Signing onto the Wireless Network

TechTip:

Finding your network connections and properly signing onto the wireless network

Below are the written instructions depicted in the video, under the "click here" icon!

Although all buildings have connectivity, some areas may not have full signal strength yet. To start: Make sure your wireless connection is on, and connected to the MCC network. Most of the time your laptop will pick up the connection and automatically start up the wireless. But if for some reason it does NOT connect, here is how you can check to see if it is connected.

- Go to control panel
- Click on Network Connections, double click
- Your wireless connections should show up, you can right click and choose view available connections.

*Keep in mind not all laptops are the same, but all have a control panel. So the location may be different. Also, Vista and XP may look a little different. XP will have **Network Connections** under control panel, while Vista will have **Network and Sharing Center**.

BUT ALWAYS MAKE SURE YOU CONNECTED TO MCC ON COMPAUS.

Students:

1. Open Firefox or Internet Explorer
2. Wait a few seconds for the log in screen to open (or click "click here" to go immediately to the next page)
3. Students will sign in with their normal user name
 - a. Initials and 6 digit student id number jd1234567
