Welcome

Congratulations and welcome to the Occupational Therapy Assistant Program at McLennan Community College. You have chosen a very exciting and rewarding profession. The OTA faculty and staff wish you success in the pursuit of your educational and professional goals.

The purpose of the Student Policy Handbook is to acquaint you with the policies and procedures of the Occupational Therapy Assistant Program. This handbook is a supplement to McLennan Community College's General Catalog found at <http://www.mclennan.edu/catalog/> and the McLennan Student Handbook, *The Highlander Guide*, found at <http://www.mclennan.edu/highlander-guide/>

We hope you share our enthusiasm and pride of our profession as Occupational Therapy practitioners. We challenge you to embrace all the exciting learning opportunities over this two-year journey. We look forward to working with you on your way to success!

Sincerely,

Cherece Henry, COTA

Accreditation

The Occupational Therapy Assistant Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA) located at:

6116 Executive Boulevard, Suite 200
North Bethesda, MD 20852-4929
301.652.6611
www.acoteonline.org

The program agrees to, within 30 days of the event, inform ACOTE of the transfer of program sponsorship or change of the institution's name; inform ACOTE of any adverse accreditation action taken to change the sponsoring institution's accreditation status to probation or withdrawal of accreditation; notify and receive ACOTE approval for any significant program changes prior to the admission of students into the new/changed program; and inform ACOTE of the resignation of the program director or appointment of a new or interim program director. The program also agrees to pay all accreditation fees within 90 days of the invoice date and submit a Report of Self-Study and other required reports within the period of time designated by ACOTE. The program will agree to a site visit date before the end of the previously awarded accreditation period. McLennan Community College will demonstrate honesty and integrity in all interactions with ACOTE, and comply with current requirements of all ACOTE policies.

Equal Educational Opportunity

McLennan provides equal educational opportunity for all qualified students and does not discriminate on the basis of race, color, religion, national origin, gender, disability, age, veteran's status, genetic information, sexual orientation, gender identity or any other unlawful factors in its educational programs, activities, or employment as required by Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Educational Amendments Act of 1972 and the Age Discrimination Act of 1978.

The following person is designated to handle inquiries regarding nondiscrimination policies: Claudette Jackson, Director, Diversity, Equity, & Inclusion/Acting Title IX Coordinator, 1400 College Drive, 254-299-8465, titleix@mclennan.edu

Title IX

McLennan Community College does not discriminate on the basis of race, color, national origin, sex, disability, or age in its programs or activities. The following person has been designated to handle inquiries regarding the nondiscrimination policies: Claudette Jackson, Director, Diversity, Equity, & Inclusion/Acting Title IX Coordinator, 1400 College Drive, 254-299-8645, titleix@mclennan.edu A lack of English language skills will not be a barrier to admission to and participation in career and technical education programs.

Title IX of the Education Amendments of 1972 is a Federal civil rights law that prohibits discrimination on the basis of sex in educational programs and activities that receive Federal funds. Examples of

discrimination prohibited under title IX include discrimination on the basis of sex can including gender discrimination, pregnant and parenting discrimination, sexual harassment or sexual violence, such as rape, dating violence, domestic violence, stalking, sexual assault, sexual battery, and sexual coercion. In accordance with the requirements of the Title IX Education Amendments of 1972 MCC's designated Title IX Coordinator, Claudette Jackson – Director, Diversity, Equity, & Inclusion/Acting Title IX Coordinator, shall be responsible for coordinating the College's effort to comply with and carry out its responsibilities under Title IX.

McLennan's Title IX webpage (<http://www.mclennan.edu/titleix/>) contains more information about definitions, reporting, confidentiality, resources, and what to do if you or someone you know is a victim of sexual misconduct, gender-based violence or the crimes of rape, acquaintance rape, sexual assault, sexual harassment, stalking, dating violence, or domestic violence.

ADA Statement

In accordance with the requirements of the Americans with Disabilities Act (ADA), and the regulations published by the United States Department of Justice 28 C.F.R. 35.107(a) and Section 504 of the Federal Rehabilitation Act of 1973, McLennan's designated ADA coordinators shall be responsible for coordinating the College's efforts to comply with and carry out its responsibilities under ADA.

Accommodations Coordinator

Katie Vise
254-299-8122

Titles I and II - Employment and Facilities

Dr. Stephen Benson, Vice President, Finance & Administration
254-299-8649

Title II - Education & Section 504 of the Federal Rehabilitation Act of 1973

Dr. Claudette Jackson, Director, Diversity, Equity, & Inclusion/Acting Title IX Coordinator
254-299-8645

Accommodations are made available to students with documented needs. These include, but are not limited to, physical, mental, learning, vision, hearing, or temporary disabilities. If you are interested in applying for Accommodations (Disability Services), please contact Katie Vise at disabilities@mclennan.edu or 254-299-8122.

Student Support Services

OTA program faculty are committed to student success. McLennan Student Services offers a variety of supportive resources and programs to help students succeed in meeting their educational goals. If at any point throughout the program a faculty member identifies a potential barrier to student success, she/he will provide the student with a referral as appropriate. Students are also welcome and encouraged to seek out support independently when necessary. Available services include, but are not limited to:

- academic advising
- counseling
- student accessibility services and assistive technology
- international student services
- support programs (Success Coaches, Support & Empowerment Program, Men of Color Initiative, TRIO)
- testing and assessment services

A summary of services and more information can be found at: <http://www.mclennan.edu/campus-resource-guide/>

Introduction

Program History

McLennan Community College, located in Waco, Texas, educates the majority of the health care professionals employed in McLennan County. The Health Professions Division is a key contributor to McLennan's success in the community, offering programs in Associate Degree Nursing, Vocational Nursing, Medical Assistant, Health Information Technology, Medical Laboratory Technician, Physical Therapist Assistant, Radiologic Technology, Respiratory Care, Surgical Technology, Paramedicine/EMS; and Veterinary Technology. An Occupational Therapy Assistant (OTA) program was on the College's long-range plan for development for over five years. In 2010, the school was approached by a local hospital to develop an Occupational Therapy Assistant program to help meet the employer needs for their rehabilitation center. As a result of this interest, McLennan created an Advisory Committee that consisted of Occupational Therapy practitioners and facility administrators from the Waco area. This committee was organized to assist in development of the program and to verify a need for OTAs beyond the hospital's rehabilitation center needs.

The College conducted a survey of Occupational Therapy agencies within a six-county area. The survey results showed an overwhelming need for Occupational Therapy Assistants within the region. Based on these results, the College contacted the American Occupational Therapy Association (AOTA) to express its intent to develop a program in Occupational Therapy Assistant to be effective spring semester 2015. The College also contacted the Texas Higher Education Coordinating Board (THECB) and area colleges within the region to inform them of the intent to develop. In April, 2014, a program director was employed by McLennan. The Application for Developing Status was filed with the Accreditation Council for Occupational Therapy Education on the 15th of May, 2014. Candidacy status was granted in August, 2014.

The McLennan Community College Occupational Therapy Assistant Program accepted the first cohort of twenty students beginning Spring, 2015. Full Program accreditation was achieved in August, 2016.

Program Information

The Occupational Therapy Assistant program is a two-year associate degree program which begins each fall semester. Students earn an Associate of Applied Science Degree upon successful completion of the program. Students then become eligible to take the national certification examination through the National Board for Certification of Occupational Therapy, Inc. (NBCOT). Graduates of the program who pass the certification examination may apply for state licensure to practice as an Occupational Therapy Assistant and thereby use the designation of OTA.

Students in the OTA program at McLennan Community College are eligible for (and encouraged to obtain) student membership in the Texas Occupational Therapy Association and the American Occupational Therapy Association allowing students access to the benefits of membership.

McLennan Community College Mission

Our mission is to educate our students - improving their lives and enriching our community.

Core Values

All choices, decisions, and actions of McLennan Community College and the individuals associated with it arise from, and are consistent with, the following core values:

1. **People matter** - We will be honest, humble, respectful, and gracious to our students and to each other. We best serve our students, colleagues, and community when we work as a team.
2. **Inclusiveness matters** - We will seek to appreciate and understand our students and each other, actively seeking different viewpoints. We will work to create a civil, welcoming environment where our diverse community of students and employees learn, teach, and work together.
3. **Integrity matters** - We will work with the highest level of integrity, taking responsibility for all of our actions. We will tell the truth and seek to be fair in our decision-making and actions.
4. **Communication matters** - We will be open, collegial, and courageous in our communications with students and with our colleagues. We will listen before we speak. We will communicate decisions and the reasons for them.
5. **Excellence matters** - We will strive for excellence in all that we do. We will actively plan for the future, seeking new and innovative ways to accomplish our mission.

Occupational Therapy Assistant Program Mission

In support of the McLennan Community College Mission statement, the OTA program joins the college in the endeavor to engage and strengthen the community by educating and training competent entry-level occupational therapy assistants who will provide excellent therapy services to diverse populations in various types of healthcare and community settings. The Occupational Therapy Assistant program is dedicated to providing a high quality, dynamic, educational curriculum to prepare highly competent occupational therapy assistants who are skilled at meeting the needs of consumers from diverse backgrounds and rapidly changing service delivery systems.

Occupational Therapy Assistant Program Purpose

The primary purpose of the Occupational Therapy Assistant Program is to prepare students to function as effective entry-level Occupational Therapy Assistants. This purpose is accomplished through a combination of sequential learning activities based upon a sound general educational framework and guided fieldwork experiences. The program seeks to develop occupational therapy assistants who possess foundational skills in occupational therapy interventions, clinical reasoning, and interpersonal communication necessary for the practice of science-driven, evidence-based occupational therapy.

Occupational Therapy Assistant Program Goals

In accordance with the Mission of McLennan Community College and the Occupational Therapy Assistant Program, as well as the Accreditation Standards for an Educational Program for the Occupational Therapy Assistant set forth by the Accreditation Council for Occupational Therapy Education, the McLennan Community College Occupational Therapy Assistant educational program will prepare students to:

1. Demonstrate high level, entry-level knowledge and performance competencies of the occupational therapy assistant that reflect the philosophy of occupational therapy and that are well-grounded in the theoretical principles, technology and standards of practice of occupational therapy.
2. Collaborate with occupational therapists in providing high quality therapy services to diverse populations, across the life span, within the variety of practice contexts, both traditional and emerging practices, in accordance with the standards of practice and credentialing and licensing bodies.
3. Advocate and promote occupational therapy services with respect for each person's inherent dignity, occupational nature, diversity and right to quality of life.
4. Demonstrate active, responsible therapeutic conduct in accordance with the profession's educational, legal, and ethical standards of practice.
5. Demonstrate civic engagement and professional responsibility for service to communities and populations that are underserved and would benefit from the philosophy, knowledge, and skills of occupational therapy.
6. Participate in effective service management and the development and marketing of occupational therapy services for diverse populations and settings.
7. Demonstrate effective problem solving and clinical reasoning (critical thinking) skills as valued parts of their professional competency.
8. Assist in developing, designing, adapting and maintaining environments that support consumers' engagement in occupation.
9. Effectively utilize professional written and oral communication in client, family and team interactions, and meet the standards for reimbursement of services.
10. Demonstrate knowledge of national requirements for certification and state requirements for licensure to practice.
11. Actively and effectively promote the profession of occupational therapy.
12. Actively seek activities that promote personal and professional growth through lifelong learning.

Essential Functions and Technical Standards

Health Professions programs establish essential functions and technical standards to ensure that students have the abilities required to participate, and potentially be successful in, all aspects of the respective programs. Students are required to meet technical standards for the OTA program as indicated below. If the student is unable to meet all of the outlined standards with or without reasonable accommodation, he/she may be withdrawn from the program. The following essential functions outline reasonable expectations of a student in the OTA Program for the performance of common, safe classroom and clinical functions. The OTA student must be able to apply the knowledge and skills necessary to function in a variety of classroom, lab, and clinical situations while providing the essential competencies of occupational therapy intervention. These requirements apply for the purpose of admission and continuation in the program.

The student must demonstrate the following abilities:

Categories of Essential Functions	Definition	• Example of Technical Standard Ability (<i>but not limited to</i>)
<p>Observation</p>	<p>Ability to participate actively in all demonstrations, laboratory exercises, experiential/ simulation, and clinical experiences in the professional program component and to assess and comprehend the condition of all clients assigned for data collection, intervention, and contribution to discharge. Such observation and information usually require functional use of visual, auditory, somatic, and olfactory sensations.</p>	<p>Visual:</p> <ul style="list-style-type: none"> • Read print on LED display on therapeutic instruments for assessment and intervention • Visually discriminate postural, sensorimotor, musculoskeletal, and color changes • Recognize and interpret facial expressions and body language • Read paper and/or computer-generated medical records • Read instrument panels and gauges • Visually monitor clients for adverse reactions to treatment • Make and record visual observations regarding functional abilities • Assess and manipulate the environment at varying distances <p>Auditory:</p> <ul style="list-style-type: none"> • Receive, assess, and interpret verbal communication from clients, families, fellow students, faculty, and other members of the health care team • Respond appropriately to call bells, emergency alarms, auditory timers, and any other patient monitor • Distinguish between normal and abnormal manual blood pressure readings <p>Tactile:</p> <ul style="list-style-type: none"> • Palpate a pulse • Detect changes or abnormalities of surface texture, skin, and temperature • Assess muscle tone

Categories of Essential Functions	Definition	• Example of Technical Standard Ability (<i>but not limited to</i>)
		<ul style="list-style-type: none"> • Discriminate via fine touch to palpate pathologic changes in soft tissue • Palpate and manipulate bony landmarks of upper and lower extremities in preparation for activity engagement and/or data collection. <p>Olfactory:</p> <ul style="list-style-type: none"> • Smell sufficiently to assess patient status (odors of infection, etc.) • Smell sufficiently to maintain a safe work environment
Communication	Ability to communicate effectively in English using verbal, non-verbal, and written formats with academic and clinical faculty, students, clients, families and other members of the healthcare team.	<ul style="list-style-type: none"> • Sensitively and effectively elicit and assess verbal and non- verbal information while engaging in intervention with clients, families, and colleagues • Recognize, interpret, and respond to non-verbal communications • Effectively articulate verbal and written information to clients, families, staff, instructors and fellow students, and other healthcare team members in both academic and clinic settings • Receive, write, and interpret written communication in both academic and clinic settings • Demonstrate active listening skills • Present and receive feedback in academic and clinical settings in a professional manner • Ability to give demonstrations or presentations to classmates, faculty, other health care workers, or at professional association meetings • Ability to independently prepare papers and reports • Ability to take written, computerized, and practical examinations • Ability to ask and respond to formal and informal questions with confidence at an appropriate professional level • Ability to use correct grammar and spelling as well as the appropriate level of formality
Neuromusculoskeletal and Movement Related Functions	Sufficient ability to execute the movement and skills required for safe and effective therapeutic assessment and intervention and emergency treatment as necessary.	<ul style="list-style-type: none"> • Demonstrate stability, mobility, balance, strength, and agility to assist and safeguard clients during transfers and daily, relevant, meaningful activities/occupations • Be able to safely lift up to 50 lbs. while maintaining proper body mechanics • Safely lift, move, adjust, transfer, or position clients and equipment using proper body mechanics • Provide emergency treatment and follow emergency protocol both in academic and clinical

Categories of Essential Functions	Definition	• Example of Technical Standard Ability (<i>but not limited to</i>)
		<ul style="list-style-type: none"> • settings when necessary • Sit, stand, and/or walk for sufficient periods of time to actively engage in the academic, lab, and clinical activities (may be up to 8 to 10 hours per day). • Frequently bend, crawl, squat, reach, push, and pull as required for data collection and treatment intervention • Demonstrate manual dexterity and coordination necessary to manipulate equipment and perform therapeutic procedures in such therapeutic interventions as data collection, splinting, wheelchair adjustment, feeding, managing orthotics and prosthetics etc.
Intellectual	<p>Ability to collect, interpret and integrate information. Ability to demonstrate clinical reasoning.</p>	<ul style="list-style-type: none"> • Read, comprehend, and retain relevant information in textbooks, class presentations, medical records, and professional literature • Integrate, retain, and synthesize information to effectively problem-solve, make decisions, plan, organize, and follow through • Exercise sound, clinical judgment and complete tasks within required time limits • Apply knowledge to both academic and clinical situations and problem solve using clinical reasoning • Utilize effective teaching and learning techniques and test-taking strategies • Exercise independent judgment and discretion in the performance of assigned responsibilities • Locate information using reference manuals and computer databases • Use appropriate mathematical concepts to determine standardized tests scores and understand research statistics in literature
Behavioral and Social Attributes	<p>Possess the emotional health and stability necessary to exercise sound clinical judgment and develop mature, sensitive, and effective relationships with clients, their families, and other members of the health care team.</p> <p>Possess the ability to tolerate taxing workloads, function effectively under stress, adapt to changing environments, display</p>	<ul style="list-style-type: none"> • Manage time, energy, and flexibility within heavy academic schedules and deadlines in academic, clinic and home environments • Demonstrate flexibility during client, environmental, or situational change • Demonstrate emotional health needed to sustain professional behavior under physical and emotional stress • Acknowledge and respect individual values and opinions • Demonstrate sensitivity to cultural differences within academic, clinic, and community settings • Demonstrate a concern for others, interest, and motivation. • Accept responsibility and accountability for one's

Categories of Essential Functions	Definition	• Example of Technical Standard Ability (<i>but not limited to</i>)
	<p>flexibility, and learn to function in the face of uncertainties inherent in clinical settings with patients.</p> <p>Possess compassion, integrity, concern for others. Demonstrate respect for academic and clinical instructors, fellow students, and other members of the health care team.</p> <p>Demonstrate professional behaviors and a strong work ethic.</p>	<p>own actions.</p> <ul style="list-style-type: none"> • Comply with the Practice Rules and Practice Act of the Texas Board of Occupational Therapy Examiners and the American Occupational Therapy Association’s Standards of Practice and the Code of Ethics.
Technical	Demonstrate computer competency	<ul style="list-style-type: none"> • Utilize Microsoft Word and PowerPoint • Utilize the College Learning Management System • Utilize College email system • Utilize the internet
Professional Conduct and Appearance		<ul style="list-style-type: none"> • Maintain good health and self-care in order to present a well-groomed, neat appearance • Maintain patient confidentiality and exercise ethical judgment, dependability, and accountability • Demonstrate self-respect and respect for others • Display attitudes of tolerance and integrity • Display professional attributes, including punctuality, professional demeanor, and cooperation • Adhere to institutional and program policies and procedures as documented in student handbooks • Act in a manner that demonstrates awareness that a legal and binding contract exists between the academic program and the clinical site

Philosophy and Curricular Design

Program Philosophy

The McLennan Community College Occupational Therapy Assistant program fully embraces the Philosophical Base of Occupational Therapy stated by the American Occupational Therapy Association (2017):

Occupations are activities that bring meaning to the daily lives of individuals, families, communities, and populations and enable them to participate in society. All individuals have an innate need and right to

engage in meaningful occupations throughout their lives. Participation in these occupations influences their development, health, and well-being across the lifespan. Thus, participation in meaningful occupations is a determinant of health and leads to adaptation.

Occupations occur within diverse social, physical, cultural, personal, temporal, and virtual contexts. The quality of occupational performance and the experience of each occupation are unique in each situation because of the dynamic relationship among factors intrinsic to the individual, the environment and contexts in which the occupation occurs, and the characteristics of the occupation.

The focus and outcome of occupational therapy are clients' engagement in meaningful occupations that support their participation in life situations. Occupational therapy practitioners conceptualize occupations as both a means and an end in therapy. That is, there is therapeutic value in occupational engagement as a change agent, and engagement in occupations is also the ultimate goal of therapy.

Occupational therapy is based on the belief that occupations are fundamental to health promotion and wellness, remediation or restoration, health maintenance, disease and injury prevention, and compensation and adaptation. The use of occupation to promote individual, family, community, and population health is the core of occupational therapy practice, education, research, and advocacy.

Program Philosophical View of Human Occupations

The McLennan Occupational Therapy Assistant program believes that the nature of human beings is to be involved in intentional, goal-oriented, engrossing, task-oriented activities throughout their daily life. These activities give meaning, express roles, improve and sustain the daily life and allow the individual to occupy a place in society. The sum of all goal-directed use of time would describe an individual's habits, routines, roles, and in general, the time spent in occupations.

It is also the nature of human beings to react and interact with various environments, both human and non-human, in the course of performing meaningful occupations. The successful planning, performing, and participation in occupations influence a person's health, maturation and sense of well-being. The successful outcome of planning, performing, and participation in meaningful occupation may require adaptive change in some aspect of the activity or the environment.

Adaptation involves an ongoing internal process of change. It is a person's ability to recognize the need for change, modification, or refinement (adaptation) in order to achieve optimal occupational performance. The adaptive response occurs when a person's typical response does not meet the challenges of an occupation and the person modifies or adjusts behavior to achieve a competent outcome.

When an event occurs either within the individual or the environment that prevents a person from being adaptive, dysfunction may result. When dysfunction occurs, intervention may be required. Occupational therapy uses occupation to promote adaptation and to prevent dysfunction.

Occupational Therapy Assistant Program Assumptions about How Humans Learn

The McLennan Community College Occupational Therapy Assistant program believes that:

1. Humans are goal directed agents who actively seek information.
2. Humans learn behaviors and attitudes in social contexts through informal learning.

3. Humans come to formal education with a range of prior knowledge, skills, beliefs, and concepts that significantly influence what they notice about the environment and how they organize and interpret it.
4. Pre-existing knowledge and experience affect the person's ability to remember, reason, solve problems and acquire new knowledge.
5. People construct new knowledge and understanding based on what they already know and believe.
6. Motivation is essential to learning; establishing relevance is a key element of motivation especially for the adult learner.
7. Changes in prior knowledge or transformational learning occurs as a result of significant learning experiences where there is established relevance, high motivation, integration of related concepts and a learning environment that is safe for change. (Fink, 2003)
8. Learning information in the context in which it will be used improves retention and recall. (Bransford, 2000)
9. Useful learning includes knowing when particular information or skills are applied.
10. For deep learning (ability to use, transfer, transform and be transformed by information) active learning is needed. (Meyers,1993)
11. Human learning is modified and influenced by human feedback.
12. Time for reflection (metacognition) is needed to create self-awareness that can lead to improved understanding, transfer of learning, and transformation of the learner. (Moon, 2004)
13. Learning that is connected and organized around important concepts is durable and portable to other environments.
14. Learning with understanding focuses on the processes of knowing and the learner will be motivated to generalize learning from one context to another.
15. When a person learns the basic principles of learning in a Learner-Centered environment it can facilitate self-sustaining and lifelong learning. (Weimer, 2002)

- Moon, J. (2004). Using Reflective Learning to Improve the Impact of Short Courses and Workshops. *The Journal of Continuing Education in Health Professions*. 24: 4-11.
- Weimer, M. (2002). *Learner-Centered Teaching*. San Francisco, CA: Jossey-Bass.

The adult learning pyramid (National Training Laboratories; Bethel, Maine) puts forth the concept that Participatory Teaching Methods have the highest collaboration and learning retention while Passive Teaching Methods have lower learning retention: Passive → Lecture 5%, Reading 10%, Audio-Visual 20%, and Demonstration 30%; Participatory → Group Discussion 50%; Practice by Doing 75%; and Teaching Others 90%.

As facilitators of adult learning, the Occupational Therapy Assistant program faculty recognize the importance of active engagement in the learning process and provide participatory formats throughout

each course and the program. The faculty promotes responsibility and accountability for one's own learning in a graded manner. Expectations for academic and professional behavior excellence are established at the onset of the program. Early in the program, students are provided direct and frequent feedback related to academic performance and professional behaviors. As the student progresses through the program, the responsibility of identifying individual learning needs gradually shifts to the individual student with faculty guidance.

Occupational Therapy Assistant Program Curriculum Design

The McLennan Community College Occupational Therapy Assistant program's guiding principle.

"Action Based Learning leads to Learning Based Action".

The curriculum design for the Occupational Therapy Assistant program, along with the assumptions about human learning, form a starting place for program design, planning, implementation, and evaluation.

- The scope of the curriculum is based on the philosophy of occupational therapy as well as the guiding programmatic and institutional missions.
- Scope and content are influenced by the Texas Occupational Therapy Practice Act as governed by the Executive Council of Physical Therapy and Occupational Therapy Examiners and the American Occupational Therapy Association practice standards and guidelines as they relate to the role of the Occupational Therapy Assistant.
- Content is based on current and projected needs of the profession and the role of the Occupational Therapy Assistant.
- Course sequencing is based on the assumptions of how humans learn

The curriculum design of the McLennan Community College Occupational Therapy Assistant Program affirms the uniqueness of each student and appreciates the influential nature of student life experiences and the role these experiences play in shaping student learning. A developmental model is used that progresses the content from simple to complex, allowing each student to build upon previously learned information and furthering life experiences, eventually translating into new learning.

Similarly, content is presented using a lifespan approach, first focusing on "normal" occupational performance and social participation from infancy through productive aging and then by focusing on challenges to (abnormal) occupational performance and social participation due to disease, injury, or lack of opportunity. Final didactic courses act as a bridge to Level II fieldwork, exposing students to problem-based scenarios and requiring advanced problem solving and clinical reasoning skills.

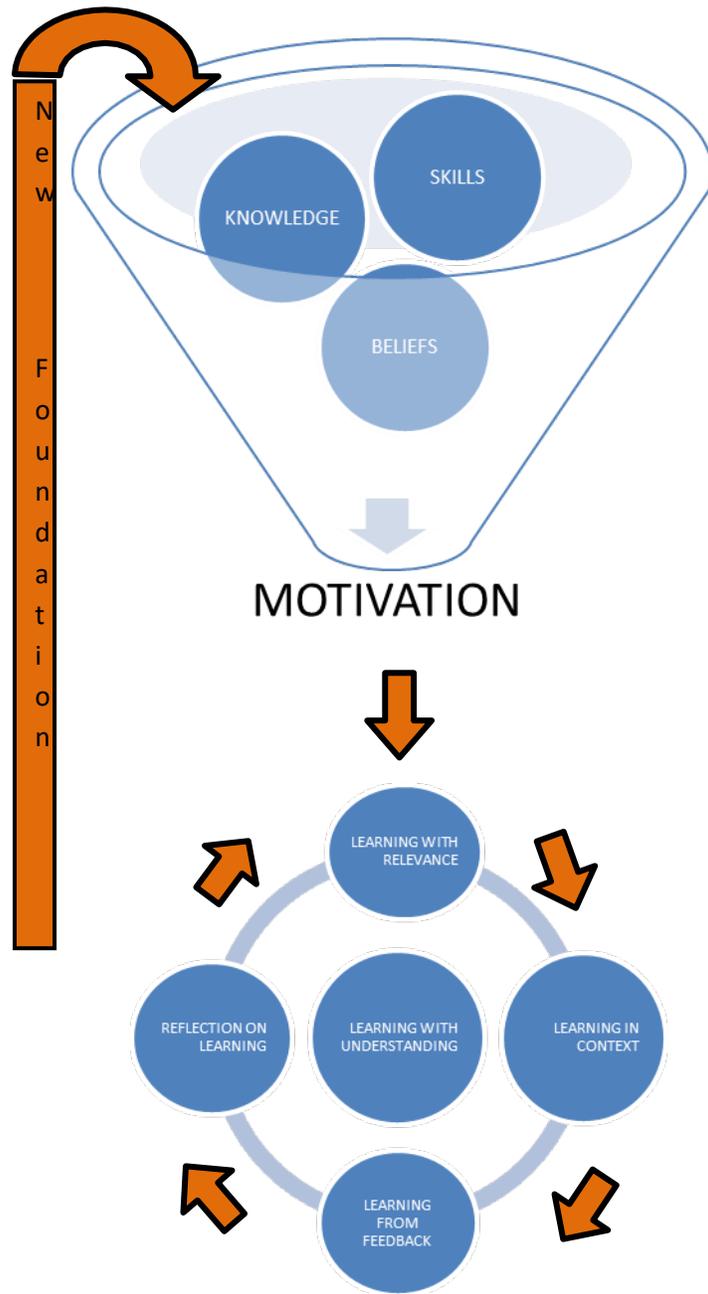

The OTA curriculum design is influenced most in every course by the following learning principles (Refer to OTA Program Assumptions about How People Learn):

- 1) New knowledge is based on pre-existing knowledge, skills, and beliefs
- 2) Relevant, contextual, active learning in learner-centered and knowledge-centered environments leads to learning with understanding.
- 3) Increased Motivation leads to increased retention and recall.

- 4) Learning with Understanding occurs as the student learns to apply skills and learn which situations require which skills.
- 5) Transferring knowledge and skills from the classroom into the clinic, from one environment to another, requires a confidence in competence which comes from practice, feedback, and reflective learning.
- 6) Understanding and using this model requires reading, discussion, review, practice, and application.
- 7) Thinking about how humans learn will help students recognize how their patients/clients will acquire new knowledge, skills, and beliefs to increase participation in their daily occupations.

This Space Intentionally Left Blank

Pre-existing Knowledge, Skills, and Beliefs lead to Motivation. Learning with understanding transforms when learning is relevant and in context. Responses to meaningful feedback and reflection result in new knowledge, skills, and beliefs.

Thus, it is expected that learning in the Occupational Therapy Assistant program is progressive and cumulative and that the student acquires knowledge, skills, and application reasoning in a predictable manner. Through reflective learning and metacognition (higher-order thinking that enables understanding, analysis, and control of one's cognitive processes, especially when engaged in learning) the student will know when they are acquiring new knowledge, new skills, and/or integrating new aspects of application.

The developmental instructional process will focus on the gradual development of experience and competence in a practice domain. Methodology will:

- Begin with the student's existing conceptual knowledge and past experiences
- Engage students with knowledge and skills directly related to professional practice with gradually increasing demands - begin global and move to specific
- Clarify instructional goals to ensure they are meaningful for each individual student
- Provide practical experiences in relevant simulated or real-life contexts to actively engage students
- Present domain knowledge and skills with modeling, guided practice, coaching, cueing, gradually requiring articulation and reflection
- Provide inter-disciplinary and inter-professional educational experiences
- Promote transfer of learning by guiding the student to recognize similarities across learning/practice settings including class, lab/simulation, home, community, or practice environments
- Provide meaningful methods for reflection including discussion, use of on-line forums, and portfolio development

Students are provided with diverse learning opportunities including kinesthetic, visual, and auditory methods of instruction as well as grading criteria for assignments that provide various options for assessment of learning and proving competency. Throughout the curriculum, students are encouraged to work with faculty and fieldwork educators to identify learning strengths and growth areas then develop learning plans to enhance and develop skills.

Curricular Threads

Crossing the Lifespan, Adaptation, Workplace Skills/Professional Development/Lifelong Learning, and Occupational Therapy Practice Skills are conceptual threads that are woven throughout the curriculum.

Crossing the Lifespan

Participation in meaningful occupation is discussed throughout the curriculum as an adaptive process essential for health and well-being across the lifespan. The student is exposed to variations in the form, function, and meaning of occupations from birth through death, across diverse cultures, by observing, gathering information, and reflecting on what people do, how they do it, and the inherent meanings to the person or group. The social nature of occupational development becomes better understood when interacting with children, adolescents, adults, and the elderly and the life roles that each age group typically encompasses.

Occupational Therapy Assistant students learn to perform selected assessments of skills and capacities at each life stage with an emphasis on analysis of occupational performance in naturally occurring environments while always considering the transaction among person, task, environment, and all relevant contexts.

Adaptation

“Occupational therapy practitioners conceptualize occupations as both a means and an end in therapy. That is, there is therapeutic value in occupational engagement as a change agent, and engagement in occupations is also the ultimate goal of therapy. Occupational therapy is based on the belief that occupations are fundamental to health promotion and wellness, remediation or restoration, health maintenance, disease and injury prevention, and compensation and adaptation. The use of occupation to promote individual, family, community, and population health is the core of occupational therapy practice, education, research, and advocacy.” The Philosophical Base of Occupational Therapy (AOTA, 2017)

Occupational Therapy practitioners believe that human beings have the potential for adaptation throughout the course of their lives when unexpected changes occur. Disruptions in typical progression through life’s stages (which may include but are not limited to traumatic physical events, developmental delay, and/or psychological events) have the potential to cause adverse effects on occupational engagement and balance. Through the use of carefully selected and meaningful occupations, however, there is the capacity for change and adaptation which has the potential to restore balance and purpose to one’s life. By engaging in carefully selected and meaningful occupations within varied contexts, human beings have the potential to adapt to various life events in order to achieve a state of overall health, well-being, and quality of life.

Workplace Skills/Professional Development/Lifelong Learning

The focus on becoming an Occupational Therapy Professional is the student’s gradual acquisition of skills for client centered practice and professionalism. The curriculum provides opportunities to clarify personal values, to establish rapport, actively listen, use the teaching/learning process, and to manage difficult emotions and behaviors. Coursework includes communication skills and group dynamics.

The nature of the occupational therapy profession requires that the individual practitioner consistently look towards advances and developments in practice to hone professional skills and techniques to better serve the designated population. Similarly, the curriculum design of the Occupational Therapy Assistant program and McLennan Community College is future-oriented in that it addresses current and emerging areas of practice. Included in the curriculum are concepts identified by the profession at large as important in future practice. These include, but are not limited to, population health issues, aging in place, low vision, driving, home modifications, and assistive technology.

Student and faculty membership in professional organizations are identified as key to staying up-to-date on trends and issues that affect the future of OT practice. Each student is expected to join the national and state occupational therapy associations as part of the process of developing into an occupational therapy professional. Student assignments include regular use of the AOTA website, TOTA website, American Journal of Occupational Therapy, and the OT Practice Journal.

Occupational Therapy Practice

During the first semester “Principles of Occupational Therapy” class, the student learns about the history and foundations for Occupational Therapy practice including the ethics, values, and core beliefs of the profession. During this same class, and through the later “Healthcare Management” class, the student learns to discern the social and political context for Occupational Therapy practice in the United States and how various regulations impact practice in medical, social, and educational settings.

Training and practice in techniques and skills required across a variety of settings ensures safe practice and compliance with health precautions and contraindications when working with certain populations. The student gradually assimilates the ability to gather and record client information, and to develop intervention plans in collaboration with the person served, and the occupational therapist, as per the requirements of each practice setting.

Each student participates in fieldwork education throughout the curriculum linking academic studies to the realities and demands of practice.

Through supervised fieldwork education and service learning in authentic settings, each student has multiple opportunities to solve practice related problems, and develop and refine professional and interpersonal skills. Level I fieldwork serves to integrate content from the combined semester coursework and builds upon knowledge and skills honed during prior semester(s). Level II fieldwork education requires 16 weeks of direct application with different populations/practice settings. These experiences serve to reinforce and evaluate the required competencies of an entry-level Occupational Therapy Assistant.

Fieldwork and Curriculum Design

The fieldwork program is designed to be integrated into the curriculum design of the program. Learning is a cycle that requires reinforcement of concepts through “hands-on” delivery methods.

Fieldwork sites will be carefully selected based on their ability to address the curricular threads. Fieldwork educators are active participants in this process through participation in advisory committee meetings, fieldwork site visits, opportunities for adjunct teaching and guest lectures, providing feedback via surveys, and through electronic communication. The program actively recruits former students familiar with the curriculum design to serve as fieldwork educators, encouraging promotion of the profession through fieldwork education.

During the Level II placements, the students will be concurrently enrolled in OTHA 2235 Healthcare Management and OTHA 2230 Workplace Skills to further support the fieldwork experience. Discussion boards allowing reflection of the learning experiences will be included.

Including Fieldwork and Prerequisites, the Occupational Therapy Assistant Curriculum can be completed in 24 months.

The McLennan Occupational Therapy Assistant curriculum is designed to meet the requirements of the Texas Higher Education Coordinating Board. As such, many course titles and descriptions are prescribed. Students must complete all courses outlined in the curriculum. General education requirements are an integral part of the program and provide the student with a foundation in the areas of creative arts/culture/philosophy/language, biological science, social/behavioral science, and composition.

Note on WECM:

Courses for the Occupational Therapy Assistant program are selected from the course list developed by the Texas Workforce Educational Course Manual (WECM). All programs within each discipline have the same courses from which to choose, thus, allowing each program to select courses best suited to its curriculum design. Titles and course descriptions are the same throughout the state. WECM in no way supersedes the ACOTE guidelines for curriculum development.

Textbooks

Textbook purchase is required. Textbooks are selected for classes based on educational and reference purposes. Many texts are used in multiple courses. Please consult with faculty before selling any texts.

Registration

To maintain good standing in the program, students are responsible for registering and paying for program courses each semester during the specified college registration eligibility period. These dates are published in the college course schedule online. Course schedules are subject to change without notice.

Change of Personal Information

It is of utmost importance that the students inform program faculty concerning all changes in personal information during the entirety of the program. This should be done in Web Advisor as any change occurs.

This Space Intentionally Left Blank

Program Length

The Associate of Science Degree in Occupational Therapy Assistant at McLennan Community College includes 22 general education credits (including the pre-professional phase of the OTA curriculum) provided through the McLennan Community College general education programs and 38 professional credits earned through the Health Professions division of the college.

The general education credits earned through the McLennan Community College include foundational content that is further developed and integrated within the professional curriculum and applied during fieldwork education. The 38 professional credits are taken over the course of 6 semesters.

The curriculum design for the Occupational Therapy Assistant Program coupled with the assumptions about human learning form a starting place for program design, planning, implementation, and evaluation. As noted previously, a developmental model is used that progresses the content from simple to complex, allowing each student to build upon previously learned information and furthering life experiences, eventually translating into new learning. It is expected that learning in the Occupational Therapy Assistant Program is progressive and cumulative and that the student acquires knowledge, skills, and application reasoning in a predictable manner.

The content, scope, and sequence of the professional coursework supports the program's mission with an emphasis on human occupation across the lifespan, adaptation, the process of becoming an OT professional, and evidence-based OT practice applications.

Fieldwork education is integrated into each segment of coursework during the professional program - two Level I clinicals and two Level II clinicals. Full-time, Level II fieldwork education occurs in the final two semesters of the program. **No portion of Level I fieldwork is substituted for any part of the Level II fieldwork requirements.** The fieldwork program is designed to be integrated fully into the curriculum design of the program. Learning is a cycle that requires reinforcement of concepts through "hands-on" delivery methods.

The length of the OTA Program is comparable to other health professions programs at McLennan Community College and is comparable to Occupational Therapy Assistant Programs in Texas and throughout the nation.

Curriculum Requirements

Once in the program, all students must complete the sequence of courses as outlined in the OTA degree plan. Co-requisite courses that are listed within the degree plan may be taken early (and students are advised to take these courses prior to program admission), but may not be taken after the semester in which they are listed. It is the individual responsibility of each student to register for and complete all program courses as outlined in the degree plan. If a student does not successfully pass a co-requisite course with a "C" or better, it is the student's responsibility to notify the

program director immediately to determine whether he/she can progress in the program. Students should not assume that co-requisite courses taken prior to program admission will count toward the degree plan; students must meet with the program director to obtain department approval for course substitutions and must also obtain official college approval. Failure to follow these procedures may impact a student's graduation status. **All Level II clinical courses must be completed within twelve months of completion of the didactic portion of the curriculum. Students in the Program have five academic years to complete the curriculum after official enrollment in the first Program course. Exceptional circumstances will be considered on an individual basis.**

Cost Approximation

Due to McLennan's low tuition and central location for commuters, the cost of attendance is relatively low. Tuition is currently \$106 / credit (semester) hour for in-county students, \$124/ credit (semester) hour for out-of-county students and \$181/ credit (semester) hour for out-of-state students. The approximate cost for tuition and fees for the full program is currently \$6,980 for in-county, \$8,066 for out-of-county, and \$11,481 for out-of-state. Additional expenses are incurred for books (approximately \$1,500 for OTA books), national certification exam (approximately \$620), state licensure fee (approximately \$100), and travel expenses (gas, etc.) for clinicals (approximate cost will vary per student). [All costs are subject to change without notice.]

McLennan has many forms of financial aid available for students needing help with school and living expenses and is approved for Veteran's training.

Evaluation of Student Performance and Program Progression

Grade Reporting

The following percentage system for letter grade assignment will be utilized for reporting grades:

- A=90-100%
- B=80-89.99%
- C=75-79.99%
- D=65-74.99%
- F=below 64.99%

OTA courses require an average of 75% on written exams as well as a minimum of 75% on EACH skills exam to be given credit in a course. If a student fails a skills exam, that student will be allowed one (1) re-take of the skills exam. If the student fails the skills exam a second time, this will result in failure of a course, and the student will not be able to continue in the program. Failure of two skills practicals **across all OTHA courses** in a given semester will result in the student not being able to progress in the program. Specific grade compilation will be explained in the syllabi provided (for each OTA course) at the beginning of each semester.

A student must receive a “C” or above for successful completion of an OTA course or co-requisite course. Any student receiving a “D” or an “F” must withdraw from the OTA program, but may reapply for admission the following year following failure of only one OTA course, if there are no documented ~~causes~~ due to professional behavior issues (including such items as attendance, generic professional abilities, etc.). (See re-admission policy for complete details of this process).

Testing Procedures

All student personal belongings, including cell phones and smart watches, are to be stowed during written exams. It is the student’s responsibility to arrive early and secure belongings so that the exam may begin on time. No questions will be answered during the exam. Once the exam begins, students will not be allowed to return to the classroom once they exit.

When utilizing Scantrons, it is the student’s responsibility to ensure name, student number and all answers have been marked on the Scantron. Questions answered on the exam but not transferred to the Scantron will not be graded. It is the student’s responsibility to ensure all questions have been answered on the Scantron and that the Scantron is completed clearly and precisely within the allotted space. If student fails to comply with this procedure, the grade will be assigned as it was scored on the Scantron. No corrections will be made to the Scantron by the instructor after it has been electronically scored.

Evaluation Methods

Student learning outcomes will be measured by written exam (basic knowledge/comprehension and higher level/critical thinking), check-offs (technical and psychomotor skills), skills practicals (technical and psychomotor skills and higher level/critical thinking skills), group discussions and projects (basic knowledge/comprehension, higher level/critical thinking, and professional communication), student presentations (basic knowledge and professional communication), and written reports (basic knowledge/comprehension, higher level/critical thinking, and professional communication).

Program Progression

In order to successfully progress from semester to semester in the Occupational Therapy Assistant Program, the student must, at a minimum:

1. Receive a final (minimal) grade of “C” or above in any OTA or co-requisite course
2. Successfully complete all courses as outlined in the OTA degree plan
3. Satisfactorily meet all course objectives
4. Meet all technical standards/essential functions
5. Meet attendance requirements
6. Meet professional behavior requirements
7. Register and pay for classes each semester

Program Completion/Graduation Requirements

1. In order to graduate from the program, a student must successfully complete all OTHA, prerequisite, and co-requisite courses with a “C” or better
2. Graduation from McLennan requires a minimum overall 2.0 grade point average in the OTA technical curriculum.
3. With successful completion of 60 credit hours in the OTA curriculum, the Associate in Applied Science degree will be awarded.

Certification and Licensure

Graduates of the program are eligible to sit for the National Certification Examination for the Occupational Therapy Assistant, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the graduate will be a Certified Occupational Therapy Assistant (COTA). In addition, most states require licensure to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

Please Note: A felony conviction, or certain misdemeanor convictions, may affect a graduate’s ability to sit for the NBCOT Certification Examination or obtain state licensure. See NBCOT and TBOTE websites for specific eligibility requirements.

https://www.nbcot.org/-/media/PDFs/Cert_Exam_Handbook.pdf

<http://www.ptot.texas.gov/>

OTA Program Policies and Procedures

Health Policy

Students will be required to have on file with the OTA Program Director (via electronic submission through the contracted tracking service) proof of immunization against the following prior to beginning the clinical phase of the program:

- Hepatitis B
- Varicella (Chicken pox)
- Measles
- Mumps
- Rubella
- Diphtheria/tetanus

Students will also be required to have a two-step tuberculosis skin test, TB blood testing, (or chest x-ray) upon entry into the program. Annual TB screening and seasonal flu vaccines are required as well. Cost of immunizations and x-rays are the responsibility of the student.

COVID-19 Vaccines

McLennan Community College does not require students in Health Professions programs to receive COVID-19 vaccinations. However, clinical affiliates may require students and clinical faculty to be fully vaccinated against COVID-19 or provide a college approved exemption.

Exemptions for COVID-19 vaccinations are reviewed by the program director and Dean, Health Professions and are granted on a case-by-case basis. Exemptions granted for participation in a McLennan Health Professions program does not guarantee that a graduate will receive an exemption from future employers.

Students are required to secure and maintain health insurance coverage, and provide proof thereof, throughout the duration of the Program.

Students are required to have the physical and mental skills necessary to meet the standards of the workplace and within the clinical setting. Reasonable accommodation will be made for students with documented disabilities who have been accepted into the program. However, it is the student's responsibility to notify the OTA program director and the Accommodations office that such disability exists. The purpose of such accommodation is to allow the student to meet the educational standards and should not be perceived as lowering of educational standards. Refer to the *Essential Skills and Requirements* section.

Transfer Policy

From Another OTA Program

Any student who has previously been admitted to another OT or OTA program will be considered along with all other applicants in a pool. The applicant must submit:

- a. A McLennan Community College application
- b. An OTA program application (due June 1 each year)
- c. Transcripts from all other institutions attended
- d. A letter of recommendation from the previous OT or OTA program director stating that the student is in good standing and would be eligible for re-admission into that program.

The student must also meet McLennan OTA program admission criteria. Again, requests for admission into the McLennan OTA program will be reviewed and scored along with all other applicants.

A student who has been previously enrolled in an OT or OTA Program will take all of the courses for the Program even if the student was successful in other OTHA courses. Each semesters' OTHA courses are concurrent courses. At no time may a student take only one/select courses.

The program does not accept previous work experience as a substitute for coursework.

For Non- OTA Courses

All academic courses to be transferred into the degree plan from another institution must be

recommended by the program director, as well as evaluated and approved by the Registrar's office of McLennan. Any student who wishes to discuss transfer credit for the prerequisite/corequisite courses should contact the OTA program director.

Please note: McLennan Community College policy states that at least 25% of the hours in the degree plan must be completed in residency at McLennan Community College in order to be granted a degree from our institution.

Student Advisement/Conferences Policy

Once enrolled in the OTA program, academic and fieldwork advisement is periodically conducted with program faculty and scheduled at times convenient for both student and faculty. Should a concern regarding student progress arise, program faculty will request that the student attend an advisement meeting to discuss available student options and supportive resources/services as appropriate. Additionally, a student may request an academic advisement appointment with program faculty at any point to discuss his/her program progress and progress toward completion of the degree plan. The faculty member receiving the student request will direct the student to the most appropriate individual to address his/her concerns. Fieldwork advisement will occur on an as needed basis between the student, fieldwork educator (clinical instructor), and the fieldwork coordinator (FWC) should questions, issues, or concerns arise during the fieldwork experience.

If it is determined that the student is in jeopardy of failing or leaving the program, the student and all faculty involved will determine a plan of action to try and retain the student in the program. Solutions may include, but are not limited to: tutoring, assigning a mentor, meeting with success coaches, locating other resources to assist with study habits, learning style assessment, and stress and/or time management strategies. Student Conference Forms are utilized, and the student may make comments and sign the form. The form is then placed in the student's file. Student signature on the conference form does not indicate that the student agrees with statements made on the form, only that the student has had an opportunity to read the form and to make comments.

Attendance and Assignments Policy

Attendance is essential for the attainment of course objectives in both classroom and clinical instruction.

Any student who is absent from class or lab due to personal physical illness, serious illness or death of an immediate family member will be required to present documentation of the illness or death in order to make up any missed work. It is the **student's** responsibility to attain the information that is missed due to his/her absence.

Regardless of the reason for a particular absence, each absence will count toward the stated limitations. (See McLennan's attendance policy). See course syllabi for additional information.

Attendance is essential for attainment of course objectives and skills competencies. A student who is not present at the scheduled start time of class is considered tardy (this includes start of day as well as return from breaks and return from lunch). A student who misses more than 50% of a class period, whether it is due

to late arrival or early departure, will be counted as absent. **Three (3) tardies will constitute one absence.** At the instructor's discretion, the door may be locked at the beginning of class with the late student being denied entry.

- Two (2) absences: verbal warning
- Three (3) absences: written warning
- Four (4) absences or one no call/no show: program probation
- Five (5) absences or two no call/no show's: **withdrawal from program**

Additionally, the third absence, and each additional absence, will result in a reduction of the final course grade by two points.

Absences from lab will also be handled following the above policy; however, hours missed from lecture and lab will not be combined to penalize the student.

Make-up work may be allowed/required, at the discretion of the instructor, for absences in order to ensure that student acquires information and skills presented during their absence. Students must notify the instructor in advance via e-mail or phone message whenever tardiness or absence is unavoidable. **Failure to notify the instructor will result in program probation.**

Students should not schedule travel events during any class day from the first day of the semester to the last day of finals per the college calendar. Students who plan travel and miss course content or exams will receive a grade of 0 unless **prior** written approval is given by the faculty for an excused reason (i.e., death in the family, etc.).

It is the responsibility of the student to come to class having read the assigned material and ready to participate in discussion and activities. This will provide a more positive learning experience for the student. It is also the responsibility of the student to turn in assignments on time.

Assignments are due at the beginning of the class day or as stated in each assignment in Brightspace. Late assignments will not be accepted unless it is due to a documented excused absence (i.e., death in family, illness with note from MD, acts of God, etc.). *Minor illnesses do not constitute excused absences.*

The following are not acceptable forms of assignments:

- assignments in other than "Word" or pdf format
- hard copy of assignments that were to be uploaded
- illegible assignments
- emailed assignments that were to be uploaded
- jpg. or other digital formatting
- assignments sent through text message
- handwritten assignments in other than blue or black ink
- assignments with unprofessional presentation including being incomplete
- assignments with extensive grammatical errors will not be graded and will receive a "zero"
- assignments that use identifying information of a subject/supervisor/facility (must use initials only) will receive a "zero".

In-class assignments, including but not limited to quizzes, presentations, and lab activities, missed due to an absence, late arrival, or leaving class early will be awarded an automatic "zero" and cannot be made up.

Arriving to class after the morning quiz or exam has started will result in an automatic grade of “zero”.

There will be no make-up exams for written exams or skills practicals except with permission from the instructor for excused absences only (i.e., death in family, illness with note from MD, acts of God, etc.). *Minor illnesses do not constitute excused absences.* When make-up exams are granted, they will be ~~stated~~ at the instructor’s convenience. Absence or tardiness for a make-up exam will result in a grade of “zero”. In general, work “re-do’s” will not be allowed. If, at the discretion of the instructor, a re-do is permitted, a maximum grade of 75% will be given.

Time/hours missed on clinical/fieldwork placement must be made up/rescheduled at the convenience of the facility.

Scholastic and Program Probation

Please see the McLennan General Catalog (available at <http://www.mclennan.edu/catalog/>) for detailed information on “Scholastic Probation and Suspension.” Within the OTA program, a student whose scholastic or professional performance is weak or unsatisfactory will meet with the individual instructor(s) and/or the OTA Program Director to discuss areas of concern, and a Student Conference Form will be completed. If the student’s scholastic or professional performance does not improve he/she may be put on program probation and specific criteria will be set for continuation in the program. If the student is unable to meet the criteria, or if performance does not improve, he/she will be withdrawn from the program. In all instances, the student will be provided with individual counseling and assistance.

Probation may be implemented for, but is not limited to, the following:

- Unsatisfactory scholastic or clinical performance
- Unsatisfactory classroom or clinical attendance and punctuality
- Inability to maintain physical and mental health necessary to function in the program
- Unethical, unprofessional behavior, and/or unsafe classroom/lab or clinical practice
- Refusal to participate with a procedure
- Unsafe or unprofessional clinical practice that compromises student, patient, or staff safety
- Behavior which compromises classroom/lab experiences or clinical affiliations
- Failure to comply with all terms outlined in the conference report

Students are allowed no more than two probationary periods throughout the course of the program for academic and/or professional issues. Need for a third probationary period will result in withdrawal from the program.

Withdrawing from a Course

Before withdrawing from a course or from the College, the student should first speak with the instructor of the course. The student must also notify the OTA Program Director prior to withdrawing because withdrawing from certain courses may prevent the student from progressing in the program.

Students may initiate a withdrawal through the Office of Admissions/Registrar. A student who ceases to attend classes but does not officially withdraw from classes may receive a grade of “F”. (See Class Attendance Policy and College Grading System – General Catalog.)

Students should carefully review the official academic calendar and pay special attention to the last date

during the semester/term when they drop a course and receive a “W”. After that date, they may receive an “F” if they are not passing the course. There is a date late in the semester after which no course may be dropped by a student without receiving a letter grade.

Re-Admission to the OTA Program Policy

Any student who is unsuccessful in an academic or clinical course (grade below 75%) is no longer able to progress in the OTA program. If the student was unsuccessful in only one course and has no documented counseling due to professional behavior issues (including such items as attendance, generic professional abilities, etc.), the student is able to apply for readmission to the OTA program at any time. If readmitted into the OTA program (which is not guaranteed), the student will be required to complete all program courses regardless of successful completion the first time. Readmission is granted only once. If the student was unsuccessful in two or more courses (or one course plus has one or more documented professional behavior counseling) the student is no longer eligible to apply for readmission to the OTA program.

A student who voluntarily withdraws from the program for personal reasons is able to request reinstatement if the student has an 80% or better in all OTA classes, both completed and in progress, at the time of withdrawal and has no documented counseling due to professional behavior issues.

Reinstatement is granted on a case by case basis and only if there is space available in the program.

Request for reinstatement procedure:

- a. Student must submit in writing to the OTA Program Director, their intent to be reinstated into the program. The written request must include, at minimum, the steps the student has taken in order to ensure their success in the program, should reinstatement be granted.
- b. The OTA Program Director will take the student’s written request to the health professions admissions committee for consideration. Each request will be handled on a case by case basis.
- c. The student will then receive a letter from the admissions committee stating if the student was granted reinstatement along with any requirements/remediation deemed necessary by the admissions committee.
 - i. If reinstatement is granted, the student will have to prove competency in OTA courses already completed by the end of the semester in which the student is reinstated in order to continue in the program. This may include passing written and skills exams (with a minimum grade of 75% for each) as determined by the OTA faculty and admissions committee.
 - ii. It is the responsibility of the student to prepare for, and schedule, competency testing with the instructor and/or program director. Students who are readmitted to the OTA program after successfully completing a clinical course may or may not have to prove competency in previously completed OTA courses, per the discretion of the OTA Program Director.
 - iii. Potential remediation recommendations could include: re-taking courses previously completed, auditing courses previously completed, acquiring more observation hours in an OTA clinical setting, independent student research, and/or meeting with success coaches. (This list is an example and is not all inclusive).
- d. The Health Professions Admissions Committee will make the final decision regarding readmission

applications based on: space availability and previous student record and potential for academic and clinical success, if applicable.

Communication Policy

External communication with students outside the classroom is executed primarily via email. Each student, therefore, is to submit a McLennan email account address and ensure any change to that address, through the course of the year, is submitted in writing. **All email communication between faculty and students will take place through McLennan's student email system only; faculty will not respond to students who send emails from personal mail accounts.** Faculty will make every attempt to respond to e-mail within 48 hours during normal business hours. It is the student's responsibility to check and respond to email communication in a timely manner.

*Please note: **Faculty will also not respond to email communications that are not written in appropriate business professional style including correct spelling and grammar.***

Classroom and Lab Safety Policy

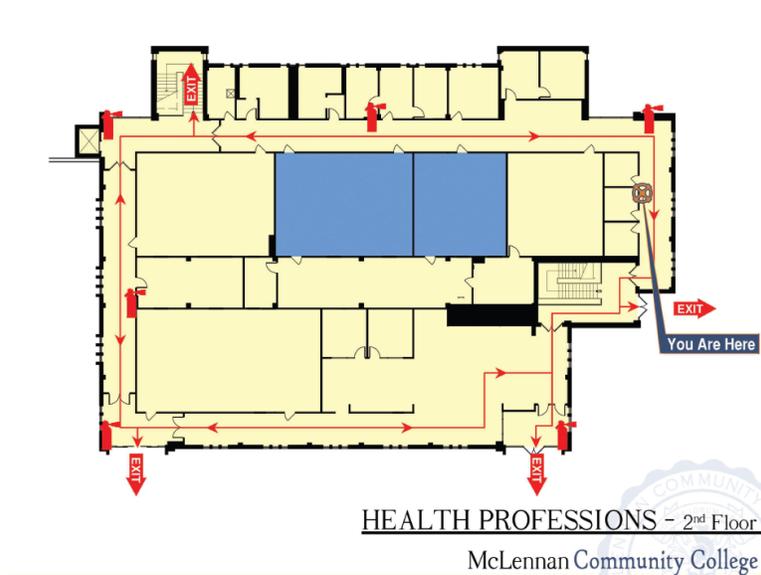

McLennan's safety policies for weather, fire, and other emergencies will be addressed at the beginning of each semester with the students. A copy of McLennan's emergency plan can be found on the McLennan website.

http://www.mclennan.edu/crisis-management/docs/Emergency_Operation_Field_Guide.pdf

Students are encouraged to sign up for MCC *myAlert*. *MCC myAlert* is an emergency notification service that gives McLennan Community College the ability to communicate health and safety emergency information quickly by email and text message. By enrolling in *MCC myAlert*, MCC can quickly pass on safety-related information, regardless of student's location. <https://www.mclennan.edu/alerts/>

Evacuation

Below is a floor plan of the Community Service Center's C Wing with exits labeled. The majority of the OTA classroom and lab work will take place in room HP 228. If evacuation is required, use the nearest accessible exit and meet in parking lot H across the street.

Inclement Weather

In the event of inclement weather, check for school closings on *myAlert* and/or the College web site. Do not attempt to come to class in anticipation of, or during, ice storms, tornado warnings, or severe thunder storms.

Equipment and Supplies

Basic OTA classroom and lab safety regulations are posted in the lab/classroom areas. Safety regulations regarding the use of equipment and supplies are presented as they are needed to meet learning objectives. It is imperative that students adhere to these standards in order to maintain a safe environment in the classroom and lab area. Students are to only practice those techniques that have been presented in lecture and/or lab. Students wishing to use lab equipment at any time other than regular or open lab hours must make arrangements with an OTA faculty member to provide supervision.

Students are responsible for maintaining safe and clean classroom and lab environments. This includes, but is not limited to, returning all equipment and supplies to their designated spaces, returning classroom desks and chairs appropriately, wiping down lab mats/classroom desks as necessary, reporting any unsafe or damaged equipment to the instructor immediately, utilizing resources and supplies in an efficient manner, utilizing all college property in a respectful manner, and assisting in the maintenance of an environment conducive for learning.

Students are to notify the instructor immediately of any safety hazards identified. This includes, but is not limited to: frayed electrical cords, loose nuts or connectors, cracked or broken equipment, missing parts, expired perishables, or water leaks.

Infection Prevention

Students are expected to comply with good hygiene practices related to regular hand washing. Each lab has a sink area for compliance. Additionally, gel hand sanitizer is available in the lab. Students must pass

the hand hygiene lab skills practical in the first semester.

Students are expected to follow standard precautions relative to body fluids including the appropriate use of personal protective equipment. Students must pass the standard precautions/personal protective equipment lab skills practical in the first semester.

All equipment is to be wiped down with germicidal wipes between uses.

General Classroom/Lab Policy

Open Labs

The OTA program provides opportunities for students to study and practice outside scheduled classroom/laboratory times. The times are scheduled as requested every semester and on availability of qualified staff. Qualified personnel must be available to answer questions and/or provide assistance. An attempt is made to schedule times when the majority of students may take advantage of this opportunity. Students must coordinate with OTA faculty for open-lab times. Students have access to evaluations and treatment methods during scheduled class/lab times, open labs as directed by faculty, and open labs as requested by students.

Human Subjects – Non-Research

Each student will be asked to allow faculty and other students to apply commonly accepted occupational therapy techniques to his/her body during role-playing scenarios and/or lab experiences. All students will be instructed in proper technique for the protection of a patient's modesty and dignity. All techniques will be applied with faculty supervision. Only currently enrolled students may participate in laboratory activities.

Confidentiality of Exams and Assignments

All exams are the property of the program and will not be released to the students. All exams and designated assignments will be kept in confidential files in the Program Director or Faculty offices. Students may access exams and other assignments as needed for review through any program faculty member during designated office hours. Review must occur within the site designated by the faculty member. During any exam reviews, an instructor's presence is required. All grades are confidential and should not be shared or discussed with peers. All grade questions should be discussed with the instructor or Program Director.

While reviewing the exams, the student is free to make notes related to the topics addressed on the exam. The student may consult with faculty regarding material covered or methods of study to learn the information. Students may not make direct copies or photos of the exam questions in any manner. Failure to comply with this policy may result in disciplinary action which may include program withdrawal. Any exam re-moved from the departmental files will result in the grade being changed to a "0". Violations may result in disciplinary action up to withdrawal from program due to scholastic dishonesty.

Technology Devices

Personal Computer/Electronics Use: **Computer use is expected throughout the Program. The MCC library**

has computer availability for after class hours if necessary. Access to library search engines is required and will be a part of the student's required class participation.

Students are not to use laptop computers, smart phones, iwatches/smart watches, or other electronic devices in the classroom unless prompted by the instructor. These devices are to remain stowed during class.

Students are not to post any classroom materials on any internet or social media site without the express written consent of the faculty.

A student who has an unauthorized electronic device activated during an examination period will not be permitted to continue the examination, will be asked to leave the classroom, and will be denied the opportunity to complete or re-take the examination. Due to the circumstance, the instructor may question the validity of any portion of the examination completed prior to the violation and may elect not to grade the examination. In such a situation, the student will not receive credit for the examination and will not be permitted to make up the missed examination.

Video & Tape Recordings: Students may only tape record or video class activities and instructors with permission of the instructor and in no circumstance are allowed to post recordings on any internet site or social network site. The recording may only be utilized by the individual. Students who do not remain in compliance with this policy will be written up, put on probation, or potentially dismissed from the program based upon the extent to which the policy has been disregarded.

Beepers, cellular telephones, text, and personal telephone calls. Students are NOT to receive or place telephone calls/texts during class. Smart watches and cellular telephones are to be turned off or set to vibrate before entering the classroom and stored in backpack during class. At the discretion of the instructor, students may be asked to leave cell phones and electronic devices in a box during class.

Additional Items:

- ✓ **Verbal, non-verbal, and written communications** are to be polite and respectful at all times
- ✓ **Food** is not allowed in class
- ✓ **Children** are not allowed in class
- ✓ **Sleeping** is not allowed in class
- ✓ **Drinks** with screw-on lids are permitted if the student leaves the lid in place
- ✓ **Smoking, vaping, using tobacco**, using simulated tobacco or similar products are not allowed in class
- ✓ **Alcohol and drugs are not allowed** in the classroom and students should not attend class under the influence of them nor with the smell of any of them

Any of the above will result in being asked to leave the classroom and receiving an absence for the day at a minimum but could result in being written up, put on probation, or potentially dismissed from the program based upon the extent to which the policy has been disregarded.

Appearance and Grooming

As a student and future professional, personal health must be maintained such that there is no risk to self, peers, or patients. Personal cleanliness and hygiene are essential for acceptable interpersonal activities such as those engaged in by health care personnel. The OTA faculty will counsel students in these areas when necessary. These guidelines apply to campus classroom and lab as well as clinical settings.

1. Jewelry that is acceptable: wedding bands/rings; watch; small chain necklace; small stud earrings (no more than two per ear). Jewelry that is NOT acceptable: rings other than listed above; bracelets; bulky necklaces; dangle or loop earrings; pierced earrings worn anywhere other than the ear; i.e., facial, nose, tongue, etc. piercings are not allowed.
2. Hair must be clean and off the shoulders. Only simple hair accessories are permitted. Students with long hairstyles must be able to tie hair back or pin it up so it does not fall loosely over shoulders and face.
3. Fingernails must be clean and filed smoothly. The fingernails must not extend beyond the fingertips. Only single-colored nail polish is acceptable.

4. Personal hygiene should include daily bathing as well as the use of deodorants and mouthwashes as needed. No fragrances or perfumes are to be worn. Offensive body odors will not be tolerated, including the lingering smell of tobacco on clothing, hands, or breath.
5. Moustaches /beards must be neatly trimmed.
6. Classroom attire is business casual. Clean, neat shirts, and pants or skirts, jeans, scrubs or Capri pants are acceptable. Knee length shorts are the only acceptable type of shorts permitted. Pants and jeans are to cover the hips and buttocks completely even while bending. Shirts and blouses are to cover the chest and midriff completely even while bending. Shoes are to be closed toe, sturdy, non-skid soles, and able to provide stability.
7. Hats and caps are not allowed in the classroom or clinic.
8. Students must be prepared to dress as required for certain laboratory experiences. Laboratory attire will consist of shorts and a plain t-shirt for men and shorts, plain t-shirt, and sports bra/halter top or 2 piece swim suit top for women. Shorts must have an elastic waistband (i.e. gym shorts). Shorts should not be excessively short and must be loose enough to allow for palpation of hip musculature. Sport bras/ halter tops or swimsuit tops must have back closures to allow exposure for palpation of vertebrae, shoulder girdle, and associated structures.
9. OTA Program scrubs will be worn in the CDC labs, Simulation Building labs, and at other times as directed by the course instructor.
10. Clinic attire will be the OTA Program scrubs and shoes that are closed toe, sturdy, and with non-skid soles unless otherwise directed by the clinical site.
11. MCC CLINICAL NAME TAGS MUST BE WORN AT ALL TIMES IN THE CLINICAL SETTING
12. Tattoos must be covered.

If a student attends class in unacceptable dress, he/she may be asked to return home to change into appropriate attire before being admitted to class. This will result in an absence being counted.

Student Records

All student records must be retained in compliance with the College policies. Once the storage time has been reached, the original documents are destroyed in compliance with the College policies. Students can review these secured records by making an appointment with the Program Director.

It is the responsibility of the student to maintain his/her own copies of any record submitted to the OTA program which includes, but is not limited to, transcripts, immunizations records, CPR certification, etc. The OTA department will not make copies of these documents.

Academic Dishonesty

The Center for Academic Integrity defines academic integrity as “a commitment, even in the face of adversity, to five fundamental values: honesty, trust, fairness, respect, and responsibility. From these values flow principles of behavior that enable academic communities to translate ideals into action.” Individual faculty members determine their class policies and behavioral expectations for students. Students who commit violations of academic integrity should expect serious consequences. For further information about student rights, responsibilities, and academic integrity definitions, please consult the *General Conduct Policy* in the [Highlander Guide](#).

McLennan’s OTA program does not tolerate academic dishonesty of any kind. Students are expected to refrain from academic dishonesty. This includes any conduct aimed at misrepresentation with respect to a

student's academic performance. Examples of academic dishonesty include: cheating or collaborating on written exams; possession, at any time, of current or previous test materials without the instructor's written permission; plagiarism; collaborating with others if contrary to stated guidelines for assignment or skill; providing students who have not completed skills practicals with information related to the exam; and intentionally assisting another student in any dishonest action. Violations of this policy will be brought to the attention of the student by the instructor. If there is suspicion of wrongdoing without corroborating evidence, the matter will be discussed with the student, and a verbal warning will be issued if warranted. If there is clear evidence that a violation has taken place, the instructor may impose a sanction ranging from a written warning to expulsion from the course with a failing grade.

Violations of this policy will be brought to the attention of the student by the instructor. If there is suspicion of wrongdoing without corroborating evidence, the matter will be discussed with the student, and a verbal warning will be issued if warranted. If there is clear evidence that a violation has taken place, the instructor may impose a sanction ranging from a written warning to failure of the course. Failure of a course for any reason will result in the student not being able to continue in the OTA program.

If the student does not feel that the issue is satisfactorily resolved, the student should contact the OTA Program Director to discuss the matter. If the matter cannot be resolved at that level, the student may then contact the Dean of Health Professions. If the issue is not satisfactorily resolved at the end of this process, the student may initiate a formal grievance procedure. The Student Grievance Procedure is outlined in the [Highlander Guide](#) or the McLennan website at: www.mclennan.edu/publications/policies/G-XIII.pdf

Student Ethics

Students in the OTA program are expected to:

1. Use their own knowledge and skill to complete examinations without referring to others' answers, class notes or other references unless specifically permitted by the instructor.
2. Use their own knowledge to write major papers or compile research information. They shall not plagiarize, quote or copy other persons' works without giving proper recognition as stated in a standard manual on style.
3. Comply with all testing procedures/protocols as outlined by the instructor and/or testing center.
4. Respect the opinions of the instructor and other learners. They shall not insult, slur or degrade instructors, other health professionals or students. (This ethics statement does not infringe upon a student's right to raise questions and request clarification but does modify the manner in which the question or clarification is brought forth.)
5. Respect the limited resources of textbooks, library books, reprints, and journals. They shall not mutilate, deface, damage or withhold resources for their own use.
6. Conserve limited resources by using only supplies needed for completion of assignments and maintain equipment in good working order. They shall not waste supplies or misuse equipment.
7. Assist in maintaining class and laboratory rooms in good order. They shall not leave these rooms dirty or in disarray or disorder upon completion of their assignment in each room.
8. Complete all assignments by the scheduled date and time or make satisfactory arrangements with the course instructor for an extension. They shall not expect to receive equal consideration in grading unless

such arrangements are made.

9. Complete all assignments. The student shall not expect to pass a course until **all assignments** have been submitted. A grade of zero will be given on late assignments.
10. Observe all safety procedures when working with patients and equipment whether in class, clinic or patient's home. They shall not endanger the safety and welfare of patients, other students or faculty and staff.
11. Observe all policies and procedures established by the Division of Health Professions, Occupational Therapy Assistant Program, and all fieldwork facilities. Student shall not exempt themselves without specific permission by a faculty member or Fieldwork Educator.
12. Respect the confidentiality of patient information regardless of source (patient, therapist, records, charts and any other patient identifiers). They shall not repeat information outside of the classroom, clinic or facility in which any part of the patient's name appears except initials. Shall abide by the HIPPA policies set forth by the OTA Program and any Fieldwork Facility.
13. Work in cooperation with and respect for other health care team members. Student shall not interfere with or obstruct the rendering of the services provided by other health care members.
14. Protect the property and property rights of the facility, clinic, and patient. They shall not remove or borrow property without permission and shall not damage or misuse property while in the facility, clinic or home.
15. Respect other student's projects. They shall not handle, steal, alter, deface or otherwise harm another student's project, especially in a manner that might cause the project to receive a lower grade by the instructor.
16. Use sound judgment in regard to the safety of self and others during all class-related activities.
17. Take responsibility for own learning by seeking out assistance and learning opportunities.
18. Accept and make the necessary behavioral changes based on constructive feedback.
19. Demonstrate initiative, preparedness, and dependability.
20. Demonstrate positive interpersonal skills including but not limited to cooperation, flexibility, tact, and empathy.
21. Demonstrate respect for human diversity during all program activities.

Adapted From: APPENDIX L/ Student Ethics, University of Oklahoma Health Sciences Center, College of Health, Dept. of Occupational Therapy

Generic Abilities & Professional Behaviors:

Students are expected to maintain a professional classroom decorum that includes respect for other students and the instructor, prompt and regular attendance, and an attitude that seeks to take full advantage of the educational opportunity. Likewise, all communications with the instructor are to be professional. (E-mails that are discourteous, use improper grammar, and/or simulate a text message will not be responded to).

Students in the Occupational Therapy Assistant program have willingly applied for and entered into a professional degree program. Implicit in professional degree programs is the need to develop the

student’s professional behaviors as well as minimum basic entry level competencies. The tool utilized in the OTA Program is the Generic Abilities form. Students will be evaluated on a continual basis throughout the program in classroom, lab activities, clinical activities, and interaction between fellow students, faculty, and instructors.

If a student is found to be lacking in any area of the generic abilities, the student will be called in by the faculty member who will fill out the form and review any deficiencies. The faculty member, and if deemed necessary the program director, will then discuss with the student a plan of action to assist the student in development in the areas that have been deemed deficient.

Any student who persists with the same deficiencies with no improvement in professional behavior over three (3) different episodes may be dismissed from the program based upon lack of progress in professional behavior.

It will also be at the faculty member’s discretion to take two (2) points from the student’s final grade for each documented episode related to unprofessional behavior.

A short description of the Generic Abilities follows and specific forms for assessment are included in each course syllabi.

Generic Abilities

Generic abilities are attributes, characteristics or behaviors that are not explicitly part of the knowledge and technical skills but are nevertheless required for success in the profession. Ten generic abilities were identified through a study conducted at the University of Wisconsin at Madison in 1991-1992. The ten abilities and definitions developed are:

	<i>Generic Ability</i>	<i>Definition</i>
1	Commitment to learning	The ability to self-assess, self-correct, and self-direct; to identify needs and sources of learning; and to continually seek new knowledge and understanding.
2	Interpersonal skills	The ability to interact effectively with patient, families, colleagues, other health care professionals, and the community and to deal effectively with cultural and ethnic diversity issues.
3	Communication skills	The ability to communicate effectively (speaking, body language, reading, writing, listening) for varied audiences and purposes.
4	Effective use of time and resources	The ability to obtain the maximum benefit from a minimum investment of time and resources.
5	Use of constructive feedback	The ability to identify sources of and seek out feedback and to effectively use and provide feedback for improving personal interaction.
6	Problem-solving	The ability to recognize and define problems, analyze data, develop and implement solutions, and evaluate outcomes.
7	Professionalism	The ability to exhibit appropriate professional conduct and to represent the profession effectively.
8	Responsibility	The ability to fulfill commitments and to be accountable for actions and outcomes.
9	Critical thinking	The ability to question logically; to identify, generate and evaluate elements of logical argument; to recognize and differentiate facts, illusions, assumptions, and hidden assumptions; and to distinguish the relevant from the irrelevant.

10	Stress management	The ability to identify sources of stress and to develop effective coping behaviors.

Plagiarism

The following guidelines have been established by McLennan Community College to help students avoid plagiarism and are included below for ease of student accessibility to the information.

McLennan Community College Guidelines for Avoiding Plagiarism

Plagiarism is the intentional- or unintentional- use of someone else’s work without adequate documentation. Whenever writers want to include another’s ideas, key terms or copied text into their own papers or presentations, they must always use that borrowed information accurately and ethically.

Documentation, an agreed upon style of providing credit to others’ work, is necessary in order to avoid plagiarism. Plagiarism is a serious offense in college-level writing, for it is intellectually dishonest, robbing authors of their property.

All documentation styles include internal citations, a works cited list, and quotation marks around copied terms and information.

To consider: As we would never borrow one of our neighbor’s possessions without asking permission, we should never use someone’s words or ideas without permission. Correctly documenting someone else’s material permits us legal use of words and ideas not belonging to us.

It should be obvious that buying papers, using someone else’s papers and similar activities are plagiarism at its worst.

Each instructor will determine penalties for plagiarized work.

Document when:

- You use someone’s ideas from any traditional or web source
- You copy sentences and phrases from a source
- You copy a key term from a source
- You use information from an interview or survey
- You copy pictures, charts, and diagrams from sources
- You use information you did not originate

Use of Plagiarism Detection Service

Brightspace Turnitin Integration

1. McLennan Community College faculty members may adopt the plagiarism detection services offered by Brightspace Turnitin, but they are not required to do so.
2. Faculty members choosing to adopt this plagiarism detection service offered by the Service shall:
 - a. Treat all students equally
 - b. Require submission of either all student papers or no student paper, for any particular assignment
 - c. Inform students which assignments will require submission to the Service
3. In the event a student commits an act of plagiarism, faculty members are strongly encouraged to submit the name of the offending student to the Discipline Coordinator. This action is recommended without regard to other consequences a faculty member may choose to employ. It is imperative that the Discipline Coordinator be given the information so that the college can identify serial offenders.
5. Instructors are encouraged to place the following statement in their syllabus:

* [Click Here for the MCC Academic Integrity Statement](#)

(www.mclennan.edu/academic-integrity)

The link above will provide you with information about academic integrity, dishonesty, and cheating.

In addition, in this class, students are subject to the minimum following discipline:

First Offense: failing grade on the assignment

Second Offense: failing grade in the course

The student may be withdrawn from the Program based on the severity of the offense.

Complaint/Grievance Procedure

Faculty will provide academic and clinical counseling throughout the program as necessary. Concerns regarding academic and/or clinical advising or instruction should be first addressed to the faculty member in question within five (5) working days from the time of occurrence. If the student feels that a problem has not been resolved, then the student should present the issue to the program director. If no resolution is reached at this level, in accordance with the McLennan Student Grievance Procedure, the student may discuss the issue with the Dean of Health Professions. If resolution is still not reached, then the Vice President of Instruction and Student Engagement is contacted. A formal grievance may be initiated by submitting a request in writing to the President of the College to have the issue considered by a formal grievance committee. This procedure is outlined in the Highlander Guide, available at www.mclennan.edu.

For information regarding the due process policies of the College, please refer to the Highlander's Guide. The same organizational structures must be followed, which means that the student is expected to first start by discussing the issue with the specific faculty involved.

Time Line for Program Complaints/Grievances

Maximum time in days	Action
5	Student advises faculty of issue in an informal meeting.
14	Faculty meets with student to provide written feedback and strategies for resolution.
30	Student meets with program director if feedback and strategies do not resolve the grievance.
45	If the issue has not been resolved, the student should address the grievance to the Dean of Health Professions

If academic or clinical grievances are not sufficiently resolved according to the detailed process and timeline, the student may initiate the formal grievance policy. Please see the Highlander Guide for specific steps in this process.

This Space Intentionally Left Blank

THE CLINICAL EDUCATION PROCESS

This section of the Handbook describes those policies and procedures that govern the clinical portion of the OTA educational program. Non-compliance with regulations or failure to execute the responsibilities in this section will jeopardize the student's standing in the program.

The clinical education program is multifaceted. It offers the student a chance to be exposed to a variety of health care settings in order for the student to fully understand the scope of the profession and the health care needs of the community.

The clinical education program is an integral part of the academic program and:

1. Exposes the student to clinical practice at various stages of his/her academic experience
2. Provides the student an opportunity to integrate acquired classroom knowledge with clinical practice in a supervised setting
3. Fosters an environment for the student to develop effective communication skills with patients/clients and other occupational therapy practitioners and health care professionals
4. Serves as a mechanism for feedback that allows the Occupational Therapy Assistant faculty to review the effectiveness of the academic program

Responsibilities

Responsibilities of the OTA Program Faculty

One member of the Occupational Therapy Assistant faculty is primarily responsible for coordinating the clinical component of the program, and is referred to as the Fieldwork Coordinator (FWC). This coordinator works directly with academic instructors, fieldwork educators (clinical instructors), and students to provide learning experiences that develop the student's clinical competence.

The FWC is responsible for the following:

1. Act as coordinator of the clinical component of the program
2. Maintain up-to-date affiliation agreements with all clinical sites by reviewing agreements on an annual basis
3. Actively seek potential clinical sites and determine suitability based on program and ACOTE guidelines for clinical facilities
4. Maintain open lines of communication and interaction with clinical coordinators and clinical instructors
5. Coordinate and schedule individual clinical experiences for the students and communicate this information to the clinics
6. Familiarize clinical instructors and student with the Fieldwork Performance Evaluation

7. Perform on-site or telephone visits regularly for each student during each clinical affiliation to assess progression and address any concerns of the student and/or the clinical instructor
8. Organize and/or arrange in-services and/or credentialing opportunities for clinical instructors
9. Develop problem-solving strategies as necessary to include:
 - a. Early identification of a problem
 - b. Exploration of possible solutions

Responsibilities of Level II Fieldwork Clinical Instructors

One occupational therapist or occupational therapy assistant at each facility is responsible for coordinating the learning experiences of students assigned to the facility.

In order to serve as a Fieldwork Educator for Level II fieldwork students, the following requirements must be met:

- Occupational therapists must hold at least a baccalaureate degree from an accredited program of Occupational Therapy, hold a current and active Texas license, and have a minimum of one year clinical experience
- Occupational therapy assistants must hold at least an Associate of Applied Science degree from an accredited program for Occupational Therapy Assistant, hold a current and active Texas license, have a minimum of one year clinical experience, and be practicing under the supervision of an occupational therapist as required by law

Fieldwork educators are responsible for the following:

1. Become familiar with the student assessment tool utilized in the clinical setting
2. Provide proper supervision for the student
3. Perform on-going assessment of student performance, competency, and safety in clinical practice and arrange periodic conferences with student to provide feedback on how he/she is performing
4. Encourage the student to evaluate his/her own performance
5. Provide a written assessment of student performance to the OTA faculty completing the appropriate forms
6. Develop problem-solving strategies as necessary including:
 - a. Early identification of and communication of any problems with student performance
 - b. Determine effective solution(s) to problems
 - c. Determine the need for additional information or assistance from the AFWC to solve problems
 - d. Overall determination that problem(s) cannot be solved in available time or with available resources

Responsibilities of Student

Each student is responsible for providing input to the OTA faculty and the clinical instructors to help provide learning experiences that will most benefit him/her. Students are responsible for the following:

1. Become familiar with the assessment tool utilized in the clinical setting
2. Provide input to the FWC before clinical affiliation assignments are finalized
3. Actively seek learning opportunities to develop skills and competencies within the clinical setting
4. Provide self-assessment of his/her performance including strengths and areas that need improvement
5. Identify problems early and communicate the problem to clinical instructors and/or FWC
6. Complete a clinical evaluation form at the end of each affiliation

Students are expected to display initiative in treating patients, assisting therapists with treatments, cleaning patient treatment areas, seeking information from therapists and/or available textbooks and discussing the affiliation with the clinical instructor.

Note: A Student Is Required To Have Passed All Prior OTA Coursework In Order To Qualify For Placement On Clinical Affiliation.

Critical Safety Skills

Demonstrating mastery of specific *critical safety skills* during clinical rotations is necessary in order to pass each clinical affiliation. Competency with *critical safety skills* indicates that a student carries out intervention per the plan of care in a manner that minimizes risk to the patient, self and others. Examples of essential critical safety skills include but are not limited to:

- Ability to follow and appropriately carry out the Plan of Care established by the OT.
- Safe implementation of the Plan of Care based upon patient diagnosis, status, and response to intervention without placing the patient in jeopardy of harm or injury.
- Demonstration of knowledge regarding contraindication and precautions for specific patient diagnosis relative to the occupational therapy interventions within the Plan of Care (i.e. following hip precautions when implementing interventions for a patient after a total hip replacement; etc.).
- Ability to correctly identify physiological measures (BP, HR, blood glucose levels, etc.) outside the parameters that allow for safe therapeutic intervention and provide proper response and notification of the OT/MD/nurse.
- Ensures safety of self and others by using proper hand washing technique, following standard precautions and don/doff personal protective equipment without contaminating materials, patient, or self to prevent spread of infection.
- Uses acceptable techniques for safe handling of patients with proper body mechanics, guarding, and level of assistance and employs standard safety precautions such as: locking a wheelchair prior to transferring a patient, appropriate use of a gait belt with transfers, washing hands prior to and after each patient contact, recognizing environmental hazards of safe mobility, transfers, or other therapeutic intervention.

- Establishes and maintains a safe working environment (i.e. monitoring of lines and tubes and other medical equipment, checks occupational therapy equipment and assistive devices for maintenance and/or disrepair, eliminates work place hazards).
- Requests assistance when necessary (i.e. from the fieldwork educator, utilizes and monitors support personnel).
- Ability to recognize patient responses during therapeutic intervention that may indicate a life threatening condition (shortness of breath, chest pain, sudden dizziness, sudden dysarthria, change in mental status, etc.) and provide proper response and notification to OT/MD/nurse.
- Demonstrates knowledge of facility safety policies and procedures.

The fieldwork educator will continually assess the student's competency in safety and will notify the AFWC if there are any issues or concerns regarding a student's capability of practicing in a safe manner. If safety concerns are not resolved in an acceptable timeframe, the student will be removed from the clinical site and not allowed to progress in the program.

Clinical Regulations and Guidelines

BLS Certification

Students must have documentation of current American Heart Association Healthcare Provider Basic Life Support certification (infant, child, and adult) on file with the FWC and the Program Director prior to beginning the clinical phase of the program. The BLS certification MUST be current throughout the entire length of the Program. Students with an expired certification will not be allowed to treat patients and will be removed from the clinical affiliation until re-certification is obtained. The student is responsible for making up all time missed in the clinical. At minimum, this may delay the student's graduation; at maximum the student may not be allowed to progress in the program.

Immunizations

Students must have documentation of current immunizations and/or titers demonstrating immunity. All students must complete the Hepatitis B series. Immunizations and/or titers are at the student's expense. Failure to comply (and keep current) may result in dismissal from the Program.

Background Checks

Each student must complete a background check prior to program entry (at the student's expense) and again prior to beginning the second year of the Program (at the Program's expense). An additional criminal history check is required prior to completing lab experiences in the McLennan Child Development Center. Additional criminal history checks are required by some facilities prior to clinical placement. A failed background check may result in dismissal from the Program.

Drug Screens

Drug screens are required prior to beginning both the first year (at the student's expense) and the second year of the Program (at the Program's expense). Students may also be tested for cause. A failed drug screen will result in dismissal from the Program.

Clinical Assignments

Assignments for each affiliation will be made approximately one month prior to that affiliation. The student must contact the facility prior to the beginning of the affiliation to make sure they are prepared for the first day of clinical. The OTA program will not grant assurances that students will be placed in specific sites. Transportation arrangements, lodging, required attire, and other costs are the student's responsibility.

Student placements are reserved months in advance and take place in facilities that have a written and signed affiliation agreement in place. The Fieldwork Coordinator assigns all eligible students to specific facilities for each clinical affiliation. It is very difficult to find alternative student placements once assignments have been made. Because of the difficulty and lead-time necessary for scheduling fieldwork placements, the program cannot assume liability for timely rescheduling of fieldwork placements canceled by the student or the fieldwork site. However, the program recognizes and accepts its ethical obligation in those situations where the facility or program has canceled a scheduled placement, or when extenuating circumstances have precluded the student's participation in the experience. The OTA Program Director shall determine whether or not circumstances can be viewed as extenuating for purposes of clinical rescheduling. ***Students who choose not to take the assigned fieldwork site will be asked to withdraw from the program.***

Students ***will not*** attempt to contact clinical facilities to discuss placement opportunities or attempt to change placements with other students once an assignment has been given. Clinical agreements with facilities stipulate that program faculty must initiate contact with fieldwork sites. If a student is familiar with a facility that is not on the program list, he/she should provide the Fieldwork Coordinator with the pertinent information and request that contact be initiated. Fieldwork sites must meet the OTA Program standards and be willing to establish a legal educational agreement with McLennan.

Any student who is unable to perform expected duties during the clinical affiliation, due to physical condition or other reason, will report this to the FWC prior to reporting to the clinical site, or during the clinical affiliation if issues arise at that time. The FWC and the Program Director will discuss the issue(s) with the student and determine whether the student may continue with the affiliation or whether the student will need to schedule the clinical time for a later date contingent upon resolution of the issue(s). If a student is unable to participate at the scheduled time of an affiliation, he/she will be assigned to another affiliation site at the time an availability arises at the discretion of the FWC.

Clinical Placement Policy

Placement is intended to expose the student to as many areas of occupational therapy practice as possible in order to facilitate the development of basic skills needed for an entry-level, licensed OTA. Clinical assignments for each student will include psychosocial, pediatric, and physical disability clients. ***Due to the difficulty of placement and reduced number of clinical sites in the Waco area, the student***

will be required to travel for at least one or more of the clinical affiliations. Travel is defined as greater than one (1) hour from the immediate Waco area. This rule is in place to insure that all students are able to be placed at a clinical site and that all students are able to complete the scheduled rotations in a timely manner.

The clinical schedule is determined by the facility in collaboration with the Fieldwork Coordinator. Students should be prepared to work the same schedule as their clinical instructor including weekends and holidays. **Students may not rearrange their schedules without prior consent of their clinical instructor and the Fieldwork Coordinator.**

Students will not be assigned to facilities where they are presently employed, or have entered into an agreement of employment, unless the placement is in a different department with a different supervisor. Students are given an opportunity to provide input about placement before the assignments are finalized; however, the final decision is made by the FWC.

No portion of Level I fieldwork is substituted for any part of the Level II fieldwork requirements. Students are required to complete two Level II fieldwork experiences (OTHA 2266 and OTHA 2267). Each of these experiences requires a completion of 8 weeks, full-time (or 16 weeks part-time).

Level II fieldwork can be completed in a minimum of one setting if it is reflective of more than one practice area (such as acute care, skilled nursing, and outpatient) in which the student may participate. Level II fieldwork will be completed in a maximum of three different settings. The majority of students will complete Level II fieldwork in two settings.

Clinical Attendance

Due to the significant nature of clinical time for the student, all clinical hours missed due to absence must be made up at a time convenient to the clinic and agreed upon by the clinical instructor, fieldwork coordinator, and the student. More than two (2) absences may be taken as evidence that the student does not intend to participate sufficiently to assure likelihood of success. With two or more absences, the student will be required to conference with the FWC. ***Anytime a student must be absent from the clinical site, he/she is required to notify the facility and the FWC.*** In general, the student is responsible for making up all time missed in the clinical. At minimum this may delay the student's graduation; at maximum the student may not be allowed to progress in the program due to absenteeism.

Patient Care

Students are required to meet the workforce standard of providing care to any and all patients assigned to their care by the clinical instructor.

Clinical Dress Policy

Students are required to wear a photo ID nametag that identifies the individual as a McLennan student OTA. Some facilities may require photo IDs provided by the facility. The nametag should be worn at all times (upper body on the left; clearly visible) while the student is on clinical assignment but may not be worn at any time other than assigned clinical affiliations.

Students should dress in the OTA Program scrubs unless otherwise directed by the facility. Shoes must be a solid color, leather athletic shoe, and socks or hose must be worn. Long hair must be pulled back from the face, and jewelry should be minimal. Blue jeans, shorts, t-shirts, sandals, V-neck blouses, ruffles, loud colors, etc. are unacceptable attire. Some facilities may require a lab coat, which the student will be required to purchase. Students are required to contact the facility prior to his/her affiliation for dress/uniform requirements. Body piercings (other than stud earrings; maximum of two each ear) must be removed and tattoos must be covered during the time the student is at the clinic site. The clinical instructor has the authority to deny clinical attendance for a student whose apparel is considered inappropriate.

Cell Phone Policy

Cell phones or other personal communication devices must be turned off and put away during clinical hours. They may be used only during designated breaks as allowed by the facility.

Schedule of Student Affiliations

Students begin their clinical training during their first summer semester in the OTA program. The schedule for each affiliation is as follows but is subject to change:

- First Summer Session - 8 hours/week for 10 weeks
- Second Fall Semester – 6 hours/week for 16 weeks
- Second Spring Semester – 40 hours/ week for 8 weeks
- Second Summer Semester- 32 hours/week for 10 weeks

Liability Insurance

McLennan Community College provides a limited student liability insurance during clinical affiliations. The coverage for students is effective only during scheduled clinical time. The student is not covered for employment outside of scheduled clinical time.

Accidental Injury and/or Health Coverage

Neither the clinical facility nor the College assumes any responsibility for an injury occurring during clinical hours. The student must carry private health insurance coverage and is required to report any personal injury to the clinical instructor immediately.

Evaluation of Student Performance during Clinical Affiliations

Level I fieldwork experiences are evaluated using the AOTA Level I Competency Evaluation for OT and OTA Students plus additional assignments required by the course. This evaluation tool represents an objective assessment of the student's skills as performed at the fieldwork site. The evaluation is completed by the fieldwork educator which may or may not be an occupational therapy practitioner. Qualified fieldwork educators may include, but are not limited to, social workers, nurses, physical therapists, psychologists, recreational therapists, teachers, and physician assistants per ACOTE.

The evaluation/assessment tool utilized by the McLennan Community College OTA program for Level II Fieldwork is the Fieldwork Performance Evaluation by AOTA and is completed by the OT Practitioner serving as the Fieldwork Educator.

1. Defines for students and fieldwork educators the skills that all students are expected to master prior to graduation
2. Measures progress in the student's ability to perform
3. Provides a uniform mechanism for rating students from different schools at clinical affiliation sites
4. Allows students to assess their own performance and to compare their self-assessment with those of their clinical instructors
5. At mid-term, provides a summary of the individual student's current strengths and weaknesses, thus helping the student and clinical instructor plan any needed additional experiences
6. Provides a mechanism to identify strengths and weaknesses in the academic portion of the curriculum

Clinical Grading for Level II Fieldwork

Clinical grade compilation is based on skill attainment utilizing the FWPE. McLennan faculty retain the final responsibility for assigning the final clinical grade.

Level II fieldwork courses are graded on a credit/no credit basis. To successfully pass Level II FW experiences, students must:

- 1) Meet passing criteria on the AOTA Fieldwork Performance Evaluation
 - a) Obtain a minimum final score of 70 points **and**
 - b) Obtain a rating of 3 (or above) for *all* Safety and Ethics items at final
 - i) Failure to obtain a rating of 3 (or above) in this area will result in failure of the affiliation
- 2) Meet all course objectives as outlined in the course syllabus,
- 3) Satisfactorily complete all course assignments, and**
- 4) Adhere to all policies and procedures as outlined in the student handbook.

If a student receives an incomplete or no credit for a clinical course, and he/she wishes to return to the program and is eligible to return to the program, the student, along with the other requirements for a reinstatement request (see section in handbook on reinstatement), will be required to pass a skills assessment exam, both written and practical, at the level of 75% or greater before returning to the clinical setting. This exam will be given at a time designated by the program director.

Clinical Forms

The OTA program utilizes several forms throughout the clinical education process. The purpose and use of each form are outlined below.

Student Personal Data Sheet

The purpose of this form is to provide the initial contact between the student and the clinical site. The students are instructed to complete the form and send it to the clinic 3-4 weeks prior to the beginning of the affiliation. The form includes a summary of previous clinical experiences, the student's expectations for this affiliation, and a self-assessment of strengths and weaknesses. A photograph may be attached to the upper right hand corner.

Clinical Orientation Form

The purpose of this form is to provide the clinical instructor with a checklist or outline of items that should be addressed on the first day of the student's affiliation. This form was developed only as a guideline, and it is not necessary for the student to return this form to the FWC at the end of the affiliation.

Student Evaluation of Clinical Educational Experiences

This form is to be completed by the student at the end of his/her affiliation to assess the overall clinical experience. This form should be completed prior to the final evaluation, and should be discussed with the clinical instructor during the final evaluation.

Assessment of OTA Program Form

This form was developed to allow fieldwork educators more input into the Occupational Therapy Assistant curriculum development process.

Professional Conduct in the Clinical Setting

The conduct of the OTA student should be such that the patient's confidence is inspired. Only a consistently professional attitude can accomplish this. One must endeavor to treat patients with kindness and courtesy and insure preservation of the patient's privacy. The following list is a minimal conduct guideline for professional conduct in the clinic setting.

1. Always introduce yourself; wear a nametag at all times (placed visibly on the upper body)
2. Knock before entering any room
3. Do not congregate in semi-public areas, such as patient reception areas. Patients awaiting therapy services do not understand the presence of idle (apparent) therapists and assistants.

4. Never discuss a patient's history, or information in patient charts/reports (unless instructed to do so by the supervising OT/OTA) with a patient or the patient's family/friends. Patient's charts and all other patient records should be kept out of reach of unauthorized persons, including patients.
5. Do not discuss matters pertaining to work in elevators, corridors, or any other public areas.
6. No conversation should take place within a patient's hearing which is not DIRECTLY related to that patient's care and INTENDED for the patient to hear.
7. Smoking, including electronic cigarettes, eating or drinking are prohibited except in designated areas.
8. Gratuities of any kind are prohibited.
9. Gum chewing is prohibited.
10. Personal involvement between a student and a patient being treated by that student is prohibited including social media contact.
11. Personal involvement with fellow staff members should be limited to "off-duty" hours and should be conducted with discretion. Professionalism in the clinic must be maintained at all times.
12. Loaning of personal items to patients and/or running errands for patients is not recommended.
13. Be prepared to accept constructive feedback gracefully.
14. In the clinic, the clinical instructor should be kept informed of your activities and location at all times.

Social Media Policy

It is highly recommended that students refrain from posting information about patients or clinical activities on any social media such as Facebook, Twitter, etc... Sharing such information could be considered a violation of HIPAA resulting in dismissal from the program and possibly a fine and/or jail time.

Subject to Change Policy

The curriculum/degree plan, policies, regulations, procedures, and fees associated with this program are subject to change without prior notice, if necessary, to keep College and program policies in compliance with State and Federal laws and/or with rules related to the program's accrediting agency.

The College and the program reserve the right to change curricula, rules, fees, and other requirements, of whatever kind, affecting students in any way. The provisions of this document do not constitute a contract, express or implied, between any applicant, student, faculty or staff member and McLennan Community College or this program.

**OCCUPATIONAL THERAPY ASSISTANT PROGRAM
CLINICAL ORIENTATION FORM**

This form is intended to facilitate the student's first day of each affiliation. It is recommended that the following items be addressed for orientation to the facility.

1. Introduction to Clinical Fieldwork Coordinator
2. Introduction to Fieldwork Site Coordinator, if applicable
2. Tour of department and facility
3. Introduction to staff members
4. Description of a "typical" day at the facility including types of patients
5. Review of department procedures such as:
 - a. Transporting patients
 - b. Accessing/reviewing the medical record
 - c. Documentation
 - d. Specific safety items such as fire, patient emergency, infection prevention, fall prevention, etc.
6. Review of facility's objectives for clinical education
7. Review of student's goals and objectives for this affiliation
8. Instructions regarding expectations for:
 - a. Arrival time
 - b. Departure time
 - c. Lunch and break times
 - d. Student's use of free time
9. Discussion of any assignments/expectations for the affiliation such as a project or presentation

For Level I Fieldwork, the student is primarily an observer of patient/client care although is expected to begin to interact verbally with clients and practitioners. The Level I student is not expected to perform treatments and skills or to document care unless mutually agreed upon by student and instructor.

For Level II Fieldwork, the student should be an observer only as long as the fieldwork educator deems necessary. The student should be given the opportunity to perform various patient treatments and skills. Discussion and demonstration of interventions with which the student is unfamiliar should be ongoing throughout the affiliation. Students are expected to display initiative in treating patients and in seeking information from available sources as well as discussing the affiliation with the fieldwork educator.

OCCUPATIONAL THERAPY PROCESS

I. EVALUATION

List assessment tools used	Observed	Performed

II. INTERVENTION

List major therapeutic interventions frequently used and indicate whether each was provided as individual, group, or co-treatment, or as a consultation. List other professionals involved.

Types of Intervention	Individual	Group	Co-Tx	Consultation
Occupations: client-directed life activities that match/support/address identified goals				
Activities: meaningful to client, address performance skills and patterns to facilitate occupational engagement				
Preparatory methods: modalities, devices and techniques. These are provided to the client, no active engagement				
Preparatory tasks: actions that target specific client factors or performance skills. Requires client engagement				

Education: provides knowledge & enhances understanding about occupation, health and well-being to client to develop helpful behaviors, habits, routines				
Training: develops concrete skills for specific goal attainment. Targets client performance				
Advocacy: promotes occupational justice and empowers clients				

Identify theory(ies) that guided intervention: _____

III. OUTCOMES

Identify the types of outcomes measured as a result of OT intervention provided:

Type of outcome	yes	no	Provide example
Occupational Performance			
Prevention			
Health & Wellness			
Quality of Life			
Participation			
Role competence			
Well-being			
Occupational Justice

Health Professions' Division Policies & Procedures

Subject: Division Criminal Background Check

Effective date:

Responsibility: Program Directors, Clinical Coordinators

Review date: 7/26/21

Health Professions Division Criminal Background Check

Introduction

The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees; this includes students doing clinical rotations in the facility. Competency extends beyond technical skills to an individual's criminal history.

Purpose:

This policy is designed to protect the community of health care consumers from services provided by students who have documented illegal and unethical behaviors. These requirements also allow the Health Professions division to be in compliance with clinical affiliation agreements.

In compliance with HB 1508, students are advised that a criminal background could prevent licensure by the State of Texas. Students are further advised to consult with the program director or faculty member for guidance. Students also have the right to request a criminal history evaluation letter from the applicable licensing agency.

Policy:

Successful completion of a criminal background check is required for admission and continuation in all Health Professions Programs. Students will be given specific directions from the program about how to obtain the background check.

Background checks may be honored for the duration of the student's enrollment in the clinical program if the participating student has not had a break in the enrollment of a Health Professions class. A break in enrollment is defined as nonattendance of one full semester or more. The above information must be verifiable through the college/school and an attestation will be provided to the clinical agency. Individual programs may require more frequent background checks to meet clinical requirements.

Nursing Programs:

All students admitted, re-admitted, or transferred into the Associate Degree (ADN) or Vocational Nursing (VN) program, must have a cleared criminal background check from the Texas Board of Nursing by 5:00 pm on the Friday preceding the first day of class. Students are required to pay for the costs. Prior to admission, students will be instructed of the procedure to follow for obtaining a

criminal background check. The fingerprint process will initiate a criminal background check with results being sent to the Texas Board of Nursing and will be kept on file at the Texas Board of Nursing for future licensure. The blue clearance background card or the letter stating the person is cleared that is received from the Texas Board of Nursing must be submitted to the ADN or VN admissions office by 5:00pm on the Friday preceding the first day of class. The information received from the criminal background check will determine eligibility for full acceptance status into the nursing program. All students must have clearance of a criminal background check from the Texas Board of Nursing before full admission status is granted. Students must be aware that results of the criminal background check history may bar them from full acceptance status into the nursing program (see examples on www.bon.state.tx.us and www.bon.state.tx.us/disciplinaryaction/discp-guide.html). Students must report any and all arrests or convictions while enrolled in the program. If a student exits the program for any one long semester before reentering, the criminal background check process and drug screening must be repeated. Students will not be allowed to reenter if they do not have a cleared criminal background check and negative drug screen within the designated timeframe.

Any student admitted on the contingency of a cleared background check and who is not cleared by the Texas Board of Nursing by 5:00pm on the Friday preceding the first day of class will have guaranteed admission only to the next admission class if the following criteria are met:

- 1) another application (no fee required) to the nursing program along with a letter of intent is submitted by the admission deadline date to join the next nursing class
- 2) clearance is obtained by the first day of the next nursing class in which student is applying for
- 3) all other admission criteria are met, including a negative drug screen within 30 days of the first day of the class.

Disqualifying Histories

The following histories will disqualify an individual from consideration for admission because the student would not be eligible for clinical placement: (this includes, but is not limited to):

- Murder
- Capital murder
- Manslaughter
- Criminally negligent homicide
- Hate crimes
- Unlawful restraint
- Kidnapping
- Aggravated kidnapping
- Continuous sexual abuse of a young child or children
- Indecent exposure
- Indecency with a child
- Improper relationship between educator and student

- Improper photography or visual recording
- Sexual assault
- Aggravated assault
- Aggravated sexual assault
- Intentional, knowing, or reckless injury to child, elderly individual, or disabled individual
- Intentional, knowing, or reckless abandonment or endangerment of child
- Deadly conduct
- Terroristic threat
- Aiding suicide
- Prohibited sexual conduct (incest)
- Agreement to abduct child from custody
- Violation of certain order in family violence case
- Violation of protective order preventing hate crime
- Sale or purchase of child
- Arson
- Robbery
- Aggravated robbery
- Burglary
- Online solicitation of minor
- Money laundering
- Fraud
- Identity theft
- Cruelty to animals
- Compelling prostitution
- Causing sexual performance by a child
- Possession or promotion of child pornography
- Any other offense for which registration as a sex offender is required
- Moral turpitude

The following histories will disqualify an individual from consideration for admission if the conviction occurred within the last five (5) full calendar years*:

- Assault punishable as a Class A misdemeanor or felony.
- Drug related issues
- Theft
- Misapplication of fiduciary property or property of financial institution punishable of Class A misdemeanor or felony
- Securing execution of a document by deception punishable as a Class A misdemeanor or felony (document tampering)
- False identification as a peace officer
- Disorderly conduct

*Any terms of probation must be complete prior to admission to a health professions program.

The following histories will disqualify an individual from consideration for admission if the conviction occurred within the last 12 months*:

- Driving while intoxicated (DWI or DUI)
- Theft by check
- Public intoxication
- Minor in possession

*Any terms of probation must be complete prior to admission to a health professions program.

For students accepted to a clinical program with access to a licensing/registry body review process:

If an individual does not meet one or more of the aforementioned standards, she/he may pursue a declaratory order process with her/his licensing/registry body. If the licensing/registry body approves the individual to take the licensing/credentialing exam, the individual may be able participate in the clinical rotation, depending on the affiliation agreement.

Disclaimers

- **Successful completion of a criminal background check for a Health Professions Program does not ensure eligibility for licensure or future employment.**
- **Individual Health Professions programs may require more frequent or multiple background checks in order to meet clinical requirements.**
- **Clinical agencies can establish more stringent standards, if they so desire, to meet regulatory requirements for their facility.**
- **Clinical agencies can conduct additional background checks at their discretion.**
- **If a student is found to be ineligible for clinical placement any time during the program, the student is unable to meet clinical learning objectives and will be withdrawn pending resolution of the situation.**

Costs for Background Checks

All costs for criminal background checks are the responsibility of the student entering or enrolled in a Health Professions program at McLennan Community College. Students will use the testing agency designated by the College. The student will be responsible for scheduling his or her own time at the agency and will be required to follow all procedures required by that agency for accurate testing.

Screening Requirements

Successful completion of a criminal background check is required for admission and continuation in all Health Professions programs at McLennan Community College. Admission to a Health Professions program is considered conditional until the results of the criminal background check are approved by the program director. Students will be given specific instructions from the program about obtaining the background check.

Drug screens and criminal background checks must also be completed within the thirty (30) days prior to a student's initial entry into the clinical assignment portion of his or her respective health science program. For some programs, clinical assignments begin immediately when classes begin for the semester. For other programs, clinical assignments are scheduled for later in the program. Verification of a negative drug screen and a satisfactory criminal background check must be received prior to the first clinical day in the student's program. The results may be acceptable for all clinical rotations during the student's enrollment in the program unless there is a break during that student's enrollment. A break in enrollment (leaving the program) is defined as nonattendance for a portion of a semester or more. Attendance must be verifiable through the College.

Students who are not disqualified should not assume that their criminal background check shows no criminal activity. The student should report any convictions to the appropriate licensing or registry boards at least three months prior to the examination date.

Each student must report within three business days to the Program Director and the Dean of Health Professions any arrests and/or criminal charges or convictions filed subsequent to the completion of the criminal background check. Failure to report will make the student subject to administrative withdrawal from the program.

Any student who changes programs or stays out of a Health Professions program at McLennan Community College for 12 months will be required to submit a new criminal background check and drug screen upon re-entry to the Health Professions Division.

The Health Professions division will provide an attestation of the background check and drug screen to clinical affiliates prior to each rotation. Clinical facilities may submit a written request for additional information regarding background checks and drug screens for students and faculty participating in clinical rotations.

Disclosure

Students are required to disclose any prior criminal record by accurately answering the following question on the application for admission to the Health Professions program:

***Have you ever been convicted of a crime other than a minor traffic violation? (Circle one) YES
NO***

Please note that **Driving Under the Influence (DUI)** and **Driving Under Suspension (DUS)** are NOT considered minor traffic violations. Failure to disclose may result in withdrawal from the program of study.

Records of Criminal Background Checks

Criminal background checks and drug screens are reviewed securely through the provider's website. Any printed records of criminal background checks will be kept in a secured file in the office of the program director of that student's Health Professions program. It will be accessible only to the program director, the program clinical coordinator, the Dean of Health Professions, any of the College Vice Presidents, the President of the College, the college attorneys, and any college judicial panel which may be created to review a student's case.

Health Professions' Division Clinical Drug Screening

Purpose: The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees; this includes students participating in clinical rotations in the facility. Competency extends beyond technical skills to include screening for drug use.

Policy:

Drug screens must be completed within the thirty (30) days prior to a student's initial entry into the clinical assignment portion of their respective Health Professions program. For some programs, clinical assignments begin immediately when classes begin for the semester. For other programs, clinical assignments are scheduled for later in the program. Verification of a negative drug screen must be received prior to the first clinical day in the student's program. The results will be acceptable for all clinical rotations during the student's enrollment in the program unless there is a break during that student's enrollment. A break in enrollment (leaving the program) is defined as nonattendance for a portion of a semester or more. Attendance must be verifiable through the College.

Individual programs may require more frequent screening to meet clinical affiliation requirements.

The Substance Abuse Panel 12 (SAP 12) tests for:

- Amphetamines
- Barbiturate
- Benzodiazepines
- Cannabinoids
- Cocaine
- MDMA [Urine Testing]
- Methadone
- Methaqualone
- Opiates
- Oxycodone
- Phencyclidine
- Propoxyphene

Costs for Drug Screening

Cost of the drug screen will be the responsibility for any students entering a Health Professions Program at McLennan Community College. Students will use the testing agency designated by the College. The student will be responsible for scheduling his or her own testing time at the agency and will be required to follow all procedures required by that agency for accurate testing. The student will be responsible for ensuring that the results of all testing be sent by the agency directly to the director of the Health Professions program in which they are admitted or enrolled.

Disqualifications from Clinical Affiliation Participation

A student will not be allowed to participate in clinical affiliations if he or she is found to have a positive drug screen on the Substance Abuse Panel 12 (SAP 12). If the student feels that the positive result is in error, he or she will be able to request a Medical Review through the testing agency and pay an additional fee for that service. The testing agency will have its Medical Review Officer assess the screen and follow through with an appropriate investigation. The student will be responsible for the cost of the medical review. A student will not be allowed to participate in clinical activity (removed from program) in any MCC Health Professions program for twelve (12) months following a verified positive drug screen. The student will then be required to undergo an additional drug screen which must be negative, prior to a clinical assignment, per the stated policy above.

"For Cause" Screening (Zero Tolerance)

At any time during **classroom, lab, or clinical** portions of a health science program, the student is suspected of being under the influence of drugs or alcohol, the program faculty or clinical facility personnel may require the student to be tested for drugs and/or alcohol. If the clinical facility has the capability of doing the screen on site, the facility may use that service. The student is responsible for any cost of the screening. If a student must be dismissed from the clinical facility during a clinical assignment to undergo testing and/or for inappropriate behavior due to possible drug or alcohol influence, the student will be responsible for providing contact information for someone to provide transportation for the student to be taken away from the site and, as necessary, to the college-designated testing agency. Failure by the student to comply with these policies is grounds for dismissal from the Health Professions program in which the student is enrolled. A positive drug or alcohol test is also grounds for dismissal from the program in which the student is enrolled.

CBD Statement

Using CBD products with 0.3 percent or higher levels of THC may cause a positive result for marijuana metabolites on the clinical drug screen. Students who test positive for marijuana metabolites are not eligible for clinical placement and may not progress in the program.

Impaired Student Policy

According to the Health Professions Division policy, *students attending clinical while under the influence of any substance affecting their ability to respond in a reasonable and acceptable manner* is considered inappropriate behavior, unsafe practice and is grounds for removal from the clinical environment.

Faculty who suspect any student of attending clinical while under the influence of any substance affecting the student's ability should abide by the following procedure:

1. If the clinical environment is on McLennan Community College campus:
 - a. Faculty or designated professional is required to stay with student throughout the following process.
 - b. If student needs medical evaluation, student will be referred to the Emergency Department of a local hospital and family/friend will be notified of their visit to the emergency room and asked to pick them up following exam. Student will be responsible for charges incurred.
 - c. Have another professional witness student behavior.
 - d. Student should not be allowed to void prior to urine specimen collection.
 - e. Student may not return to the clinical experience for the remainder of the scheduled clinical day.
 - f. Notify Campus Police at 8911 or (254) 299-8911 of the current situation.
 - g. Notify A&D Testing at (254)399-8378 to provide an on-site screening.
 - i. A&D Testing will perform a Rapid Screen and Alcohol Breath Analyzer
 - ii. If the Rapid Screen is positive, A&D Testing will then confirm the results with a lab 12 panel drug screen.
 - iii. A&D Testing will send McLennan Allied Health Division an invoice for the services performed.
 - h. For positive results
 - i. Student will be advised to contact the Clinical Coordinator and Program Director, by next business day, to schedule an appointment for review of occurrence.
 - ii. Student will call family/friend to pick them up immediately from the clinical environment.

Note: Student will be advised that they may not drive themselves.
 - iii. Clinical hours missed will count as an absence.
 - iv. Students will not be allowed to participate in clinical affiliations for 12 months following a verified positive drug screen. Student must follow readmission procedures of program. Students are not guaranteed re- entry into program.
 - i. For negative results
 - i. Student will call family/friend to pick them up immediately from the clinical environment.

Note: Student will not be advised that they can drive themselves.
 - ii. Clinical hours missed will count as an absence.

- iii. Student will be counseled by clinical coordinator and program director regarding impaired behavior and subsequent occurrences.
- j. Notify Clinical Coordinator of occurrence.
- 2. If the clinical environment is not on McLennan Community College campus
 - a. Faculty or designated professional is required to stay with student throughout the following process.
 - b. If student needs medical evaluation, student will be referred to the Emergency Department and family/friend will be notified of their visit to the emergency room and asked to pick them up following exam. Student will be responsible for charges incurred.
 - c. Have another professional witness student behavior.
 - d. Student should not be allowed to void prior to specimen collection.
 - e. Notify the facility's security department regarding the student.
 - f. Notify A&D Testing at (254)399-8378 to provide an on-site screening.
 - i. A&D Testing will perform a Rapid Screen and Alcohol Breath Analyzer
 - ii. If the Rapid Screen is positive, A&D Testing will then confirm the results with lab 12 panel drug screen.
 - iii. A&D Testing will send McLennan Allied Health Division an invoice for the services performed.
 - g. For positive results
 - i. Student will be advised to contact Clinical Coordinator and Program Director, by next business day, to schedule an appointment for review of occurrence.
 - ii. Student will call family/friend to pick them up immediately from the clinical environment.

Note: Student will not be advised that they can drive themselves.
 - iii. Clinical hours missed will count as an absence.
 - iv. Students will not be allowed to participate in clinical affiliations for 12 months following a verified positive drug screen. Student must follow readmission procedures of program. Students are not guaranteed re- entry into program.
 - h. For negative results
 - i. Student will call family/friend to pick them up immediately from the clinical environment.

Note: Student will be advised that they may not drive themselves.
 - ii. Clinical hours missed will count as an absence.
 - iii. Student will be counseled by clinical coordinator and program director regarding impaired behavior and subsequent occurrences.
 - i. Notify Clinical Coordinator of occurrence.

Complaints Outside Due Process

Purpose: To address complaints that fall outside of due process, such as those submitted by clinical personnel, patients, or other stakeholders.

Policy: The program director of each Health Professions program will be responsible for handling complaints that fall outside of due process. In the event that the program director is not available or if it is inappropriate for the program director to address the complaint (e.g. the complaint involves the program director), the complaint will be forwarded to the Dean of Health Professions or the Vice President of Instruction.

- Complaints should be submitted in writing to the program director.
- The program director should respond to the complainant within 10 business days of receiving the complaint. When appropriate, the program director may consult with other offices and personnel to address the complaint.
- If the program director is unable to resolve the complaint, the person(s) may contact the Dean of Health Professions or Vice President of Instruction.
- Complaints will be handled in an expeditious manner.
- Complaints may be filed without fear of retribution or retaliation.
- Documentation regarding the complaint, any actions taken, and resolution will be maintained securely for five (5) years.

Student Acknowledgement Forms

General

MCLENNAN COMMUNITY COLLEGE OCCUPATIONAL THERAPY ASSISTANT PROGRAM

READ THE FOLLOWING STATEMENTS BEFORE SIGNING:

As a student in the OTA program, I aware that I:

- May be photographed or filmed as a part of class, lab, or clinical activities.
- Will be expected to participate as a “patient” during class or lab activities and/or lab exams. Precautions and contraindications for the procedure will be discussed prior to such participation. Any student has the right to decline participating as a patient with prior notification to the instructor, however, this may result in an absence.
- Will be responsible for uniform, travel, meals and other expenses related to clinical courses.
- Will be working with patients during clinical courses and may be exposed to illness, blood and other bodily fluids.
- Will be responsible for all financial expenses incurred for medical care received during the program including those resulting from an accident/injury sustained while participating in class, lab, and/or clinicals.
- Will be required to undergo drug screens, criminal background checks, obtain BLS certification and required immunizations at my own expense, in order to participate in clinicalaffiliations.
- Will be required to secure and maintain health insurance and to provide proof of such coverage
- Am expected to communicate with faculty via the College email system

I understand that my successful completion of this program depends on regular and punctual attendance to class and clinicals, maintaining a professional and productive attitude, maintaining infection prevention techniques within the clinical setting, complying with all clinical site policies, OTA/Health Professions policies, HIPAA, OSHA and The Joint Commission standards; maintaining a 75 or higher in each course; passing each lab practical; and completing all skills competencies with a satisfactory or better.

I have received (posted online) the Occupational Therapy Assistant Program Student Handbook, and it has been discussed with me. I agree that I have read and understand the information found in this handbook. I agree to abide by all rules, policies and procedures contained herein and understand that failure to do so may result in program withdrawal. I am also aware that this handbook is intended as a guide and policies and procedures described herein may be changed without notice.

This form must be signed and returned to the OTA Program Director on or before the first day of class.

Student Informed Consent

MCLENNAN COMMUNITY COLLEGE OCCUPATIONAL THERAPY ASSISTANT PROGRAM

During the education process for students in the OTA program, the students will be required to practice occupational therapy techniques on classmates and/or faculty members. It is the nature of the profession that skills be acquired by practicing on healthy individuals before an attempt is made to become skilled with patient populations. Therefore, the following must occur:

1. Each student must wear lab clothing that allows practice on and observation of parts of the body on which techniques will be applied
2. Each student must play the roles of patient, assistant, and grader so that every student has the opportunity to gain the skills necessary to perform safe and effective occupational therapy techniques
3. Each student must touch, observe, and interact with classmates and/or faculty members while playing the above roles
4. Each student must conduct himself/herself in a respectful and considerate manner while touching, observing and interacting with classmates and/or faculty members

I understand that I will be asked to participate in laboratory and classroom activities as described above and understand that participation is required for student learning. Therefore, I willingly agree to participate fully. In addition, I hereby assume all risks in connection with and fully release McLennan Community College, its agencies and/or employees from any injury, damage, embarrassment, or emotional discomfort that may result from participating in the Occupational Therapy Assistant Program.

Lab Guidelines and Safety Policy Agreement

MCLENNAN COMMUNITY COLLEGE OCCUPATIONAL THERAPY ASSISTANT PROGRAM

OTA lab allows students supervised practice time under the direction and supervision of a licensed occupational therapist or occupational therapy assistant. Lab may include regularly scheduled class time, supplemental lab hours, and/or open lab time. The licensed professionals are here to facilitate your learning process, but ultimately the responsibility for learning the skills is yours. Use of the OTA lab at McLennan Community College is a privilege that comes with certain expectations.

Listed in the student handbook are the guidelines and exceptions for using the OTA lab. I agree to follow these guidelines and policies. I understand that failure to adhere to them may result in my inability to participate in and/or attend lab. Students asked to leave lab will receive an absence for that class.

After you have read these guidelines and policies, sign below to indicate your understanding and agreement of compliance.
