Corequisite: BIOL 2116. Semester Hours 3 (3 lec)

BIOL 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in the biological sciences/life sciences. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of living organisms and their systems. Prerequisites: Completion of one of the following Biology courses: 1406, 1407, 1411, 1413, 2401, 2402 and 2420 with a grade of B or better. Semester Hours 3 (3 lec)

BIOL 2401 Anatomy and Physiology I

Acquaints the student with processes of the human body. Includes chemical, cellular, tissue and organ systems. Also covers integumentary, skeletal, muscular and nervous systems. NOTE: Both BIOL 2401 and 2402 should be taken to ensure transferability. Prerequisites: BIOL 1406, 1408 or 2404 with a minimum grade of C, or consent of division chair. Semester Hours 4 (3 lec/3 lab)

BIOL 2402 Anatomy and Physiology II

Continues the investigation of the human body. Covers endocrine, cardiovascular, respiratory, digestive, excretory and reproductive systems. NOTE: Both BIOL 2401 and BIOL 2402 should be taken to ensure transferability. Prerequisite: BIOL 2401 with a minimum grade of C or consent of division chair. Semester Hours 4 (3 lec/3 lab)

BIOL 2404 Introductory Anatomy and Physiology

This course is designed to introduce the integrative processes within cells, tissues, organs and body systems associated with human anatomy and physiology. Lecture in combination with

laboratory exercises will be utilized to provide a basis for anatomical and physiological processes. This knowledge base will provide a background for selected programs in health careers. Semester Hours 4 (3 lec/3 lab)

BIOL 2420 Microbiology

Surveys microorganisms that affect people. Includes the morphology, physiology and taxonomy of representative types of microorganisms. Emphasizes microorganisms in relation to soil, sewage, water, food, air, industrial processes and diseases. Prerequisites: BIOL 1406, 1408, 2401 or 2404 with a minimum grade of C, or consent of division chair. Semester Hours 4 (3 lec/3 lab)

Business**BMGT 1191 Special Topics in Business Administration and Management, General**

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec/lab)

BMGT 1291 Special Topics in Business Administration and Management, General

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 2 (2 lec/lab)

BMGT 1301 Supervision

A study of the role of the supervisor. Managerial functions as applied to leadership, counseling, motivation and human skills are examined. Semester Hours 3 (3 lec)

BMGT 1307 High Performance Work Teams

Presents the basic principles of building and sustaining teams in organizations, including team dynamics and process improvement. Prerequisite: BMGT 1303 or BMGT 1327 or consent of faculty advisor. Semester Hours 3 (3 lec)

BMGT 1327 Principles of Management (Formerly BMGT 1303)

Examines concepts, terminology, principles, theories and issues in the field of management. Semester Hours 3 (3 lec)

BMGT 1341 Business Ethics

Discusses ethical issues, the development of a moral frame of reference and the need for an awareness of social justice in management practices and business activities. Review of ethical responsibilities and relationships between organizational departments, divisions, executive management and the public. Semester Hours 3 (3 lec)

BMGT 1344 Negotiations and Conflict Management

Discusses theories which aid in the diagnosis of interpersonal and intergroup conflict. The role of manager as negotiator, intermediary and problem-solver. Semester Hours 3 (3 lec)

BMGT 1491 Special Topics in Business Administration and Management, General
(formerly BUSI 2390 Special Topics in Business)

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 4 (3 lec/2lab)

BMGT 2309 Leadership

Introduces concepts of leadership and its relationship to management. Prepares the student with leadership and communication skills needed to motivate and identify with employees. This is a Capstone course that integrates knowledge from previous courses and provides the opportunity to apply management and leadership principles to real world situations.

Prerequisite: Completion of or concurrent enrollment in BMGT 1303 or BMGT 1327. Semester Hours 3 (3 lec)

BMGT 2470 Internship III – Business Administration and Management, General

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This is a Capstone course. The work environment is arranged by the student.

Prerequisite: an approved work station. BMGT 2489 – Capstone course must be taken with or following BMGT 2309 or BMGT 1307. (See [Guidelines for Internships.](#)) Semester Hours 4 (1 lec/15-20 lab)

BMGT 2488 Internship I – Business Administration and Management, General

(formerly BUSI 2571 Management Training I)

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Prerequisite: An approved work station. BMGT 2488 must be taken with or following BMGT 1303 or BGMT 1327. (See [Guidelines for Internships.](#)) Semester Hours 4 (1 lec/15-20 lab)

BMGT 2489 Internship II – Business Administration and Management, General

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. The work environment is arranged by the student. Prerequisite: An approved work station and BMGT 2488. (See [Guidelines for Internships.](#)) Semester Hours 4 (1 lec/15-20 lab)

BUSG 2305 Business Law/Contracts

Presents principles of law that form the legal framework for business activity, including applicable statutes, contracts and agency. Examines the principles of the law of contracts, sales, the Uniform Commercial Code, business organizations, conveyance of property and other topics of business law. Semester Hours 3 (3 lec)

BUSG 2309 Small Business Management

Presents fundamentals on how to start and operate a small business. Topics include facts about a small business, essential management skills, how to prepare a business plan, financial needs, marketing strategies and legal issues. Semester Hours 3 (3 lec)

BUSI 1301 Survey of Business

Introduces the student to the role of business in modern society. Includes overview of business operations, analysis of the specialized fields within the business organization, and development of a business vocabulary. Broad-based topics include business organization, management, marketing, economics, finance, accounting and international business. Semester Hours 3 (3 lec)

BUSI 2301 Business Law I

Discusses principles of law that form the legal framework for business activity, including applicable statutes, contracts and agency. Examines the principles of the law of contracts, sales, the Uniform Commercial Code, business organizations, conveyance of property and other topics of business law. Recommendation: Students should have passed the reading section of the THEA or approved alternative test or be currently enrolled in or have credit for READ 0302 before enrolling in this course. Semester Hours 3 (3 lec)

HECO 1307 Personal Finance (formerly BUSI 1307)

Personal and family accounts, budgets and budgetary control, bank accounts, charge account, borrowing, investing, insurance, standards of living, renting or home ownership, and will and trust plans. Semester Hours 3 (3 lec)

HRPO 2301 Human Resources Management

Introduces behavioral and legal approaches to the management of human resources in organizations. Recommended completion of BMGT 1303 or BMGT 1327. Semester Hours 3 (3 lec)

IBUS 1305 Introduction to International Business and Trade

Presents techniques for entering the international marketplace. Emphasis on the impact and dynamics of sociocultural, demographic, economic, technological and political-legal factors in the foreign trade environment. Topics include patterns of world trade, internationalization of the firm and operation procedures of the multi-national enterprise. (Offered only in spring.) Semester Hours 3 (3 lec)

INSR 1209 Principles of Insurance

Prepares participants to work in insurance agencies as entry-level customer service representatives. Includes information about policies, terminology and customer service procedures. May prepare students to take the licensing exam sponsored by the Texas Department of Insurance. Semester Hours 2 (2 lec)

MRKG 1302 Principles of Retailing

Introduces the retailing environment and its relationship to consumer demographics, trends and traditional/nontraditional retailing markets. Also includes the employment of retailing techniques and the factors that influence modern retailing. (Offered only in spring.) Semester Hours 3 (3 lec/lab)

MRKG 1311 Principles of Marketing

Introduces basic marketing functions; identification of consumer and organizational needs; explanation of economic, psychological, sociological and global issues; and description and analysis of the importance of marketing research. Emphasizes impact of current events on marketing activity. Semester Hours 3 (3 lec)

MRKG 1391 Special Topics in Business Marketing and Marketing Management

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Semester Hours 3 (3 lec)

MRKG 2333 Principles of Selling

Presents an overview of the selling process. Identification of the elements of the communication process between buyers and sellers in business and examination of the legal regulations and ethical issues of business that affect salespeople. (Offered only in spring.) Semester Hours 3 (3 lec)

MRKG 2349 Advertising and Sales Promotion

Presents integrated marketing communications. Introduces advertising principles, practices and multimedia in persuasive communication, including buyer behavior, budgeting and regulatory constraints. (Offered only in fall.) Semester Hours 3 (3 lec)

MRKG 2488 Internship — Business Marketing and Marketing Management (Capstone)

Provides a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. The work environment is arranged by the student. Prerequisite: An approved work station and MRKG 1311. (See [Guidelines for Internships](#).) Semester Hours 4 (1 lec/15-20 lab)

MRKG 2489 Internship – Business Marketing and Marketing Management (Capstone)

Provides a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. The work environment is arranged by the student. This is a Capstone

course. Prerequisite: An approved work station and MRKG 2488 or MRKG 2333 or MRKG 2349 or MRKG 1302. (See [Guidelines for Internships.](#)) Semester Hours 4 (1 lec/15-20 lab)

Certified Medical Assistant

ECRD 1211 Electrocardiography

Fundamentals of cardiovascular anatomy and physiology. Includes basic electrocardiography procedures, interpretation of basic dysrhythmias and appropriate treatment modalities.

Semester Hours 2 (2 lec/2 lab)

MDCA 1160 Clinical – Medical/Clinical Assistant

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Semester Hours 1 (5 clinical hours/week)

MDCA 1161 Clinical – Medical/Clinical Assistant

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Semester Hours 1 (6 clinical hours/week)

MDCA 1254 Medical Assisting Credentialing Exam Review

A preparation for Medical Assisting credentialing exam. Semester Hours 2 (2 lec)

MDCA 1291 Special Topics in Medical Assistant

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course designed to be repeated multiple times to improve student proficiency. Prerequisites: MDCA 1417, MDCA 1421, MDCA 1343, MDCA 1409. Semester Hours 2 (2 lec)

MDCA 1305 Medical Law & Ethics

Instruction in principles, procedures and regulations involving legal and ethical relationships among physicians, patients and medical assistants. Semester Hours 3 (3 lec)

MDCA 1313 Medical Terminology

A study and practical application of a medical vocabulary system. Includes structure, recognition, analysis, definition, spelling, pronunciation and combination of medical terms from prefixes, suffixes, roots and combining forms. Semester Hours 3 (3 lec)

MDCA 1343 Medical Insurance

Emphasizes medical office coding procedures for payment/reimbursement by patient or third party. Semester Hours 3 (2 lec/4 lab)

MDCA 1402 Human Disease/Pathophysiology

A study of anatomy and physiology with emphasis of human pathophysiology, including etiology, prognosis, medical treatment, signs and symptoms of common diseases of all body systems. Semester Hours 4 (3 lec/3 lab)

MDCA 1409 Anatomy & Physiology for Medical Assistants

Emphasis on structure and function of human cells, tissues, organs and systems with overview of common pathophysiology. Semester Hours 4 (3 lec)

MDCA 1417 Procedures in a Clinical Setting

Emphasis on patient assessment, examination and treatment as directed by physician. Includes vital signs, collection and documentation of patient information, asepsis, office clinical procedures and other treatments as appropriate for the medical office. Semester Hours 4 (2 lec/4 lab)

MDCA 1421 Administrative Procedures

Medical office procedures including appointment scheduling, medical records creation and maintenance, interpersonal communication, financial processes, coding, billing, collecting, third-party reimbursement, credit arrangements, and computer use in the medical office. Semester Hours 4 (2 lec/4 lab)

MDCA 1448 Pharmacology & Administration of Medications

Instruction in concepts and application of pharmacological principles. Focuses on drug classifications, principles and procedures of medication administration, mathematical systems and conversions, calculation of drug problems, and medico-legal responsibilities of the medical assistant. Semester Hours 4 (2 lec/4 lab)

MDCA 1452 Medical Assistant Laboratory Procedures

Waived procedures stated in the current Clinical Laboratory Improvement Act (CLIA). Includes blood collection, specimen handling, identification of normal ranges and quality control. Semester Hours 4 (2 lec/4 lab)

MDCA 1660 Clinical – Medical/Clinical Assistant

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Semester Hours 6 (18 clinical hours/week)

MDCA 2660 Clinical – Medical/Clinical Assistant

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Semester Hours: 6 (18 clinical hours/week)

PHRA 1309 Pharmaceutical Mathematics I

Pharmaceutical mathematics including reading, interpreting and solving calculation problems encountered in the preparation and distribution of drugs. Prerequisites: MATH 0307 or passing score on the Accuplacer/THEA exam. Semester Hours 3 (3 lec)

Chemistry**CHEM 1405 Introductory Chemistry I**

Introduces basic laws, theories, concepts, use of the metric system, atomic structure and matter, nuclear chemistry, periodic table, chemical bonding, solution chemistry, behavior of

gases, and environmental chemistry. Designed for the allied health and liberal arts student. Semester Hours 4 (3 lec/3 lab)

CHEM 1407 Introductory Chemistry II

Introduces organic chemistry, biochemistry, an overview of metabolism and some special topics. Designed for the allied health and liberal arts student. Prerequisite: High school chemistry or CHEM 1405. Semester Hours 4 (3 lec/3 lab)

CHEM 1411 General Inorganic Chemistry I

Fundamental principles of chemistry for majors in the sciences, health sciences and engineering; topics include measurements, fundamental properties of matter, states of matter, chemical reactions, chemical stoichiometry, periodicity of elemental properties, atomic structure, chemical bonding, molecular structure, solutions, properties of gases, and an introduction to thermodynamics and descriptive chemistry. Basic laboratory experiments supporting theoretical principles; introduction of scientific method, experimental design, data collection and analysis, and preparation of laboratory reports. Prerequisite: Credit for, or concurrent enrollment in, MATH 1314 or equivalent, or consent of division chair. Semester Hours 4 (3 lec/4 lab)

CHEM 1412 General Inorganic Chemistry II

Chemical equilibrium, phase diagrams and spectrometry, acid-base concepts, thermodynamics, kinetics, electrochemistry, nuclear chemistry, an introduction to organic chemistry and descriptive inorganic chemistry. Basic laboratory experiments supporting theoretical principles; introduction of the scientific methods, experimental design, chemical instrumentation, data collection and analysis, and preparation of laboratory reports. Prerequisite: CHEM 1411 with a minimum grade of C. Semester Hours 4 (3 lec/4 lab)

CHEM 2389 Academic Cooperative

Designed to integrate on-campus study with practical hands-on work experience with an anaerobic digester (used in breaking down organic materials to produce methane gas). Develop research procedures to investigate the effectiveness of the process. Implement the research procedures to analyze results of changing various parameters in the anaerobic digester process. Prerequisite: CHEM 2423. Semester Hours 3 (1 lec/8 lab)

CHEM 2423 Organic Chemistry I

Covers principles and concepts of organic chemistry, structural formulas, nomenclature, stereoisomerism, aliphatic hydrocarbons and derivatives, some functional groups, and interpretation of spectra. Prerequisites: CHEM 1411 and 1412 with a minimum grade of C. Semester Hours 4 (3 lec/4 lab)

CHEM 2425 Organic Chemistry II

Covers aromatic hydrocarbons and derivatives, more functional groups, biomolecules, and special topics. Prerequisite: CHEM 2423 with a minimum grade of C. Semester Hours 4 (3 lec/4 lab)

Child Development

CDEC 1317 Child Development Associate Training I

Based on the requirements for the Child Development Associate National Credential (CDA). Topics include CDA overview, general observation skills, and child growth and development overview. The four functional areas of study are creative, cognitive, physical and communication. Semester Hours 3 (3 lec/1 lab)

CDEC 1323 Observation and Assessment

A study of observation skills, assessment techniques and documentation of children's development. Semester Hours 3 (2 lec/2 lab)

CDEC 1356 Emergent Literacy for Early Childhood

An exploration of principles, methods and materials for teaching young children language and literacy through a play-based, integrated curriculum. Prerequisites: TECA 1311, CDEC 1413, 1421 with grade of C or better or approval of program advisor. Semester Hours 3 (2 lec/2 lab)

CDEC 1358 Creative Arts for Early Childhood

An exploration of principles, methods and materials for teaching young children music, movement, visual arts and dramatic play through process-oriented experiences to support divergent thinking. Prerequisites: TECA 1311, CDEC 1413, 1421 with grade of C or better or approval of program advisor. Semester Hours 3 (2 lec/2 lab)

CDEC 1359 Children with Special Needs

A survey of information regarding children with special needs, including possible causes and characteristics of exceptionalities, intervention strategies, available resources, referral processes, the advocacy role, and legislative issues. Semester Hours 3 (3 lec)

CDEC 1413 Curriculum Resources for Early Childhood Programs (Capstone)

A study of the fundamentals of curriculum design and implementation in developmentally appropriate programs for young children. Prerequisite: TECA 1311 or 1354 with a grade of C or better or concurrent enrollment in either. This course serves as the Capstone experience for the Child Development Certificate Option I and will be mandatory. Semester Hours 4 (3 lec/2 lab)

CDEC 1419 Child Guidance

An exploration of guidance strategies for promoting prosocial behaviors with individual and groups of children. Emphasis on positive guidance principles and techniques, family involvement, and cultural influences. Practical application through direct participation with children. Semester Hours 4 (3 lec/2 lab)

CDEC 1421 The Infant and Toddler

A study of appropriate infant and toddler programs (birth to 3 years), including an overview of development, quality routines, appropriate environments, materials and activities, and teaching/guidance techniques. Prerequisite: TECA 1311 or 1354 with a grade of C or better or concurrent enrollment in either. Semester Hours 4 (3 lec/2 lab)

CDEC 2307 Math and Science for Early Childhood

An exploration of principles, methods and materials for teaching children math and science concepts and process skills through discovery and play. Prerequisites: TECA 1311, CDEC

1413, 1421 with grade of C or better or approval of program advisor. Semester Hours 3 (2 lec/2 lab)

CDEC 2322 Child Development Associate Training II

A continuation of the study of the requirements for the Child Development Associate National Credential (CDA). The six functional areas of study include: safe, healthy, learning environment, self, social and guidance. Prerequisite: CDEC 1317 with grade of C or better or approval of program director. Semester Hours 3 (3 lec/1 lab)

CDEC 2324 Child Development Associate Training III

Continuation of the requirements for the Child Development Associate National Credential (CDA). Three functional areas of study include: family, program management and professionalism. Prerequisite: CDEC 2322 with grade of C or better or approval of program director. Semester Hours 3 (2 lec/2 lab)

CDEC 2326 Administration of Programs for Children I

Application of management procedures for early care and education programs. Includes planning, operating, supervising and evaluating programs. Topics cover philosophy, types of programs, policies, fiscal management, regulations, staffing, evaluation and communication. Semester Hours 3 (3 lec)

CDEC 2328 Administration of Programs for Children II

An in-depth study of the skills and techniques in managing early care and education programs, including legal and ethical issues, personnel management, team building, leadership, conflict resolution, stress management, advocacy, professionalism, fiscal analysis and planning parent education/partnerships. This course serves as the Capstone experience for the Child Development Certificate Option II. Semester Hours 3 (3 lec)

CDEC 2364 Practicum in Child Development (Capstone)

Practical general workplace training supported by an individualized learning plan developed by the employer, college and student. The plan relates the workplace training and experiences to the student's general and technical courses of study. The guided external experiences may be paid or unpaid. This course may be repeated if topics and learning outcomes vary. Prerequisite: TECA 1303, 1311, 1318, 1354, CDEC 1356, 1357, 1358, 1394, 1413, 1419, 1421 with a grade of C or better or approval of program advisor. This course serves as the Capstone for the A.A.S. degree. Semester Hours 3 (2 lec/20 lab)

CDEC 2441 The School Age Child

A study of programs for the school age child (5 to 13 years), including an overview of development, learning environments, materials and activities, and teaching/guidance techniques. Prerequisite: CDEC/TECA 1311 with a grade of C or better or concurrent enrollment in either. Semester Hours 4 (3 lec/2 lab)

TECA 1303 Families, School, & Community

A study of the child, family, community and schools, including parent education and involvement, family and community lifestyles, child abuse, and current family life issues.
Semester Hours 3 (3 lec/1 lab)

TECA 1311 Educating Young Children

An introduction to the education of the young child, birth through age 12, including developmentally appropriate practices and programs, theoretical and historical perspectives, ethical and professional responsibilities, and current issues. Semester Hours 3 (3 lec/1 lab)

TECA 1318 Wellness of the Young Child

A study of the factors that impact the well-being of the young child, including healthy behavior, food, nutrition, fitness and safety practices. Focus on local and national standards and legal implications of relevant policies and procedures. Semester Hours 3 (2 lec/2 lab)

TECA 1354 Child Growth and Development

A study of the physical, emotional, social and cognitive factors impacting growth and development from conception to adolescence. This course is parallel to the Workforce Education Course Manual (WECM) course CDEC 1354. Semester Hours 3 (3 lec)

College Success**COSU 0101 College Success**

This course focuses on critical issues for students new to college. Emphasis is placed on addressing perceptions, expectations, behaviors and outcomes required for college success. Course topics include: understanding the college culture, planning and goal setting, time management, college reading expectations, listening critically, effective note taking, studying and taking tests, and using the library. Prerequisites: READ 0300 or concurrent enrollment in READ 0301. Semester Hours 1 (1 lec)

Communication/Journalism**COMM 1307 Introduction to Mass Communication**

Provides students with a basic understanding of mass communication concepts and mass media, including print, broadcast, film, advertising, and public relations. Emphasis is on media functions, structure, support, and influence, as well as the media's interaction with government and society. Semester Hours 3 (3 lec)

COMM 1316 News Photography I

Basic theory and techniques of photojournalism; introduction to electronic digital photography and editing; professional, technical, and esthetic values. Semester Hours 3 (3 lec)

COMM 2301 Introduction to Technology and Human Communication

A survey of emerging interactive communication technologies and how they influence human communication, including interpersonal, group decision-making, and public and private communication. (Cross-listed as SPCH 2301). Semester Hours 3 (3 lec)

COMM 2305 Editing, Layout, and Headline Writing

Helps the student develop an understanding of the newsroom organization and the entire news/editorial process. Emphasis is on developing a regard for accuracy and fairness in the editing process and on learning and practicing the principles of newspaper design. Prerequisite: COMM 2311. Semester Hours 3 (3 lec/3 lab)

COMM 2311 News Gathering and Writing I

Helps the student develop the proper techniques of news gathering (interviewing), as well as writing news and feature stories. Emphasis is on news sense and judgment. Semester Hours 3 (3 lec/3 lab)

Communication Studies/Speech

SPCH 1311 Introduction to Speech Communication

A survey of the basic principles of human communication with opportunities to apply these principles in three or more areas of study, including, but not limited to: interpersonal, public speaking, and small group communication. Semester Hours 3 (3 lec)

SPCH 1315 Public Speaking

Provides an introduction to research, organization, composition, and delivery of speeches for various purposes and occasions, with emphasis on listening skills, informative and persuasive speaking, and small group communication. Semester Hours 3 (3 lec)

SPCH 1318 Interpersonal Communication

Introduces fundamental concepts and provides skills development for verbal and nonverbal communication in one-to-one interactions. Explores supportive and defensive climates, skills for sending and receiving messages, leadership, assertiveness, conflict management techniques, and the reduction of communication barriers. Semester Hours 3 (3 lec)

SPCH 1321 Business and Professional Speaking

Presents theories and develops skills in organizational communication as applied to business and professional situations with emphasis on listening analysis, professional presentations, and organizational groups. Semester Hours 3 (3 lec)

SPCH 2301 Introduction to Technology and Human Communication

A survey of emerging interactive communication technologies and how they influence human communication, including interpersonal, group decision-making, and public and private communication. (Cross-listed as COMM 2301). Semester Hours 3 (3 lec)

SPCH 2333 Discussion and Small Group Communication

Introduces discussion and small group theories/techniques, emphasizing leadership and participation in routine professional meetings, business conferences, and community groups. Includes units on problem-solving agendas, interpersonal communication, and small group presentational styles. Semester Hours 3 (3 lec)

SPCH 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of speech. Semester Hours 3 (3 lec)

Computer Information Systems and Media Communications

ARTC 1302 Digital Imaging I

Introduces raster image editing and/or image creation software: scanning, resolution, file formats, output devices, color systems and image-acquisitions. Semester Hours 3 (2 lec/2 lab)

ARTC 2305 Digital Imaging II

Covers principles of digital image processing and electronic painting. Emphasis on bitmapped- or raster-based image marking and the creative aspects of electronic illustration for commercial and fine art applications. Topics include advanced concepts and concerns associated with image resolution and file size; digital editing and use of printing/Web tools; creating, editing and painting digital images; color correction and manipulation of photographic images; and saving and outputting images on various output devices. Prerequisites: ARTC 1302. Semester Hours 3 (2 lec/2 lab)

ARTV 1351 Digital Video

Develops skills in producing and editing video and sound for multimedia or Web productions. Emphasis is placed on the capture, editing and outputting of video using a desktop digital video workstation. Semester Hours 3 (2 lec/2 lab).

ARTV 2301 Animation 2D

Teaches skill development in the use of software to develop storyboards and two-dimensional animation, including creating, importing and sequencing media elements to create multimedia presentations. Emphasis on conceptualization, creativity and visual aesthetics. Semester Hours 3 (2 lec/2 lab)

BCIS 1305 Business Computer Applications

Teaches computer terminology, hardware, software, operating systems and information systems relating to the business environment. The main focus is on business applications of software, including word processing, spreadsheets, databases, presentation graphics and business-oriented utilization of the Internet. Required for students taking the Business Field of Study. Semester Hours 3 (2 lec/2 lab).

COSC 1301 Introduction to Computing

Overview of computer systems: hardware, operating systems and microcomputer application software, including the Internet, word processing, spreadsheets, presentation graphics and databases. Current issues such as the effect of computers on society and the history and use of computers in business, educational, and other modern settings are also studied. Semester Hours 3 (2 lec/2 lab)

COSC 1336 Programming Fundamentals I

Introduces the fundamental concepts of structured programming. Topics include software development methodology, data types, control structures, functions, arrays, and the mechanics

of running, testing and debugging. This course assumes computer literacy. Semester Hours 3 (3 lec)

COSC 1337 Programming Fundamentals II

Reviews control structures and data types with emphasis on structured data types. Applies the object-oriented programming paradigm, focusing on the definition and use of classes along with the fundamentals of object-oriented design. Includes basic analysis for algorithms, searching and sorting techniques, and an introduction to software engineering. Prerequisite: COSC 1336. Semester Hours 3 (3 lec)

COSC 2325 Computer Organization and Machine Language

Basic computer organization; machine cycle, digital representation of data and instructions; assembly language programming, assembler, loader, macros, subroutines, and program linkages. Prerequisite: COSC 1336. Semester Hours 3. (3 lec)

COSC 2336 Programming Fundamentals III

Presents further application of programming techniques, introducing the fundamental concepts of data structures and algorithms. Topics include recursion, fundamental data structures (including stacks, queues, linked lists, hash tables, trees, and graphs), and algorithmic analysis. Prerequisite: COSC 1337. Semester Hours 3 (3 lec)

GRPH 1359 Vector Graphics for Production

A study and use of vector graphics for production. Semester Hours 3 (2 lec/2 lab)

IMED 1316 Web Design I

Introduces Internet Web page design and related graphic design issues, including mark-up languages, websites, Internet access software, and interactive topics. Students should be proficient with Windows functions, mousing and keyboarding skills. Semester Hours 3 (2 lec/2 lab)

IMED 1366 Practicum (or Field Experience) – Web Page, Digital/Multimedia and Information Design

Practical workplace training supported by an individualized learning plan developed by the employee, college, and student. Prerequisites: IMED 1316 and IMED 2315. Semester Hours 3 (1 lec/20 lab)

IMED 2309 Internet Commerce

Gives an overview of the Internet as a marketing and sales tool with emphasis on developing a prototype for electronic commerce. Topics include database technology, creating websites in order to collect information, performing online transactions, and generating dynamic content. Prerequisites: COSC 1301 or BCIS 1305 or equivalent introduction to computer course with consent of instructor; basic Web design skills suggested. Semester Hours 3 (2 lec/2 lab).

IMED 2313 Project Analysis and Design

Applies the planning process for multimedia or Web, including costing, preparation, production legal issues, and guidelines for pre-production preparation and creation of a comprehensive design document that includes target audience analysis, purpose and goals, objectives, content outline, flow chart, and storyboard. Emphasis is placed on content design and production management. Prerequisites: ARTC 1302, IMED 1316 and ARTV 2301. Semester Hours 3 (2 lec/2 lab)

IMED 2315 Web Design II

Studies current mark-up languages and layout techniques for creating engaging, well-designed Web pages; identify the target audience and produce websites according to physical and technical limitations, cultural appearance, and legal issues. Emphasis placed on use of Cascading Style Sheets (CSS) and XML. Students will work on a website with at least one assigned client from the community. Prerequisites: Successful completion of IMED 1316 or equivalent introductory Web design course with instructor consent; knowledge of CSS and division tags important. Semester Hours 3 (2 lec/2 lab)

IMED 2488 Internship – Digital Communication and Media/Multimedia

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the college and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. Prerequisite: Must meet internship requirements. (See [Guidelines for Internships](#).) Semester Hours 4

ITCC 1310 Cisco Discovery I: Networking for Home and Small Businesses

This introductory course teaches students the skills needed to obtain entry-level home and small business network installer jobs as network technicians, computer technicians, cable installers, and help desk technicians. It provides a hands-on introduction to networking and the Internet using tools and hardware commonly found in home and small business environments. Labs include PC installation, Internet connectivity, wireless connectivity, file and print sharing, and the installation of game consoles, scanners, and cameras. This is the first course in the four-course series preparing students for the CISCO Certified Network Administrator certification. Semester Hours 3 (2 lec/3 lab)

ITCC 1311 Cisco Discovery II: Working at a Small-to-Medium Business or ISP

This course prepares students for jobs as network technicians. It also helps students develop additional skills required for computer technicians and help desk technicians. It provides a basic overview of routing and remote access, addressing, and security. It also familiarizes students with servers that provide e-mail services, Web space, and authenticated access. Students also learn about soft skills required for help desk and customer service positions. Network monitoring

and basic troubleshooting skills are taught on context. This is the second course in the four-course series preparing students for the CISCO Certified Network Administrator certification. Prerequisite: ITCC 1310. Semester Hours 3 (2 lec/3 lab)

ITCC 1312 Cisco Discovery III: Introducing Routing and Switching in the Enterprise

This course familiarizes students with the equipment applications and protocols installed in enterprise networks, with a focus on switched networks, IP Telephony requirements, and security. It also introduces advanced routing protocols such as Enhanced Interior Gateway Routing Protocol (EIGRP) and Open Shortest Path First (OSPF) Protocol. Hands-on exercises include configuration, installation, and troubleshooting. This is the third course in the four-course series preparing students for the CISCO Certified Network Administrator certification.

Prerequisite: ITCC 1311. Semester Hours 3 (2 lec/3 lab)

ITCC 1313 Designing and Supporting Computer Networks

Learners progress through a variety of case studies and role-playing exercises, which include gathering requirements, designing basic networks, establishing proof-of-concept, performing project management tasks, and lifecycle services, including upgrades, competitive analyses, and system integration. This is the fourth course in the four-course series preparing students for the CISCO Certified Network Administrator certification. Prerequisite: ITCC 1312. Semester Hours 3 (2 lec/3 lab)

ITNW 1337 Introduction to the Internet

Introduces the Internet with emphasis on using the World Wide Web to locate, transfer, and publish information. Surveys emerging technologies on the Internet. Students will use and configure Web browsers; use the Internet to locate, transfer and publish information; create a basic HTML document; use e-mail services; and explain issues in choosing an Internet service provider. Semester Hours 3 (2 lec/2 lab)

ITNW 1345 Implementing Network Directory Services

Provides students with the knowledge and skills necessary to install, configure, and administer Network Directory service. Students will learn the logical and physical structure of directory services, configure the Domain Name System (DNS) server service to support directory services, create and administer user accounts and group resources, delegate and administer control of Directory objects, and maintain and restore the database of Active Directory.

Prerequisite: ITNW 1354 or job experience in networking. Semester Hours 3 (2 lec/2 lab)

ITNW 1354 Implementing and Supporting Servers

Develops skills necessary to implement, administer, and troubleshoot information systems in a networked computing environment using Microsoft Windows-based servers. Students will learn to configure peripherals and devices; set up servers for various client computers; configure directory replication; and manage licensing, user groups accounts, user profiles, system policies, and profiles. Students will also learn to administer remote servers and disk resources,

create and share resources, implement permissions and security, implement fault-tolerance data storage measures, and configure servers for interoperability with various network operating systems servers. Course will teach how to install and configure Remote Access Service (RAS), identify and monitor performance bottlenecks, and resolve configuration problems. Prerequisite: ITSC 1305. Semester Hours 3 (2 lec/2 lab)

ITNW 2352 Administering SQL Server

Develops skills in the installation, configuration, administration, and troubleshooting of SQL Servers client/server database management system version. Students will describe SQL Server architecture, plan for a SQL Server installation, install SQL Server and configure SQL Server, manage files and databases, choose a login security method, and configure login security. Course also includes the planning and implementation of database permissions, backing up and restoring databases, automating administrative tasks using SQL Server Agent, creating custom administrative tools, transferring and migrating data into databases, monitoring SQL Server performance, and replicating data from one SQL Server to another. Prerequisite: ITSC 1305 and a networking course or experience. Semester Hours 3 (2 lec/2 lab)

ITSC 1305 Introduction to PC Operating Systems (formerly BCIS 1375)

Introduction to personal computer operating systems, including installation, configuration, file management, memory and storage management, control of peripheral devices, and use of utilities. Semester Hours 3 (2 lec/2 lab)

ITSC 1307 UNIX Operating System I

Introduces the UNIX operating system, including multi-user concepts, terminal emulation, use of system editor, basic UNIX commands, and writing script files using LINUX operating system. Topics include introductory systems management concepts. Students will learn the proper use of basic UNIX commands, define and apply terminal emulation, use of the system editor, manage individual user account, and effectively manage user files. Prerequisite: ITSC 1305. Semester Hours 3 (2 lec/2 lab)

ITSC 1309 Integrated Software Applications I

Introduces business productivity software suites using word processing, spreadsheets, databases, and/or presentation software. Semester Hours 3 (2 lec/2 lab)

ITSC 1315 Project Management Software

Teaches project management software for the examination of concepts including timelines, milestones, scheduling, life cycle phases, management frameworks, skills, processes, and tools. Students will learn how to use project management software to design, develop, and manage a project; organize and evaluate project phases; produce and analyze reports and charts; distinguish task relationships; and demonstrate teamwork. Semester Hours 3 (2 lec/2 lab)

ITSC 1325 Personal Computer Hardware

Studies current personal computer hardware, including personal computer assembly and upgrading, setup and configuration, and troubleshooting. The student will assemble/set up and upgrade personal computer systems, diagnose and isolate faulty components, optimize system performance, and install/connect peripherals. Semester Hours 3 (2 lec/2 lab)

ITSC 1347 UNIX System Administration II

Teaches advanced UNIX workstation administration skills in a network environment. Students will learn the control system logging activity, manage virtual disk, configure the network file system (NFS) environment, automount file systems on demand, administer the NIS, and administer the UNIX operating system within a network. System security features will also be covered. Prerequisite: ITSC 1307. Semester Hours 3 (2 lec/2 lab)

ITSC 2339 Personal Computer Help Desk

Covers diagnosis and solution of user hardware- and software-related problems with on-the-job projects in either a Help Desk Lab or short-term assignments for local businesses. Students will establish rapport with users problem-solving situations, analyze user problems and lead them through solutions, maintain problem logs, and formulate problem-solving methodologies. This is a Capstone course that will integrate skills and knowledge from previous courses. Prerequisite: This course should be taken in the last two semesters before graduation. Semester Hours 3 (2 lec/2 lab)

ITSC 2486 Internship – Computer and Information Sciences, General

Provides a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the college and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. This course may be repeated. Prerequisite: Must meet internship requirements. (See [Guidelines for Internships.](#)) Semester Hours 4

ITSE 1311 Beginning Web Programming

Skill development in Web page programming, including mark-up and scripting languages. Teaches Internet Web page programming and related graphic design issues, including mark-up languages, websites, Internet access software, and interactive topics. May include use of HTML, CGI, Java, Javascript or ASP. Prerequisite: COSC 1336 and IMED 1316. Semester Hours 3 (2 lec/2 lab)

ITSE 1331 Introduction to Visual BASIC Programming

Introduces computer programming using Visual BASIC. Emphasizes the fundamentals of structured design, development, testing, implementation, and documentation. Includes language syntax, data and file structures, input/output devices, and files. Uses structured programming

techniques; develops correct executable programs; creates appropriate documentation; and creates applicable graphical user interfaces. Prerequisite: COSC 1336. Semester Hours 3 (2 lec/2 lab)

ITSE 1350 System Analysis and Design

Introduces the planning, design, and construction of computer information systems using the systems development life cycle and other appropriate design tools. Students will use system design tools, exhibit knowledge of all phases of the system design life cycle, demonstrate prototype concepts, differentiate tools used for project management, and develop documentation for each phase of the system life cycle. This is a Capstone course that will integrate skills and knowledge from previous courses. Prerequisite: A high-level programming language and ITSW 1307 or instructor consent. This course should be taken in the last two semesters before graduation. Semester Hours 3 (2 lec/2 lab)

ITSE 2309 Introduction to Database Programming

Covers application development using database programming techniques emphasizing database structures, modeling, and database access. Students develop database applications using a structured query language, create queries and reports from database tables, and create appropriate documentation. Prerequisite: COSC 1336. Semester Hours 3 (2 lec/2 lab)

ITSE 2317 JAVA Programming

Introduction to object-oriented Java programming, including the fundamental syntax and semantics of Java for applications and Web applets. Prerequisite: COSC 1336. Semester Hours 3 (2 lec/2 lab)

ITSE 2486 Internship – Computer Programming/Programmer, General

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the college and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. This course may be repeated. Prerequisite: Must meet internship requirements. (See [Guidelines for Internships.](#)) Semester Hours 4

ITSW 1304 Introduction to Spreadsheets

Introduces the concepts, procedures, and importance of electronic spreadsheets. Students will identify spreadsheet terminology and concepts, create formulas and functions, use formatting features, and generate charts, graphs and reports. Semester Hours 3 (2 lec/2 lab)

ITSW 1307 Introduction to Database

Introduces database theory and the practical applications of a database. Students will identify database terminology and concepts; plan, define and design a database; design and generate tables, forms and reports; and devise and process queries. Semester Hours 3 (2 lec/2 lab)

ITSW 2337 Advanced Database

Extends understanding of advanced database design and functionality. Topics include relational database theory, use of advanced capabilities for online collection and distribution of data, analysis of data using advanced database features, and an introduction to structured query language. Prerequisite: ITSW 1307. Semester Hours 3 (2 lec/2 lab.)

ITSW 2486 Internship – Data Processing, and Data Processing Technology/Technician

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Mentored and supervised by a workplace employee, the student achieves objectives that are developed and documented by the college and that are directly related to specific occupational outcomes. This may be a paid or unpaid experience. This course may be repeated. Prerequisite: Must meet internship requirements. (See [Guidelines for Internships](#).) Semester Hours 4

ITSY 1342 Information Technology Security

Instructs on security for network hardware, software, and data, including physical security, backup procedures, relevant tools, encryption, and protection from viruses. Students will learn to ensure the physical security of file servers and other network components using best practices; develop backup procedures to provide for data security; use network operating system features to implement network security; describe the nature of computer viruses, their methods of spreading, and means of protecting networks from viruses; use relevant tools to provide for network security; and use encryption techniques to protect network data. Prerequisite: ITSC 1305 or experience with computers. Semester Hours 3 (2 lec/2 lab).

ITSY 2300 Operating System Security

Safeguard computer operating systems by demonstrating server support skills and designing and implementing a security system. Identify security threats and monitor network security implementations. Use best practices to configure operating systems to industry security standards. Semester Hours 3 (2 lec/ 2 lab)

ITSY 2301 Firewall and Network

Instructs on the elements of firewall design, types of security threats, and responses to security attacks. Students learn how to use best practices to design, implement, and monitor a network security plan. Examine security incident postmortem reporting and ongoing network security activities. Prerequisites: ITSY 1342 and a networking class (ITCC 1310, ITNW 1354 or ITSC 1307). Semester Hours 3 (2 lec/2 lab)

Cosmetology

CSME 1348 Principles of Skin Care

An introduction of the theory and practice of skin care. Semester Hours 3 (2 lec/4 lab)

CSME 1405 Fundamentals of Cosmetology

A course in the basic fundamentals of cosmetology. Topics include service preparation, manicure, facial, chemical services, shampoo, haircut, wet styling, and comb out. Semester Hours 4 (2 lec/6 lab)

CSME 1420 Orientation to Facial Specialist

An overview of the skills and knowledge necessary for the field of facials and skin care. Semester Hours 4 (2 lec/6 lab)

CSME 1421 Principles of Facial/Aesthetic Technology I

An introduction to the principles of facial and skin care technology. Topics include anatomy, physiology, theory, and related skills of facial and skin care technology. Semester Hours 4 (2 lec/5 lab)

CSME 1431 Principles of Nail Technology I

A course in the principles of nail technology. Topics include anatomy, physiology, theory, and skills related to nail technology. Semester Hours 4 (2 lec/6 lab)

CSME 1435 Orientation to Instruction of Cosmetology

Acquaints the student with skills that are necessary for teaching cosmetology students. Emphasizes lesson planning, time management, learning styles, and learner behavior. Prerequisite: Consent of program director. Semester Hours 4 (2 lec/5 lab)

CSME 1443 Manicuring and Related Theory

Presentation of the theory and practice of nail technology. Topics include terminology, application, and workplace competencies related to nail technology. Semester Hours 4 (2 lec/6 lab)

CSME 1447 Principles of Skin Care/Facials and Related Theory

In-depth coverage of the theory and practice of skin care, facials, and cosmetics. Semester Hours 4 (2 lec/6 lab)

CSME 1451 Artistry of Hair, Theory and Practice

Instruction in the artistry of hair design. Topics include theory, techniques, and application of hair design. Semester Hours 4 (2 lec/8 lab)

CSME 1453 Chemical Reformation and Related Theory

Presentation of the theory and practice of chemical reformation, including terminology, application, and workplace competencies. Semester Hours 4 (2 lec/8 lab)

CSME 1534 Cosmetology Instruction I

Explores the field of teaching as a professional career choice. Focuses on teaching strategies and skills appropriate for employment in a public or private vocational school. Prerequisite: Consent of program director. Semester Hours 5 (3 lec/6 lab)

CSME 1545 Principles of Facial/Aesthetics Technology II

A continuation of the concepts and principles in skin care and other related technologies. Topics include advanced instruction in anatomy, physiology, theory, and related skills of facial and skin care technology. Semester Hours 5 (3 lec/6 lab)

CSME 2237 Advanced Cosmetology Techniques

Mastery of advanced cosmetology techniques, including hair designs, professional cosmetology services, and workplace competencies. Semester Hours 2 (0 lec/8 lab)

CSME 2401 The Principles of Hair Coloring and Related Theory

Presentation of the theory, practice, and chemistry of hair color. Topics include terminology, application, and workplace competencies related to hair color. Semester Hours 4 (2 lec/8 lab)

CSME 2414 Cosmetology Instruction II

Continuation of fundamentals of instructing. Emphasizes methods and techniques of teaching informational theory relative to the cosmetology profession. Prerequisites: CSME 1435 and 1534. Semester Hours 4 (2 lec/6 lab)

CSME 2439 Advanced Hair Design

Advanced concepts in the theory and practice of hair design. Semester Hours 4 (2 lec/6 lab)

CSME 2441 Preparation for Texas Cosmetology Commission Examination (Capstone)

Preparation for the Texas Cosmetology Commission Operator Examination. Semester Hours 4 (2 lec/8 lab)

CSME 2443 Salon Development

Procedures necessary for salon development. Topics include professional ethics, goal setting, salon operation and record keeping. Semester Hours 4 (2 lec/4 lab)

CSME 2445 Instructional Theory and Clinic Operations

An overview of objectives based on requirements of the Texas Department of Licensing and Regulations (TDLR) Instructor Examination. Provides students with opportunities to participate in classroom and laboratory instruction. Prerequisite: CSME 2414 and CSME 2515. Semester Hours 4 (2 lec/5 lab)

CSME 2515 Cosmetology Instruction III

An overview of objectives based on requirements of the Texas Department of Licensing and Regulations (TDLR) Instructor Examination. Provides students with opportunities to participate in classroom and laboratory instruction. Prerequisite: CSME 1435 and CSME 1534. Semester Hours 5 (2 lec/5 lab)

CSME 2531 Principles of Facial/Aesthetics Technology III

Advanced concepts and principles of skin care and other related technologies. Topics include professional ethics, establishing client relationships, salon management, and preparation for the Texas Cosmetology Commission license examination. Semester Hours 5 (3 lec/7 lab)

CSME 2544 Cosmetology Instruction IV

Advanced instruction emphasizing the demonstrating, development, and implementation of assessment techniques. This is a Capstone course that integrates knowledge from previous courses and provides students the opportunity to apply peer teaching, management, and leadership principles to real-world teaching situations. Prerequisite: CSME 2414 and CSME 2515. Semester Hours 5 (3 lec/6 lab)

Criminal Justice**CJCR 2325 Legal Aspects of Corrections (Capstone)**

A study of the operation, management, and legal issues affecting corrections. Analysis of constitutional issues involving rights of the convicted, as well as civil liability of correctional agencies and staff. This course will serve as the Capstone for the A.A.S. and Certificate in Corrections. Semester Hours 3 (3 lec)

CJSA 1308 Criminalistics I

Introduction to the field of criminalistics. Topics include the application of scientific and technical methods in the investigation of crime including location, identification, and handling of evidence for scientific analysis. Semester Hours 3 (3 lec)

CJSA 1393 Special Topics in Criminal Justice Studies (Forensic Art)

In this science-based anthropology course, as it relates to criminal justice, students will practice the forensic art reconstruction techniques that are used for the postmortem identification of persons and the identification/location of missing or wanted individuals, including age

progressions, reconstructive and composite drawings, clay construction of a skull and muscles, and clay reconstruction of appearance on a plastic skull model. Students will use pencil and paper to create imagery in two dimensions and modeling clay to reconstruct craniofacial appearance in three dimensions. Semester Hours 3 (3 lec)

(Forensic Anthropology)

This online course will survey the recovery and analysis of skeletal remains. Estimation of biological factors such as age at death, sex, ancestry, stature, pathology and time since death will be explored. The role of physical anthropology in criminal investigation will be discussed. Semester Hours 3 (3 lec)

CJSA 1400 Death Investigation I

Concepts, investigation processes, scene management, required documentation and case management for incidences of natural, accidental and suicidal deaths. Follows the U.S. Department of Justice's National Guidelines for Death Investigations and meets the criteria for academic credit recognition from the American Board of Medicolegal Death Investigators. Semester Hours 4 (3 lec/3 lab)

CJSA 2389 Internship – Criminal Justice

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Provides work experience to increase student understanding of the operation and administration of a crime scene lab. Through placement in a variety of local agencies, students will gain hands-on experience in crime scene investigation, chain of evidence custody, and working conditions in a criminal investigation lab. Semester Hours 3 (1 lec/8 lab)

CJSA 2471 Forensic Science I

An introduction to crime scene investigation, evidence gathering, and preservation. Utilizing lecture and lab, the course presents the methods, procedures, and techniques for the analysis and preservation of crime scene evidence appropriate for first responders to a crime scene. Includes the use of specific instrumentation to perform trace analysis of hair and fiber, stains, epithelial cells, latent fingerprints, DNA, and other basic evidence gathering techniques. Additional skills and knowledge will be obtained from guest speakers and local documented cases. In the process, students will have hands-on experience as well as practical understanding of the basic operation of a busy forensic lab. Semester Hours 4 (3 lec/2 lab)

CJSA 2472 Forensic Science II

A forensic science course focused on research in adolescent and adult neuropsychology. A study of the latest research from neuroimaging related to biological templates for violence within Paul MacLean's Triune Brain paradigm. Explores the developmental sequencing and powerful illumination of the brain's centers of addiction and the impact of neurocriminalistics — such as brain mapping and brain fingerprinting. The psychopathology and known offender characteristics will be analyzed and discussed. Also demonstrated are how forensic specialists

analyze mens rea (the criminal mind), MO (modus operandi), signature, and criminal aftermath activity as part of crime scene analysis. Prerequisite: CJSA 2471. Semester Hours 4 (3 lec/2 lab)

CRIJ 1301 Introduction to Criminal Justice

History, philosophy, and ethical considerations of criminal justice; the nature and impact of crime; and an overview of the criminal justice system, including law enforcement and court procedures. Semester Hours 3 (3 lec)

CRIJ 1306 Court Systems and Practices

Study of the judiciary in the American criminal justice system and the adjudication processes and procedures. Semester Hours 3 (3 lec)

CRIJ 1307 Crime in America

Study of American crime problems in historic perspective; social and public policy factors affecting crime; impact and crime trends; social characteristics of specific crimes; and prevention of crime. Semester Hours 3 (3 lec)

CRIJ 1310 Fundamentals of Criminal Law

Study of criminal law, its philosophical and historic development; major definitions and concepts, classification and elements of crime; penalties using Texas statutes as illustrations; and criminal responsibility. Semester Hours 3 (3 lec)

CRIJ 1313 Juvenile Justice System

A study of the juvenile justice process to include specialized juvenile law, role of the juvenile law, role of the juvenile courts, role of police agencies, role of correctional agencies, and theories concerning delinquency. Semester Hours 3 (3 lec)

CRIJ 2301 Community Resources in Corrections

An introductory study of the role of the community in corrections, community programs for adults and juveniles, administration of community programs, legal issues, and future trends in community treatment. Semester Hours 3 (3 lec)

CRIJ 2313 Correctional Systems and Practices

Corrections in the criminal justice system; organization of correctional systems; correctional roles; institutional operations; alternatives to institutionalization; treatment and rehabilitation; current and future issues. Semester Hours 3 (3 lec)

CRIJ 2314 Criminal Investigation

Investigative theory; collection and preservation of evidence; sources of information; interview and interrogation; uses of forensic sciences; case and trial preparation. Semester Hours 3 (3 lec)

CRIJ 2323 Legal Aspects of Law Enforcement (Capstone)

Police authority; responsibilities; constitutional constraints; laws of arrest, search, and seizure; police liability. This course will serve as a Capstone for the A.A.S. degree and Certificate in Law Enforcement. Semester Hours 3 (3 lec)

CRIJ 2328 Police Systems and Practices

The police profession; organization of law enforcement systems; the police role; police discretion; ethics; police-community interaction; current and future issues. Semester Hours 3 (3 lec)

Dance (See also Theatre)

DANC 1141 Ballet I

Surveys and demonstrates technique, theory, and vocabulary of basic classical ballet. May be taken three times for credit. Semester Hours 1 (4 lec/lab)

DANC 1142 Ballet II

Continues the development of ballet techniques and formulation of a personal style to achieve performance level. Prerequisite: DANC 1141 or consent of instructor. May be taken three times for credit. Semester Hours 1 (4 lec/lab)

DANC 1151 Theatre Dance I

Surveys and demonstrates all aspects of theatre dance with emphasis on technique and vocabulary of jazz, tap, and character dance leading to skills in performance. May be taken three times for credit. Semester Hours 1 (4 lec/lab)

DANC 1152 Theatre Dance II

Continues DANC 1151 Theatre Dance I. Refines theatre dance techniques and helps students develop personal styles. May be taken three times for credit. Prerequisite: DANC 1151. Semester Hours 1 (4 lec/lab)

DANC 1171 Musical Theatre Workshop

Provides practical experience of dancing in a musical production. May be taken three times for credit. Semester Hours 1 (6 lab)

DANC 2141 Ballet III

This course is a continuation of Ballet II and presents technique, theory and vocabulary of classical ballet at an intermediate level. Prerequisite: DANC 1142 or consent of instructor. Semester Hours 1 (1 lec/3 lab)

DANC 2142 Ballet IV

This course is a continuation of Ballet III and presents technique, theory and vocabulary of classical ballet at an intermediate to advanced level. Prerequisite: DANC 2141 or consent of instructor. Semester Hours 1 (1 lec/3 lab)

DANC 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of dance. Semester Hours 3 (3 lec)

Economics

ECON 1301 Introduction to Economics

A study of consumer problems of the individual and of the family in the American economy. Areas of study may include: money and credit management, saving and personal investment, estate planning, wills, buying food and clothing, home ownership or rental, transportation, insurance, taxes, and consumer protection. Semester Hours 3 (3 lec)

ECON 2301 Macroeconomics

History, development and application of macroeconomic and microeconomic theory underlying the production, distribution, and exchange of goods and services, including the utilization of resources, analysis of value and prices, national income analysis, fiscal policies, monetary and banking theory and policy, distribution of income, labor problems, international economics, and economics systems. Attention is given to the application of economic principles to economic problems. Prerequisite: Students should have passed the reading portion of the THEA or approved alternative test or be concurrently enrolled in READ 0302. Recommendation: Students should have passed the math portion of the THEA or approved alternative test. Semester Hours 3 (3 lec)

ECON 2302 Microeconomics

Introduces the history, development and application of microeconomic theory as applied to the exchange of goods and services, supply and demand, price and output determination, market structures, government regulation, labor/management relations, distribution of income, and international trade. Prerequisite: Students should have passed the reading portion of the THEA or approved alternative test or be concurrently enrolled in READ 0302. Recommendation: Students should have passed the math portion of the THEA or approved alternative test. Semester Hours 3 (3 lec)

Education

EDUC 1100 Learning Framework

Studies of the research and theory in the psychology of learning, cognition, and motivation; factors that impact learning, and application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of

college-level student academic strategies. Students use assessment instrument (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models that they have learned. (Cross-listed as PSYC 1100) Semester Hours 1 (1 lec)

EDUC 1200 Learning Framework

Studies of the research and theory in the psychology of learning, cognition, and motivation; factors that impact learning, and application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instrument (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models that they have learned. Prerequisites: Must have passed the reading portion of the THEA or approved alternative test or concurrent enrollment in READ 0302. (Cross-listed as PSYC 1200) Semester Hours 2 (2 lec)

EDUC 1300 Learning Framework

Studies of the research and theory in the psychology of learning, cognition, and motivation; factors that impact learning, and application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instrument (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models that they have learned. Semester Hours 3 (3 lec)

EDUC 1301 Introduction to Education

Explores the field of teaching as a professional career choice. Emphasizes personal awareness of interest, values, strengths, decision making and occupational information. Provides students with opportunities to participate in field observations at all levels of P-12 schools with varied and diverse student populations. Semester Hours 3 (3 lec/1 lab)

EDUC 2301 Introduction to Special Populations

An enriched, integrated pre-service course and content experience that provides an overview of schooling and classrooms from the perspectives of language, gender, socioeconomic status, ethnic and academic diversity, and equity with an emphasis on factors that facilitate learning.

Provides students with opportunities to participate in field observations of P-12 special populations. Prerequisite: EDUC 1301. Semester Hours 3 (3 lec/1 lab)

Electroneurodiagnostics and Polysomnography

ENDT 1170 Pattern Recognition Lab

Introduction of the study and recognition of the rhythms, to include routine studies as well as advanced studies. Rhythms include the basic frequencies and how to identify them based on morphology and frequency. Prerequisites: ENDT 1345 and ENDT 1350 and PSGT 1410 with a minimum grade of C. Semester Hours 1 (2 lab)

ENDT 1260 Clinical Electroencephalography

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Prerequisites: ENDT 1345, 1350 and PSGT 1410 with a minimum grade of C. Semester Hours 2 (12 clinical hours/week)

ENDT 1270 Pattern Recognition Lab

Continuation of the study and recognition of the rhythms. Studies include specialized studies, long-term studies, medication induction studies and seizure induction techniques. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215 and 2320 and PSGT 1410 with a minimum grade of C. Semester Hours 2 (3 lab)

ENDT 1345 Applied Electronics and Instrumentation

Theory and application of electrical concepts, recording techniques, data analysis, and descriptions. Includes electronics and instrumentation associated with the conventional electroencephalograph such as the power supply, contribution of electrodes, differential amplifier concepts, filters (low frequency, high frequency and 60-Hz filters), the writer unit, electrical output, electrical safety, and standards for clinical electroencephalographs. Also covers ambulatory monitoring and digital electroencephalography. Prerequisite: Admission to END/PSG program. Semester Hours 3 (3 lec/1 lab)

ENDT 1350 Electroencephalography

The field of electroencephalography (EEG) and its use in medicine and surgery. Emphasizes patient hookup, taking histories, careful handling of the patient, reviewing normal and abnormal brainwaves, identifying artifacts, EEG instrumentation, pattern recognition, and sleep recordings. Includes examination of EEG findings in neurological disease and introduces special EEG procedures. Prerequisite: Admission to END/PSG program. Semester Hours 3 (3 lec/1 lab)

ENDT 1660 Clinical Electroencephalography

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Includes a comprehensive certification-type examination that serves as a Capstone experience to assess student achievement of entry-level competencies required by the profession and the workplace. Includes a comprehensive certification-type examination that serves as a Capstone experience to assess student achievement of entry-level competencies required by the profession and the workplace. Prerequisites: ENDT 1170, 1260, 1345, 1350, 2210, 2215 and 2320 and PSGT 1410 with a minimum grade of C. Semester Hours 6 (32 clinical hours/week)

ENDT 2210 Evoked Potentials

Evoked potentials (EP) instrumentation, EP history, signal averaging, statistics, A/D converter, amplifiers, filters, and stimulators. Includes recording evoked potentials from volunteers and observing the effect of different variables. Emphasizes somatosensory, visual, and brainstem auditory evoked responses and provides practical application and evaluation of EP data. Prerequisites: ENDT 1345 and 1350 and PSGT 1410 with a minimum grade of C. Semester Hours 2 (2 lec)

ENDT 2215 Nerve Conduction Studies

Electrodiagnostics, principles of nerve conduction studies, and methods designed to assess neuromuscular transmission. Includes conventional and single-fiber electromyography and methods designed for reaching less accessible regions of the nervous system. Prerequisites: ENDT 1345 and 1350 and PSGT 1410 with a minimum grade of C. Semester Hours 2 (2 lec)

ENDT 2260 Clinical III Electroneurodiagnostics Technology

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Semester Hours 2 (12 clinical hours per/week)

ENDT 2320 Electroneurodiagnostics Technology I

Electroneurodiagnostics and normal functional neuroanatomy and physiology. Explores abnormal functional neuroanatomy and physiological conditions and correlates. Includes an examination of electroencephalographic signs of cerebral disorders, specific neurological disease entities, and the integration of electroencephalography patterns for cerebral disorders

and diagnosis. Prerequisites: ENDT 1345 and 1350 and PSGT 1410 with a minimum grade of C. Semester Hours 3 (3 lec/1 lab)

ENDT 2370 Electroneurodiagnostics Technology II

Demonstrate the ability to take a patient's medical history; outline various montages used to record the EEG; discuss the differential amplifier and common mode rejection; and describe safety measures that pertain to clinical EEG procedures. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215 and 2320 and PSGT 1410 with a minimum grade of C. Semester Hours 3 (3 lec/1 lab)

PSGT 1300 Polysomnography I

Didactic and laboratory training for entry-level personnel in the basics of polysomnographic technology. Includes terminology, instrumentation setup and calibration, patient safety and infection control, recording and monitoring techniques, documentation, professional issues, and patient-technologist interactions related to polysomnography technology. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215, 2320 and PSGT 1410 with a minimum grade of C or better. Semester Hours 3 (3 lec)

PSGT 1410 Neuroanatomy and Physiology

Basic neuroanatomy and physiology. Includes the neurologic history, the neurologic exam, and diagnostic tools applied to the study of various neurologic disorders. Prerequisite: Admission to the END/PSG program. Semester Hours 4 (3 lec/3 lab)

PSGT 1460 Clinical – Polysomnography Clinical II

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215, 2320 and 2360 and PSGT 1300 and 1410 with a minimum grade of C. Semester Hours 4 (12 clinical hours/week)

PSGT 2411 Polysomnography II

Current practices in polysomnography. Includes the use of specialized equipment/instruments used to record and monitor various physiological parameters involved with sleep testing. Emphasizes sleep disorders, theory of testing and treatment procedures, and analysis of polysomnography data. Provides for instruction on patient testing in polysomnography in a laboratory setting. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215, 2320 and 2360 and PSGT 1300 and 1410 with a minimum grade of C. Semester Hours 4 (4 lec/1 lab)

PSGT 2660 Clinical – Polysomnography Clinical III (Capstone)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Includes a comprehensive certification-type examination that serves as a

Capstone experience to assess student achievement of entry-level competencies required by the profession and the workplace. Prerequisites: ENDT 1170, 1260, 1345, 1350, 1660, 2210, 2215, 2320 and 2360 and PSGT 1300, 1410, 1460 and 2411 with a minimum grade of C. Semester Hours 6 (36 clinical hours/week)

Engineering

ENGR 1201 Introduction to Engineering

Introduces the field of engineering as a career to help students answer the question, “Do I want to be an engineer?” and to help students be successful academically and professionally in the engineering field. Prerequisite: MATH 1314 or consent of the division chair. Semester Hours 2 (2 lec)

ENGR 1304 Engineering Graphics

Introduction to computer-aided drafting using CAD software and sketching to generate two- and three-dimensional drawings based on the conventions of engineering graphical communication; topics include spatial relationships, multi-view projections and sectioning, dimensioning, graphical presentation of data, and fundamentals of computer graphics. Prerequisite: Math 1314 or consent of division chair. Semester Hours 3 (2 lec/3 lab)

ENGR 1307 Plane Surveying

Development of skills necessary to recognize and solve problems in surveying; introduction and use of various precision instruments used for surveying, including level, theodolites, electronic distance measuring equipment, and total stations for collecting field data; introduction of Global Positioning Systems (GPS) and Geographic Information Systems (GIS) and their use in surveying; and use of graphic design software, such as AutoCAD or Microstation, in surveying problems. Prerequisites: MATH 1316 or ENGR 1304 with a grade of C or better. Semester Hours 3 (3 lec)

ENGR 2105 Electrical Circuits I Laboratory

Basic laboratory experiments supporting theoretical principles presented in ENGR 2305 involving electrical and electronic components and circuits, including circuit analysis, network principles, motors, and steady-state and transient responses, and preparation of lab reports. Prerequisite: PHYS 2426. Corequisite: ENGR 2305. Semester Hours: 1 (3 lab)

ENGR 2106 Introduction to Digital Systems Laboratory

Basic laboratory experiments supporting theoretical principles presented in ENGR 2306 involving design, construction, and analysis of combinational and sequential digital circuits and systems, including logic gates, adders, multiplexers, encoders, decoders, arithmetic logic units, latches, flip-flops, registers, and counters; preparation of laboratory reports. Corequisite: ENGR 2306. Semester Hours 1 (3 lab)

ENGR 2304 Programming for Engineers

Introduction to computer programming using a modern programming language. Emphasis on the fundamentals of structured design, development, testing, implementation and documentation. Includes coverage of language syntax, data and file structures. Prerequisite: credit for or concurrent enrollment in MATH 2413 or consent of division chair. Semester Hours 3 (3 lec/2 lab)

ENGR 2305 Circuits I for Electrical Engineers

Basic concepts of electrical engineering using calculus: the fundamentals of electrical and electronic components and circuits, circuit analysis, network principles, motors, steady-state and transient responses; application of LaPlace transforms; and use of computational software to solve network problems; application of the principles to the solutions of electrical engineering problems; relationship between basic principles and advanced applications. Prerequisite: PHYS 2326. Corequisite: ENGR 2105. Semester Hours 3 (3 lec)

ENGR 2306 Introduction to Digital Systems

Introduction to theory and design of digital logic, circuits, and systems. Number systems, operations and codes; logic gates; Boolean Algebra and logic simplification; Karnaugh maps; combinational logic; functions of combinational Logic; flip-flops and related devices; counters; shift registers; sequential logic; memory and storage. Prerequisite: MATH 1314 with a grade of C or better. Corequisite: ENGR 2106. Semester hours 3 (3 lec)

ENGR 2308 Engineering Economics

Methods used for determining the comparative financial desirability of engineering alternatives. Provides the student with the basic tools required to analyze engineering alternatives in terms of their worth and cost, an essential element of engineering practice. The student is introduced to the concept of the time value of money and the methodology of basic engineering economy techniques. The course will address some aspects of sustainability and will provide the student with the background to enable them to pass the Engineering Economy portion of the Fundamentals of Engineering exam. Prerequisite: MATH 2413 with a grade of C or better. Corequisite: ECON 2301 or ECON 2302. Semester hours 3 (3 lec)

ENGR 2401 Engineering Mechanics I (Statics)

Basic theory of engineering mechanics using calculus, involving the description of forces, moments, and couples acting on stationary engineering structures, equilibrium in two and three dimensions, free-body diagrams, friction, centroids, centers of gravity, and moments of inertia. Prerequisite: PHYS 2425. Semester Hours 4 (4 lec)

ENGR 2402 Engineering Mechanics II (Dynamics)

Basic theory of engineering mechanics using calculus, involving the motion of particles, rigid bodies, and systems of particles, Newton's Laws, work and energy relationship, principles of impulse and momentum, application of kinetics and kinematics to the solution of engineering problems. Prerequisite: ENGR 2401. Semester Hours 4 (4 lec)

English

ENGL 0300 Basic Grammar and Composition I

Helps students improve basic writing, usage, and grammar skills. Focuses on the development and organization of short writing assignments. Equivalent course: ENGL 0310. Semester Hours 3 (3 lec/1 lab)

ENGL 0301 Basic Grammar and Composition II

Helps students address college entry-level issues of grammar, idea organization and concept development in single- to multi-paragraph writing tasks. Prerequisite: Successful completion of ENGL 0300, ENGL 0310, or the required THEA or approved alternative writing test score. Equivalent course: ENGL 0311. Semester Hours 3 (3 lec/1 lab)

ENGL 0310 Developmental Composition I for Non-Native Speakers

Helps non-native speakers of English improve basic writing, usage and grammar skills. Focuses on the development and organization of short writing assignments. Equivalent course: ENGL 0300. Semester Hours 3 (3 lec/1 lab)

ENGL 0311 Developmental Composition II for Non-Native Speakers

Helps non-native speakers of English address college entry-level issues of grammar, idea organization and concept development in single- and multi-paragraph writing tasks.

Prerequisite: ENGL 0300, 0310, or the required THEA or approved alternative writing test score.

Equivalent course: ENGL 0301. Semester Hours 3 (3 lec/1 lab)

ENGL 1301 Freshman Composition I

Focuses on developing the core skills of reading, critical thinking, writing, and researching.

Emphasizes writing processes and outcomes and includes attention to standard language conventions. Prerequisite: Must have passed the writing section of the THEA or approved

alternative test or credit for ENGL 0301. Semester Hours 3 (3 lec)

ENGL 1302 Freshman Composition II

Focuses on college-level research techniques while emphasizing the writing process of argumentation/persuasion and critical thinking skills. Refines core communication skills.

Equivalent course: ENGL 2311. Prerequisite: ENGL 1301 or its equivalent with a grade of C or better or consent of division chair. Semester Hours 3 (3 lec)

ENGL 2307 Creative Writing

Emphasizes writing for pleasure and publication. Provides opportunities for

students to critique and practice the techniques of imaginative writing in order to develop a sound original style in various genres, such as poetry, short stories, short drama, and nonfiction.

Addresses practical problems of marketing. Prerequisite: ENGL 1302 or consent of instructor or division chair. Semester Hours 3 (3 lec)

ENGL 2311 Technical Communication

Emphasizes techniques and skills of technical and business writing. Includes such projects as product description, process description, a written and oral research report, interview skills, and standard business correspondence such as letters, memos, proposals, and resumes. Continues attention to standard language conventions. Equivalent to ENGL 1302. Prerequisite: ENGL 1301 or POFT 1301 with a grade of C or better. Semester Hours 3 (3 lec)

ENGL 2321 British Literature

Surveys British literature from its origins through the present. Includes historical background, as well as social and literary development. Emphasizes appreciation of selected works of a range of writers such as Chaucer, Shakespeare, Wordsworth, and Woolf. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2322 British Literature to the Romantics

Surveys British literature from its origins through the 18th century. Includes historical background, as well as social and literary development. Emphasizes appreciation of selected

works of a range of writers such as Chaucer, Shakespeare, Milton, and Behn. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2323 British Literature: Romantics to Present

Surveys British literature of the 19th and 20th centuries. Includes historical background, as well as social and literary development. Emphasizes appreciation of selected works of a range of writers such as Wordsworth, Tennyson, Yeats, and Woolf. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2326 American Literature

Surveys American literature from its origins through the present. Includes historical background, as well as social and literary development. Emphasizes appreciation of selected works from a range of writers such as Emerson, Hawthorne, Chopin, Dickinson, and Morrison. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2327 American Literature to the Civil War

Surveys a range of American works through the Civil War with a variety of authors, including Hawthorne, Douglass, Poe, Wheatley, and Rowlandson. Includes historical background, as well as literary development. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2328 American Literature: Civil War to Present

Surveys a range of American works, from the conclusion of the Civil War to the present including such authors, as Chopin, Fitzgerald, Hurston, Hemingway, and Walker. Includes some historical background, as well as literary development. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2331 World Literature

Surveys representative literature from world cultures that have influenced the evolution of modern civilization. Emphasizes selected writers and works from antiquity to the present. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2332 World Literature to the 17th Century

Surveys representative literature from world cultures that have influenced the evolution of modern civilization. Emphasizes selected writers from antiquity through the 16th century. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2333 World Literature: 17th Century to Present

Surveys representative literature from world cultures that have influenced the evolution of modern civilization. Emphasizes selected writers from the 17th century to the present. May be taken before, after or concurrently with other literature courses. Prerequisites: ENGL 1302, ENGL 2311 or equivalent; must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

ENGL 2341 Forms of Literature

Includes selections in literature organized by areas such as genre, theme, period or geographical region. Course descriptions, which may change from semester to semester, are available each semester prior to registration. May be repeated for credit when different topics are covered. May be taken before, after or concurrently with other literature courses. Prerequisite: ENGL 1302, ENGL 2311 or equivalent. Semester Hours 3 (3 lec)

ENGL 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of English and literature. Semester Hours 3 (3 lec)

Environmental Science**ENVR 1101 General Environmental Science Laboratory**

Introduces the methods of collection, analysis, and interpretation of environmental data. Prerequisite: Credit for or concurrent enrollment in ENVR 1301. Semester Hours 1 (3 lab)

ENVR 1102 Environmental Science Lab II

Lab portion of ENVR 1302. Requires a minimum of previous science background. Lab exercises relate scientific knowledge to problems involving energy and the environment. Includes research projects related to the historical development of current environmental practices and concerns. May include other research projects dealing with current or potential environmental concerns. Semester Hours 1 (3 lab)

ENVR 1301 General Environmental Science

Emphasizes the issues and problems arising from the impact of human activity on the environment. Analyzes environmental quality and how our natural resources are utilized. Semester Hours 3 (3 lec)

ENVR 1302 Environmental Science II

General interest course requiring a minimum of previous science background and relating scientific knowledge to problems involving energy and the environment. A continued development of topics from ENVR 1301 relevant to current environmental issues. Includes the historical development of environmental concerns and practices of the modern era. May include

research projects dealing with current or potential environmental issues. Semester Hours 3 (3 lec)

ENVR 1401 Environmental Science I

General interest course requiring a minimum of previous science background and relating scientific knowledge to problems involving energy and the environment. Prerequisites: None. Semester Hours 4 (3 lec/3 lab)

ENVR 1402 Environmental Science II

General interest course requiring a minimum of previous science background and relating scientific knowledge to problems involving energy and the environment. A continued development of topics from ENVR 1401 relevant to current environmental issues. Includes the historical development of environmental concerns and practices of the modern era. May include research projects dealing with current or potential environmental issues. Prerequisites: None. Semester Hours 4 (3 lec/3 lab)

Fire Protection Technology

Firefighter certification I through VII must all be taken concurrently.

FIRS 1103 Firefighter Agility and Fitness Preparation

Physical ability testing methods. Rigorous training in skills and techniques needed in typical fire department physical ability test. Semester Hours 3 (3 lab)

FIRS 1301 Firefighter Certification I

Firefighter safety and development. Includes Texas Commission on Fire Protection Rules and Regulations, firefighter safety, fire science, personal protective equipment, self-contained breathing apparatus, and fire reports and records. Semester Hours 3 (2 lec/3 lab)

FIRS 1313 Firefighter Certification III

Fire streams and pump operations as they relate to fundamental development of basic firefighter skills. Semester Hours 3 (2 lec/2 lab)

FIRS 1319 Firefighter Certification IV

Equipment, tactics, and procedures used in forcible entry, ventilation, salvage, and overhaul. Preparation for certification as a basic firefighter. Semester Hours 3 (2 lec/2 lab)

FIRS 1323 Firefighter Certification V

Ropes and knots, rescue procedures and techniques, and hazardous materials. Preparation for certification as a basic firefighter. Semester Hours 3 (2 lec/2 lab)

FIRS 1329 Firefighter Certification VI

Fire inspection techniques and practices. Emphasis on fire cause determination. Includes fire protection systems, wild land fire, and pre-incident planning. Preparation for certification as a basic firefighter. Semester Hours 3 (2 lec/2 lab)

FIRS 1407 Firefighter Certification II

Basic principles and skill development in handling fire service hose and ladders. Includes the distribution system of water supply, basic building construction, emergency service communication, procedures, and equipment. Semester Hours 4 (2 lec/4 lab)

FIRS 1433 Firefighter Certification VII

Simulated emergency operations and hands-on live fire training exercises, incident management procedures, and combined operations using proper extinguishing methods. Emphasis on safety. Semester Hours 4 (3 lec/3 lab)

French**FREN 1411 Beginning French I**

Introduces essentials of pronunciation and grammar through oral and written practice. Communication-based practice for all language skills. No prior knowledge of French required. Semester Hours 4 (3 lec/2 lab)

FREN 1412 Beginning French II

Emphasizes the essentials of pronunciation and grammar through oral and written practice. Communication-based practice for all language skills. Prerequisite: FREN 1411, two years of high school French, or consent of instructor or division chair. Students with two years of high school French are encouraged to see a French instructor prior to enrolling. Semester Hours 4 (3 lec/2 lab)

FREN 2311 Intermediate French I

Reviews conversation, composition, and grammar through oral and written practice. Utilizes films and reading selections in French to expand vocabulary and knowledge of the French language and culture. Prerequisite: FREN 1412, three years of high school French, or consent of instructor or division chair. Students with three years of high school French are encouraged to see a French instructor prior to enrolling. Semester Hours 3 (3 lec)

FREN 2312 Intermediate French II

Continues review of conversation, composition, and grammar through oral and written practice. Utilizes films and reading selections in French to expand vocabulary and knowledge of the French language and culture. Prerequisite: FREN 2311, four years of high school French, or consent of instructor or division chair. Students with four years of high school French are encouraged to see a French instructor prior to enrolling. Semester Hours 3 (3 lec)

Geography**GEOG 1300 World Geography**

Introduces modern geography by means of a world survey of geographic conditions. Includes studies of the major types of land surfaces, the great climatic regions with associated vegetation and soils, the water and mineral resources, and the world distribution of population. Emphasizes

map study and environmental problems with possible solutions. Often recommended for majors in elementary education. Semester Hours 3 (3 lec)

Geology

GEOL 1101 Earth Science Lab

Focuses on the survey of geology, astronomy, meteorology, oceanography, and related earth science processes. Students will be exposed to applications of these concepts via field trips, experiments and hands-on learning activities. Semester Hours 1 (3 lab)

GEOL 1301 Earth Science

Presents key concepts of major physical science concepts of geology, astronomy, meteorology, oceanography and earth science such as weather systems, mass wasting, mid-oceanic ridges, deep sea ridges, celestial bodies, ocean currents, geomorphology of the earth, geologic principles, geologic resources, volcanism, earthquakes and mountain-building processes. Students may take this course with or without the corresponding lab component. Semester Hours 3 (3 lec)

GEOL 1401 Earth Science

Presents key concepts of major physical science concepts of geology, astronomy, meteorology, oceanography, and earth science such as weather systems, mass wasting, mid-oceanic ridges, deep sea ridges, celestial bodies, ocean currents, geomorphology of the earth, geologic principles, geologic resources, volcanism, earthquakes, and mountain building processes. The lab component provides exposure to applications of these concepts via field trips, experiments, and hand-on learning activities. Semester Hours 4 (3 lec/3 lab)

GEOL 1403 Physical Geology

Introduces the basic physical processes of the earth and their effect on people and the environment. Emphasizes plate tectonics, earth materials, weathering and the agents of erosion, and the development of landforms. The lab provides hands-on experience in rock and mineral identification and an introduction to geologic and topographic map interpretation. Outside field trips may be scheduled during class time; number of field trips, if any, to be determined by the instructor. Semester Hours 4 (3 lec/3 lab)

GEOL 1404 Historical Geology

Introduces the theories of the evolution of life-forms on earth. Concurrent with this study is the history of the development of landforms of North America. Lab introduces fossil identification with emphasis on fossils of Central Texas; also includes topographic and geologic map interpretation. Outside field trips may be scheduled during class time; number of field trips, if any, to be determined by the instructor. Semester Hours 4 (3 lec/3 lab)

GEOL 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in the physical sciences. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of inanimate objects, processes of matter and energy, and associated phenomena. Semester Hours 3 (3 lec)

German

GERM 1411 Beginning German I

Introduces essentials of pronunciation and grammar through oral and written practice. A communication-based approach is used to practice all language skills. No prior knowledge of German required. Semester Hours 4 (3 lec/2 lab)

GERM 1412 Beginning German II

Introduces essentials of pronunciation and grammar through oral and written practice. A communication-based approach is used to practice all language skills. Prerequisite: GERM 1411, two years of high school German, or consent of instructor or division chair. Students with two years of high school German are encouraged to see a German instructor before enrolling. Semester Hours 4 (3 lec/2 lab)

GERM 2311 Intermediate German I

Reviews conversation, composition, and grammar through oral and written practice. Uses reading, audio, and video selections to expand vocabulary and knowledge of the German language and culture. Prerequisite: GERM 1412, three years of high school German, or consent of instructor or division chair. Students with three years of high school German are encouraged to see a German instructor prior to enrolling. Semester Hours 3 (3 lec)

GERM 2312 Intermediate German II

Continues review of conversation, composition, and grammar through oral and written practice. Uses reading, audio, and video selections to expand vocabulary and knowledge of the German language and culture. Prerequisites: GERM 2311, four years of high school German, or consent of instructor or division chair. Students with four years of high school German are encouraged to see a German instructor prior to enrolling. Semester Hours 3 (3 lec)

Government

GOVT 2304 Introduction to Political Science

A survey of the development, philosophies, and methodologies of the political discipline. Topics covered will include: theory and theory building, research techniques and sources, constitutional law, comparative government, international relations, political socialization, political behavior, public administration, and political philosophy. This course will **not** satisfy the Government class requirements for graduation. It is highly recommended for potential government and social science majors. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

GOVT 2305 National Government

Surveys the national government, the rise of constitutionalism, the national constitution, the federal system, the position of the individual political parties and elections, civil liberties, administration, defense, and foreign policy. Sophomore standing or completion of HIST 1301 and 1302 recommended. May be taken before or after GOVT 2306. Prerequisite: Must have

passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

GOVT 2306 Texas Government

Surveys state and local government in Texas, the state constitution, state parties and elections, and legislative, executive, and judicial functions at the state level. Sophomore standing or completion of HIST 1301 and 1302 recommended. May be taken before or after GOVT 2305. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

GOVT 2311 Mexican American Politics

The study of Mexican American politics within the American political experience. Students will explore the political forces integral to the inclusion and/or exclusion of Mexican American political development in the United States. Topics covered will include: immigration, labor, border politics, partisan politics, religion, voting, mass movements, political organizations, and prominent leaders (past and present) in the Mexican American community. Sophomore standing or completion of HIST 1301 or 1302 recommended. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

GOVT 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in government. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of human social behavior and/or social institutions. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

Health Information Technology

HITT 1205 Medical Terminology I

Studies the word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols, surgical procedures, medical specialties and diagnostic procedures. Semester Hours 2 (2 lec)

HITT 1211 Health Information Systems

Introduces concepts of computer technology related to health care data and the tools and techniques for collecting, storing, securing, retrieving, and reporting health care data. Semester Hours 2 (1 lec/3 lab)

HITT 1255 Health Care Statistics

Covers general principles of health care statistics with emphasis in hospital statistics. Skill development in computation and calculation of health data. Prerequisite: HITT 1301 with a minimum grade of C. Semester Hours 2 (2 lec)

HITT 1261 Clinical – Health Information/Medical Records Technology/Technician (Coding Capstone)

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by clinical professional. Provides Capstone experience in the work environment of content acquired in the Coding Specialist Certificate Program. Must be currently enrolled in or have taken HITT 2435 with a minimum grade of C. Semester Hours 2 (7 clinical hours/week)

HITT 1301 Health Data Content and Structure

Introduction to systems and processes for collecting, maintaining and disseminating primary and secondary health-related information, including content of health record, documentation requirements, registries, indices, licensing, regulatory agencies, forms and screens. Semester Hours 3 (2 lec/2 lab)

HITT 1345 Health Care Delivery System

Introduces organization, financing, and delivery of health care services, accreditation, licensure, and regulatory agencies. Explores specialized record requirements. Prerequisite: HITT 1301 with a minimum grade of C. Semester Hours 3 (3 lec)

HITT 1353 Legal and Ethical Aspects of Health Information

Introduces concepts of privacy, security, confidentiality, ethics, health care legislation, and regulations related to the maintenance and use of health information. Prerequisites: HITT 1301 with a minimum grade of C. Corequisites: HITT 1255, 1211 and 1345. Semester Hours 3 (3 lec)

HITT 1441 Coding and Classification Systems

Teaches application of basic coding rules, principles, guidelines, and conventions. Introduces principles of various classification systems with emphasis on the ICD-9-CM classification system utilizing manual and computer applications. Prerequisites: HITT 2331, BIOL 2401, HPRS 2301 with a minimum grade of C or consent of the program director. Corequisite: HITT 1301. Semester Hours 4 (3 lec/3 lab)

HITT 2149 RHIT Competency Review (HIT Capstone)

Reviews HIT competencies, skills, and knowledge base pertinent to the technology and relevant to the professional development of the students. Includes a mock certification examination, which provides a Capstone experience to assess student mastery of entry-level competencies for the profession. Prerequisites: HITT 1301, 1255, 1345, 1353, 1441, 2343, 1211, 2260 with a minimum grade of C. Semester Hours 1 (1 lec)

HITT 2231 Medical Terminology – Advanced

Discusses advanced terminology in various medical and surgical specialties. Prerequisite: HITT 1205 or HPRS 1206. Semester Hours 2 (2 lec)

HITT 2261 Clinical – Health Information/Medical Records Technology/Technician

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by clinical professional. Prerequisites: HITT 2260, 1441, 2343 with a minimum grade of C. Semester Hours 2 (8 clinical hours/week)

HITT 2339 Health Information Organization and Supervision

Covers principles of organization and supervision of human, fiscal, and capital resources. Prerequisites: HITT 1301, 1255, 1345, 1441 with a minimum grade of C. Corequisites: HITT 1353 and 2343. Semester Hours 3 (3 lec)

HITT 2343 Quality Assessment & Performance Improvement

Covers many facets of quality standards and methodologies in the health information management environment. Topics include licensing, accreditation, compilation and presentation of data in statistical formats, quality improvement functions, quality tools, utilization management, risk management, and medical staff data quality issues. Prerequisites: HITT 1301 and 1255 with a minimum grade of C. Semester Hours 3 (3 lec)

HITT 2346 Advanced Medical Coding

Explains ICD and CPT coding rules, conventions, and guidelines in complex case studies. Investigates government regulations and changes in health care reporting. Prerequisites: HITT 1441 and HITT 2435. Semester Hours 3 (2 lec/3 lab)

HITT 2435 Coding & Reimbursement Methodologies

Covers advanced coding techniques with emphasis on case studies, health records, and federal regulations regarding prospective payment systems and methods of reimbursement. Introduces the Common Procedure Coding system and provides practice in CPT coding using actual patient records and computer application. Prerequisite: HITT 1441 with a minimum grade of C. Semester Hours 4 (3 lec/3 lab)

MRMT 1307 Medical Transcription I

Fundamentals of medical transcription with hands-on experience in transcribing physician dictation including basic reports such as history and physicals, discharge summaries, consultations, operative reports, and other medical reports. Utilizes transcribing and information processing equipment compatible with industry standards. Designed to develop speed and accuracy. Prerequisites: ITSW 1301, HPRS 1206 with a minimum grade of C. Corequisite: ITSW 1301. Semester Hours 3 (2 lec/2 lab)

History**HIST 1301 History of the United States to 1877**

Surveys the growth of the United States beginning with an examination of Europe on the eve of colonization, the establishment of the American colonies, the struggle for independence, westward expansion, the strengthening of nationalism, the growing problem of sectionalism, the Civil War, and the post-war South. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

HIST 1302 History of the United States from 1877 to Present

Surveys the continued growth of the United States by examining the results of Reconstruction, the Industrial Revolution, the development of the United States as a world power, the problems of democracy and empire, the Great Depression, world war, the quest for economic security, world peace, and social improvement. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

HIST 2301 History of Texas

Surveys the military, political, social, economic, and multicultural development of Texas from Spanish colonial days through the periods of Mexican control, the Revolution, the Republic, and the Confederacy to the development of the modern urban state. Provides the option to substitute three hours of Texas history for three of the six hours of American History required by Texas statute for graduation from state colleges and universities. Semester Hours 3 (3 lec)

HIST 2321 World Civilization I

A survey of ancient and medieval history with emphasis on Asian, African and European cultures. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

HIST 2322 World Civilization II

Surveys the rise of modern Europe, the world, and the changes in Western and Eastern cultures resulting from expansion and conflict. Stresses changing political, social, and cultural scenes in Europe, Africa, Asia, and the Americas. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

HIST 2327 Mexican-American History I

Surveys the historical, economic, social, cultural, and political development of Mexican-Americans from Pre-Columbian societies to the Mexican-American War of 1846-1848. Gives attention to Pre-Columbian societies, Spanish colonization of North America, Mexican control over the region, borderlands development, immigration issues, and emerging social, political, cultural and economic issues of the Mexican-American population. May be applied to U.S. History requirement. Semester Hours 3 (3 lec)

HIST 2328 Mexican-American History II

Surveys the historical, economic, social, cultural, and political development of Mexican-Americans from the Mexican-American War of 1846-1848 to the present. Gives attention to the borderlands, migration/immigration, social, cultural, economic, political developments, and civil rights issues impacting the Mexican-American population in their efforts for inclusion into the American political system. May be applied to U.S. History requirement. Semester Hours 3 (3 lec)

HIST 2381 African-American History

Surveys the economic, social, and cultural development of African-Americans from the historical perspective. Considers the African-American experience and specific contributions of African-Americans to American culture. Semester Hours 3 (3 lec)

HIST 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of history. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

Humanities

HUMA 1301 Introduction to Humanities I

An interdisciplinary, multi-perspective assessment of cultural, political, philosophical and aesthetic factors critical to the formulation of values and the historical development of the individual and of society. Team-taught by faculty from diverse departments as a colloquium (academic seminar led by a different lecturer and on a different topic at each session). Works may include studies, journals, novels, poems, treatises, graphic novels, films, plays, paintings, musical compositions, etc. Prerequisite: Member of Honors College/Presidential Scholars or permission of instructor. Semester Hours 3 (3 lec)

HUMA 1302 Introduction to Humanities II

An interdisciplinary, multi-perspective assessment of cultural, political, philosophical and aesthetic factors critical to the formulation of values and the historical development of the individual and of society. Team-taught by faculty from diverse departments as a colloquium (academic seminar led by a different lecturer and on a different topic at each session). Works may include studies, journals, novels, poems, treatises, graphic novels, films, plays, paintings, musical compositions, etc. Prerequisite: Member of Honors College/Presidential Scholars or permission of instructor. Semester Hours 3 (3 lec)

HUMA 2319 American Multicultural Studies

Surveys through varied texts the historical, economic, political, literary, and social development of various cultural groups of the United States. Specific course descriptions, which may change from semester to semester, are available each semester prior to registration. May be repeated for credit when different topics are covered. Prerequisites: Must have passed the reading section of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

Interpreter Training

SGNL 1401 Beginning ASL I

Introduction to American Sign Language (ASL) covering fingerspelling, vocabulary, and basic sentence structure in preparing individuals to interpret oral speech for the hearing impaired. An

introduction to the basic skills in production and comprehension of ASL. Includes the manual alphabet and numbers. Develops conversational ability, culturally appropriate behaviors, and exposes students to ASL grammar. Semester Hours 4 (3 lec/2 lab)

SGNL 1402 Beginning ASL II (Capstone)

Continues the development of beginning communication skills in American Sign Language (ASL). Covers fingerspelling vocabulary and basic sentence structure and grammatical features of ASL. Develops receptive and expressive ability and allows recognition and demonstration of more sophisticated grammatical features of ASL. Increases fluency and accuracy in fingerspelling and numbers. Provides opportunities for interaction within the deaf community. This course is the Capstone course for the Studies in Deafness Certificate. Prerequisite: SGNL 1401 with a minimum grade of C or consent of the program director. Semester Hours 4 (3 lec/2 lab)

SGNL 2301 Intermediate ASL I

Integrates and refines expressive and receptive skills in American Sign Language (ASL), including recognition of sociolinguistic variation. A practice-oriented approach to language acquisition, including the use of multimedia. Review and application of conversational skills in American Sign Language; preparation for interpreting from signing to voice as well as from voice to signing. Introduction to American Sign Language literature and folklore. Prerequisite: SGNL 1402 with a minimum grade of C or consent of the program director. Semester Hours 3 (3 lec)

SGNL 2302 Intermediate ASL II

Continues Intermediate American Sign Language I. Review and application of conversational skills in American Sign Language; interpreting from signing to voice as well as from voice to signing. Introduction to American Sign Language literature and folklore. An integration of expressive and receptive skills with emphasis on literature, discourse styles, and contextualization at an intermediate level. Provides students with information on colloquial usages for signs and grammatical structures for complex sentences. Prerequisite: SGNL 2301 with a minimum grade of C or consent of the program director. Semester Hours 3 (3 lec)

SLNG 1211 Fingerspelling and Numbers

Develops expressive and receptive fingerspelling skills. Receptive skills focus on whole word and phrase recognition and fingerspelling/numbering comprehension in context. Expressive skills focus on the development of speed, clarity, and fluency. Prerequisite: SGNL 1401 with a minimum grade of C or consent of program director. Semester Hours 2 (1 lec/2 lab)

SLNG 1315 Visual/Gestural Communication

A course in the development of skills in non-verbal communications. Emphasizes the use and understanding of facial expression, gestures, pantomime, and body language. Create and

perform stories using these elements. Prerequisite: SGNL 1401 with a minimum grade of C.
Semester Hours 3 (3 lec/1 lab)

SLNG 1317 Introduction to Deaf Community

An overview of the physical, educational, social, and cultural implications within the context of a deaf or hard-of-hearing individual's personal life, family, and community in today's multicultural world. Emphasis on current educational and vocational programs, legislation, technology, oppression, and other issues. Semester Hours 3 (3 lec)

SLNG 1321 Introduction to the Interpreting Profession

An overview of the field of American Sign Language (ASL)/English interpretation. Provides a historical framework for the principles, ethics, roles, responsibilities, and standard practices of the interpreting profession. Semester Hours 3 (3 lec)

SLNG 1347 Deaf Culture

Provides a historical and contemporary perspective of American deaf culture using a sociocultural model. Includes cultural identity and awareness, values, group norms, communication, language, and significant contributions made by deaf people to the world. Prerequisite: SLNG 1317 with a minimum grade of C. Semester Hours 3 (3 lec)

SLNG 1391 Special Topics in Sign Language Interpreting

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Approval of the program director is required. Semester Hours 3 (2 lec/2 lab)

SLNG 2401 Interpreting I

An overview of the interpreting process and models of interpretation. Introduces the skills necessary to achieve message equivalency in interpreting American Sign Language (ASL) to English and English to ASL. Prerequisite: SGNL 1402 and SLNG 1321 with a minimum grade of C or better or consent of program director. Semester Hours 4 (3 lec/2 lab)

SLNG 2402 Interpreting II

Enhancement of interpreting skills and discourse analysis to increasingly complex tasks utilizing consecutive and interactive interpreting experiences including multimedia materials. Emphasis on skill analysis and peer evaluation. Prerequisite: SLNG 2401 with a minimum grade of C or consent of the program director. Semester Hours 4 (3 lec/2 lab)

SLNG 2488 Internship – Sign Language Interpreter (Capstone)

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. This course may be repeated if topics and learning

outcomes vary. This course serves as the Capstone experience for A.A.S. degree students.
Corequisite: SLNG 2402. Semester Hours 4 (1 lec/15 lab)

Long-Term Care Administration

LTCA 1311 Introduction to Long Term Care Administration

An overview of the long-term care industry. Includes a survey of the history and philosophy of long-term care administration. Provides an introduction to regulatory standards. Semester Hours 3 (3 lec)

LTCA 1312 Resident Care in the Long Term Care Facility (Capstone)

A study of the delivery of services to residents of long-term care facilities, including ethical considerations and quality of life issues. This course serves as the Capstone experience for certificate students. Semester Hours 3 (3 lec)

LTCA 1313 Organization & Management of Long Term Care Facilities

An overview of the functional organizational structures common to long-term health care facilities. Includes an examination of the role of the administrator in the organization and management of long-term care facilities. Semester Hours 3 (3 lec)

LTCA 2314 Long Term Care Law

A study of federal, state, and local statutes and regulations affecting the long-term care industry. Semester Hours 3 (3 lec)

LTCA 2315 Financial Management of a Long Term Care Facility

A study of the techniques used in the financial management of the long-term care facility, including special accounting requirements of Medicare, Medicaid and other third-party payment systems. Also covers strategies to promote financial sustainability. Semester Hours 3 (3 lec)

LTCA 2489 Internship – Hospital/Health Facilities Administration

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. The internship must take place in an approved nursing facility under the supervision of a licensed and approved nursing facility administrator. Taken three times, this course meets the field experience prerequisite for licensing as a nursing facility administrator in Texas. Semester Hours 4 (1 lec/20 lab)

LTCA 2689 Internship – Hospital/Health Facilities Administration

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. The internship must take place in an approved nursing facility under the supervision of a licensed and approved nursing facility administrator. Taken two times, this course meets the field experience prerequisite for licensing as a nursing facility administrator in Texas. Semester Hours 6 (1 lec/31 lab)

Mathematics

Developmental Mathematics

MATH 0100 Basic Concepts in Arithmetic

A computer-based laboratory course that includes instruction in operations with whole numbers, fractions, and mixed numbers; rounding; order of operations; solving simple equations; and basic applications of all these concepts. Semester Hours 1 (1 lab)

MATH 0101 Basic Applications of Arithmetic

A computer-based laboratory course in which arithmetic operations are reviewed and that includes instruction in converting decimals, fractions, and percents; applications of decimals, proportions, and percentages; and concepts of mean, median, and mode. Prerequisite: MATH 0100. Semester Hours 1 (1 lab)

Credit for the following 3-course sequence: MATH 0102, MATH 0103 and MATH 0104 can be substituted for MATH 0301.

MATH 0102 Pre-algebra I

The first course in a 3-course sequence. Introduces algebraic concepts throughout the study of whole numbers and integers. Students will complete tutorials and exercises using a designated computer program. Prerequisite: MATH 0300, or THEA math score of 161-189 or equivalent score on approved alternative test, or consent of the division chair. Semester Hours 1 (1 lab)

MATH 0103 Pre-algebra II

The second course in a 3-course sequence. Reviews final topics covered in MATH 0102 and introduces algebraic concepts through the study of integers, fractions, and decimals. Students will complete tutorials and exercises using a designated computer program. Prerequisite: MATH 0102. Semester Hours 1 (1 lab)

MATH 0104 Pre-algebra III

The third course in a 3-course sequence. Reviews the solving of linear equations involving all sets of rational numbers, with emphasis placed on their applications to geometric formulas, ratios, percents, proportions, unit conversion, and basic data analysis. Students will complete tutorials and exercises using a designated computer program. Prerequisite: MATH 0103. Semester Hours 1 (1 lab)

Credit for the following 3-course sequence: MATH 0105, MATH 0106 and MATH 0107 can be substituted for MATH 0307.

MATH 0105 Beginning Algebra I

The first course in a 3-course sequence. Includes the study of operations with real numbers and variables, algebraic expressions, solving linear equations, applications of linear equations, and linear inequalities. Students will complete tutorials and exercises using a designed computer program. Prerequisite: MATH 0301, or THEA math score of 190-229 or equivalent score on approved alternative test, or consent of division chair. Semester Hours 1 (1 lab)

MATH 0106 Beginning Algebra II

The second course in a 3-course sequence. Includes the study of graphing linear equations, an introduction to functions, and solving systems of linear equations by various methods. Students will complete tutorials and exercises using a designated computer program. Prerequisite: Math 0105. Semester Hours 1 (1 lab)

MATH 0107 Beginning Algebra III

The third course in a 3-course sequence. Includes the study of laws of exponents, operations with polynomials, and factoring techniques. Students will complete tutorials and exercises using a designated computer program. Prerequisite: MATH 0106. Semester Hours 1 (1 lab)

MATH 0300 Basic Mathematics

Presents a study of arithmetic operations over fractions and decimals. Emphasizes percent, ratio, proportion, geometry and conversion of units of measure. Semester Hours 3 (3 lec)

MATH 0301 Pre-algebra

Introduces signed numbers, algebraic expressions, and linear equations. Course topics include solving equations involving rational numbers, ratios and proportions, unit conversion, elementary geometry, and elementary statistics. Prerequisite: Math 0300 or THEA math score

of 161-189 or equivalent score on approved alternative test, or consent of division chair.
Semester Hours 3 (3 lec)

MATH 0307 Elementary Algebra

A course designed for students who have successfully completed MATH 0301 or the equivalent or who have not completed an algebra course within the past three years. Course topics include: solution of linear equations and inequalities, graphing of points and lines in a rectangular coordinate system, introduction to functions, solving systems of linear equations, laws of exponents, operations and factoring of polynomials, and real-world applications of these concepts. Corequisite: READ 0302. Prerequisite: MATH 0301 or THEA math score of 190-229 or equivalent score on approved alternative test, or consent of division chair. Semester Hours 3 (3 lec)

MATH 0311 Intermediate Algebra

Provides further study of algebraic concepts, operations, and applications to real world problems. Additional topics may include factoring polynomials and solving equations with quadratic models, operations with rational expressions and solutions of rational equations, further investigation of linear functions and linear inequalities, operations with radical expressions and solutions of radical equations, various solution methods for quadratic equations, graphing quadratic functions, and graphing systems of linear inequalities. Corequisite: READ 0302. Prerequisite: MATH 0307 or THEA math score between 230-269 or equivalent score on approved alternative test, or consent of division chair. Semester Hours 3 (3 lec)

College-Level Mathematics

MATH 1314 College Algebra

Provides a study of algebraic concepts that may include: linear, quadratic, polynomial, exponential, logarithmic, and rational functions, their graphs, and applications in mathematical modeling; composition and inverses of functions, systems of linear equations and inequalities; matrices and determinants; and sequences and series. Problem solving with algebraic applications relevant to today's world is emphasized. Graphing calculator required. Prerequisite: MATH 0311 or THEA math score of 270 or higher or equivalent score on approved alternative test, or consent of division chair. Semester Hours 3 (3 lec)

MATH 1316 Trigonometry

Provides a study of trigonometric functions and their graphs, trigonometric identities and equations, solutions of triangles, complex numbers, polar coordinates, vectors, analytic geometry, and applications of each. Graphing calculator required. Prerequisite: MATH 1314 or high school precalculus, or consent of division chair. Semester Hours 3 (3 lec)

MATH 1324 Mathematics for Business and Economic Analysis I

Demonstrates the application of these and other mathematical concepts to the solution of various business, economics, and other real-world problems: systems of linear equations and inequalities, matrices, linear programming, mathematics of finance, set theory, introductory probability and statistics, and nonlinear functions. Introduction to limits. Graphing calculator required. Prerequisite: MATH 0311 or THEA math score of 270 or higher or equivalent score on approved alternative test, or consent of division chair. Semester Hours 3 (3 lec)

MATH 1325 Mathematics for Business and Economic Analysis II

Presents the study of limits and their applications in differential and integral calculus, emphasizing both conceptual and applied mathematics. Topics may include optimization of functions, curve sketching, definite and indefinite integrals, differential equations, partial derivatives, Lagrange multipliers, and continuous probability models. Graphing calculator required. Prerequisite: MATH 1314 or 1324 or consent of division chair. Semester Hours 3 (3 lec)

MATH 1332 Contemporary Liberal Arts Mathematics

Emphasizes critical thinking and problem-solving skills. Topics may include set theory, logic, number systems, number theory, functions, introductory probability and statistics, and the application of these concepts to real-world problems. Graphing calculator required. Prerequisite: MATH 0307 or THEA math score of 230 or higher, or consent of the division chair. Semester Hours 3 (3 lec)

MATH 1342 Introduction to Statistics

Provides a study of statistical description of frequency distributions; sampling; elementary principles of probability distributions, both binomial and normal; estimation of parameters; tests of hypotheses; linear regression and correlation; independence of variables by Chi Square analysis; and an introduction to a statistics software package. Laboratory is Internet-based. Graphing calculator required. Prerequisite: MATH 0311 or credit for a college-level math course other than MATH 1332 or THEA math score of 270 or higher or equivalent score on approved alternative test, or consent of the division chair. Semester Hours 3 (3 lec)

MATH 1350 Fundamentals of Mathematics I

The first of a two-semester sequence of courses designed for those planning to teach in elementary or middle school or complete the A.A.T. degree, this course emphasizes mathematical reasoning and writing. Topics include small- and large-group problem solving, sets, number systems, number theory, operations, arithmetic, place value and bases, fractions, and decimals. Prerequisite: MATH 1314 or consent of the division chair. Semester Hours 3 (3 lec)

MATH 1351 Fundamentals of Mathematics II

An exploration of geometry, measurement, probability, and statistics with an emphasis on problem solving and critical thinking. Prerequisite: MATH 1350. Semester Hours 3 (3 lec)

MATH 2305 Discrete Math

A course designed to prepare math, computer science, and engineering majors for a background in abstraction, notation, and critical thinking for the mathematics most directly related to computer science. Topics include: logic, relations, functions, basic set theory, countability and counting arguments, proof techniques, mathematical induction, combinatorics, discrete probability, recursion, sequence and recurrence, elementary number theory, graph

theory, and mathematical proof techniques. Prerequisite: MATH 2413 with a grade of C or better. Semester Hours 3 (3 lec)

MATH 2318 Linear Algebra

Introduces and provides models for application of the concepts of vector algebra. Topics include finite dimensional vector spaces, systems of linear equations, matrices, determinants, linear transformations, quadratic forms, and eigenvalues and eigenvectors. Graphing calculator required. Pre- or Corequisite: MATH 2414 or consent of division chair. Semester Hours 3 (3 lec)

MATH 2320 Differential Equations

Ordinary differential equations, including linear equations, systems of equations, equations with variable coefficients, existence and uniqueness of solutions, series solutions, singular points, transform methods, and boundary value problems; applications of differential equations to real-world problems. Graphing calculator required. Pre- or Corequisite: MATH 2415 or consent of division chair. Semester Hours 3 (3 lec)

MATH 2412 Precalculus Mathematics

Provides a thorough treatment of the functions necessary to adequately prepare students for the calculus sequence. Topics include polynomial and rational functions, exponential and logarithmic functions, trigonometric functions, conic sections, polar coordinates and vectors, matrices and determinants, sequences and series, and introduction to limits. Graphing calculator required. Prerequisite: High school credit for precalculus mathematics or MATH 1314 or consent of division chair. Semester Hours 4 (4 lec)

MATH 2413 Calculus I

Examines the concept of limit and its relationship to differential and integral calculus. Introduces the student to topics that may include differentiation of algebraic and trigonometric functions, optimization, differentials, antiderivatives, definite integrals, numerical integration, and their applications to problem solving. Graphing calculator required. Prerequisite: MATH 2412 or both MATH 1314 and MATH 1316, or consent of division chair. Semester Hours 4 (4 lec)

MATH 2414 Calculus II

Building on the Calculus I background, additional differentiation and integration techniques and more advanced applications of the definite integral are presented. Other topics are introduced and their applications investigated, including improper integrals, parametric equations, polar coordinates, and infinite sequences and series. Graphing calculator required. Prerequisite: MATH 2413 with a minimum grade of C or consent of division chair. Semester Hours 4 (4 lec)

MATH 2415 Calculus III

Advanced topics in calculus, including vectors and vector-valued functions, partial differentiation, Lagrange multipliers, multiple integrals, and Jacobians; application of the line integral, including Green's Theorem, the Divergence Theorem, and Stokes' Theorem. Graphing

calculator required. Prerequisite: MATH 2414 with a minimum grade of C or consent of division chair. Semester Hours 4 (4 lec)

Medical Laboratory Technician

MLAB 1160 Clinical – Clinical/Medical Laboratory Technician: Phlebotomy

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in phlebotomy. Co/Prerequisites: PLAB 1223 and approval by the program director. Semester Hours 1 (3 clinical hours/week)

MLAB 1161 Clinical – Clinical/Medical Laboratory Technician: Coagulation

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in coagulation. Co/Prerequisites: MLAB 1227, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 1 (3 clinical hours/week)

MLAB 1162 Clinical – Clinical/Medical Laboratory Technician: Immunology/Serology

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in immunology/serology. Co/Prerequisites: MLAB 1235, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 1 (3 clinical hours/week)

MLAB 1163 Clinical – Clinical/Medical Laboratory Technician: Urinalysis and Body Fluids

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in urinalysis and body fluids. Co/Prerequisites: MLAB 1211, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 1 (3 clinical hours/week)

MLAB 1191 Special Topics in Medical Laboratory Technology (Capstone)

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Includes a comprehensive certification-type examination that serves as a Capstone experience to assess student achievement of entry-level competencies required by the profession and the workplace. This course is to be taken the last semester before graduation. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 1 (1 lec)

MLAB 1211 Urinalysis and Body Fluids

Introduces urinalysis and body fluid analysis, including the anatomy and physiology of the kidney and physical, chemical and microscopic examination of urine, cerebrospinal fluid and other body fluids. Utilizes a student laboratory for experiences in basic urinalysis and body fluids analysis. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (1 lec/2 lab)

MLAB 1227 Coagulation

Teaches coagulation theory, procedures, and practical applications. Includes laboratory exercises that rely on commonly performed manual and semiautomated methods. Utilizes a student laboratory for experiences in basic coagulation procedures. Prerequisites: MLAB 1415, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (1 lec/2 lab)

MLAB 1231 Parasitology/Mycology

Covers taxonomy, morphology, and pathogenesis of human parasites and fungi, including the practical application of laboratory procedures. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (2 lec)

MLAB 1235 Immunology/Serology

Introduces to the theory and application of basic immunology, including the immune response, principles of antigen-antibody reactions, and the principles of serological procedures. Utilizes a student laboratory for experiences in basic immunology/serology procedures. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (1 lec/2 lab)

MLAB 1261 Clinical – Clinical/Medical Laboratory Technician/Assistant: Hematology

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in hematology. Co/Prerequisites: MLAB 1415, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (6 clinical hours/week)

MLAB 1262 Clinical – Clinical/Medical Laboratory Technician/Assistant: Immunochemistry

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in immunochemistry. Co/Prerequisites: MLAB 2431, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 2 (6 clinical hours/week)

MLAB 1360 Clinical – Clinical/Medical Laboratory Technician/Assistant: Microbiology, Parasitology, Mycology, and Virology

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in microbiology, parasitology, mycology, and virology.

Co/Prerequisites: MLAB 2434, MLAB 1231, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 3 (9 clinical hours/week)

MLAB 1361 Clinical – Clinical/Medical Laboratory Technician/Assistant: Clinical Chemistry

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in clinical chemistry. Co/Prerequisites: MLAB 2401, admission to the Medical Laboratory Technician Program and approval by the program director.

Semester Hours 3 (9 clinical hours/week)

MLAB 1415 Hematology

Introduces the theory and practical application of routine and special hematology procedures, both manual and automated; red blood cells and white blood cell maturation sequences; and normal and abnormal morphology and associated diseases. Utilizes a student laboratory for experiences in basic hematology procedures. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 4 (2 lec/4 lab)

MLAB 2431 Immunoematology

Studies blood antigens and antibodies. Performance of routine blood banking procedures, including blood group and Rh typing, antibody screens, antibody identification, cross matching, elution, and absorption techniques. Utilizes a student laboratory for experiences in basic immunoematology procedures. Prerequisites: MLAB 1235, admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 4 (2 lec/4 lab)

MLAB 2401 Chemistry

Introduces to the principles and procedures of various tests performed in clinical chemistry. Presents the physiological basis for the test, the principle and procedures for the test, and the clinical significance of the test results, including quality control and normal values. Also includes basic chemical laboratory techniques, chemical laboratory safety, electrolytes and acid-base balance, proteins, carbohydrates, lipids, enzymes, metabolites, endocrine function, and toxicology. Utilizes a student laboratory for experiences in basic clinical chemistry procedures. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 4 (3 lec/3 lab)

MLAB 2434 Microbiology

Instruction in the theory, practical application, and pathogenesis of clinical microbiology, including collection, setup, identification, susceptibility testing, and reporting procedures. Utilizes a student laboratory for experiences in basic microbiology. Prerequisites: Admission to the Medical Laboratory Technician Program and approval by the program director. Semester Hours 4 (3 lec/3 lab)

PLAB 1160 Clinical – Phlebotomy/Phlebotomy Technician

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical laboratory professional. Provides clinical training in phlebotomy. Co/Prerequisites: PLAB 1223 and approval by the program director. Semester Hours 1 (5 clinical hours/week)

PLAB 1223 Phlebotomy

Develops skills in the performance of a variety of blood collection methods using proper techniques and standard precautions. Includes vacuum collections devices, syringes, capillary

skin punctures, butterfly needles and blood culture, and specimen collection on adults, children, and infants. Emphasis is on infection prevention, proper patient identification, labeling of specimens and quality assurance, specimen handling, processing and accessioning. Topics include professionalism, ethics, and medical terminology. Utilizes a student laboratory for experiences in basic phlebotomy procedures. Prerequisites: Admission to the college and approval by the program director. Semester Hours 2 (1 lec/2 lab)

Mental Health

CMSW 1309 Problems of Children and Adolescents

Examination of common problems and evaluation of effective intervention models of at-risk children and youth. Topics include social, family, educational systems impact, juvenile delinquency, teen sexuality and addictive behaviors. Semester Hours 3 (3 lec)

CMSW 1323 The Exceptional Person

Study of physical, intellectual, and learning disabilities, sensory deficits, and the exceptionally gifted individual. Semester Hours 3 (3 lec)

CMSW 1327 Treatment Modalities with Special Populations

Introduces the most commonly used and accepted treatment methods in the mental health and mental retardation field. Explores the role of the social service worker and treatment modalities utilized in the outpatient, inpatient, and day treatment areas as they apply to different special populations. Semester Hours 3 (3 lec)

CMSW 1341 Behavior Modification and Cognitive Disorder

In-depth study of the theories and principles of behavioral science and the methods of modifying and controlling behavior in clients with cognitive disorders. Semester Hours 3 (3 lec)

CMSW 1371 Interpersonal Relations in a Care Giving Environment

Practical application of the principles and concepts of the behavioral sciences to interpersonal relationships in the care giving environment. Emphasis is placed on methods and techniques to address issues among supervisors, peers, and/or clients. Semester Hours 3 (3 lab)

CMSW 1391 Special Topics in Clinical and Medical Social Work

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 3 (2 lec/4 lab)

DAAC 1304 Pharmacology of Addiction

Emphasizes pharmacological effects of addiction, tolerance, dependence, cross addiction, drug interaction, withdrawal and recovery. Describes the psychological and physiological effects of substance use and behaviors. Semester Hours 3 (3 lec)

DAAC 1309 Assessment Skills of Alcohol and Other Drug Addictions

Exploration of procedures and tools used to identify and assess a client's problems, strengths, deficits and needs. Prerequisite: DAAC 1319 with a minimum grade of C. Semester Hours 3 (3 lec)

DAAC 1311 Counseling Theories

An examination of the major theories and current treatment modalities used in the field of counseling. Semester Hours 3 (3 lec)

DAAC 1317 Basic Counseling Skills

An overview of basic counseling skills. Semester Hours 3 (3 lec)

DAAC 1319 Introduction to Alcohol and Other Drug Addictions

An overview of causes and consequences of addiction the major drug classifications and the counselor's code of ethics. Semester Hours 3 (3 lec)

DAAC 2266 Practicum – Drug/Alcohol Abuse Counseling (Capstone)

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid learning experience. This course serves as the Capstone for the Counselor Intern Education Preparation Certificate Program. Semester Hours 2 (1 lec/18 lab)

DAAC 2307 Addicted Family Intervention

Examination of family systems, focusing on the effects of addition and recovery. Semester Hours 3 (3 lec)

DAAC 2343 Current Issues

Examination of current issues in addiction. Semester Hours 3 (3 lec)

DAAC 2354 Dynamics of Group Counseling

Exploration of group counseling skills and techniques, stages of group development, confidentiality and ethics. Semester Hours 3 (3 lec)

EDTC 1325 Multicultural Education

An examination of cultural diversity found in society and reflected in the classroom. Topics include the study of major cultures and their influence on lifestyle, behavior, learning intercultural communication and teaching, as well as psychosocial stressors encountered by diverse cultural groups. Semester Hours 3 (3 lec)

GERS 1301 Introduction to Gerontology

Overview of the social, psychological, and biological changes that accompany aging, and the implications of these changes for the individual, as well as for the larger society. Semester Hours 3 (3 lec)

PMHS 1166 Practicum – Psychiatric/Mental Health Services Technician

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Semester Hours 1 (1 lec/9 lab)

PMHS 1191 Special Topics in Psychiatric/Mental Health Services Technician

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec)

PMHS 1267 Practicum – Psychiatric/Mental Health Services Technician (Capstone)

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Semester Hours 1 (2 lec/14 lab)

PMHS 1467 Practicum – Psychiatric/Mental Health Services Technician

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Semester Hours 4 (1 lec/30 lab hours)

PMHS 2266 Practicum – Psychiatric/Mental Health Services Technician (Capstone)

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. This course serves as the Capstone for all Mental Health certificate programs. Semester Hours 2 (1 lec/14 clinical)

PMHS 2467 Practicum – Psychiatric/Mental Health Services Technician

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. This may be a paid or unpaid experience. This course may be repeated if topics and learning outcomes vary. Semester Hours 4 (1 lec/30 lab hours)

PSYT 2331 Abnormal Psychology

Examination and assessment of the symptoms, etiology, and treatment of procedures of mental, emotional, and behavioral disorders. Semester Hours 3 (3 lec)

SCWK 1321 Orientation to Social Services

Introduction to the basic concepts, information, and practices within the field of social services. Topics include the historical development of social services, populations served by social service workers, and review of current treatment and/or services. Semester Hours 3 (3 lec)

Military Science

Qualified MCC students are able to take the first two levels of Military Science of a four-year Army ROTC program at MCC. This includes MILS 1101 and 1102 – Introduction to Leadership and MILS 2201 and 2202 – Basic Leadership plus the associated labs. The Army ROTC classes are conducted at Baylor University. Students register at MCC, pay MCC tuition, and receive MCC credit for the classes. The third and fourth years of the program (referred to as the Advanced Course) may be completed at any one of 279 four-year college campuses around the country. Tarleton State University's Waco campus offers the Advanced Course classes through Baylor University.

For more information, write to the Military Science Department, One Bear Place #97179 Baylor University, Waco, TX 76798-7179; visit the Military Science Department located at 1111 S. Seventh St., Waco; call 254-710-3133/3134 or e-mail tim_childress@baylor.edu.

MILS 1101 Introduction to Leadership I

This is a freshman-level course to orient new students to the ROTC, Army's customs and courtesies, develop skills in physical fitness and small unit leadership. Students are introduced to the U.S. Army and what it requires to be an Army officer. Students will learn about officership, values and ethics, leadership, personal development, physical well being, military rank structure and the basic organizational structure of the U.S. Army and its branches. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 1111. Semester Hours 1 (3 lec)

MILS 1102 Introduction to Leadership II

This is a freshman-level course to orient new students to the ROTC, Army's customs and courtesies, develop skills in physical fitness and small unit leadership. Students are introduced to the U.S. Army and what it requires to be an Army officer. Students will learn about officership, values and ethics, leadership, personal development, physical well being, military rank structure and the basic organizational structure of the U.S. Army and its branches. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 1112. Semester Hours 1 (3 lec)

MILS 1111 Introduction to Leadership Lab I

This course allows experiential learning for MILS 1100 Cadets to master intro-level skills and concepts. It facilitates the development of leadership skills and physical fitness while giving practical experience in selected military skills. Areas of emphasis include drill and ceremonies, squad-level tactics, physical fitness, swimming, and land navigation. A weekend field training exercise and weekly physical fitness training are included. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 1101. Semester Hours 1 (3 lab)

MILS 1112 Introduction to Leadership Lab II

This course allows experiential learning for MILS 1100 Cadets to master intro-level skills and concepts. It facilitates the development of leadership skills and physical fitness while giving practical experience in selected military skills. Areas of emphasis include drill and ceremonies, squad-level tactics, physical fitness, swimming, and land navigation. A weekend field training exercise and weekly physical fitness training are included. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 1102. Semester Hours 1 (3 lab)

MILS 2111 Basic Leadership Lab I

This course allows experiential learning for MILS 2100 Cadets to master basic level skills and concepts. It facilitates the development of leadership skills and physical fitness while giving practical experience in selected military skills. Areas of emphasis include drill and ceremonies, squad-level tactics, physical fitness, swimming, and land navigation. A weekend field training exercise and weekly physical fitness training are included. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 2201. Semester Hours 1 (3 lab)

MILS 2112 Basic Leadership Lab II

This course allows experiential learning for MILS 2100 Cadets to master basic level skills and concepts. It facilitates the development of leadership skills and physical fitness while giving practical experience in selected military skills. Areas of emphasis include drill and ceremonies, squad-level tactics, physical fitness, swimming, and land navigation. A weekend field training exercise and weekly physical fitness training are included. Prerequisites: Permission of the instructor and concurrent enrollment in MILS 2202. Semester Hours 1 (3 lab)

MILS 2201 Basic Leadership I

This is a sophomore-level course intended to be a bridge between MILS I and MILS III where cadets are all contracted and are preparing for the Leadership Development and Assessment Course (LDAC). Students will learn to give presentations to improve their oral communication skills and will be required to prepare and present one (1) ten-minute briefing focusing on at least one of the Army Values (Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal Courage). Students must research and develop their briefings based on factual military event/operation/situation, etc. that illustrate the value(s). The curriculum involves understanding how to build teams, how to influence, communicate orally and give a briefing or presentation to a group, make sound and timely decisions, engage in creative problem solving, and effectively plan and organize cadet events. The curriculum is, for the most part, a “hands-on” experience. There are several graded tests on various subjects throughout the semester. Prerequisites: Successful completion of MILS 1101 or 4 years of Junior ROTC or successful prior military service and concurrent enrollment in MILS 2111. Semester Hours 2 (2 lec)

MILS 2202 Basic Leadership II

This is a sophomore-level course intended to be a bridge between MILS I and MILS III where cadets are all contracted and are preparing for the Leadership Development and Assessment Course (LDAC). Students will learn to give presentations to improve their oral communication skills and will be required to prepare and present one (1) ten minute briefing focusing on at least one of the Army Values (Loyalty, Duty, Respect, Selfless Service, Honor, Integrity, and Personal Courage). Students must research and develop their briefings based on factual military event/operation/situation, etc. that illustrate the value(s). The curriculum involves understanding how to build teams, how to influence, communicate orally and give a briefing or presentation to a group, make sound and timely decisions, engage in creative problem solving, and effectively plan and organize cadet events. The curriculum is, for the most part, a “hands-on” experience. There are several graded tests on various subjects throughout the semester. Prerequisites: Successful completion of MILS 1102 or 4 years of Junior ROTC or successful prior military service and concurrent enrollment in MILS 2112. Semester Hours 2 (2 lec)

Music (See also Commercial Music)**Private Music Lessons**

Available to non-majors as well as music majors who wish to study a secondary applied emphasis. Involves one half-hour private lesson per week and five practice hours per week. May be repeated for credit. Corequisite: MUEN 1121 or MUEN 1141. Semester Hours 1 (1 lab)

Violin	MUAP 1102	Trombone	MUAP 1145
Viola	MUAP 1105	Baritone Horn/Euphonium	MUAP 1149
Flute	MUAP 1118	Tuba	MUAP 1153
Oboe	MUAP 1122	Percussion	MUAP 1157
Bassoon	MUAP 1125	Guitar	MUAP 1161
Clarinet	MUAP 1129	Organ	MUAP 1165
Saxophone	MUAP 1136	Piano	MUAP 1169
Trumpet	MUAP 1137	Voice	MUAP 1182
French Horn	MUAP 1142	Harpsichord	MUAP 1187

Private Music Lessons

Required of all music majors, but also available to non-majors. The student shall have had prior experience in the major instrument or voice or have permission from the instructor. One-hour lesson per week. May be repeated for credit. Corequisite: MUEN 1121 or MUEN 1141.

Semester Hours 2 (2 lab)

Violin	MUAP 1202	Trombone	MUAP 1245
Viola	MUAP 1205	Baritone Horn/Euphonium	MUAP 1249
Flute	MUAP 1217	Tuba	MUAP 1253
Oboe	MUAP 1222	Percussion	MUAP 1257
Bassoon	MUAP 1225	Guitar	MUAP 1261
Clarinet	MUAP 1229	Organ	MUAP 1265
Saxophone	MUAP 1233	Piano	MUAP 1269
Trumpet	MUAP 1237	Voice	MUAP 1281
French Horn	MUAP 1242	Harpsichord	MUAP 1287

Ensemble

Provides the opportunity for the study and performance of music in small ensembles. These courses are open to all students but are strongly recommended for all music majors and minors in their area of primary emphasis.

Brass	MUEN 1131	Guitar	MUEN 1134
Percussion	MUEN 1132	Voice	MUEN 1151
Woodwind	MUEN 1133		

Each section may be repeated for credit. Semester Hours 1 (1 lec/2 lab)

Musical Theatre Workshop

Provides musical theatre experience by singing or playing in a pit orchestra in a musical production. Each section may be repeated for credit. Semester Hours 1 (MUEN 1152 4 lab; MUEN 1140 5 lab)

Voice	MUEN 1152	Pit Orchestra	MUEN 1140
-------	-----------	---------------	-----------

MUEN 1121 Wind Ensemble

Provides an ensemble open to all students who play a band instrument. Enrollment in brass, percussion or woodwind ensemble (MUSI 1131, 1132, 1133) strongly recommended. Average of four rehearsal-performance hours per week. May be repeated for credit. Semester Hours 1 (3 lec/3 lab)

MUEN 1122 Stage Band

Offers an opportunity for students who are interested in playing stage band music. Three rehearsal performance hours per week. May be repeated for credit. Semester Hours 1 (3 lab)

MUEN 1130 Community Band

Provides a performance ensemble for members of the community who play a band instrument. Prerequisites: Audition and/or permission of the instructor. Semester Hours 1 (3 lab)

MUEN 1141 Chorale

Provides an opportunity for interested students to sing. Required for all vocal emphasis majors and minors. Average of four rehearsal-performance hours per week. May be repeated for credit. Semester Hours 1 (3 lec/3 lab)

MUSI 1116 Sight-Singing and Ear-Training I

Includes sight-singing and dictation of intervals and simple melodies in various clefs and modes, study of commonly used meters, rhythmic patterns, and harmonic progressions of primary chords. Must be taken concurrently with MUSI 1311. Semester Hours 1 (1 lec/2 lab)

MUSI 1117 Sight-Singing and Ear-Training II

Continues MUSI 1116. Includes sight-singing of more complex melodies and rhythmic patterns and harmonic progressions of all diatonic chords. Must be taken concurrently with MUSI 1312. Prerequisite: MUSI 1116. Semester Hours 1 (1 lec/2 lab)

MUSI 1158 Opera Workshop

Presents opera music, libretti, and characterization and motivational staging through the performance of an opera or opera scenes. Recommended for all music vocal majors and minors, but open to all students with consent of instructor. Concurrent enrollment in DRAM 1162 is recommended but not required. May be repeated for credit. Semester Hours 1 (3 lec/lab)

MUSI 1160 Italian Diction

Presents the phonetic sounds of the Italian language, the principles of which will be applied to required vocal repertoire for transfer music majors. Required for voice majors, but open to all students with consent of instructor. Semester Hours 1 (2 lec)

MUSI 1161 English Diction

Presents the phonetic sounds of the English language as used in English or American art songs. These principles will be applied to required repertoire of vocal music majors. Course is required for voice majors but open to all students with instructor approval. Semester Hours 1 (2 lec)

MUSI 1181 Class Piano – Level I

The study of piano as a group in a classroom equipped with individual keyboards. Introduction to the piano keyboard with emphasis on reading music, major scales, and simple harmonizations. This course is required for transfer music majors and commercial music majors and is open to non-music majors. Semester Hours 1 (1 lec/2 lab)

MUSI 1182 Class Piano – Level II

The study of piano as a group in a classroom equipped with individual keyboards. Continuation of MUSI 1181. Emphasis on reading skills, major and minor scales, arpeggios, cadences, and simple harmonizations. Students must have successfully completed MUSI 1181 or have permission from the instructor prior to enrollment. Semester Hours 1 (1 lec/2 lab)

MUSI 1183 Class Voice I

Provides for the study of voice in a classroom situation, emphasizing the same principles as private voice instruction: breathing, projection, tone quality, and interpretation. Some solo instruction and class performance. May be repeated for credit. Semester Hours 1 (1 lec/2 lab)

MUSI 1184 Class Voice II

Class instruction in the fundamentals of singing, including breathing, tone production, and diction. Designed for students with little or no previous voice training. Prerequisites: MUSI 1183 or permission of instructor. Semester Hours 1 (1 lec/2 lab)

MUSI 1192 Class Guitar

Provides class instruction for the beginning guitar student in the fundamental techniques of playing classical guitar, preparing the student for private instruction. Semester Hours 1 (3 lab)

MUSI 1301 Fundamentals of Music

Provides a course for music majors whose background is not sufficient for MUSI 1116 and 1311. Elementary basic notation, rhythmic practice, scale formation, key signatures, and knowledge of the piano keyboard are stressed. Required, if necessary, for music majors. Non-music majors may elect this course. A student may not receive credit for both MUSI 1301 and MUSI 1304. Semester Hours 3 (3 lec)

MUSI 1304 Foundations of Music for Classroom Teachers

Introduces the fundamentals of music for prospective classroom teachers, including notation, intervals, scales, key signatures, rhythm, chord, sight reading, ear training, and piano. Designed to meet the needs of elementary education majors, but open to all students. Students may not receive credit for both MUSI 1304 and MUSI 1301. Semester Hours 3 (3 lec)

MUSI 1306 Music Appreciation

Applies as a required humanities or fine arts course for all students. Information and techniques for the intelligent appreciation of music through lecture and recorded music; basic elements of form, style, and content of the music periods. Semester Hours 3 (3 lec)

MUSI 1308 Music Literature I

Surveys music literature from Gregorian chant to the early classical period. Emphasis on music materials and listening skills through recorded music and scores. Required for music majors and minors. Fall semester only. Semester Hours 3 (3 lec)

MUSI 1309 Music Literature II

Continues MUSI 1308. A study of music from the classical period to the present. Emphasis on styles and analysis. Required for music majors and minors. Spring semester only. Semester Hours 3 (3 lec)

MUSI 1310 American Music

Traces the history of American Music. Focus is on blues, jazz, country, rock and roll, and other contemporary popular music styles. Satisfies general humanities elective requirements.

Semester Hours 3 (3 lec)

MUSI 1311 Music Theory I

Reviews scale construction, intervals, and chord spelling. Includes the study of melody writing and part-writing using the primary triads. Concurrent enrollment in MUSI 1181 and 1116 is required. Prerequisite: MUSI 1301 or acceptable grade on Theory Placement Exam. Semester Hours 3 (3 lec)

MUSI 1312 Music Theory II

Continues MUSI 1311 with further study of melody writing and part-writing using all diatonic chords and non-chord tones. Concurrent enrollment in MUSI 1181 and 1117 is required.

Prerequisite: MUSI 1311. Semester Hours 3 (3 lec)

MUSI 2116 Sight-Singing and Ear-Training III

Includes sight-singing and dictation of difficult melodies in modes and melodies that modulate. Study of unusual and mixed meters, difficult rhythmic patterns, and harmonic progressions of seventh chords and altered chords. Concurrent enrollment in MUSI 2311 is required.

Prerequisites: MUSI 1117 and 1312. Semester Hours 1 (1 lec/2 lab)

MUSI 2117 Sight-Singing and Ear-Training IV

Continues MUSI 2116. Sight-singing and dictation of difficult melodies in modes and melodies that modulate and tonal melodies. Study of unusual and mixed meters, difficult rhythmic patterns, and harmonic progressions of seventh chords, altered chords, and chord clusters. Introduction to 20th century techniques. Concurrent enrollment in MUSI 2312 is required.

Prerequisite: MUSI 2116. Semester Hours 1 (1 lec/2 lab)

MUSI 2160 German Diction

Presents the phonetic sounds of the German language, the principles of which will be applied to required vocal repertoire for transfer music students. Required for voice majors, but open to all students with consent of instructor. Semester Hours 1 (2 lec)

MUSI 2161 French Diction

Presents the phonetic sounds of the French language, the principles of which will be applied to required vocal repertoire for transfer music majors. Required for voice majors, but open to all students with consent of instructor. Semester Hours 1 (2 lec)

MUSI 2181 Class Piano – Level III

Continues the study of piano as a group in a classroom equipped with individual keyboards. Emphasis is on continued development of music reading skills, major and minor scales,

arpeggios, cadences, and simple harmonizations. Prerequisite: MUSI 1182 or permission of the instructor. Semester Hours 1 (1 lec/2 lab)

MUSI 2182 Class Piano – Level IV

Continues the study of piano as a group in a classroom equipped with individual keyboards. Emphasis is on music reading skills, major and minor scales, arpeggios, cadences, and simple harmonizations. Prerequisite: MUSI 2181 or permission of the instructor. Semester Hours 1 (1 lec/2 lab)

MUSI 2311 Music Theory III

Includes the study of figured bass and melody harmonization with altered chords and all diatonic seventh chords, modulations, and styles of composition other than chordal styles. Concurrent enrollment in MUSI 2116 and MUSI 2181 or 2182 or MUAP 1169 or MUAP 1269. Prerequisite: MUSI 1312. Semester Hours 3 (3 lec)

MUSI 2312 Music Theory IV

Continues MUSI 2311. Mastery of all tonal functions, natural and altered chords, and seventh and ninth chords. Advanced modulations and advanced harmonic analysis. Study of 20th century music. Concurrent enrollment in MUSI 1181 or MUAP 1169 or MUAP 1269 and MUSI 2117 is required. Prerequisite: MUSI 2311. Semester Hours 3 (3 lec)

MUSI 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of music. Semester Hours 3 (3 lec)

Music, Commercial**Music Management Courses****MUSB 1305 Survey of Music Business**

Introduces overview of the music industry, including songwriting, live performance, the record industry, music merchandising, contracts and licenses, and career opportunities. Semester Hours 3 (3 lec)

MUSB 1341 Concert Promotion & Venue Management

Introduces the basics of concert promotion and venue management, including considerations in purchasing a club, concert promotion and advertising, talent buying, city codes, insurance, Texas Alcoholic Beverage Commission Regulation, Performance Rights Organizations licenses, personnel management, and concert production and administration. Semester Hours 3 (3 lec)

MUSB 2301 Music Marketing and Merchandising

Studies the methods of distribution, retailing, and wholesaling. Includes identifying a target market, image building, distribution (brick and mortar vs. delivery), pricing, advertising, and marketing mix. Semester Hours 3 (3 lec)

MUSB 2305 Music Publishing

Studies the administrative and marketing aspects of music publishing, including the application of current copyright law, developing songwriters, rights exploration, and royalty collection. Semester Hours 3 (3 lec)

MUSB 2309 The Record Industry

Overview of the record industry and the organization of large and small record companies. Emphasizes record company functions such as artist and repertoire (A&R), promotion, marketing, business affairs, and administration and distribution, including Internet-based distribution. Semester Hours 3 (3 lec)

MUSB 2345 Live Music & Talent Management

Examines the role, scope, and activities of the talent manager, including establishing the artist/manager relationship, planning the artist's career, and developing goals, strategies, and tactics with an overall view of the live music business. Semester Hours 3 (3 lec)

MUSB 2350 Commercial Music Project

Addresses the application of skills learned in other Commercial Music courses. This is a hands-on, project-oriented course aimed at helping students create a portfolio of their work. Each student must design and complete his/her own project with instructor approval. Semester Hours 3 (3 lec/lab)

MUSB 2355 Legal Aspects of the Entertainment Industry

Introduces the basics of copyright law and the various agreements used in the entertainment industry with emphasis on contracts used by music publishers, record companies, artist management, record producers, film and television producers, and booking agencies. Semester Hours 3 (3 lec)

MUSB 2586 Internship – Music Business Management & Merchandising

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. Prerequisite: MUSB 1305 and approved internship site. Semester Hours 5 (1 lec/20 lab)

Commercial Music Theory, Songwriting and Audio Courses**MUSC 1213 Commercial Music Theory I**

Learn to apply chord progressions, song forms, and harmonic techniques used in commercial music. Topics include modern chord notation and chord voicings. Semester Hours 3 (3 lec)

MUSC 1303 History of Popular Music

Introduces commercial music industry trends and developments through historical analysis. Topics include the evolution of the music industry with emphasis on the development of popular

musical styles and the impact of culture and technology on industry growth. Semester Hours 3 (3 lec)

MUSC 1311 Commercial Music Sight-Singing/Ear-Training I

Introduction to basic aural, visual, and vocal experiences in dictation and singing at sight with emphasis on identification of chord progression, motion, and melody/harmony relationship of popular music. Semester Hours 3 (3 lec/lab)

MUSC 1321 Songwriting

Introduction to the techniques of writing marketable songs, including the writing of lyrics and melodies, setting lyrics to music, developing lyrical and musical “hooks,” analyzing the marketplace, and developing a production plan for a song demo. Semester Hours 3 (3 lec/lab)

MUSC 1327 Audio Engineering I

Overview of the recording studio. Includes basic studio electronics and acoustic principles, waveform properties, microphone concepts and miking techniques, studio setup and signal flow, recording console theory, signal processing concepts, recorder principles and operation, and an overview of mixing and editing. Semester Hours 3 (2 lec/3 lab)

MUSC 1331 MIDI I

Introduces Musical Instrument Digital Interface (MIDI) systems and applications. Topics include the history and evolution of MIDI, the MIDI language, and typical implementation of MIDI applications in the studio environment using software-based sequencing programs. Semester Hours 3 (2 lec/2 lab)

MUSC 1335 Commercial Music Software

Specialized training in commercial music software applications. Semester Hours 3 (3 lec/lab)

MUSC 1405 Live Sound I

An overview of the field of live sound. Includes principles of live sound and the theory and interconnection of the components of a sound reinforcement system. Semester Hours 4 (2 lec/6 lab)

MUSC 2131 Commercial Music Sight-Singing/Ear-Training III

Continuation of MUSC 2311. Prerequisite: MUSC 2311. Semester Hours 1 (3 lec/lab)

MUSC 2132 Commercial Music Sight-Singing/Ear-Training IV

Continuation of MUSC 2131 with emphasis on advanced rhythms and melodies and multivoice chord progression. Prerequisite: MUSC 2131. Semester Hours 1 (3 lec/lab)

MUSC 2141 Forum/Recital

Teaches the student to analyze performances by students, faculty, and guest artists critically with emphasis on improving observation and listening skills and to develop interpersonal skills to participate in seminar discussions about music industry topics. Semester Hours 1 (3 lec/lab)

MUSC 2213 Commercial Music Theory II

Continuation of MUSC 1213. Emphasizes harmonic and melodic analysis, extended chord theory, and modal and altered scales. Prerequisite: MUSC 2311. Semester Hours 1 (3 lec/lab)

MUSC 2214 Improvisational Theory I

Introduces the scale chord relationships for triads, major 7 chords, dominant 7 chords, and minor 7 chords; compose an appropriate solo line over selected harmonic progressions; and perform appropriate extemporaneous solos over ii-V7-I progressions and minor and dominant blues. Prerequisites: MUSC 2213 and MUSC 2313. Semester Hours 2 (3 lec/lab)

MUSC 2234 Improvisational Theory II

A continuation of the study of chordal structures of commercial music genres. Emphasizes extemporaneous performance. Students will learn the skill/chord relationships of extended chords (9, 11, 13) and altered chords, to analyze and transcribe appropriate improvised solos, and to perform appropriate extemporaneous solos over altered ii-V7-I progressions, 32-bar song forms, and selected harmonic progressions. Prerequisites: MUSC 2214 and concurrent enrollment in MUSC 2447 or MUSC 2448. Semester Hours 2 (3 lec/lab)

MUSC 2286 Internship: Recording Arts Technology

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student. Presents the theory, concepts, and skills involving the tools, materials, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, and legal systems associated with the workplace. Students will demonstrate ethical behavior, safety practices, interpersonal and teamwork skills, appropriate verbal and written communications in the workplace. This course will emphasize the audio recording industry. Prerequisite: MUSC 2427. Semester Hours 2 (15 lab)

MUSC 2311 Commercial Music Sight-Singing/Ear-Training II

Continuation of MUSC 1311 with emphasis on chromatic tonalities and melodies. Teaches the student to sight-sing selected melodies in chromatic tonalities; and transcribe dictation of selected rhythmic patterns, chromatic melodies, and intermediate chord progressions. Prerequisites: MUSC 1213 and 1311. Semester Hours 3 (3 lec/lab)

MUSC 2319 Orchestration

Prepares the student to write for voices and instruments to include ranges, transposition, and idiosyncrasies of each instrument with emphasis on commercial music chord voicings. Prerequisites: MUSC 1213 and MUSC 1311. Semester Hours 3 (3 lec)

MUSC 2330 Commercial Music Arranging & Composition

Presentation of arranging and composition for projects in industry recognized genres including songwriting, show writing, video, and film. Prerequisite: MUSC 1321. Semester Hours 3 (3 lec)

MUSC 2403 Live Sound II

Overview of stage monitor systems. Includes monitor systems set-up and operation and stage management. Also covers interactivity between sound management, performance quality, and audience experience. Semester Hours 4 (3 lec/2 lab)

MUSC 2427 Audio Engineering II

Implementation of the recording process, microphones, audio console, multitrack recorder, and signal processing devices. Prerequisite: MUSC 1327. Semester Hours 4 (2 lec/3 lab)

MUSC 2447 Audio Engineering III

Advanced practice of procedures and techniques in recording and manipulating audio. Includes digital audio editing, advanced recording techniques, and advanced engineering projects.

Prerequisite: MUSC 2427. Semester Hours 4 (2 lec/2 lab)

MUSC 2448 Audio Engineering IV

Covers advanced technologies in recording, mixing, and editing. Introduces the role of the producer, including recording, mixing, arranging, analyzing projects, session planning, communication, budgeting, business aspects, technical considerations, and music markets.

Capstone course for Commercial Music Audio Technology A.A.S. Degree. Prerequisite: MUSC 2447. Semester Hours 4 (2 lec/2 lab)

MUSC 2453 Live Sound III

Advanced concepts of live sound engineering for front-of-house mix. Includes techniques required to build and maintain a live sound mix for an audience. Semester Hours 4 (2 lec/6 lab)

Commercial Music Applied Lessons

May be used for Capstone Course for Commercial Music Performance A.A.S. or Certificate. Capstone must be approved by program director.

MUSP 1101 Applied Commercial Music: Arranging & Composing

Provides private instruction in arranging and composition with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1103 Applied Commercial Music: Acoustic Bass

Provides private instruction in acoustic bass with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1104 Applied Commercial Music: Bass Guitar

Provides private instruction in bass guitar with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for

faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1105 Applied Commercial Music: Commercial Guitar

Provides private instruction in commercial guitar with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1110 Applied Commercial Music: Commercial Piano

Provides private instruction in piano with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1111 Applied Commercial Music: Fiddle

Provides private instruction in fiddle with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1115 Applied Commercial Music: Mandolin

Provides private instruction in mandolin with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1117 Applied Commercial Music: Percussion

Provides private instruction in percussion with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1121 Applied Commercial Music: Steel Guitar

Provides private instruction in steel guitar with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1123 Applied Commercial Music: Synthesizer

Provides private instruction in the synthesizer with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 1127 Applied Commercial Music: Commercial Voice

Provides private instruction in voice with goals related to commercial music. The student will demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried performance for faculty.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2130 Advanced Applied Commercial Music: Voice

Provides advanced private instruction in voice with goals related to commercial music.

Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2131 Advanced Applied Commercial Music: Acoustic Bass

Provides advanced private instruction in electric guitar with goals related to commercial music.

Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2133 Advanced Applied Commercial Music: Bass Guitar

Provides advanced private instruction in bass guitar with goals related to commercial music.

Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2135 Advanced Applied Commercial Music: Piano

Provides advanced private instruction in piano with goals related to commercial music.

Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2141 Advanced Applied Commercial Music: Electric Guitar

Provides advanced private instruction in electric guitar with goals related to commercial music.

Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital.

Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2143 Advanced Applied Commercial Music: Fiddle

Provides advanced private instruction in fiddle with goals related to commercial music. Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2147 Advanced Applied Commercial Music: Mandolin

Provides advanced private instruction in mandolin with goals related to commercial music. Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2149 Advanced Applied Commercial Music: Percussion

Provides advanced private instruction in percussion with goals related to commercial music. Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2152 Advanced Applied Commercial Music: Steel Guitar

Provides advanced private instruction in steel guitar with goals related to commercial music. Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

MUSP 2159 Advanced Applied Commercial Music: Arranging/Composition

Provides advanced private instruction in arranging/composition with goals related to jazz or commercial music. Demonstrate proficiency in commercial music repertoire and technique; develop a professional, disciplined approach to performance skills; and present a juried public performance or recital. Corequisite: enrollment in a Commercial Music Ensemble – exceptions must be approved by program director. Semester Hour 1 (1 lec/3 lab)

Commercial Music Ensembles**MUSP 1143 Class Strings**

Provides for the study of guitar, fiddle, and bass guitar performance in a master class. Students will achieve mastery of fret nomenclature and the five forms used in performances. Corequisite: enrollment in Applied guitar, fiddle and/or bass guitar course. Semester Hours 1 (3 lab)

MUSP 1146 Small Commercial Music Ensemble – Country

Participation in a country ensemble concentrating on commercial music performance styles.
Semester Hours 1 (4 lab)

MUSP 1148 Small Commercial Music Ensemble – Improvisation

Participation in a small ensemble concentrating on improvisation of commercial music performance styles. Ensemble sections offered include: electric guitar, contemporary Christian, big band jazz and vocal jazz, among others. Semester Hours 1 (4 lab)

MUSP 1150 Small Commercial Music Ensemble – Jazz

Participation in a jazz ensemble concentrating on commercial music performance styles.
Semester Hours 1 (4 lab)

MUSP 1153 Small Commercial Music Ensemble – Rock

Participation in a rock ensemble concentrating on commercial music performance styles.
Semester Hours 1 (4 lab)

MUSP 2101 String Doubling

Study of basic doubling techniques on the guitar, bass guitar, acoustic bass, fiddle, steel guitar, and banjo. Semester Hours 1 (3 lab)

MUSP 2103 Commercial Music Class Piano

Introduces keyboard skills for commercial music majors, including selected chord progressions and scales, modal, harmony, and extensive use of the ii-V7-I progression with appropriate keyboard voicing. Prerequisite: MUSI 1182. Semester Hours 1 (3 lab)

Nursing, Associate Degree

Students desiring to enroll in the Associate Degree Nursing Program (R.N.) at McLennan Community College should refer to the program's application (available at www.mccnursing.com) for admissions procedures and additional information.

RNSG 1161 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. On-site clinical instruction, evaluation, and placement is the responsibility of the college faculty. Nursing Process is the systematic, problem-solving process utilized in this course. Prerequisites: ENGL 1301, RNSG 2504, RNSG 1463 with minimum grades of C. Corequisite: RNSG 1293. Semester Hours 1 (3 clinical hours/week)

RNSG 1162 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Clinical experiences will include general medical/surgical settings. Nursing

Process is utilized to manage clients/families. Fulfillment of RNSG 1161, 1162, 1462, 1463 and VNSG 1119 will qualify the student to enter VNSG 1463. Semester Hours 1 (3 clinical hours/week)

RNSG 1293 Special Topics in Nursing (R.N. Training)

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. Nursing Process is the systematic problem-solving process utilized. Prerequisites: ENGL 1301, RNSG 2504, RNSG 1463 with minimum grades of C. Corequisite: RNSG 1161. Semester Hours 2 (2 lec)

RNSG 1327 Transition From Vocational to Professional Nursing

Topics include health promotion, expanded assessment, analysis of data, nursing process, pharmacology, multidisciplinary teamwork, communication and applicable competencies in knowledge, judgment, skills, and professional values within a legal/ethical framework throughout the life span. Prerequisites: Vocational Nurse License and admission to the Professional Nursing Program. Semester Hours 3 (3 lec/1 lab)

RNSG 1462 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Clinical experiences include introduction to the roles of the registered nurse with emphasis on health promotion and primary disease prevention across the life span, essential components of the nursing health assessment, identification of deviations from expected health patterns; the application of a systematic, problem-solving process to provide basic nursing care to diverse clients across the life span; and applicable competencies in knowledge, judgment, skills and professional values within a legal/ethical framework. Nursing Process is the systematic, problem-solving process utilized. Prerequisites: Admission to the Professional Nursing Program; CHEM 1405 or 1407 or 1411; or BIOL 1406 or 1407 or 1408 or 2404; or VNSG 1420, and BIOL 2401, 2402 and PSYC 2301 with a minimum grade of C. Corequisite: RNSG 1523. Semester Hours 4 (14 clinical hours/week)

RNSG 1463 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Clinical experiences include uncomplicated perinatal care, common childhood/adolescent diseases, mental health concepts, perioperative care, and frequently occurring adult health problems and health issues related to aging. Emphasis is on secondary disease prevention and collaboration with members of the multi-disciplinary health care team. Focuses on the utilization of the nursing process in the management of clients/families. Prerequisites: HPRS 1206, PSYC 2314, RNSG 1523 and 1462 with minimum grades of C. Corequisite: RNSG 2504. Semester Hours 4 (14 clinical hours/week)

RNSG 1523 Introduction to Professional Nursing for Integrated Programs

Introduction to the profession of nursing, including the roles of the registered nurse with emphasis on health promotion and primary disease prevention across the life span; essential components of the nursing health assessment; identification of deviations from expected health patterns; the application of a systematic, problem-solving process to provide basic nursing care to diverse clients across the life span; and applicable competencies in knowledge, judgment, skills, and professional values within a legal/ethical framework. This course lends itself to an integrated approach. Nursing Process is the systematic, problem-solving process utilized. Prerequisites: Admission to the Professional Nursing Program; CHEM 1405 or 1407 or 1411; or BIOL 1406 or 1407 or 1408 or 2404; or VNSG 1420 and BIOL 2401, 2402 and PSYC 2301 with

a minimum grade of C. Corequisites: RNSG 1462, HPRS 1206 and PSYC 2314. Semester Hours 5 (4 lec/2 lab)

RNSG 2462 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Emphasizes setting priorities in management and teaching of clients with multiple complex needs including complicated perinatal care, complex childhood/adolescent diseases, acute mental illness, complex perioperative care, serious adult health problems and health issues related to aging. Demonstrates the use of advanced communication skills with clients experiencing acute mental illness. Continues to utilize nursing process in managing clients/families. Prerequisites: ENGL 1301, RNSG 2504, RNSG 1463 with a minimum grade of C or admission to the program through Advanced Placement. Corequisite: RNSG 2514 Semester Hours 4 (14 clinical hours/week)

RNSG 2463 Clinical – Nursing (R.N. Training)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Provides experiences in which students demonstrate the roles of the provider of care, manager of care, patient safety advocate and member of the profession. Utilizes the nursing process in the management of care for groups of clients whose health care needs may be difficult to predict. Prerequisites: BIOL 2420, SPCH (college level), RNSG 2514, RNSG 2462 with minimum grades of C. Corequisite: RNSG 2535. Semester Hours 4 (14 clinical hours/week)

RNSG 2504 Integrated Care of the Client with Common Health Care Needs

Application of a systematic problem-solving process and critical thinking skills to provide nursing care to diverse clients/families across the life span with common health care needs including, but not limited to, common childhood/adolescent diseases, uncomplicated perinatal care, mental health concepts, perioperative care, frequently occurring adult health problems and health issues related to aging. Emphasis on secondary disease prevention and collaboration with members of the multi-disciplinary health care team. Content includes applicable competencies in knowledge, judgment, skills and professional values within a legal/ethical framework. This course lends itself to an integrated approach. Nursing Process is the systematic problem-solving process utilized. Prerequisites: HPRS 1206, PSYC 2314 RNSG 1523, RNSG 1462 with minimum grades of C. Corequisites: RNSG 1463 and ENGL 1301. Semester Hours 5 (4 lec/2 lab)

RNSG 2514 Integrated Care of the Client with Complex Health Care Needs

Application of a systematic problem-solving process and critical thinking skills to provide comprehensive nursing care to diverse clients/families across the life span with complex health care needs including, but not limited to, complex childhood/adolescent diseases, complicated perinatal care, acute mental illness, complex perioperative care, serious adult health problems

and health issues related to aging. Emphasis on tertiary disease prevention, health maintenance/restoration and collaboration with members of the multi-disciplinary health care team. Topics include the role of the nurse as client advocate and coordinator of care and applicable competencies in knowledge, judgment, skills and professional values within a legal/ethical framework. This course lends itself to an integrated approach. Nursing Process is the systematic, problem-solving process utilized. Prerequisites: ENGL 1301, RNSG 2504, RNSG 1463 with minimum grades of C. All first year prerequisites must be completed. Corequisites: RNSG 2462, BIOL 2420 and any college-level Speech course. Semester Hours 5 (4 lec/2 lab)

RNSG 2535 Integrated Client Care Management (A.D.N. Capstone)

Application of client assessment skills, critical thinking, and independent nursing interventions to care for diverse clients/families throughout the life span whose health care needs may be difficult to predict. Emphasis on collaborative clinical decision-making, nursing leadership skills and client management. Topics include the significance of professional development, trends in nursing and health care, and applicable knowledge, judgment, skills and professional values within a legal/ethical framework. This course lends itself to an integrated approach. Nursing Process is the systematic problem-solving process utilized. This course contains Capstone activities for ADN students. Prerequisites: BIOL 2420, SPCH (college level), RNSG 2514, RNSG 2462, RNSG 1161 and RNSG 1293 with minimum grades of C. Must have taken or currently be enrolled in a Humanities elective. Corequisites: RNSG 2463, Humanities. Semester Hours 5 (4 lec/2 lab)

VNSG 1463 Clinical – Practical Nurse (L.P.N. Training and VN Capstone)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Completion of RNSG 1161, 1162, 1462, 1463 and VNSG 1119, 1463 meets all the requirements set forth by the Board of Nurse Examiners for Vocational Nursing. This course contains Capstone activities for vocational nursing students. Clinical experiences will include general medical/surgical settings. Prerequisites: RNSG 1293 with a minimum grade of C and credit for VNSG 1119 and RNSG 1161 and 1162. Semester Hours 4 (40 clinical hours/week)

Nursing, Vocational

Students desiring to enroll in the Vocational Nursing Program at McLennan Community College should refer to the program application for admissions procedures and additional information. Students may visit the Vocational Nursing website at www.mclennan.edu/departments/hsp/lvn for up-to-date information.

NOTE: Students must concurrently pass both the theory and clinical parts of any vocational nursing course to progress in the program. A grade of C or better must be earned in all courses required for a Certificate of Completion in Vocational Nursing.

VNSG 1119 Leadership and Professional Development

Studies the importance of professional growth. Topics include the role of the Licensed Vocational Nurse in the multi-disciplinary health care team, professional organizations, and continuing education. Prerequisite: Admission into Vocational Nursing Program or Associate Degree Nursing Program. Semester Hours 1 (1 lec)

VNSG 1122 Vocational Nursing Concepts

Introduces the nursing profession and its responsibilities and the legal and ethical issues in nursing practice. Concepts related to the physical, emotional, and psychosocial self-care of the

learner/professional. Prerequisite: Admission to program. Corequisites: VNSG 1327, VNSG 1360 and VNSG 1423. Semester Hours 1 (1 lec)

VNSG 1260 Clinical – Practical Nurse

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisite: VNSG 1360. Corequisite: VNSG 1509. Semester Hours 2 (9 clinical hours/week)

VNSG 1261 Clinical – Practical Nurse

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisite: VNSG 1509 and VNSG 1260. Corequisite: VNSG 1510. Semester Hours 2 (9 clinical hours/week.)

VNSG 1262 Clinical – Practical Nurse

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisite: VNSG 1509 and VNSG 1260. Corequisite: VNSG 1330. Semester Hours 2 (9 clinical hours/week)

VNSG 1263 Clinical – Practical Nurse

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Corequisite: VNSG 1334. Semester Hours 2 (9 clinical hours/week)

VNSG 1327 Essentials of Medication Administration

Discusses general principles of medication administration, including determination of dosage, preparation, safe administration, and documentation of multiple forms of drugs. Instruction includes various systems of measurement. Drug classification will be included. Prerequisite: Admission to program. Corequisites: VNSG 1423, VNSG 1360 and VNSG 1122. Semester Hours 3 (3 lec)

VNSG 1330 Maternal - Neonatal Nursing

Utilizes the nursing process in the assessment and management of the childbearing family. Emphasis on the bio-psycho-social-cultural needs of the family during the phases of pregnancy, childbirth, and the neonatal period, including abnormal conditions. Corequisite: VNSG 1262. Semester Hours 3 (3 lec)

VNSG 1334 Pediatrics (Capstone) Level III

Studies childhood diseases and childcare from infancy through adolescence. Focus on the care of the well and the ill child utilizing the nursing process. Growth and development included. Capstone for Level III students. Corequisite: VNSG 1263. Semester Hours 3 (3 lec)

VNSG 1360 Clinical – Practical Nurse

Provides a health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisite: Admission to program. Corequisites: VNSG 1327, VNSG 1423, and VNSG 1122. Semester Hours 3 (17 clinical hours/week)

VNSG 1423 Basic Nursing Skills

Teaches mastery of entry-level nursing skills and competencies for a variety of health care settings. Utilization of the nursing process as the foundation for all nursing interventions. Includes concepts of geriatrics, infection control and nutrition. Prerequisite: Admission to program. Corequisites: VNSG 1327, VNSG 1360 and VNSG 1122. Semester Hours 4 (2 lec/6 lab)

VNSG 1509 Nursing in Health and Illness II

Introduces common health problems requiring medical and surgical interventions. Includes female reproductive, sexually transmitted diseases, musculoskeletal burns, mental health, blood, fluid, electrolytes, emergency nursing, endocrine, and cancer. Nutrition will be included. Prerequisite: VNSG 1423. Corequisite: VNSG 1260. Semester Hours 5 (5 lec)

VNSG 1510 Nursing in Health and Illness III (Capstone) – Level III

Continuation of VNSG 1509. Further study of common medical-surgical health problems of the client including. Incorporates knowledge necessary to make the transition from student to graduate vocational nurse. Includes respiratory, AIDS, cardiovascular, neurological, eye, ear, male reproductive, urinary, liver, biliary, pancreas, and gastrointestinal. Nutritional concepts will be included. Capstone for Level III students. Prerequisite: VNSG 1509 and VNSG 1260. Corequisite: VNSG 1261. Semester Hours 5 (5 lec)

Nursing Home Administration (See Long Term Care Administration)

Office Technology Careers

ARTC 1302 Digital Imaging I

Introduces raster image editing and/or image creation software: scanning, resolution, file formats, output devices, color systems, and image-acquisitions. Semester Hours 3 (2 lec/2 lab)

ARTC 1313 Digital Publishing I

Introduces the fundamentals of using digital layout as a primary publishing tool and the basic concepts and terminology associated with typography and page layout. Students learn to apply fundamentals of page layout, define typographic terminology and specifications, import text and graphics into page layout programs, and understand file formats and file management. Prerequisite: ITSW 1301 with a minimum grade of C or knowledge of word processing. Semester Hours 3 (2 lec/2 lab)

ARTC 2313 Digital Publishing II

Introduces layout procedures from thumbnails and roughs to final comprehensive and printing; emphasis is on design principles for the creation of advertising and publishing materials and techniques for efficient planning and documenting projects. Prerequisite: ARTC 1313. Semester Hours 3 (2 lec/2 lab)

BMGT 1325 Office Management

Presents systems, procedures, and practices related to organizing and planning office work, controlling employees' performance, and exercising leadership skills. Prerequisite: POFT 1301, POFT 1309, ITSW 1301 or POFT 2301, with a minimum grade of C. Semester Hours 3 (3 lec)

GRPH 2380 Cooperative Education – Prepress/Desktop Publishing and Digital Imaging Design

Provides career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component that covers interpersonal and job-related skills. Prerequisite: ARTC 1302, ARTC 1313 and approved workstation and consent of program director. Semester Hours 3 (1 lec/15-20 lab)

GRPH 2381 Cooperative Education – Prepress/Desktop Publishing and Digital Imaging Design

Provides career-related activities encountered in the student's area of specialization offered through an individualized agreement among the college, employer, and student. Under the supervision of the college and the employer, the student combines classroom learning with work experience. Includes a lecture component that covers ergonomics and interpersonal and job-related skills. Prerequisite: ARTC 1302, ARTC 1313 and approved workstation and consent of program director. Semester Hours 3 (1 lec/15-20 lab)

HITT 1205 Medical Terminology I

Studies the word origin and structure through the introduction of prefixes, suffixes, root words, plurals, abbreviations and symbols, surgical procedures, medical specialties and diagnostic procedures. Semester Hours 2 (2 lec)

HITT 1249 Pharmacology

Presents an overview of the basic concepts of the pharmacological treatment of various diseases affecting major body systems. Identifies the drugs associated with the treatment process; and examines drug therapy, dosages, actions, and drugs administration routes. Emphasis is on drug interactions with each body system, pharmaceutical medical terminology, and generic and trade names of drugs. Semester Hours 2 (2 lec)

ITSW 1301 Introduction to Word Processing

Presents an overview of the production of documents, tables, and graphics. Students will identify word processing terminology and concepts, create technical documents, format and edit documents, use simple tools and utilities, and print documents. Presents pagination, merge and storage of documents. Prerequisite: POFT 1227 with a minimum grade of C or a keyboarding skill of 30 word a minute using touch method. Semester Hours 3 (2 lec/2 lab)

MRMT 1307 Medical Transcription I

Presents the fundamentals of medical transcription with hands-on experience in transcribing physician dictation, including basic reports such as history and physicals, discharge summaries, consultations, operative reports, and other medical reports. Utilizes transcribing and information processing equipment compatible with industry standards. Designed to develop speed and accuracy. Prerequisite: ITSW 1301 or HITT 1249, HPRS 1206 with a minimum grade of C. Corequisite: POFI 2301. Semester Hours 3 (2 lec/2 lab)

POFI 2340 Advanced Word Processing

Presents advanced techniques in merging, macros, graphics, and desktop publishing. Includes extensive formatting for technical documents. Emphasis is on business applications. Students will design and create macros, use advanced formatting features, import data, and use graphic and special functions to enhance documents. Emphasizes advanced printing techniques. Prerequisite: ITSW 1301 with a minimum grade of C or consent of the program director. Semester Hours 3 (2 lec/2 lab)

POFM 1302 Medical Software Applications

Medical software applications for the management and operation of health care information systems. End-of-course speed is 50 words per minute with 5 or few errors on five 5-minute timed writings. Prerequisite: POFT 1227. Semester Hours 3 (2 lec/3 lab)

POFM 1391 Special Topics in Medical Administrative Keyboarding

Develops skill in the operation of the keyboard by touch applying proper keyboarding techniques. Emphasis on continued keyboarding skills in document formatting, emphasizing speed, and accuracy. Emphasis on proofreading, editing, following instructions, and keyin documents from various copy. Formatting basic documents, such as letters, reports, tables and business forms. End-of-Course Competency Standard: keyboard 60 words a minute with 5 or fewer errors. Prerequisites: POFT 1227 and ITSW 1301 with a grade of C or better and keyboarding skill of 30 words a minute using touch method. Semester Hours 3 (2 lec/3 lab)

POFM 2333 Medical Document Production

Studies the advanced concepts of medical office activities, practices, and procedures. Topics include advanced medical reports, coding billing insurance activities, and records management. End-of-course competence is keyboarding at a rate of 60 words a minute. Prerequisite: ITSW 1301 or HITT 1249 and HPRS 1206 with a minimum grade of C and keyboard 50 words a minutes using the touch method; concurrently enrolled in POFI 2340. Semester Hours 3 (2 lec/3 lab)

POFM 2486 Internship – Medical Administrative Assistant/Secretary

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. Course covers interpersonal and job-

related skills. Prerequisite: An approved workstation and consent of program director; POFT 1309, ITSW 1301, POFI 2340 and POFT 2301 with a minimum grade of C. Semester Hours 4 (1 lec/15-20 lab)

POFM 2487 Internship – Medical Administrative Assistant/Secretary

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. Course covers ergonomics and interpersonal and job-related skills. Prerequisite: An approved workstation and consent of program director; ITSW 1301, POFI 2340, and POFT 1309 and 2301 with a minimum grade of C. Semester Hours 4 (1 lec/15-20 lab)

POFT 1191 Special Topics in Business Communications

Presents topics that address recently identified current events, skills knowledges, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec)

POFT 1192 Special Topics in Administrative Assistant/Secretarial Science, General

Presents topics that address recently identified current events, skills knowledges, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec)

POFT 1227 Introduction to Keyboarding

Develops skills in keyboarding techniques with emphasis on alphabet, number, and symbol keys by touch. Emphasizes proper keyboarding technique and the development of acceptable speed and accuracy. Skills can be applied to computers, typewriters, and other equipment with keyboards. Semester Hours 2 (1 lec/2 lab)

POFT 1291 Special Topics in Business Communications

Includes topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 2 (2 lec)

POFT 1292 Special Topics in Administrative Assistant/Secretarial Science, General

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 2 (2 lec)

POFT 1301 Business English

Introduces the practical application of basic language usage skills with emphasis on fundamentals of writing and editing for business. Students will apply the basic rules of grammar, spelling, capitalization, number usage, and punctuation; utilize terminology applicable to technical and business writing; develop proofreading and editing skills; and write effective sentences and paragraphs for business applications. Prerequisite: Must have passed the writing portion of the THEA or MCC Placement Test or credit for ENGL 0301. Semester Hours 3 (3 lec)

POFT 1309 Administrative Office Procedures I

Studies current office procedures, duties, and responsibilities applicable to an office environment, including telephone skills, time management, travel and meeting arrangements, and mail processing. Human relations and interview skills are also covered. Semester Hours 3 (3 lec)

POFT 1321 Business Math

Instructs the fundamentals of business mathematics, including analytical and problem-solving skills for critical thinking in business applications. Applies problem-solving skills utilizing calculators. Enables the student to use mathematical approaches in computing percents and their applications in business discounts, interest, taxes, payroll, markups, consumer and business credit investments, and other business applications. Semester Hours 3 (3 lec)

POFT 1391 Special Topics in Business Communications

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 3 (3 lec)

POFT 1392 Special Topics in Administrative Assistant/Secretarial Science, General

Presents topics that address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 3 (3 lec)

POFT 2203 Speed and Accuracy Building

Builds skills in reviewing, correcting, improving, and/or perfecting touch keyboarding techniques for the purpose of increasing speed and improving accuracy. Semester Hours 2 (1 lec/2 lab)

POFT 2301 Intermediate Keyboarding

Develops skill in the operation of the keyboard by touch applying proper keyboarding techniques. Emphasis on continued keyboarding skills in document formatting, emphasizing speed, and accuracy. Emphasis on proofreading, editing, following instructions, and keying documents from various copy. Formatting basic documents, such as letters, reports, tables and business forms. End-of-Course Competency Standard: Keyboard 50 wpm with 5 or fewer errors. Prerequisite: POFT 1227 and ITSW 1301 with a grade of C or better and keyboarding skill of 30 words a minute using touch method. Semester Hours 3 (2 lec/3 lab)

POFT 2303 Speed and Accuracy Building

Review, correct, and improve keyboarding techniques for the purpose of increasing speed and improving accuracy. This course is designed to be repeated multiple times to improve student proficiency. Prerequisite: POFT 1227. Semester Hours 3 (3 lec)

POFT 2312 Business Correspondence & Communication

Presents the development of writing skills and presentation skills to produce effective business documents. Prerequisite: POFT 1301 with minimum grade of C. Semester Hours 3 (3 lec)

POFT 2333 Advanced Keyboarding

Continues keyboarding skills in advanced document formatting, emphasizing speed, accuracy, and decision-making. Studies advanced concepts in a variety of office-simulated correspondence activities with emphasis on organization, prioritizing, decision-making, composition, placement, accuracy, and speed development. Students will apply mailability standards; produce alphabetic, alphanumeric, and numeric material; enhance proofreading and editing skills; and implement decision-making skills. Utilizes word processing software to create mailable copy. End-of-Course Competency Standard: keyboard 60 WPM with 5 or fewer errors. Prerequisite: ITSW 1301, POFT 1309 or 2301 with a minimum grade of C and keyboard 50 words a minute using touch method. Semester Hours 3 (2 lec/3 lab)

POFT 2486 Internship – Administrative Assistant/Secretarial Science, General

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. Course covers interpersonal and job-related skills. Prerequisite: An approved workstation and consent of program director; POFT 1309, ITSW 1301, POFI 2340 and POFT 2301 with minimum grade of C. Semester Hours 4 (1 lec/15-20 lab)

POFT 2487 Internship – Administrative Assistant/Secretarial Science, General

Establishes a work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. Course covers ergonomics and interpersonal and job-related skills. Prerequisite: An approved workstation and consent of program director; POFT 1309, ITSW 1301 POFI 2340 and POFT 2301 with minimum grade of C. Semester Hours 4 (1 lec/15-20 lab)

Paralegal

LGLA 1172 Computerized Legal Research: Lexis-Nexis

This course provides a working knowledge of effective legal research using the Lexis-Nexis computerized subscription service. Topics include features of this service, formulating queries, and incorporating findings in legal documents. Recommended: Passing score on the reading portion of the THEA or other placement test or concurrent enrollment in READ 0302. Offered only in the spring. Semester Hours 1 (1 lec)

LGLA 1301 Legal Research and Writing

This course provides a working knowledge of fundamentals of effective legal research and writing. Topics include law library techniques, computer assisted legal research, briefs, and legal memoranda. Recommended: Passing score on the reading portion of the THEA or other placement test or concurrent enrollment in READ 0302. Offered only in the spring. Semester Hours 3 (3 lec)

LGLA 1311 Introduction to Law

Legal systems, concepts, procedures, and terminology. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Semester Hours 3 (3 lec)

LGLA 1313 Introduction to Paralegal studies

This course provides an overview of the paralegal profession, including ethical obligations, regulation, professional trends and issues, and the paralegal's role in assisting the delivery of legal services. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Semester Hours 3 (3 lec)

LGLA 1342 Federal Civil Litigation

Fundamental concepts and procedures of federal civil litigation with emphasis on the paralegal's role. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Offered only in the spring. Semester Hours 3 (3 lec)

LGLA 1344 Texas Civil Litigation

Fundamental concepts and procedures of Texas civil litigation with emphasis on the paralegal's role. Recommended: Passing score on the reading portion of the THEA or MCC placement Test or concurrent enrollment in READ 0302. Offered only in the fall. Semester Hours 3 (3 lec)

LGLA 1345 Civil Litigation

Presents fundamental concepts and procedures of civil litigation including pretrial, trial, and post-trial phases of litigation and emphasizes the paralegal's role in civil litigation. Semester Hours 3 (3 lec)

LGLA 1391 Practice of Property and Family Law

Presents fundamental concepts of property and family law with an emphasis on the paralegal's role. Property topics include the nature of property, rights and duties of ownership, conveyances, and document recording. Family law topics include marriage, divorce, marital property, and the parent-child relationship. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Offered only in the fall. Semester Hours 3 (3 lec)

LGLA 2307 Law Office Management

Basic principles and structure of management, administrative, and substantive systems in the law office. Includes law practice technology as applied to paralegals. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Offered only in the fall. Semester Hours 3 (3 lec)

LGLA 2311 Business Organizations: Corporate Law and Contracts for Paralegals

Basic concepts of business organizations with emphasis on the paralegal's role. Topics include law of agency, sole proprietorships, forms of partnerships, corporations and other emerging

business entities. This course focuses on the practical aspects of two significant topics impacting the corporate paralegal: business organizations and contracts. Specific coverage includes an in-depth analysis of business organizations, including how they are formed, financed, governed, managed and dissolved, and an in-depth look at the drafting and interpreting of contracts. Prerequisites: LGLA 1311, LGLA 1313 and BUSI 2301. Semester Hours 3 (3 lec)

LGLA 2313 Criminal Law and Procedure

Fundamental concepts of criminal law and procedure from arrest to final disposition including principles of federal and state law emphasizing the role of the paralegal in the criminal justice system. Semester Hours 3 (3 lec)

LGLA 2333 Advanced Legal Document Preparation

Use of office technology skills in preparation of legal documents by paralegals based on hypothetical situations drawn from various area of law. Semester Hours 3 (2 lec/2 lab)

LGLA 2488 Internship – Paralegal/Legal Assistant (Capstone)

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. This may be a paid or unpaid experience. It may be repeated if topics and learning outcomes vary. This course serves as the Capstone experience for LGLA students. If the student's prior work experience satisfies internship requirements, the program director may substitute a 3-hour LGLA elective. Students must meet Guidelines for Internships and have approval of the program director to enroll in this course. Recommended: Passing score on the reading portion of the THEA or MCC Placement Test or concurrent enrollment in READ 0302. Offered only in the spring. Semester Hours 4 (1 lec/15 lab)

Paramedicine

EMSP 1160 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 60 hours of ambulance ride-outs and 20 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Basic level. Prerequisites: Must pass Accuplacer reading test with a score of 82. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1501, 1173 and 2271. Semester Hours 1 (5 clinical hours/week)

EMSP 1161 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 40 hours of ambulance ride-outs and 25 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Basic level. Prerequisites: Current Texas EMT Certification, HPRS 1206 and BIOL 2404. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1162, 1173, 1438, 1455, 1456 and 2271. Semester Hours 1 (6 clinical hours/week)

EMSP 1162 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 40 hours of ambulance ride-outs and 25 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Basic level. Prerequisites: Current Texas EMT Certification, HPRS 1206 and BIOL 2404. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1161, 1173, 1438, 1455, 1456 and 2271. Semester Hours 1 (6 clinical hours/week)

EMSP 1173 EMS First Responder Agility and Fitness Preparation

Provides the student with the tools necessary to improve long-term physical health and conditioning. Exercise and physical training will prepare the EMS student to successfully meet or exceed the physical strength requirements and challenges of working with EMS. Prerequisites: EMT students must meet the requirements for admission to the EMT program. Advanced EMT students (EMT Intermediate and Paramedic level) must meet the requirements for admission into the Advanced EMT program. Semester Hours 1 (2 lab)

EMSP 1438 Introduction to Advanced Practice

Explores the foundations necessary for mastery of the advanced topics of clinical practice in and out of the hospital. Scenarios, case studies and simulations included in this course assist the student to develop critical thinking skills that can be applied in simulated pre-hospital care environments. Prerequisites: Current Texas EMT Certification, HPRS 1206 and BIOL 2404. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1161, 1162, 1173, 1455, 1456 and 2271. Semester Hours 4 (3 lec/2 lab)

EMSP 1455 Trauma Management

Studies the knowledge and skills necessary to reach competency in the assessment and management of patients with traumatic injuries. Scenarios, case studies and simulations included in this course assist the student to develop critical thinking skills in assessing and assisting with the treatment of patients with traumatic injuries. Prerequisites: Current Texas EMT Certification, HPRS 1206 and BIOL 2404. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1161, 1162, 1173, 1438, 1456 and 2271. Semester Hours 4 (3 lec/2 lab)

EMSP 1456 Patient Assessment and Airway Management

Studies the knowledge and skills necessary to reach competency in the assessment and management of patients with airway disease or injury. Scenarios, case studies and simulations included in this course assist the student to develop critical thinking skills in assessing and assisting with the treatment of patients with airway injuries or acute respiratory illnesses. Prerequisites: Current Texas EMT Certification, HPRS 1206 and BIOL 2404. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1161, 1162, 1173, 1438, 1455 and 2271. Semester Hours 4 (3 lec/2 lab)

EMSP 1501 Emergency Medical Technician – Basic

Introduction to the level of Emergency Medical Technician (EMT)-Basic. Includes all the skills necessary to provide emergency medical care at a basic life-support level with an ambulance service or other specialized services. Prerequisites: HPRS 1206, BIOL 2404, and CPR. Must pass Accuplacer reading test with a score of 82. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Semester Hours 5 (2 lec/8 lab)

EMSP 2143 Assessment Based Management (Capstone)

A capstone course covering comprehensive, assessment-based patient care management. Includes specific care when dealing with pediatric, adult, geriatric and special-needs patients. Prerequisite: Certificate of Paramedicine. Semester Hours 1 (0 lec/2 lab)

EMSP 2161 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 80 hours of ambulance ride-outs and 30 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Advanced level. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, and 1456. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1171, 2273, 2338 and 2348. Semester Hours 1 (6 clinical hours/week)

EMSP 2162 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 85 hours of ambulance ride-outs and 25 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Advanced level. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, 1456, 2161, 2338 and 2348. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2163, 2271, 2430, 2434, and 2444. Semester Hours 1 (5 clinical hours/week)

EMSP 2163 Clinical – Emergency Medical Technology/Technician

Provides hospital clinical and pre-hospital work-based learning experiences with the supervision of a qualified preceptor. Students interact directly with patients, family members, and hospital and pre-hospital employees and assist in the provision of care and services. Students complete 85 hours of ambulance ride-outs and 25 hours of emergency department experience and record all activities on detailed forms that are reviewed, approved and submitted to the course

instructor. Student documentation of patient care and procedures completed or assisted with are maintained in the student's file. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Includes hospital setting for Advanced level. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, 1456, 2161, 2338 and 2348. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2162, 2271, 2430, 2434, and 2444. Semester Hours 1 (6 clinical hours/week)

EMSP 2166 Practicum – Emergency Medical Technology/Technician

Provides practical, general training and experiences in the workplace. The college and employer will develop and document an individualized plan for the student. The plan relates the workplace training and experiences to the student's general and technical course of study. The guided external experiences may be paid or unpaid. This course may be repeated if topics and learning outcomes vary. This course has emphasis on various aspects of management of an EMS service. Prerequisites: EMT-Paramedic Certificate. Semester Hours 1 (10 clinical hours/week)

EMSP 2271 Simulation in Respiratory Care

Provides an advanced presentation of anatomy and physiology of the cardiovascular and pulmonary system. Case presentations and computer-assisted simulations assist the student to develop critical thinking skills in assessing and providing life-saving medical interventions in the pre-hospital environment. Prerequisites: EMT students must meet the requirements for admission into the EMT program. Advanced EMT students (EMT Intermediate and Paramedic level) must meet the requirements for admission into the Advanced EMT program. Semester Hours 2 (1 lec/2 lab)

EMSP 2338 EMS Operations

A detailed study of the knowledge and skills to safely manage the scene of an emergency. Prerequisites: Current Texas EMT Certification, HPRS 2306, BIOL 2404, EMSP 1161, 1162, 1438, 1455 and 1456. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2161, 2271 and 2348. Semester Hours 3 (3 lec)

EMSP 2348 Emergency Pharmacology

A comprehensive course covering all aspects of medication administration in emergency situations. This course provides a foundation for the indications, contraindications and administration of drugs used to treat patients with cardiac and other medical emergencies, as well as special populations. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455 and 1456. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact

EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2161, 2271 and 2338. Semester Hours 3 (2 lec/3 lab)

EMSP 2430 Special Populations

A detailed study of the considerations and challenges that must be addressed in order to competently provide emergency care to patients who are from nontraditional populations. This course provides essential information needed to develop a plan of care for neonatal, pediatric, gynecologic, obstetric, geriatric, psychiatric, chronically ill and/or otherwise diverse patients. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, 1456, 2161, 2338 and 2438. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2162, 2163, 2271, 2434 and 2444. Semester Hours 4 (3 lec/3 lab)

EMSP 2434 Medical Emergencies

A detailed study of the knowledge and skills in the assessment and management of patients with medical emergencies. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, 1456, 2161, 2338 and 2348. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2162, 2163, 2271, 2430 and 2444. Semester Hours 4 (3 lec/2 lab)

EMSP 2444 Cardiology

Assessment and management of patients with cardiac emergencies. Includes single and multi-lead ECG interpretation. Prerequisites: Current Texas EMT Certification, HPRS 1206, BIOL 2404, EMSP 1161, 1162, 1438, 1455, 1456, 2161, 2338 and 2348. Must pass Accuplacer reading test with a score of 82, math with a score of 63-95 and writing with a score of W5. Must contact EMS/Paramedicine director to be advised on immunization details, application process and deadlines. Corequisites: EMSP 1173, 2162, 2163, 2271, 2430 and 2434. Semester Hours 4 (3 lec/3 lab)

Philosophy

PHIL 1301 Introduction to Philosophy

Introduces basic questions that have intrigued philosophers through the centuries, along with an application of philosophical methods to selected contemporary issues. Topics include logic, theory of knowledge, freedom/determinism, philosophy of religion, ethics, and world views. Semester Hours 3 (3 lec)

PHIL 1316 Biblical Religions: Their History and Literature

An introduction to the Hebrew Bible and the Christian Scriptures and the historical and cultural contexts in which they developed. Consideration of the texts themselves – including their contents and major themes – and their interpretations will be included. Semester Hours 3 (3 lec)

PHIL 1317 Introduction to Christian History and Thought

An introduction to the major events, figures, issues, and ideas that shaped Christianity from the post-New Testament period to the present. Consideration of the development of varieties of Christianity – including the East-West Schism, the Protestant Reformation, and denominationalism – will be included. The beliefs, rituals, and practices in the various traditions will be examined. Semester Hours 3 (3 lec)

PHIL 2303 Logic

Includes the principles of logic, including deduction, induction, meanings and usages of language, argument and fallacies, the correct use of these principles in reasoning, and their practical application in everyday life. Semester Hours 3 (3 lec)

PHIL 2306 Ethics

Analyzes the basic principles and methods of evaluating human conduct, including critical examination of both classical and contemporary ethical theories, with emphasis upon their application to personal decision making and contemporary moral issues. Semester Hours 3 (3 lec)

PHIL 2374 Critical Thinking

Surveys thinking strategies useful in developing effective analytical and creative thinking skills, with an emphasis on developing autonomous (self-managed) thinking habits. Develops competencies in recognizing different types of reasoning, evaluating supporting ideas, and constructing arguments. Course includes both theory and practice for developing effective problem-solving skills. NOTE: PHIL 2303 and 2374 cannot both be taken for credit. Semester Hours 3 (3 lec)

PHIL 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of philosophy. Prerequisite: Must have passed the reading section of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

Physical Education and Health

Physical education courses at MCC are designed to provide activities and experiences that will be of value throughout the student's lifetime, as well as meeting the graduation requirements of senior institutions. Students who plan to major in physical education should see the section titled "Activities Courses for Majors" before selecting courses. Students may repeat an activity course for credit three times.

Students are required to take a minimum of two one-hour activity courses to graduate from MCC with an Associate of Arts or an Associate of Science degree. Four hours of health and physical education activity courses may count toward an Associate of Applied Science degree

(except in health career, commercial music, and certificate programs), if included on the A.A.S. degree plan. If the student is planning to transfer to a four-year institution following completion of a degree at McLennan Community College (A.A., A.S. or A.A.S.), the degree plan should contain the same number of health and physical education activity courses as required by the receiving institution.

PHED 1301 Foundations of Physical Education

Introduces the field of physical education and related areas for students planning to pursue a major in the profession. Emphasizes the nature and scope, philosophy, changing concepts, scientific foundation, professionalism, and career opportunities available in the field. Semester Hours 3 (3 lec)

PHED 1306 First Aid

Introduces the content of the American Red Cross Standard First Aid Course. Includes the following topics: emergency action principles, rescue breathing, choking, heart attack, cardiac arrest, CPR, secondary survey, bleeding, shock, burns, eye and nose injuries, bites, stings, fractures, dislocations, sprains, strains, poisoning, diabetic emergencies, stroke, seizures, temperature extremes, and rescues. CPR and First Aid certificates may be earned. Semester Hours 3 (3 lec)

PHED 1321 Sports Officiating

Emphasizes the theory and practice of sports officiating related to basketball and baseball/softball rules, interpretations, and officiating techniques. Semester Hours 3 (3 lec)

PHED 1322 Principles of Coaching

Introduces coaching principles and techniques utilized in developing a complete athletic program. Emphasizes specific areas of philosophy and the teaching of the basic fundamentals in regard to a particular sport, such as basketball or tennis. Semester Hours 3 (3 lec)

PHED 1338 Personal Trainer Certification

The National Council on Strength and Fitness Certified Personal Trainer is a college preparation course for the NCAA-accredited Board Certification course. The course is designed to combine knowledge acquired from an exercise science curriculum with practical application and emphasizes technical training skills necessary to uphold professional personal trainer standards. The NCSF-CPT has professional marketability and legal defensibility and is accepted at many gyms. Semester Hours 3 (3 lec)

PHED 1373 Wellness and Lifestyle

Introduces a broader approach to wellness to promote lifestyle changes. Emphasizes self-responsibility, self-assessment, behavior modification guidelines, and prescriptions and strategies to enhance optimal health and wellness. Semester Hours 3 (3 lec)

PHED 2156 Taping and Bandaging

Provides practical knowledge needed in the field of athletic training to give proper care and teach prevention of athletic injuries. Prerequisite: PHED 2356 or corequisite with PHED 2356. Semester Hour 1 (1 lab)

PHED 2356 Care and Prevention of Athletic Injuries

Prevention and care of athletic injuries with emphasis on qualities of a good athletic trainer, avoiding accidents and injuries, and recognizing signs and symptoms of specific sports injuries and conditions; includes the study of caring for sprains, bruises, wounds and other problems associated with athletic participation. Semester Hours 3 (3 lec)

Physical Education and Health Activity Courses

Physical education majors should register for two activity courses each semester to complete eight courses over a two-year period. The following courses should be taken: PHED 1104, 1106, 1109, 1110 or 1115, 1121 or 1125; any two from 1102, 1103, and 1121; and any two from 1123, 1130, 1133, and 1134.

PHED 1103 Tennis I

Introduces forehand, backhand, serve, and volley fundamentals in addition to history, rules, etiquette, care and selection of equipment, and basic singles and doubles strategies. This course is designed for the beginning student. Semester Hours 1 (3 activity)

PHED 1104 Volleyball I

Introduces the basic knowledge and skills involved in both coed and power volleyball play for men and women. Offensive and defensive skills and tactics, officiating, and rules of competition emphasized. Semester Hours 1 (3 activity)

PHED 1106 Figure and Weight Control

Emphasizes improving the physique through a variety of exercise programs and proper eating habits. Introduces various aerobic activities and diet concepts. Emphasis also placed on flexibility, toning, and cardiovascular development of the body. Semester Hours 1 (3 activity)

PHED 1108 Racquetball

Covers the beginning phases of racquetball skills and rules. All facets from warm-up to grip, stance, forehand, and backhand, plus singles and doubles strategies are presented. Semester Hours 1 (3 activity)

PHED 1109 Aerobic Dance and Exercise I

Provides vigorous workouts and dances set to music and designed to improve and maintain cardiovascular fitness, muscular fitness, and flexibility of the individual. Semester Hours 1 (3 activity)

PHED 1110 Weight Training

Introduces weight lifting programs that will increase strength and endurance and enhance the appearance of men and women. Emphasizes the use of free weights and circuit training on various types of weight machines. Provides knowledge on the safe and scientific use of weights to develop strength, power, endurance, and flexibility. Semester Hours 1 (3 activity)

PHED 1111 Aerobic Weight Training

Emphasizes an innovative fitness program that combines aerobics for maximum fat burning and weight training for muscle shaping into one efficient workout. The weight/aerobics combination maximizes fat loss while increasing cardiorespiratory fitness for fast, visible results. Semester Hours 1 (3 activity)

PHED 1112 Walking for Life

Introduces the fundamental concepts designed to get the student started with an appropriate walking program. It is personalized so the student can develop a habit of walking that suits the student's comfort level, goals, and lifestyles. Includes instructions concerning benefits of fitness walking, clothing and equipment, safety, warm-up/cool-down, flexibility, fitness walking test, walking programs, walking techniques, weight loss, and mental benefits. Semester Hours 1 (3 activity)

PHED 1113 Basketball

Introduces the basic knowledge and skills involved in both five-on-five and three-on-three basketball for men and women. Offensive and defensive skills, officiating, and rules of competition will be emphasized. Semester Hours 1 (3 activity)

PHED 1114 Water Aerobics

Emphasizes a series of continuous exercises and workouts done in the water to develop muscular strength, flexibility, and aerobic fitness. Semester Hours 1 (3 activity)

PHED 1115 Softball (Slow Pitch)

Introduces men and women students to basic slow pitch softball knowledge and skills. Covers instruction concerning equipment, fundamentals in throwing, catching, pitching, hitting, base running, base coaching, and rules of the game. Emphasizes offensive and defensive strategies and game play. Semester Hours 1 (3 activity)

PHED 1116 Aerobic Step Training

Provides a high-intensity, but low-impact mode of exercise used to develop cardiorespiratory fitness. Step training is an easy-to-learn, high-energy workout that involves stepping up and down on a step box with a variety of movements. Designed to burn fat and firm every major muscle group, this workout is adaptable for all fitness levels. Semester Hours 1 (3 activity)

PHED 1117 Aerobic Cross Training

Combines two or more activities designed to improve fitness, decrease injuries, provide rest for tired muscles and minimize boredom. This type of training program offers a fun workout that can develop skills and maintain good overall conditioning. Semester Hours 1 (3 activity)

PHED 1118 Contemporary Health

Emphasizes current health-related issues. Topics include stress management, emotional health, aging, death, sexually transmitted diseases, birth control, marriage, nutrition, fitness, alcoholism, drugs, and concepts in health care. Semester Hours 1 (3 lab)

PHED 1120 Physical Conditioning for Firefighters

Emphasizes cardiopulmonary endurance, flexibility, muscular strength, muscular endurance, and body composition. Specifically designed to prepare for the Candidate Physical Ability Test.

Prerequisite: Must be enrolled in the Firefighter's Candidate Program. Semester Hours 1 (3 activity)

PHED 1121 Golf I

Emphasizes skills and techniques necessary for the beginner to learn putting, chipping, and the use of irons and woods. Introduces history, rules, terms, etiquette, equipment, and golf course procedures necessary to be able to play a round of golf successfully. Semester Hours 1 (3 activity)

PHED 1122 Bowling

Provides a progressive exploration into the mechanics of bowling, including proper stance, starting positions, footwork, arm swing, timing, finish at foul line, release of the ball, and major emphasis of the hook ball. Strike angles and action, spare angles, increasing and decreasing speeds, as well as ball selection, lane recognition and conditions, and pin-setting machines are also emphasized. A class league is also introduced to expose the bowler to a bowling team and league situation. Semester Hours 1 (3 activity)

PHED 1123 Beginning Swimming (Non-Swimmer)

Introduces basic swimming skills to the non-swimmer. Covers the front crawl, elementary backstroke, breath control, basic floats, water entry, safety information, personal flotation devices, and rescue breathing. Semester Hours 1 (3 activity)

PHED 1124 Volleyball II

Emphasizes refinement of volleyball skills, rules and strategies necessary for more complex competitive play. Prerequisite: PHED 1104, participation on high school varsity volleyball team or consent of instructor. Semester Hours 1 (3 activity)

PHED 1125 Social Dance

Introduces recreational dances and provides an opportunity for social interaction. Demonstrates current and popular dance styles and techniques. Semester Hours 1 (3 activity)

PHED 1129 Golf II

Emphasizes improving fundamentals, rules and etiquette, terms, equipment, club repair, mental aspects of the game, mechanical analysis of the swing, strategy, and actual course playing. Course is designed for the student who possesses beginning skills. Prerequisite: Consent of the instructor or PHED 1121. Semester Hours 1 (3 activity)

PHED 1130 Intermediate Swimming

Provides progressive swimming skill development in the front and back crawls, breast and side strokes, elementary backstroke, survival stroke, floats, turns, personal flotation devices, surface dives, diving, underwater swimming, wading rescues, extensions, and rescue breathing. Prerequisite: PHED 1123. Semester Hours 1 (3 activity)

PHED 1131 Tennis II

Emphasizes advanced strokes, including overhead, lob, half volley, and singles and doubles strategies. Prerequisite: PHED 1103 with a grade of B or better. Semester Hours 1 (3 activity)

PHED 1132 Aerobic Dance II

Emphasizes continued improvement and maintenance of cardiovascular fitness, muscular fitness, and flexibility for the more advanced student. Prerequisite: PHED 1109 or consent of instructor. Semester Hours 1 (3 activity)

PHED 1133 Life Guard Training

Emphasizes the certification of swimmers based on the American Red Cross standards in life guard training skills. Focuses on the review and refinement of the major swimming strokes, life guarding, and rescue procedures. Red Cross certificates may be earned. Semester Hours 1 (3 activity)

PHED 1134 Water Safety Instructors Course

Provides skills in effective instructional preparation, explanation, demonstration, and critique methods utilized in teaching swimming. Red Cross certificates may be earned. Semester Hours 1 (3 activity)

PHED 1136 Varsity Basketball

Provides training designed specifically for the varsity athlete. May be repeated for credit. Prerequisite: Consent of instructor. Semester Hours 1 (3 activity)

PHED 1137 Varsity Baseball

Provides training designed specifically for the varsity athlete. May be repeated for credit. Prerequisite: Consent of instructor. Semester Hours 1 (3 activity)

PHED 1138 Varsity Dance

Develops skills and techniques of precision group performance. Emphasizes precision drilling, dancing, and marching formations for the experienced dancer. Prerequisite: Consent of instructor. May be repeated for credit. Semester Hours 1 (3 activity)

PHED 1139 Varsity Golf

Provides training designed specifically for the varsity athlete. May be repeated for credit. Prerequisite: Consent of instructor. Semester Hours 1 (3 activity)

PHED 1141 Varsity Softball

Provides training designed specifically for the varsity athlete. May be repeated for credit. Prerequisite: Consent of instructor. Semester Hours 1 (3 activity)

PHED 1142 Fitness Over 50

Provides knowledge and training specifically designed for people over age 50. This course provides a variety of safe and effective training programs that emphasize moderate- to low-intensity exercises to improve and maintain cardiovascular fitness, muscular fitness, flexibility, and body composition. Semester Hours 1 (3 activity)

PHED 1143 Disc Golf

Disc golf, sometimes called Frisbee golf, is a game where individual players throw a flying disc into a basket or at a target for eighteen holes. It is similar to traditional golf and uses many of the same rules and terminology. The objective of the game is to traverse a course from beginning to end with the fewest number of throws of the disc. Semester Hours 1 (3 activity)

PHED 1144 Soccer

This course will provide instruction, practice, and analysis in the techniques of soccer. The course will develop knowledge of rules, scoring, game strategies, as well as individual and team concepts. Specific skill development includes dribbling, passing, trapping, shooting, and goal keeping. Semester Hours 1 (3 activity)

PHED 1145 Hiking & Backpacking

An activity course designed to teach the value of outdoor experiences. Emphasis is placed on the knowledge and skills necessary for safe, enjoyable hiking, camping, and backpacking experiences. Topics include ecology, clothing, equipment, emergency care, hiking, camping, and backpacking skills. Students provide personal equipment. Semester Hours 1 (3 activity)

PHED 1146 Wallyball

Variation of volleyball played on a racquetball court. Provides competition and great exercise to improve fitness condition. Semester Hours 1 (3 activity)

PHED 1147 Pilates and Yoga Exercise

Pilates and yoga are gentle, yet effective, training methods that will strengthen, shape, stretch, define, and relax the body. Both improve posture, core strength, correct poor positioning and create awareness of the body. Semester Hours 1 (3 activity)

PHED 1148 Tae Bo/Kickboxing

Provides a muscle and fitness kickboxing workout that combines the art of self-defense, dance, and boxing in an easy-to-learn workout. The focus is on how the mind and body work in an aerobic capacity, applying weight training, flexibility, kicks and punches to provide a continuous cardiovascular workout. Semester Hours 1 (3 activity)

PHED 1150 Lap Swimming

Emphasizes the sidestroke, backstroke, breaststroke, crawlstroke or competitive-style swimming strokes for conditioning. May be repeated for credit. Prerequisite: PHED 1130 or consent of instructor. Semester Hours 1 (3 activity)

PHED 2100 Stretching and Flexibility

Teaches six specific stretching techniques: Static Stretching; Static Active Stretching; Ballistic Stretching; Dynamic Stretching; Isometric Stretching; PNF Stretching. Semester Hour 1 (3 activity)

PHED 2101 Stretching and Flexibility 2

Designed for advanced study and practical work. It will target specific stretching and flexibility routines for each individual student. Prerequisite: PHED 2100. Semester Hour 1 (3 activity)

PHED 2102 Cycling

An introduction course covering bicycling knowledge, skills, and safety. Class rides will be from eight to ten miles. Required equipment: Bicycle (safe dependable, functioning 10 or more speeds), approved helmet and means repairing flat tire (frame pump, tire tools, patch kit, and wrench to get hub nut off, if needed). Semester Hour 1 (3 activity)

PHED 2103 Beginning Mountain Biking

This course is designed to prepare students for a lifetime of enjoyable mountain bike riding. Emphasis will be placed on the development of skills necessary to safely climb, descend, and maneuver a mountain bike through technical areas on various terrains, as well as, maintain the bike properly. Students must be able to transport their bikes to local parks. Semester Hour 1 (3 activity)

Physical Therapist Assistant

PTHA 1321 Pathophysiology

Studies the pathogenesis, prognosis, and therapeutic management of disease/conditions commonly encountered in physical therapy. Prerequisites: PTHA 1409 and 1413. Semester Hours 3 (3 lec)

PTHA 1361 Clinical Physical Therapist Assistant I

Provides health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisites: PTHA 1321, 1431, and 2409. Semester Hours 3 (15 clinical hours/week)

PTHA 1391 Special Topics Physical Therapy (Honors)

Academic Cooperative in Physical Therapy for students in Honors College. Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 3 (3 lec)

PTHA 1409 Introduction to Physical Therapy

Introduces the profession of physical therapy, including the exploration of the historical and current scope of physical therapy, and lab procedures basic to patient handling, functional skills, and data collection techniques. Prerequisites: Admission to PTA program. Semester Hours 4 (3 lec/4 lab)

PTHA 1413 Functional Anatomy

Studies human anatomy and its application to the motion of the musculoskeletal system as it relates to normal activities and dysfunctions. Integration of skills related to the kinesiological assessment of the human body. Prerequisites: Admission to the PTA program; BIOL 2401 or

other science (prerequisite or corequisite). Corequisite: PTHA 2201. Semester Hours 4 (3 lec/4 lab)

PTHA 1431 Physical Agents

Studies the biophysiological principles, assessment, and application of therapeutic physical agents with specific emphasis on indications, contraindications, medical efficacy, and physiological effects. Prerequisites: PTHA 1409 and 1413. Semester Hours 4 (3 lec/4 lab)

PTHA 2201 Essentials of Data Collection

Studies data collection techniques used in physical therapy to prepare the physical therapist assistant to assist physical therapy management. Corequisite: PTHA 1413. Semester Hours 2 (1 lec/3 lab)

PTHA 2217 Issues in Health Care

Explores the organizational patterns, administrative principles, legal and ethical issues, communications, and licensure and employment acquisition skills in physical therapy and health care. Prerequisites: PTHA 2201 and 2431. Semester Hours 2 (2 lec)

PTHA 2362 Clinical Physical Therapist Assistant II

Provides health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisites: PTHA 2431 and 2201. Semester Hours 3 (15 clinical hours/week)

PTHA 2363 Clinical Physical Therapist Assistant III (Capstone)

Provides health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Prerequisites: PTHA 2431 and 2435. Semester Hours 3 (15 clinical hours/week)

PTHA 2409 Therapeutic Exercise

Examines concepts, principles, and application of techniques related to therapeutic exercise and functional training. Prerequisites: PTHA 1409 and 1413. Semester Hours 4 (3 lec/4 lab)

PTHA 2431 Management of Neurological Disorders

Integrates previously learned and new skills/techniques into the comprehensive rehabilitation of selected neurological disorders. Prerequisite: Successful completion of first-year PTHA courses. Corequisite: PTHA 2435. Semester Hours 4 (3 lec/3 lab)

PTHA 2435 Rehabilitation Techniques

Integrates previously learned and new skills/techniques into the comprehensive rehabilitation of selected long-term pathologies and orthopedic problems. Prerequisite: PTHA 2201. Corequisite: PTHA 2431. Semester Hours 4 (3 lec, 3 lab)

Physics

PHYS 1401 General Physics I

Algebra-based physics sequence, with laboratories, that includes a study of kinematics, mechanics, rotational mechanics and thermodynamics. Prerequisite: Credit for or concurrent enrollment in MATH 1316 or equivalent or consent of division chair. Semester Hours 4 (3 lec/3 lab)

PHYS 1402 General Physics II

Algebra-based physics sequence, with laboratories, that includes the study of wave mechanics, optics, electricity, magnetism and radioactivity. Prerequisite: PHYS 1401. Semester Hours 4 (3 lec/3 lab)

PHYS 1403 Astronomy: Stars and Galaxies

This course covers the fundamentals of stellar and galactic astronomy. Topics include properties of stars, nebulae, stellar evolution, neutron stars and black holes, galaxies and quasars, and cosmology. Semester Hours 4 (3 lec/3 lab)

PHYS 1404 Astronomy: Solar System

The course covers the fundamentals of astronomy with special emphasis on the solar system. Topics include motion and structure of the sun, planets and their moons, asteroids, comets, and meteorites. Semester Hours 4 (3 lec/3 lab)

PHYS 1405 Elementary Physics I

Provides students with a laboratory-oriented introduction to the concepts of mechanics, properties of matter and thermodynamics. The intent of the course is to provide each student a better understanding of the theories of physics and their application to current societal issues and technological applications. Semester Hours 4 (3 lec/3 lab)

PHYS 1407 Elementary Physics II

Provides students with a laboratory-oriented introduction to the concepts of electricity, magnetism, wave mechanics, light, optics, and topics in modern physics. The intent of the course is to provide each student a better understanding of the theories of physics and their application to current societal issues and technological applications. Semester Hours 4 (3 lec/3 lab)

PHYS 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in the physical sciences. In conjunction with class seminars, the individual student

will set specific goals and objectives in the study of inanimate objects, processes of matter and energy, and associated phenomena. Semester Hours 3 (3 lec)

PHYS 2425 Principles of Physics I

Calculus-based physics course that includes a study of linear mechanics, energy, rotational mechanics and harmonic motion. Designed for pre-engineering, physics, mathematics and chemistry majors. Prerequisite: MATH 2413 or consent of division chair. Semester Hours 4 (3 lec/3 lab)

PHYS 2426 Principles of Physics II

Calculus-based physics course that includes a study of electricity and magnetism, DC and AC circuits, waves, sound, light, and optics. Prerequisite: PHYS 2425 and MATH 2414 or consent of division chair. Semester Hours 4 (3 lec/3 lab)

Polysomnography (See Electroneurodiagnostics)

Psychology

PSYC 1100 Learning Framework

A study of the 1) research and theory in the psychology of learning, cognition and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. (Cross-listed as EDUC 1100) Semester Hour 1 (1 lec)

PSYC 1200 Learning Framework

A study of the 1) research and theory in the psychology of learning, cognition and motivation, 2) factors that impact learning, and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. (Cross-listed as EDUC 1200) Prerequisite: Must have passed the reading portion of the THEA or approved alternative test or concurrent enrollment in READ 0302. Semester Hours 2 (1 lec)

PSYC 1300 Learning Framework

A study of the 1) research and theory in the psychology of learning, cognition, and motivation; 2) factors that impact learning; and 3) application of learning strategies. Theoretical models of strategic learning, cognition, and motivation serve as the conceptual basis for the introduction of college-level student academic strategies. Students use assessment instruments (e.g., learning inventories) to help them identify their own strengths and weaknesses as strategic learners. Students are ultimately expected to integrate and apply the learning skills discussed across their own academic programs and become effective and efficient learners. Students developing these skills should be able to continually draw from the theoretical models they have learned. Prerequisites: Must have passed the reading portion of the THEA or approved alternative test or concurrent enrollment in READ 0302. Semester Hours 3 (3 lec)

PSYC 2301 General Psychology

Surveys the field of psychology, including scientific methods used in psychology, development of personality, learning, sensation and perception, and abnormal psychology. Prerequisite: Must have passed the reading portion of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

PSYC 2302 Applied Psychology – Criminal Psychology

Presents an overview of the current paradigms and research regarding violent criminal offenders. Provides an introduction to the continuum of psychopathology. Traces development of the brain and personality through and beyond adolescence. Special attention will be paid to sexual predators and serial killers. Semester Hours 3 (3 lec)

PSYC 2314 Human Growth and Development

This course surveys the patterns of developmental change occurring in the individual from conception to the end of the life cycle. Students will be introduced to the major theoretical concepts of developmental milestones of the human life cycle. Prerequisite: PSYC 2301 or consent of instructor. Semester Hours 3 (3 lec)

PSYC 2315 Psychology of Adjustment

Study of the processes involved in adjustment of individuals to their personal and social environments. Semester Hours 3 (3 lec)

PSYC 2316 Psychology of Personality

Study of the various approaches to determinants, development, and assessment of personality. Includes an examination of the major personality theories and ideas within the field of psychology. Prerequisites: PSYC 2301. Semester Hours 3 (3 lec)

PSYC 2319 Social Psychology

Provides a study of the experience and behavior of the individual in relation to social situations. Emphasis on social interaction, the self, attitudes, and group processes. Prerequisites: PSYC 2301 or SOCI 1301. NOTE: Credit will not be given for both PSYC 2319 and SOCI 2326. Semester Hours 3 (3 lec)

PSYC 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in psychology. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of human social behavior and/or social institutions. Prerequisite: Must have passed the reading portion of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

Radiologic Technology**CTMT 2232 Principles of Computed Tomography**

An introduction to the concepts and physical principles employed in computed tomography imaging techniques. Interaction between x-rays and matter and concepts of radiation detectors and digital imaging are emphasized. Current knowledge and theory of the biologic effect of x-rays are explored with an emphasis on how they relate to data acquisition, image production, and control and manipulation of image production. Included also are quality control issues and factors involved in purchasing decisions. Semester Hours 2 (2 lec/1 lab)

CTMT 2336 Computed Tomography Equipment and Methodology

A study of the actual operation and operational control of computed tomographic equipment. Focuses on routine protocols, image quality, and quality control of computed tomography. Includes theory and application of computed tomographic equipment and the principles of patient imaging techniques utilizing the equipment. Semester Hours 3 (3 lec)

CTMT 2460 Clinical – Computed Tomography Technology

A basic, intermediate, or advanced type of health professions work-based instruction that helps students synthesize new knowledge, apply previous knowledge or gain experience managing the workflow. Practical experience is simultaneously related to theory. Close and/or direct supervision is provided by the clinical professional (faculty or preceptor), generally in a clinical setting. Clinical education is an unpaid learning experience. Semester Hours 4 (24 clinical hours/week)

RADR 1203 Patient Care

Introduces the historical development of radiography, basic radiation protection, an introduction to medical terminology, ethical and legal issues for health care professionals, and an orientation to the program and to the health care system. Patient assessment, infection control procedures, emergency and safety procedures, communication and patient interaction skills, and basic pharmacology are also included. Semester Hours 2 (2 lec)

RADR 1260 Clinical I – Radiologic Technology/Science – Radiographer

Provides detailed education, training, and work-based experience, as well as direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides for competency-based clinical education in radiographic examination of the procedures addressed in RADR 1311. Semester Hours 2 (12 clinical hours/week)

RADR 1261 Clinical II – Radiologic Technology/Science – Radiographer

Provides detailed educational, training and work-based experience, as well as direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides for competency-based clinical education in radiographic examinations in continuation with the student's clinical competency profile. Semester Hours 2 (12 clinical hours/week)

RADR 1311 Basic Radiographic Procedures

Introduces radiographic positioning terminology, the proper manipulation of equipment, positioning and alignment of the anatomical structure and equipment, and evaluation of images for proper demonstration of basic anatomy. Covers positioning of the chest, abdomen, upper and lower extremities, shoulder and pelvic girdles. Includes common procedures utilizing contrast media. Prerequisites: Program Acceptance. Semester Hours 3 (3 lec/2 lab)

RADR 1313 Principles of Radiographic Imaging I

Analyzes radiographic image qualities and the effects of exposure variables upon these qualities. Semester Hours 3 (3 lec)

RADR 1660 Clinical III – Radiologic Technology Science – Radiographer III

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Semester Hours 6 (31 clinical hours/week)

RADR 2205 Principles of Radiographic Imaging II

Continues the study of radiographic imaging technique formulation, image quality assurance, and the synthesis of all variables in image production. Semester Hours 2 (2 lec)

RADR 2217 Radiographic Pathology

Introduces the disease process and common diseases and their appearance on medical images. Semester Hours 2 (2 lec/1 lab)

RADR 2240 Sectional Anatomy for Medical Imaging

In-depth coverage of anatomic relationships that are present under various sectional orientations as depicted by computed tomography and magnetic or resonance imaging. Semester Hours 2 (2 lec)

RADR 2301 Intermediate Radiographic Procedures

Continues the study of the proper manipulation of radiographic equipment, positioning and alignment of the anatomical structure and equipment, and evaluation of images for proper demonstration of intermediate anatomy and related pathology. Introduces students to positioning of the vertebral column, bony thorax, breast, and cranium. Patient care techniques are heavily stressed. Prerequisite: RADR 1311. Semester Hours 3 (3 lec/2 lab)

RADR 2309 Radiographic Imaging Equipment

Studies the equipment and physics of x-ray production, basic x-ray circuits, and the relationship of equipment components to the imaging process. Semester Hours 3 (3 lec/1 lab)

RADR 2313 Radiation Biology and Protection

Studies the effects of radiation exposure on biological systems, typical medical exposure levels, methods for measuring and monitoring radiation, and methods for protecting personnel and patients from excessive exposure. Semester Hours 3 (3 lec)

RADR 2333 Advanced Medical Imaging

Introduces to the use of computers in medical imaging and a survey of specialized imaging modalities. Includes concepts and theories of equipment operations and their integration for medical diagnosis. Semester Hours 3(3 lec/1 lab)

RADR 2360 Clinical IV – Medical Radiologic Technology

Provides detailed educational, training, and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides for competency-based clinical education in radiographic examination of the gastrointestinal and genitourinary tracts. Semester Hours 3 (18 clinical hours/week)

RADR 2361 Clinical V – Medical Radiologic Technology

Provides detailed educational, training, and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation, and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides for competency-based clinical education in radiographic examinations of the cranium and face. Semester Hours 3 (18 clinical hours/week)

RADR 2662 Clinical – Medical Radiologic Technology (Capstone)

Provides detailed education, training and work-based experience and direct patient/client care, generally at a clinical site. Specific detailed learning objectives are developed for each course by the faculty. On-site clinical instruction, supervision, evaluation and placement is the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides clinical practice in specialized imaging modalities. This Capstone experience focuses on the synthesis of professional knowledge, skills and attitudes in preparation for professional employment and lifelong learning. Semester Hours 6 (31 clinical hours/week)

Reading

READ 0300 Fundamentals of Reading

Introduces the student to the process of reading and focuses on comprehension at the paragraph level. The following comprehension skills will be emphasized: topic, main idea, major and minor supporting details of the paragraph, and organizational structures. Vocabulary development will center on the use of word parts and context clues to determine meanings of new words. An introduction to the use of the dictionary and thesaurus will be provided. Semester Hours 3 (3 lec/2 lab)

READ 0301 Introduction to College Reading

Provides instruction in vocabulary and comprehension skills necessary for college success. Emphasis is on literal comprehension skills involved in the reading process and includes some textbook study strategies. Especially helpful to students who have not been in school for several years as well as recent high school graduates needing to improve reading skills. Prerequisite: READ 0300 or a satisfactory score on the THEA or approved alternative test. Semester Hours 3 (3 lec)

READ 0302 Reading Comprehension and Analysis

Provides instruction in critical reading and thinking skills necessary for college reading and research. Includes instruction in critical analysis, critical interpretation, and advanced instruction in vocabulary and literal comprehension. Designed for students who have mastered literal comprehension skills but desire mastery of higher-order thinking and reading skills. Prerequisite: READ 0301 or a satisfactory score on the THEA or approved alternative test. Semester Hours 3 (3 lec)

Real Estate**RELE 1105 Uniform Standards of Professional Appraisal Practice**

Provides instruction on current provisions of the Uniform Standards of Professional Appraisal Practice (USPAP). Semester Hours 1 (1 lec)

RELE 1191 Special Topics in Real Estate

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec)

RELE 1300 Texas Contracts and Addenda

Promulgated Contract Forms, which shall include but is not limited to unauthorized practice of law, broker-lawyer committee, current promulgated forms, commission rules governing use forms and case studies involving use of forms. Semester Hours 3 (3 lec)

RELE 1301 Principles of Real Estate I

An overview of licensing as a real estate broker and salesperson, ethics of practice, titles to and conveyancing of real estate, legal descriptions, law of agency, deeds, encumbrances and liens, distinctions between personal and real property, contracts, appraisal, finance and regulations, closing procedures, and real estate mathematics. Covers at least three hours of classroom instruction of federal, state, and local laws relating to housing discrimination, housing credit discrimination, and community reinvestment. Texas Real Estate Commission (TREC) requires this course before sitting for the salesperson and broker licensure exam. Semester Hours 3 (3 lec)

RELE 1303 Real Estate Appraisal

A study of the central purposes and functions of an appraisal, social and economic determinant of value, appraisal case studies, cost, market data and income approaches to value estimates, final correlations, and reporting. Semester Hours 3 (3 lec)

RELE 1307 Real Estate Investment

A study of the characteristics of real estate investments. Includes techniques of investment analysis, time-valuing money, discounted and non-discounted investment criteria, leverage, tax shelters, depreciation, and applications to property tax. Semester Hours 3 (3 lec)

RELE 1309 Real Estate Law

Provides a study of legal concepts of real estate, land description, real property rights, estates in land, contracts, conveyances, encumbrances, foreclosures, recording procedures, and evidence of title. Semester Hours 3 (3 lec)

RELE 1311 Real Estate Contracts

A study of the elements of a contract, offer and acceptance, statute of frauds, specific performance and remedies for breach, unauthorized practice of law commission rules relating to use of adopted forms, and owner disclosure requirements. Semester Hours 3 (3 lec)

RELE 1315 Property Management

A study of the role of the property manager, landlord policies, operational guidelines, leases, lease negotiations, tenant relations, maintenance, reports, habitability laws, and the Fair Housing Act. Semester Hours 3 (3 lec)

RELE 1319 Real Estate Finance

An overview of monetary system, primary and secondary money markets, sources of mortgage loans, federal government programs, loan applications, processes and procedures, closing costs, alternative financial instruments, equal credit opportunity, laws affecting mortgage lending, and the state housing agency. Prerequisite: RELE 1301, concurrent enrollment in RELE 1301, or consent of program director. Semester Hours 3 (3 lec)

RELE 1321 Real Estate Marketing

A study of real estate professionalism and ethics, characteristics of successful salespersons, time management, psychology of marketing, listing procedures, advertising, negotiation and closing financing, and the Deceptive Trade Practice Act. Semester Hours 3 (3 lec)

RELE 1325 Real Estate Mathematics

Mathematical logic and basic arithmetic skills, including percentages, interest, time-value of money, depreciation, amortization, proration, and estimation of closing statement. Semester Hours 3 (3 lec)

RELE 1327 Real Estate Commercial Appraisal

Principles and techniques used in the valuation of commercial property. Topics include purposes and functions of an appraisal, social and economic forces affecting value, appraisal case studies, cost, and income approaches to value. Semester Hours 3 (3 lec)

RELE 1331 Farm and Ranch Real Estate

This course focuses on land value, land use, federal subsidies, environmental compliance issues, soil conservation, and highest and best use of land. Semester Hours 3 (3 lec)

RELE 1338 Principles of Real Estate II

Provides an overview of licensing as a real estate broker and salesman, ethics of practice, titles to and conveyancing of real estate, legal descriptions, law of agency, deeds, encumbrances and liens, distinctions between personal and real property, contracts, appraisal, finance and regulations, closing procedures, and real estate mathematics. Covers at least three hours of classroom instruction on federal, state, and local laws relating to housing discrimination, housing credit discrimination, and community reinvestment. Prerequisite: RELE 1301. Semester Hours 3 (3 lec)

RELE 2103 Real Estate Mandatory Continuing Education

Provides mandatory continuing education as required by the Texas Real Estate Commission. Includes updates on the profession and legal topics. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 1 (1 lec)

RELE 2301 Law of Agency

A study of law of agency, including principal-agent and master-servant relationships, the authority of an agent, the termination of an agent's authority, the fiduciary and other duties of an agent, employment law, deceptive trade practices, listing or buying procedures, and the disclosure of an agency. Texas Real Estate Commission requires this course before sitting for the salesman licensure exam. Semester Hours 3 (3 lec)

RELE 2311 Fundamentals of Mortgage Lending

A study of the theoretical and practical framework necessary to understand the complex field of mortgage lending with emphasis on loan application, qualifications, and underwriting. Also includes the role of lenders, security instruments, residential loan appraisals, and closing and funding the loan. Semester Hours 3 (3 lec)

RELE 2331 Real Estate Brokerage

A study of law of agency, planning and organization, operational policies and procedures, recruiting, selection and training of personnel, records and control, and real estate firm analysis and expansion criteria. Semester Hours 3 (3 lec)

RELE 2589 Internship – Real Estate (Capstone)

A work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. A learning plan is developed by the college and the employer. This is a Capstone course. This may be a paid or unpaid experience. The work environment is arranged by the student. Prerequisites: An approved work station and consent of the program director. (See [Guidelines for Internships.](#)) Semester Hours 5 (1 lec/15-20 lab)

Religion (See Philosophy – PHIL 1316, 1317)

Respiratory Care Technology

RSPT 1227 Applied Physics for Respiratory Care

Review of the theoretical and practical applications of mathematics and physics with focus on the applicability and clinical utility of the modalities, techniques, procedures, equipment, and diagnostic tests utilized in respiratory care. Prerequisite: RSPT 1371. Semester Hours 2 (2 lec)

RSPT 1241 Respiratory Home Care/Rehabilitation

A study of respiratory home care/rehabilitation equipment, procedures and patient education. Emphasizes treatment of patients in home care and alternate settings. Prerequisites: RSPT 2414. Semester Hours 2 (2 lec)

RSPT 1260 Clinical – Respiratory Care Therapy/Therapist

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student; provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: arterial blood gas sampling and analysis, lung expansion therapy, postural drainage and percussion, manual resuscitation devices — CPR, pulse oximetry, patient assessment (patient history, vital signs and physical assessment), medical terminology and symbols, infection control, medical gas therapy, oxygen analyzers and humidity and aerosol therapy. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Prerequisite: RSPT 1266. Semester Hours 2 (11 clinical hours/week)

RSPT 1266 Practicum – Respiratory Care

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student; provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: arterial blood gas sampling and analysis, lung expansion therapy, postural drainage and percussion, manual resuscitation devices - CPR, pulse oximetry, patient assessment (patient history, vital signs and physical assessment), medical terminology and symbols, infection control, medical gas therapy, oxygen analyzers and humidity and aerosol therapy. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Prerequisite: RSPT 1371. Semester Hours 2 (16 clinical hours/week)

RSPT 1267 Practicum – Respiratory Care

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student; provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: arterial blood gas sampling and analysis, therapeutic procedures to achieve adequate spontaneous and artificial ventilation, as well as review lung expansion therapy, postural drainage and percussion, artificial airways, manual resuscitation devices, tracheostomy care, suctioning, pulse oximetry, patient assessment

(patient history, vital signs and physical assessment), medical terminology and symbols, infection control, medical gas therapy, oxygen analyzers, and humidity and aerosol therapy. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Prerequisite: RSPT 1266. Semester Hours 2 (16 clinical hours/week)

RSPT 1340 Advanced Cardiopulmonary Anatomy and Physiology

Provides an advanced presentation of anatomy and physiology of the cardiovascular and pulmonary systems. The student will describe and explain advanced concepts of cardiopulmonary anatomy and physiology; describe the neurology of breathing, ventilation/perfusion concepts, and gas transport from the lung to the tissues. Prerequisites: BIOL 2401 and 2402 or BIOL 2404. Semester Hours 3 (3 lec)

RSPT 1371 Introduction to Respiratory Care

An introduction to the field of respiratory care. Topics include the history of respiratory care, hospital organization, medical malpractice, ethics, vital signs, body mechanics, basic cardiopulmonary assessment, infection control, and cardiopulmonary resuscitation (CPR). Semester Hours 3 (3 lec)

RSPT 1410 Respiratory Care Procedures I

Essential knowledge of the equipment and techniques used in the treatment of cardiopulmonary disease. Content areas include: oxygen therapy, humidity and aerosol therapy, lung expansion therapy, bronchial hygiene therapy, pulse oximetry, arterial blood gas sampling and interpretation, intravenous catheter insertion. Prerequisite: RSPT 1371. Semester Hours 4 (3 lec/4 lab)

RSPT 1411 Respiratory Care Procedures II

Provides student with essential knowledge of airway care and mechanical ventilation. Airway care includes indications, techniques, equipment, and hazards and complications. Mechanical ventilation includes indications, initiation, modes, clinical application, management, complications, and weaning. Prerequisite: RSPT 1410. Semester Hours 4 (3 lec/4 lab)

RSPT 2139 Advanced Cardiac Life Support

Designed to develop the cognitive and psychomotor skills necessary for resuscitation of the adult. Strategies for managing and stabilizing the cardiopulmonary-arrested patient will be included. The student will describe the principles, techniques, and complications of intravenous and electrical therapy, airway control, ventilation, and supplemental oxygen, as well as analyze cardiac dysrhythmias and follow through with appropriate therapeutic intervention. Prerequisite: RSPT 1267. Semester Hours 1 (3 lab)

RSPT 2230 Examination Preparation (Capstone)

Comprehensive review for selected respiratory care credentialing examinations. Test matrices and exam content areas for selected exams will be presented. Prerequisite: RSPT 2266. Semester Hours 2 (1 lec/2 lab)

RSPT 2233 Respiratory Care Case Management

Preparation and presentation of the case study. Instruction in the investigation, organization, and presentation of the material, including preparation of questions for group discussion. Prerequisite: RSPT 1267. Semester Hours 2 (2 lec)

RSPT 2258 Respiratory Care Patient Assessment

Instruction in the integration of patient examination techniques, clinical lab studies, x-ray, pulmonary function, arterial blood gases, and invasive and non-invasive hemodynamics results in patient assessment. Prerequisite: RSPT 1411. Semester Hours 2 (2 lec)

RSPT 2266 Practicum – Respiratory Care

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student; provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: advanced adult, pediatric, and neonatal patient assessment / history, vital signs, and physical assessment, basic bedside spirometry and advanced pulmonary function testing, oximetry, arterial line sampling, blood gas analysis and interpretation, advanced medical terminology and medical symbols and definitions, infection control, invasive airway management/ monitoring, intensive care radiological interpretation, emergency life support / resuscitation, intensive patient care, skills in chest physiotherapy, medical gas therapy, oxygen analysis, mechanical ventilation, humidity /aerosol therapy. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Prerequisite: RSPT 1267. Semester Hours 2 (16 clinical hours/week)

RSPT 2267 Practicum – Respiratory Care

Practical, general workplace training supported by an individualized learning plan developed by the employer, college, and student; provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: advanced adult, pediatric, and neonatal patient assessment / history, vital signs, and physical assessment, bedside spirometry and pulmonary function testing, oximetry, arterial line sampling, analysis and interpretation, advanced medical terminology and medical symbols definitions, infection control, invasive airway placement / management/ monitoring, intensive care radiological interpretation, emergency life support / resuscitation, critical and intensive patient care, skills in chest physiotherapy, medical gas therapy, oxygen analysis, mechanical ventilation, humidity /aerosol therapy skills and knowledge. Specific learning objectives are developed by the faculty. On-site clinical instruction, supervision, evaluation and placement are the responsibility of the college faculty. Clinical experiences are unpaid external learning experiences. Provides clinical practice to develop affective and psychomotor (and reinforce cognitive) skills to include: rehabilitation

and care of the critically ill adult patients. Prerequisite: RSPT 2266. Semester Hours 2 (24 clinical hours/week)

RSPT 2305 Pulmonary Diagnostics

Introduces the theories and techniques involved in pulmonary function testing diagnostics with emphasis on blood gas theory and analysis, quality control, oximetry, and capnography. The student will perform and interpret basic and advanced pulmonary function testing, describe principles/concepts involved in blood gas analysis and quality control, and describe the application/troubleshooting of oximetry and capnography. Semester Hours 3 (3 lec)

RSPT 2310 Cardiopulmonary Disease

Provides a discussion of pathogenesis, pathology, diagnosis, history, prognosis, manifestations, treatment, and detection of cardiopulmonary diseases. Prerequisites: RSPT 1411. Semester Hours 3 (3 lec)

RSPT 2317 Respiratory Care Pharmacology

A study of pharmacological principles/practices of drugs that affect the cardiopulmonary systems. Emphasis on classification, route of administration, dosages/calculations, and physiological interactions. Prerequisite: RSPT 1371. Semester Hours 3 (3 lec)

RSPT 2353 Neonatal/Pediatric Cardiopulmonary Care

Provides a study of acute care, monitoring, and management as applied to the neonatal and pediatric patient. The student will describe normal and abnormal neonatal and pediatric anatomy and physiology and select, adjust, check, and modify equipment to manage the high-risk neonatal or pediatric patient. Prerequisites: RSPT 2414. Semester Hours 3 (3 lec)

RSPT 2414 Mechanical Ventilation

Preparation to conduct the therapeutic procedures to achieve adequate, spontaneous, and artificial ventilation with emphasis on ventilator classification, methods, principles, and operational characteristics. Also included are the indications, complications, and physiologic effects/principles of mechanical ventilation. Prerequisite: RSPT 1411. Semester Hours 4 (3 lec/4 lab)

Social Work

SOCW 2361 Introduction to Social Work

Introduces the student to social work values, selected social problems, social welfare as an institution of this society, social work as a profession, and practice settings of the professional social worker. In addition to knowledge area, students are introduced to the “real” world through a required 30-hour community service experience. They are placed in diverse local social agencies and learn about problems, clients, agencies, and programs. Semester Hours 3 (3 lec)

Sociology

SOCI 1301 Introduction to Sociology

Explores social interaction with emphasis on basic sociological principles and concepts, analysis of diverse patterns of social organization, and consideration of various contemporary social conditions. Includes role playing, culture, institutions, social movements, socialization, social class, the family, and race. Semester Hours 3 (3 lec)

SOCI 1306 Social Problems

Explores selected major contemporary social problems and group conflicts, including the sociology of crime and delinquency, poverty, race relations, family, population problems, drug abuse, and other personal pathologies. Semester Hours 3 (3 lec)

SOCI 2301 Marriage and Family

Studies various problems involved in family living with stress upon matters concerning mate selection, marital adjustment, and patterns of family behavior. Semester Hours 3 (3 lec)

SOCI 2319 Minorities Studies I

Historical, economic, social, and cultural development of minority groups. Groups studied may include White Ethnics, African-Americans, Mexican-Americans, Asian-Americans, and Native Americans. Prerequisites: SOCI 1301 or 1306 and must have passed the reading portion of the THEA or approved alternative test or credit for READ 0302. Semester Hours 3 (3 lec)

SOCI 2326 Social Psychology

Provides a study of the experience and behavior of the individual in relation to social situations. Emphasizes social interaction, the self, attitudes, and group processes. Prerequisite: PSYC 2301 or SOCI 1301. NOTE: Credit will not be given for both PSYC 2319 and SOCI 2326. Semester Hours 3 (3 lec)

SOCI 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience in sociology. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of human social behavior and/or social institutions. Prerequisite: Must have passed the reading portion of the THEA or approved alternative test or have credit for READ 0302. Semester Hours 3 (3 lec)

Spanish

SPAN 1300 Conversational Spanish I

Provides instruction in oral communication for students who wish to communicate adequately for travel or work. Provides instruction through dialogs and vocabulary exercises, including the use of idiomatic expressions. May be taken by students who have little or no knowledge of Spanish; may also be taken as a supplement to other Spanish classes. PLEASE NOTE: Not

intended to satisfy part of the foreign language requirement at four-year institutions. Semester Hours 3 (3 lec)

SPAN 1310 Conversational Spanish II

Continues instruction provided in SPAN 1300. Offers further proficiency in oral communication. PLEASE NOTE: Not intended to satisfy part of the foreign language requirement at four-year institutions. Prerequisite: SPAN 1300 or previous Spanish courses in high school or college or approval of instructor. Semester Hours 3 (3 lec)

SPAN 1411 Beginning Spanish I

Introduces essentials of pronunciation and grammar through oral and written practice. A communication-based approach is used to practice all language skills. No prior knowledge of Spanish required. Semester Hours 4 (3 lec/2 lab)

SPAN 1412 Beginning Spanish II

Emphasizes essentials of pronunciation and grammar through oral and written practice. All language skills are utilized in a communication-based approach. Prerequisite: SPAN 1411, two years of high school Spanish, or consent of instructor or division chair. Students with two years of high school Spanish are encouraged to see a Spanish instructor prior to enrolling. Semester Hours 4 (3 lec/2 lab)

SPAN 2311 Intermediate Spanish I

Reviews Spanish grammar through oral and written practice. Utilizes cultural reading selections in Spanish to expand vocabulary and knowledge of the Hispanic culture. Prerequisites: SPAN 1411 and 1412, three years of high school Spanish, or consent of instructor or division chair. Students with three years of high school Spanish are encouraged to see a Spanish instructor prior to enrolling. Semester Hours 3 (3 lec)

SPAN 2312 Intermediate Spanish II

Reviews Spanish grammar through oral and written practice. Utilizes cultural reading selections in Spanish to expand vocabulary and knowledge of the Hispanic culture. Prerequisite: SPAN 2311, four years of high school Spanish, or consent of instructor or division chair. Students with four years of high school Spanish are encouraged to see a Spanish instructor prior to enrolling. Semester Hours 3 (3 lec)

SPAN 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with class seminars, the individual student will set specific goals and objectives in the study of the Spanish language and its literature. Semester Hours 3 (3 lec)

Surgical Technology

SRGT 1260 Clinical/Lab – Introductory

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Semester Hours 2 (8 clinical hours/week)

SRGT 1405 Introduction to Surgical Technologist

An in-depth coverage of surgical technology theory, technological sciences and physics as related to the operating room, surgical pharmacology, anesthesia and patient care concepts. Semester Hours 4 (3 lec/2 lab)

SRGT 1409 Fundamentals of Perioperative Concepts & Techniques

Orientation to perioperative concepts such as aseptic principles and practices, infectious processes, wound healing, instrumentation, surgical sutures and supplies, ethics and legalities, and the creation and maintenance of the sterile field. Semester Hours 4 (3 lec/2 lab)

SRGT 1441 Surgical Procedures I

Introduction to surgical pathology and its relationship to surgical procedures. Emphasis on surgical procedures related to the diagnostics, general, OB/GYN and orthopedic surgical specialties incorporating instruments, equipment and supplies required for safe patient care. Semester Hours 4 (3 lec/2 lab)

SRGT 1491 Special Topics in Central Sterilization

Topics address recently identified current events, skills, knowledge, and/or attitudes and behaviors pertinent to Central Sterilization and the theory of sterilization procedures, packaging, storing, maintaining and distributing sterile supplies that are relevant to the professional development of the Central Sterilization Technician through the International Association Healthcare Central Service Material Management (IAHCSMM) standards. This course was designed to be repeated multiple times to improve student proficiency. Semester Hours 4 (3 lec/4 lab)

SRGT 1542 Surgical Procedures II

Introduction to surgical procedures and related pathologies. Emphasis on surgical procedures related to genitourinary, otorhinolaryngological, ophthalmology, thoracic, peripheral vascular, plastic/reconstructive, ophthalmology, cardiac, and neurological surgical specialties incorporating instruments, equipment, and supplies required for preoperative patient care. Prerequisite: SRGT 1441. Semester Hours 5 (4 lec/2 lab)

SRGT 1660 Clinical – Surgical Technology/Technologist

A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional. Semester Hours 6 (12 clinical)

SRGT 2130 Professional Readiness

Transition into the professional role of the surgical technologist. Includes professional readiness for employment, attaining certification and maintaining certification status. A capstone experience may be included. Semester Hours 1 (1 lec)

SRGT 2660 Clinical – Advanced (Capstone)

A health-related, work-based learning experience that enables the student to apply specialized occupational theory, skills, and concepts. Direct supervision is provided by the clinical professional. Semester Hours 6 (24 clinical hours/week)

Theatre

Theatre majors are expected to fulfill work assignments in some phase of theatre on each theatre department production (usually two productions per semester).

DRAM 1120 Theatre Practicum

DRAM 1121 Theatre Practicum

DRAM 2120 Theatre Practicum

DRAM 2121 Theatre Practicum

Offers hands-on experience in acting, management, publicity, box office, and other aspects of rehearsal and performance for theatrical productions. Required of majors but open to all students upon consent of the instructor. May be repeated for credit. Semester Hours 1 (6 lab)

DRAM 1161 Musical Theatre Workshop

Provides practical experience by singing and/or dancing in a musical productions. May be taken four times for credit. Semester Hours 1 (5 lab)

DRAM 1162 Theatre Workshop: Opera

Includes all phases of opera with emphasis on techniques, procedures, and practical experience gained by participating in an opera production. For all transfer music majors and minors whose major instrument is voice but open to all students. May be taken four times for credit. Semester Hours 1 (5 lab)

DRAM 1310 The Art of Theatre

Applies as a required Humanities or Visual & Performing Arts course for all students. Portrays theatre arts as a reflection of society, a response to basic human needs, and a creative, collaborative art form; includes an investigation of the theatrical elements of acting, staging, and literature, ranging from the major historical periods to today's contemporary theatre and film. Semester Hours 3 (3 lec)

DRAM 1322 Stage Movement

Develops the actor's body as a tool. Builds on the foundation of movement by exploring time, space, and energy as they inspire movement through creative impulse. Prerequisite: DANC 1141, 1151 or consent of instructor. Semester Hours 3 (2 lec/2 lab)

DRAM 1330 Stagecraft

Introduces the theories and practices of technical theatre design and construction through lecture and practical application. Required of theatre majors. Semester Hours 3 (3 lec/3 lab)

DRAM 1341 Stage Make-Up

An introduction to basic techniques of makeup with emphasis on character analysis, makeup design, and techniques of application. Required of theatre majors but open to all students upon consent of the instructor. Semester Hours 3 (1 lec/3 lab)

DRAM 1342 Introduction to Costuming

Survey of the costume process from concept to realization; develops basic hand and sewing machine techniques, basic patterning and fitting methods, and costume crafts. Semester Hours 3 (3 lec/3 lab)

DRAM 1351 Acting I

Develops fundamental techniques concerning the actor and his/her relationship with the play and the audience. Acting techniques, improvisational exercises, audition techniques, and character and text analysis for contemporary monologues and scenes are emphasized. Required of theatre majors. Semester Hours 3 (3 lec)

DRAM 1352 Acting II

Continues DRAM 1351. Explores historically relevant and current performance theories by utilizing age-relevant classical and contemporary scene study. Required of theatre majors. Prerequisite: DRAM 1351. Semester Hours 3 (3 lec)

DRAM 2331 Introduction to Theatrical Design

Presents the fundamentals of design as they relate to the collaborative process of theatrical production with emphasis on two- and three-dimensional concepts. Required of theatre majors. Prerequisite: DRAM 1330 or consent of the instructor. Semester Hours 3 (3 lec)

DRAM 2336 Voice for the Actor

Offers instruction and practice designed to aid the actor in achieving optimum vocal performance through exploration of vocal mechanics and proper breathing, projection, resonance, articulation, and characterization. Basic dialects and Shakespearean textual performance techniques are introduced. Required of theatre majors. Prerequisite: DRAM 1351 (or concurrent enrollment) or permission of the instructor. Semester Hours 3 (3 lec)

DRAM 2351 Acting III

Builds on the foundation of DRAM 1351 and 1352 by exploring period acting styles from ancient styles to postmodern theatre. Prerequisite: DRAM 1351 and 1352. Semester Hours 3 (3 lec)

DRAM 2361 History of the Theatre I

Studies the development of theatre art from ancient Egypt through the mid-17th century. Representative plays from each historical period will be analyzed and contrasted in terms of style, content, and form. Required of theatre majors; open to non-theatre majors. Semester Hours 3 (3 lec)

DRAM 2362 History of the Theatre II

Covers the development of theatre art from the mid-17th century to the present. Emphasizes Western theatre and Eastern theatre as it has influenced the Western world. Representative plays from each historical period will be analyzed and contrasted in terms of style, content, and form. Required of theatre majors; open to non-theatre majors. Semester Hours 3 (3 lec)

DRAM 2366 Development of the Motion Picture I

Surveys the visual, aural, and dramatic aspects of motion pictures and narrative films; the historical growth and sociological effects of film as an art form; the historical development of film; and the aesthetics that define film as a work of art. Semester Hours 3 (3 lec)

DRAM 2389 Academic Cooperative

An instructional program designed to integrate on-campus study with practical hands-on experience. In conjunction with faculty, the individual student will set specific goals and objectives in the study of drama and theatre. Prerequisite: instructor approval. Semester Hours 3 (3 lec)

Veterinary Technology

VTHT 1171 Local Needs – Veterinary Technology National Exam Review

Topic addresses identified skills and knowledge pertinent to veterinary technology. This course is designed to reinforce the student's knowledge of veterinary technology and help improve student proficiency for the National Board Exam for Veterinary Technicians. Prerequisites: Completion of all VTHT courses with a minimum grade of C, with the exception of: VTHT 1317, 2213, 2425 and 2439. These courses are taken concurrently the same semester this course is offered. Graduates of a veterinary technology program accredited by the (AVMA) who have either not taken or not passed the national exam may also enroll in this course. Semester Hours 1 (1 lec)

VTHT 1205 Veterinary Medical Terminology

Introduction to word parts, directional terminology, and analysis of common veterinary terms. Semester Hours 2 (2 lec)

VTHT 1317 Veterinary Office Management

Practical experience in management of the veterinary hospital. Emphasis on client relations, recordkeeping, inventory, employment skills, and computer skills in the veterinary environment. Semester Hours 3 (3 lec)

VTHT 1341 Anesthesia and Surgical Assistance

In-depth application of surgical, obstetrical, and anesthesia techniques, including identification and use of instruments and equipment. Prerequisites: VTHT 1349 and 1413. Semester Hours 3 (2 lec/4 lab)

VTHT 1345 Veterinary Radiology

Presentation of theory and principles and practical application of radiology within the field of veterinary medicine. Prerequisite: VTHT 1413. Corequisite: VTHT 2435. Semester Hours 3 (2 lec/3 lab)

VTHT 1349 Veterinary Pharmacology

Fundamentals of pharmacology, including recognition, calculation, labeling, packaging, and administration of common veterinary drugs, biologics, and therapeutic agents. Discussion of normal and abnormal responses to these agents. Prerequisites: VTHT 1413 and 2321. Semester Hours 3 (3 lec/1 lab)

VTHT 1401 Introduction to Veterinary Technology

Survey of the profession of veterinary technology with emphasis on basic techniques, handling and care of domestic animals, and ethical and professional requirements. Semester Hours 4 (3 lec/3 lab)

VTHT 1413 Veterinary Anatomy and Physiology

Gross anatomy of domestic animals, including physiological explanations of how each organ system functions. Prerequisite: BIOL 1413 with a minimum grade of C. Semester Hours 4 (3 lec/3 lab)

VTHT 2201 Canine and Feline Clinical Management

Survey of feeding, common management practices, and care of canines and felines in a clinical setting. Review of common diseases of canines and felines encountered in the practice of veterinary medicine. Prerequisite: VTHT 1401. Corequisites: VTHT 1349 and 2321. Semester Hours 2 (2 lec/1 lab)

VTHT 2205 Equine Clinical Management

Survey of feeding, common management practices, and care of equines in a clinical setting. Review of common diseases of equines encountered in the practice of veterinary medicine. Prerequisites: VTHT 1349, 1413, and 2321. Semester Hours 2 (2 lec/1 lab)

VTHT 2209 Food Animal Clinical Management

Survey of feeding, common management practices, and care of food-producing animals in a clinical setting. Review of common diseases of food-producing animals encountered in the practice of veterinary medicine. Prerequisites: VTHT 1349, 1413, and 2321. Semester Hours 2 (2 lec/1 lab)

VTHT 2213 Lab Animal Clinical Management

Survey of feeding, common management practices, and care of laboratory and exotic animals in a clinical setting. Review of common diseases of laboratory and exotic animals encountered in the practice of veterinary medicine. Prerequisite: VTHT 1349, 1413, and 2321. Semester Hours 2 (2 lec/1 lab)

VTHT 2266 Veterinary Practicum

An intermediate or advanced type of health professions work-based instruction that helps students gain practical experience, enhance skills, and integrate knowledge. The emphasis is on practical work experience for which the student has already acquired the necessary theoretical knowledge and basic skills. Direct supervision is provided by the clinical professional, generally a clinical preceptor. Prerequisite: Student cannot have a grade lower than a C in any VTHT course and must have approval of program director. Semester Hours 2 (1 lec/15 lab)

VTHT 2321 Veterinary Parasitology

Study of parasites, including zoonotic diseases, common to domestic animals. Prerequisite: BIOL 1413 with a minimum grade of C. Semester Hours 3 (2 lec/3 lab)

VTHT 2323 Veterinary Clinical Pathology I

In-depth study of hematology and related chemistries with emphasis on lab procedures. Prerequisites: VTHT 1413 and 2321. Semester Hours 3 (2 lec/4 lab)

VTHT 2331 Veterinary Clinical Pathology II

In-depth study of urinalysis and cytology. Survey of microbiological techniques. Emphasis on laboratory procedures. Prerequisite: VTHT 2323. Semester Hours 3 (2 lec/4 lab)

VTHT 2425 Large Animal Assisting Techniques

Study of basic restraint and proper management, treatment, and medication techniques for farm animals. Prerequisite: VTHT 1349, 1413. Semester Hours 4 (3 lec/4 lab)

VTHT 2435 Advanced Veterinary Anatomy and Physiology

Continuation of anatomy of domestic animals, including physiological explanations of the functioning of each system. Prerequisite: VTHT 1413. Semester Hours 4 (3 lec/3 lab)

VTHT 2439 Veterinary Nursing Care

Study of surgical and anesthesia principles with special attention to pharmacological care. This is a Capstone course requiring integration of course work in the field of veterinary technology. Prerequisite: Student cannot have a grade lower than a C in any VTHT course and must have approval of program director. Semester Hours 4 (3 lec/3 lab)
